I don't need to use a spell checker. Smart people like you can
recognize typos that a spell checker might not be able to
detect....besides my errors might make you read my sentences more
carefully so as to understand the concepts that I am attempting to
explain. Smarter people than me use editors and proof readers to
correct their many mistakes. We don't have that sort of professional
editing in NGs. We thus must be a bit more tolerant of spelling and
typos here and realize that most of the stuff we read here was written
in a tme that was limited by stopping for water, food, sleep or
answering to the XYL. I'd rather spend time writting a long message
than devoting time to spell checking. Concepts are learned by
thinking. Spelling and grammar are learned by rote.

Hams need more license classes.

73,
Bob Wex w2ilp (Ignore Lacking Processing)

Lots of good jokes are lost in translation here because
words that have two different meanings may sound the same
but are often spelled differently.
--w2ilp--

> gives ya some select bandwith *and* bragging rights.
> >
> w3rv

I might be wrong but the above story sounds like BS. This is because
when Mensa proctors IQ tests, you do not get the results until several
weeks later. This is unlike Ham tests where you know that you passed
or failed on the day that you take the tests. Mensa tests are not
given at meetings...even in Philadelphia.

I'm not exactly bragging about my IQ. I'm complaining. I am the first
to admit that it pays to be ignorant and most people don't like wise
guys. How many managers or bosses want to hire somebody who is
smarter than they are? If they need a brilliant guy they hire one who
works for less money in Japan, China or India and can't ever get a
chance to become the boss or replace them. There need be no high IQ
at HQ.

BTW all blondes are not dumb. Some act that way because they are smart actresses. If Marilyn Monroe was stupid she would probably be alive today.

Hams need more license classes.

Exactly. There would be a bureaucracy to define what "faith based" organizations qualify, what services they provide, how the money is spent, etc., etc., etc. More levels of "management", not fewer.

But it might look good on paper, regardless of the services that actually reach the people who need them.

Does anyone remember that one of Clinton's pardons was of a Hassidic character who managed to run a scam with a religious school that never existed. Kind of a Billy Sol Estes with forelocks.

Gary:

I don't disagree with that at all. And among those who "hate" Dubbaya
are a lot of Conservative Republicans, who now feel cheated! The
problem President Bush has is that he began his re-election campaign
the day he took office -- and is trying to gain ground by being seen as
a "moderate." "Moderates" being the flavor-of-the-month in Washington
these days. Unfortunately, Bush is losing this conservative base, who
will probably be more than willing to fall into line behind a true
Conservative, like Steve Forbes or Alan Keyes, in ought four. In the
meantime, I am getting letters on a weekly basis from the Republican
National Committee, whining that I haven't sent in my annual contribution
yet! ROFLMAO!!!

No, I can't. I don't know about such things because I didn't hear it.

However, anyone who did hear it can contact the nearest FCC office and let them know.

We aren't speaking of "around the world," we are speaking in terms of
religions/ous groups in the United States; and I think most North Americans
would consider the above and other religions as "non-traditional."

Dwight, c'mon, for the first 150 years of this country's history our
religions and beliefs were quite restrained and limited by fewer people and
a much more community-based lifestyle. I bet for many of those years the
greater of the population were regular church-goers also. And, I bet the
greater of the population would not hear of having anything other than
Catholic, Baptist, Pentacostal, Episcopalian, Methodist, and whatever other
English borne church might have come over here--certainly *NOT* any other
religions. Not at least without scorn and disdain.

And, who shall pay the administrative costs for these religions and
(possibly) charitable organizations to "distribute our tax dollars"!!!???
Eh?

Keep church and state separate, as it should be--or more of these types of
arguments will burden the attention of the US Congress, the US people, etc.

ABSOLUTELY!!!! A definite RRAP first, and proof that there are always
common bonds to be farmed... :)

BAD, BAD, BAD idea = letting the government have religions and even
"charitable" organizations receive our tax dollars!!! Hrrrmpphhhhhh,

Kim W5TIT

That, right there ^^^^^ is so the crux of the matter, for me anyway. That which you stated is so very, very scarey to me. Really is, and I wish more people would just stop and think long enough to realize it. We don't need religion to control government and we don't need government to control religion--either way.

We've already got way more than enough big-business interest in government that will never go away; let's not add religions/charitable organizations on

top of that!

Cecil:

I would keep the Religious Right happy by assuring them that the
federal government would definitely NOT interfere with the doctrine
or policies of their churches. However, I would not institute "faith-
based" initiatives, which would direct taxpayer dollars at religious
institutions. In order to proactively make points with the religious
right, I'd probably reduce the growth in federal spending on AIDS
research, and use those funds to increase pay and benefits to
military personnel. Any Republican president who did that would
be re-elected in a landslide!

There was no sneer with that, Hans. Phil said that he has problems with government involvement with religious organizations ("it goes back many centuries, even millennia"), without offering any further details whatsoever. What else would you call that other than vague?

First of all, as far as I know, Republicans were not the ones who came up with the phrase "faith based." Clinton used that phrase many months ago when he first suggested this whole thing ("faith based initiatives"). Republicans have since widely adopted the phrase, but I don't think they came up with it. However, you are right that it is intended to lessen the association with religion - something Clinton wanted to downplay at the time.

As for government interference with the internal affairs of these religions, there is no evidence of an intent in that regard. These organizations will have to account for how the money will be spent, and how it actually was spent, but there is nothing that will require these organizations to account for their religious practices or beliefs.

Furthermore, any specific group can back out of the program at any time (or not get involved at all if they're not comfortable with the

stipulations). Therefore, there is no way for the government to interfere with these groups without their willing cooperation.

> Some organizations without fund-raising
> expertise might see this program as
>'found money' and might be influenced
> into some creative accounting practices
> to get their 'fair share' of my tax
> dollars as expenses (to finance their
> religious activities).

Certainly that already exists with some of the many organizations already receiving federal money for assistance programs. I see no reason to believe that this would be any more common with religious groups. Therefore, while this may be an argument to end the programs entirely, or to urge greater accountability, it is not an argument to exclude others from participation.

> Or they might be divinely inspired to
> show doctrinal favortism in distributing
> my tax dollars to their favorite flavor
> of 'needy'.

Again, I'm sure that already exists with some of the many organizations already receiving federal money for assistance programs. So, again, while this may be an argument to end the programs entirely, or to urge greater accountability, it is not an argument to exclude others from participation.

> The whole goofy notion is a dump huck
> idea, and the religious right wing
> authors ought to be ashamed of it.

Again, you're trying to dump this onto Republicans. The current proposals to fund faith based initiatives for community assistance programs were first advocated by the Clinton administration, not the Bush administration.

> and needs to be killed right now.

How so? How does this violate the separation of church and state? Several people have made that claim, but I've yet to see a single word to back that up. Separation of church and state was never designed to exclude religion - it's intent was to exclude government endorsement of a religion. No specific religion is being singled out here. And no legitimate religion is being excluded. Therefore, this does not constitute an endorsement of a religion under the separation of church and state premise.

It is a human standard - found throughout the world. A decent man
who truly cares about his wife would not go around having oral sex
with another women, nor would he lie to his wife about it afterwards.

> Sexual relations can be the cause of

The definition of "sexual relations" remains the same whether you're talking about biology or morality. And I have yet to find a definition that includes the word "pregnancy." Since oral sex involves a sexual organ, oral sex is indeed sex. Therefore, if you do that with another person, you are having sexual relations with that person.

Oh, a question I asked at church when I was about five years old. As I understand it (going way back in my memory on this one), it has to do with the intent of the act - to drink wine as a simple beverage is not a sin, but to drink it to become intoxicated is. However, since other beverages are so widely available, and alcohol so easily leads to intoxication, many churches oppose the consumption of all alcohol (including wine). In other words, it is often a church standard, not a "sin" as defined by the bible (only excessive drink is). Don't ask me why excessive drink is a sin. There are a number of bible passages on the subject, but I certainly don't remember them after all these years.

You know, I simply cannot understand the mentality behind this (improper use of a marine radio). For many boaters, that radio is the only link to weather information, navigation assistance, safety communications with other boaters, and help during an emergency. Why would people risk putting those boaters in potential danger by improperly using a marine radio? I guess this is just another one of those examples of how little people in this society care about others.

24. 12 Commandments of RRAP

Newsgroup: rec.radio.amateur.policy
Date: 2001-08-01 13:50:43 UTC
From: K0HB <K0HB@QWEST.NET>
Message-ID: <9FU97.110$MS3.71252@news.uswest.net>
Source record: 16371

THE 12 COMMANDMENTS OF POSTING ON RRAP

1. Make things up about your opponent : It's important to make your lies sound true. For that "righteous" effect, preface your argument with the word "clearly". Eg. "Clearly, Major Bozo is a no-coder, and a beeper to boot."

2. Be an armchair psychologist : You're a smart person. You've heard of Freud. You took a psychology course in college. Clearly, you're qualified to psychoanalyse your opponent. "Robert Wexelbaum (God Bless You!), by using the word 'disingenous' in his posting, shows he has a bad case of....."

3. Cross-post your flames: Everyone on the net is just waiting for the next literary masterpiece to leave your terminal. From POLICY to DX to CB to BOATANCHORS, they're all holding their breaths until your next flame. Therefore, post everywhere.

4. Conspiracies abound: If everyone disagrees with you, the reason can't *possibly* be that your're wrong. There's obviously a conspiracy against you, and you will be doing the entire net a favor by exposing it.

5. Lawsuit threats: This is the reverse of Rule #4 (sort of like the Yin and Yang of flaming). Threatening a lawsuit is always considered to be in good form. "By saying that I've posted to the wrong group, Robeson has libelled me, slandered me, and sodomized me. See you in court, Steve."

6. Force them to document their claims: Even if Guido Milano states outright that he likes CW, you should demand documentation. If Pasternak hasn't written an article on Guido's mode preferences, then Guido is obviously lying. If Pasternak _did_ write such an article, then Pasternak is lying, so the documentation is void anyhow. If asked to document your own claim, quote a dead amateur operator. It is not necessary that the dead amateur actually said what you quoted, or the quote can be totall out of context, but in that case the dead amateur must have been a notable official in his era.

7. Use foreign phrases : French is good, but Latin is the lingua franca of flaming. You should use the words "ad hominem" at least three times per article. Other favourite Latin phrases are "ad nauseum," "vini, vidi, vici," "fellatio alfredo."

8. Tell 'em how smart you are : Why use intelligent arguments to convince them you're smart when all you have to do is tell them?

State that you're a member of Mensa or Mega or Dorks of America or FISTS. Tell them the name of a big electronics firm you once worked for as an engineer. (Don't tell them you were a sanitary engineer.) Tell them how long ago (before they were licensed) you had an army MOS and read about crypto equipment. Old knowledge is always better than new knowledge.

9. Accuse your opponent of censorship: It is your right as an American citizen to post whatever the hell you want to the net (as guaranteed by the 37th Amendment, I think). Anyone who tries to limit your cross-posting or move a flame war to Netusers is either a communist, a fascist, or both.

10. Doubt their existence : You've never actually seen your opponent , have you? And since you're the center of the Universe, you should have seen them by now, shouldn't you? Therefore, THEY DON'T EXIST! This is the beauty of flamer's logic. If you MUST admit they exist, always refer to them by their last name. "Smith again shows his ignorance about ITU regulations by....." Ask why you cannot find their call in QRZ (even if you can -- what the heck, you will impress everyone else who didn't actually check themselves who will now believe that your opponent is a bootlegger).

11. Lie, cheat, steal, obfuscate, and leave the toilet seat up.

12. When in doubt, insult : If you forget the other 11 rules, remember this one. At some point during your wonderful career as a flamer you will undoubtedly end up in a flame war with someone who is better than you.

With all good wishes,

de Hans, K0HB

> organizations will have to account for how the money will be spent,
> and how it actually was spent, but there is nothing that will require
> these organizations to account for their religious practices or beliefs.
>

Check again! Just for one example, in order to qualify for funds,
the organization would need to comply with various Federal laws regarding
hiring practices, based on religious or sexual orientation. Since some
religious have explicit doctrine on such matters, this constitutes
explicit Federal interference in their doctrine. Can you imagine, for
instance, the Southern Baptists giving 'equal opportunity' to a gay
Hindu applicant to the job of managing their distribution of your and my
tax dollars? The applicant would be rejected outright on for reasons
related to 'doctrine' and the Federal EEO pressure would amount to
government interference/influence over doctrinal matters of the Southern
Baptist church.

That's only one very obvious example!

With all good wishes,

de Hans, K0HB

It's a matter of semantics. On the one hand we have the man, Yeshuah, who the Romans called Jesus but who was never referred as "Christ"; and on the other we have the Christian Church, founded by Saul (Paul) who never met nor even saw Yeshuah - the man Yeshua's friends tried to stone for heresy - yet who claimed to speak for him. Work of the devil? Could be ..:o) To me "Christian" refers to Paul's church, not necessarily to the man we call Jesus.

Food for thot. In the original text a group of god-like beings (Elohim) created everything including Adam and Lillith as equals. Later, the Elohim we call God created Eden and invited them in but Lillith refused. God forbid Adam and Eve both the knowledge of good and evil and eternal life. Another Elohim (Satan) convinced them to "steal" the former forcing God to evict them, not as punishment but for fear that they'd also "steal" eternal life and thus "become like us (Elohim)". That raises two questions: what happened to Lillith and which Elohim is our benefactor? I obviously don't know. If I did, I'd be a rich televangilist playing in my fabulous hamshack vs hanging out here on reecy.radio...policy ... right?

Enjoy!

There is no way in hell that the gov't is gonna dump tax money into
any private organization religeous or otherwise without having any
control over how those funds are used. Which obviously translates into
gov't exercising cotrol via endorsing or not endorsing the policies
and practices of the affected organizations as they relate to the use
of gov't-supplied funds. That Mr. Stewart would be a gross vilolation
of the principle of separation of church & state.

A July third USAToday/CNN/Gallup poll indicated that Dubya had a 52%
approval rating. A similarly rigorous poll taken in the past week gave
him a 47% approval rating but I can't find that article.

> How so? How does this violate the separation of church and state?

Simple. As soon as the govt. starts handing tax dollars to religious
organizations, the separation is violated.

> Several people have made that claim, but I've yet to see a single word
> to back that up.

See above.

> Separation of church and state was never designed to
> exclude religion - it's intent was to exclude government endorsement
> of a religion.

If the govt. gives tax dollars to some religious groups but not
others, that's endorsement.

> No specific religion is being singled out here.

But that would have to happen in the real world. Somebody, somewhere,
would have to decide which groups get what money, and which groups
don't. And that somebody is gonna be a govt. official.

> And no
> legitimate religion is being excluded.

What constitutes a "legitimate" religion? Is Scientology one? How
about pagans and Wiccans? The members of those groups say they are

legitimate. I say they are all legitimate religions, even though I find some of their ideas to be unbelievable. They are certainly "faith based" groups.

> Therefore, this does not
> constitute an endorsement of a religion under the separation of church
> and state premise.

If the govt. gives tax dollars to some religious groups but not others, that's endorsement. Only ways out are to give nothing, or give every group whatever they ask for. Otherwise, there's endorsement.

If this goes through, the first order of business is to put the Book of Bokonon on the required reading list in all schools.

For a lot of us, Kim. There are lots of other details, but the above
is the biggie. It's bad for govt. AND religions.

> That
> which you stated is so very, very scarey to me.

I wasn't kidding when I wrote "Be afraid. Be VERY afraid."

> Really is, and I wish more
> people would just stop and think long enough to realize it. We don't need
> religion to control government and we don't need government to control
> religion--either way.

Yup. Unless somebody can explain how such a system would work without
any influence either way, somebody is gonna control somebody.

For example, the Catholic church is against abortion, almost all forms
of contraception, and non-marital sex of any kind. That's their
official policy, and they have every right to promote it.

Other religions have different views. Some are diametrically opposite
to the Catholic view on all of these issues. That's their official
policy, and they have every right to promote it, too.

Suppose the Catholic church asks for govt. money for family planning
services, and so do some of the churches who have opposite views. Who
gets the dough? If the Catholics get it, the government is endorsing
their views. If the Catholics don't get it, the govt. is endorsing the
opposing view. Either way, somebody gets endorsed and somebody else
gets snubbed.

>
> We've already got way more than enough big-business interest in government
> that will never go away; let's not add religions/charitable organizations on
> top of that!

Let's not argue over semantics. Call them "non-Western European" or
"non mainstream" or whatever, Kim's point is still valid. WHO
determines what is a "legitimate" religion?

The Great Depression wasn't the first economic trouble in the US, just
the biggest. Ever read anything by Charles Dickens? The USA wasn't
much different.
>

> religions. Not at least without scorn and disdain.

Many of the original British colonies were founded by religious groups
fleeing persecution. The Congregationalists wound up in New England,
the Catholics in Maryland, the Quakers, Amish and Mennonites in
Pennsylvania. Lots of other examples. Pennsylvania was William Penn's
"Holy Experiment", where different religions would be tolerated. That
idea spread to the Constitution. It's a good idea.
>
> > The government stepped in with federal money, but set up huge

He's not my role model. I'm more of an "eye-for-an-eye" type.
The only other cheek I turn is when I moon someone.

> The Devil was created to give your God an out.

Since Jesus was predestined to be crucified, seems Judas,
Pilot, and the Romans were simply doing God's will. If Pilot had
decided not to crucify Jesus who then died of old age, what would
my Southern Baptist preacher be preaching about now? If God knows
exactly what is going to happen every second until the end of time,
is it possible for anything else to happen? If not, everything is
predestined and we are simply puppets in God's puppet show.

There is an extreme contradiction between an omniscient, omnipotent
God and man's free will. My preacher says, "God knows what choices
you are going to make using your free will even before you do."

Have you read Zecharia Sitchin's books, the latest of which is
"The Cosmic Code"? The "Adam" was the name for the new *race* of
genetically engineered beings. The first ones were domesticated
hybrids and sterile (like a mule). Subsequent trials resulted in
beings capable of becoming self sufficient and reproducing
themselves. Leaving Eden was leaving the Elohim providers,
like returning domesticated wolves to the wild. Incidentally,
Elohim is plural which can be inferred from the Bible itself.

Some of our ancestors got a double dose of Elohim genetics and
were know as the Nefilim, the offspring of earth women and the
"sons of God". (Genesis 6:2) All this is covered in a Sumerian
text called "Atra Hasis" which predates The Bible. Lillith
(Lullu - mixed one) was the first generation sterile hybrid(s).
Eve was the later fertile one(s). Nachash, the "serpent", can
also be translated, "He who knows/possesses secrets", and
was really Enki, the genetic engineer and son of Anu, the
leader of the Elohim. Enki (Nachash) got into trouble for
performing the second genetic manipulation without his
father's knowledge or consent. It's all there in the
Sumerian clay tablets written long before the Bible.

> homosexuality among its members. If you don't like it do as I do - don't
> go to church.

>>>>Jesus never forbade marriage or recreational sex. It was all concocted by the Catholic church long after he died and was buried. Their leaders had to be married to Jesus and only Jesus yet isn't something so absurd akin to homosexuality? And did you know that the Mormons swear he was in America too? Talk about screwballs. Now about Baptists having the right to ban homosexuality among its members. Perhaps but keep in mind that these Baptists are the bums in Born Again clothing trying to subvert our Constitution while "Jesusizing" the USA. If they would keep to themselves then let them practice exclusion but as long as they are trying to take over the country, to hell with them. They are ugly and demeaning beyond belief and DANGEROUS too. They are no better than the mobs in Salem who burned innocents at the stake for being witches, no less, therefore I hope half their congregations turn gay. And keep in mind that one will never find in a single Jewish temple anywhere in this world any congregation that would even remotely turn away or publicly admonish or embarrass a homosexual and lesbian. Why not? Because Jews are insistent upon respecting the dignity and rights of all men which is hell of lot more than I can say about Baptists. And something else. WE MIND OUR OWN BUSINESS. Baptists ought to try it instead of meddling everywhere.>>>>>>>

The water into wine shtick was copied from the OT tale about Moses showing Pharoh how Moses, through Yahweh, had the power to perform the type of miracles to scare Pharoh into letting the Hebrews go to then trek through the desert for 40 years eating matzohs to become so constipated they wished they never left in the first place. I can't eat 4 matzohs without getting clogged no less than how many daily for 40 years? You should understand that the Greeks, who wrote the NT, conveniently decided to place Christian holidays on top of Hebrew ones to supplant the latter. And the idea of Jesus's miracles were offshoots of those performed by Hebrew patriarchs in the OT. Now they have Viagra to raise things from the dead.

The evidence is this. A person's rectum was meant to get rid of human waste. It was not meant for some other perverted man's penis to be placed there. It is for outgoing, not incoming. That is a fact, not a belief.

Dan:

What a concept! Criminals being afraid of their victims taking direct action to defend themselves, therefore, they don't do the crime! There's only one problem with this -- it would bring about an actual SOLUTION to the crime problem, a solution which would leave citizens much less dependent on government at all levels! And, as we all know, big-government liberals don't want solutions -- they want issues that never go away, so they can keep themselves in power by promising to create the solutions that never come.

Do you ever wonder why you NEVER see anything in the mass media about citizens who actually use firearms to successfully defend themselves or third parties against violent criminals? About the only place we see any such stories is in the "The Armed Citizen" column in the NRA magazines. Why aren't Dan Rather, Peter Jennings, and Tom Brokow giving out this news on prime-time TV?

I would define a "legitimate religion" as one which is practiced by a
significant portion of the population of a nation, does not involve
practices which are inherently dangerous or anti-social in nature, and
generally leads it's congregation in a direction of brotherhood, humanity,
personal peace, and spiritual fulfillment. It would help if one of their
favorite prayers wasn't "Death to the Infidel!"

Dwight:

It's all about ham-radio wannabes getting the "Microphone Monkey"
off their backs any way they can! Around my town, I see lots of vehicles
(usually pickups and SUV's) with very obvious VHF marine antennas
attached to them. A look inside reveals a bright, white radio, complete
with white microphone, somewhere close to the drivers position! So,
who are they talking to? How is it legitimate to have a Marine VHF
rig installed in a land-based vehicle?

I wonder if civil forfeiture laws apply to bootleg users of critical radio
services? Maybe if Uncle Charley could seize your car, your house,
and anything else you own when you improperly use a Marine VHF
radio, the problem would go away! Of course, that hasn't stopped
drug trafficking...

That's easy, Larry. If there is only one nation, there will
be no wars between nations. Under One World Order, all wars would
be civil wars, by definition. Now there's an oxymoron - a "civil"
war. :-)

Where did you see that? There is no such requirement for faith-based organizations currently receiving federal funding for existing programs. As an example, Catholic Charities USA, United Jewish Communities, and National Council of Churches, all receive federal funding under the Emergency Food and Shelter National Board Program (CFDA-83.523). Yet, after checking with the Office of Management and Budget (OMB)...

http://www.whitehouse.gov/omb/

...and the Catalog of Federal Domestic Assistance (CFDA)...

http://aspe.os.dhhs.gov/cfda/index.htm

...I was not able to find any eligibility requirement relating to the hiring practices of these organizations.

Since the new faith based initiatives would also be handled by the Office of Management and Budget, there would be no reason for different requirements when it comes to these programs. And I've seen no effort to change those requirements.

I have the same common sense, and took the same history lessons, as you, and I'm still waiting for an explanation (not a defense, an explanation). How does this (faith based initiatives to provide additional funding for public assistance programs) violate the separation of church and state?

> Right there is a massive political
> brawl, who gets to differetiate

When it comes to federal money, the IRS tax code.

My friend, there is a huge difference between exercising control over how federal money is spent by an organization and exercising control over the policies and practices of that organization. As I have already said in a previous message (posted just a few minutes ago), a number of religious organizations already receive federal money for various programs, yet the government has made no effort to control the policies and practices of those organizations.

> That Mr. Stewart would be a gross
> vilolation of the principle of
> separation of church & state.

How so? The government is not exercising control over the church's money, nor is it exercising control over the policies and practices of that church. The only control that I have seen associated with these initiatives is how the government's money would be spent - nothing

more and nothing less. That does not violate the separation of church and state premise.

In my opinion, it's is the same thing that has driven world conquest for centuries - power and control. In other words, for your answer, just look back at Genghis Kahn, Adolf Hitler, and others, to see what drove them. However, instead of swords or tanks, today's elite use banks, wages, and similar economic power, to do their conquests (the conquered submit more easily when offered crappy wages instead of death).

And, like previous people fighting the battles of world conquest, there is a certain amount of jealousy or hatred thrown in. For example, many entering this country today are from countries with a long history of hatred towards the United States (for whatever reason). Obviously, they're thrilled that they can come here and take a job away from, or otherwise harm, an "American."

But those coming into the country today are probably the least of our worries. America's biggest threats are right here in this country now. The elite is getting more wealthy (losing touch with everything this country represents in the process), minorities are slowly gaining power (with hatred driving their ambition), and so many have swallowed the liberal concepts of the new world order (ending any possibility of stopping it). Because of that, the writing is on the wall, my friend. And I really don't think I need to read it to you.

No, the goal is to move existing money from existing government programs into more efficient local programs. There is no goal to change the existing local programs (such as the family planning service programs mentioned).

> Simple. As soon as the govt. starts
> handing tax dollars to religious

The government is not "handing" tax dollars to religious organizations. Those organizations don't get to keep the money. Instead, the government would provide money to distribute to others.

Hans, the definition of a "legitimate religion" on a theological basis is not relevant to the topic of this discussion. When it comes to government money for faith based initiatives (the topic of this discussion), the IRS tax codes will always be the deciding factor. Beyond that, I have no desire to get dragged into a debate about what is, or is not, a legitimate religion.

Sorry, but that argument simply does not fit the facts, Jim. The faith based initiatives in question are not based on the policies, beliefs, or traditions, of the various organizations.

For example, Catholic Charities USA already receives federal funding under the Emergency Food and Shelter National Board Program (CFDA-83.523). At the same time, the Catholic Church has not been required to change their policies about abortion, contraception, or anything else. In fact, they have not even been asked about their policies in relationship to this program.

The same is true for the United Jewish Communities and National Council of Churches (both of which also receive funding under the same program). And the same is true for the many other organizations who receive funding under this program, including a good number of non-religious groups.

That really sucks, Larry. I'm so very glad that hasn't caught on in my area yet. I would hate to imagine that I might not be able to use my radio because some clown is running his mouth on the way to Burger King (nothing against Burger King here).

By the way, there are a few legal uses for a VHF marine radio on land - operating a service to boaters (marinas, etc), marine radio telephone services, navigation (locks, draw bridges, light houses, etc), and commercial fleet operations. All require a license and all equipment used must meet certain restrictions. If the boater wants something other than vessel-to-vessel communications (or the communications just mentioned), one of the other radio services must be used.

I wish. Heck, I wish there was a way just to seize the radio. I have never understood the decision to get rid of the license for VHF marine radio. Didn't the FCC learn anything from the CB madness?

Since you're talking about Dan Rather, Peter Jennings, and Tom Brokow, that's kind of a rhetorical question, isn't it? These guys, and their networks, are so liberal, they insist Clinton is a conservative.

One world government has the advantage that all wars would be
"civil". :-)

With the presently defined US poverty status and welfare programs,
a one world government would mean that every person would be living
in poverty including you and me. Don't know about you but I don't
cotton to poverty.

"Comrade" Jim:

Please enlighten us -- what do you think would possibly be *good* about a "one world" government?

Also, answer a more important question -- If you think a one world government is not necessarily a bad thing, are you willing to risk your life to defend that concept? What are you going to do when people start shooting at you because they want to prevent a one world government from denying them their freedom and independence?

BTW -- you live in much too big a house. I think you should share it with these other three families who are just as deserving of it as you are! And what are you doing with all that radio equipment?

>
> Is one world government necessarily
> a bad thing?

Good question, Jim. First of all, how do we know that government is going to be anything at all like what we have in this country today? Liberals love to envision a paradise with people around the world living in peace, all led by a benevolent world government. What if Hitler controls that government instead? Today, if all else fails, we have the ultimate freedom to just leave the country if we don't like the government. That option will be gone with one government throughout the world.

Are we willing to give up our freedom of speech, freedom of religion, freedom to associate, other freedoms under the Bill of Rights, the Constitution, or perhaps even the right to vote, to have that one world government? None of those are guaranteed to be part of that new world government. Or, if they are included, will remain part of that government with billions of people around the world voting (each person's vote will be only one in several billion).

Do we want some guy in Ethiopia voting for the laws in our hometowns? Are we willing to have police officers from Iraq patrolling the streets of our neighborhoods? Are we prepared for a president from China (they have far more voters then we do)?

Who are the people creating this government? What are their goals and agendas? What are they getting out of this (you can bet your bottom dollar that they're getting something)? Will they allow any one of us to be part of that government? Do they even like us?

Liberals love to promote the idea of diversity. Why reduce that diversity with a single world government? A one world government is the worst idea that liberals have ever come up with. And, in my opinion, if liberals in this country attempt to put such a government in power, there should be an immediate civil war to stop it (and I'm not joking)

You missed some, Dwight.

>Cecil's premise is that
>"if" you didn't meet the requirements to get a license, then you had
>to have cheated or you're lying about being forced to meet the
>requirements.

(1) I did meet the requirements to get a license. Five times. Novice through Extra.

(2) I did not cheat, nor did anyone do any illegal or improper thing on my behalf.

(3) I was not forced to do it.

It really is THAT simple.

> So, in the end, your steadfast refusal to accept a legitimate
>definition for a word is what drives this discussion, Steve.

I don't accept his particular definition, Dwight. I was not forced. Period.

>You have
>the power to end the discussion by simply not responding. If you fail
>to do that, then you're equally responsible for everything that
>happens after that (you're not an innocent victim).

You have missed the WHOLE point, Dwight. This is all about NOT being a "victim". Cecil's premise is that everyone is "forced" to do something. By BEING "forced", they can then salve themselves of any responsibility of supporting an otherwise controversial point of view.

>And THAT is the simple truth, my friend.

Yes, it is.

>> VHF radio, the problem would go away!

Present law allows only the seizure and forfeiture of the radio and
accessories, not vehicles, homes, or bank accounts. Heroin this
isn't.
>
> I wish. Heck, I wish there was a way just to seize the radio.

It is seizable and forfeitable under present law - Section 510 of
the Comm Act - just like linears, "export model" CBs, and ham
equipment used by non-hams. Requires proof of use and issuance of a
court order. The "nickname" of this type of mis-usage is "kitchen
coastals" and it is on the FCC's "OK to do when found" list.

>I have
>never understood the decision to get rid of the license for VHF marine
>radio. Didn't the FCC learn anything from the CB madness?

Absolutely not. Don't get me started.......

Note the Subject Line.

BOLOGNA is a city in Italy, giving its name to a type of sausage.
Properly pronounced "Bolown-ya".

BALONEY is pure BS, derived from "Blarney", that area in Ireland.
Properly pronounced "r.r.a.p."

My two lira.....or is someone proposing that the capitol of The One
World be that certain city in Italy....

Only because emergency food and shelter is noncontroversial and doesn't

conflict with anybody's policies.

What happens when something controversial comes up? For example, consider medical services for people displaced by natural disasters. Faith-based groups can house and feed the people, short term or long term, sure - but what happens when the displaced people start asking for contraceptives? Will Catholic Charities supply them?

I hope you're right. But I suspect it may already be too late for that. At this point, I find it very hard to be optimistic about the future of this country. I'm not giving up on the country yet, but each day I feel it is more and more like a battle already lost.

That seems like an awful lot of unnecessary baloney about Bologna. ;-)

Actually, while I don't know if that was the original poster's intent, didn't you use ever bologna instead of baloney as a kid? It was common slang back in my school days - meaning a person or thing that was full of it (BS), as in a stuffed sausage.

That's supposed to be the general idea. Under the existing programs, the organization has to give details on exactly how the money will be spend, and so forth. The granting agency (depends on the program) is supposed to keep an eye on the organization to insure the money goes where is is supposed to go. However, like most others, I'm concerned about accountability (the government doesn't have a great record in this regard). And without strong oversight, this is going to be ripe for abuse (like almost any other federally funded program).

>not joking)

Dwight:

Don't worry -- there WILL be a civil war to prevent anyone intent on
denying American citizens their freedom and independence. Of
course, it will probably start long before the actual attempt to
overthrow our present representative republic takes place. It will
start when some whacko trys to disarm over 90 million law-abiding
American gun owners. When they come to grab the guns, they
will have to have 90 million SWAT teams ready to take us all down
by force at the same time. Even if only 10% of the law-abiding gun
owners decide to defend their Second Amendment rights with their
lives, that would still require 9 million SWAT teams, 9 million
federal trials, and cell space for 9 million political prisoners.
Naturally, they will attempt to do this incrementally, by banning
every category of weapons right down to .22 LR bolt-action rifles.
What remains to be seen is how law-abiding American gun owners
will react. The law-abiding gun owners of the U.K. and Australia
were disarmed fairly easily. I don't think the same will be possible
here -- at least, I hope not!

Okay, I'll have to go look through the Catalog of Federal Domestic Assistance to find something more controversial. How about the Grants for Residential Treatment Programs for Pregnant and Postpartum Women program under the Department of Health and Human Services (CFDA-93.101)? Or the Children's Health Protection program under the Environmental Protection Agency (CFDA-66.609)? Or how about the Family Planning Service Delivery Improvement Research Grants under the Department of Health and Human Services (CFDA-93.974)?

Or how about the Fair Housing Initiatives and Fair Housing Organizations Initiative Program under the Department of Housing and Urban Development (CFDA-14.413)? Or the Crime Victim Assistance program under the Department of Justice (CFDA-16.575)?

Or how about the Community Programs to Improve Minority Health Grant Program under the Department of Health and Human Services (CFDA-93.137)? Or the Health Disparities Grants in Minority Health program under the Department of Health and Human Services (CFDA-93.100)? Or the Public Health Traineeships program under the Department of Education (CFDA-93.964)?

There are literally hundreds of federal programs open to non-profit religious groups listed in the Catalog of Federal Domestic Assistance. I simply don't have the time to look through them all, so I hope what I've offered is enough.

And that is just fine, Steve. However, your decision to use the word "forced" within the context of your definition does not eliminate the definition that Cecil is using. In other words, under your definition, you are correct - you were not forced. However, under Cecil's definition, you were indeed forced. Again, your steadfast refusal to accept that is the driving force behind this discussion. Accept it, or ignore it, and the discussion ends.

I wish the FCC would extend that to external agencies. On a number of occasions, I've ran across people using a marine radio improperly and I would have loved a method to take that radio away on a few of those. For example, in one situation, a coastie and I had to visit the same person three times for the same offense (playing on the distress frequency). In the end, we solved the problem by suggesting that we might discover during another trip that his boat was not safe to operate (didn't meet state laws). Since it was a fairly new boat, this was a bluff (but, since he stopped, he obviously wasn't willing to take the chance).

I repeated the conditional logic statements over and over. *Your answers*
are what turned you into a cheat or a liar. If/then statements don't
declare a conclusion.

Here's how the discussions went. I said:

If you weren't required by circumstances (forced) to meet the FCC
requirements which carry the force of law then you cheated to get
your ham license.

You said: "I was not forced." Given the nature of conditional logic
statements, only one conclusion is possible. If you didn't cheat,
you were required by circumstances (forced) to meet the FCC requirements
which carry the force of law just like all the rest of us licensed
US hams did.

> >I wasn't going to post anything else on the subject, but you continued
> >to defame my character even when I wasn't posting.
>
> I said nothing of your character, Cecil. Another untruth.

You said I quit the game because I didn't like the rules. That's
certainly a statement about my character. What's worse, you waited
until I wasn't posting anymore to make the statement.

> (3) I was not forced to do it.

There's the lie, Steve. Since you haven't posted your own definition of forced, you are tacitly accepting the context of the definition I posted from Webster's dictionary. So you are saying that you were not required by circumstances (forced) to meet the FCC requirements which means you didn't have to meet the FCC requirements. If you didn't have to meet the FCC requirements in order to get an amateur radio license, you cheated. It's that simple. Either you were required by circumstances (forced) to meet the FCC requirements or you cheated.

If, as you say, you didn't have to meet the FCC requirements in order to obtain an amateur radio license, then exactly how did you get one?

Seizure/forfeiture is only authorized when the radio is modified or
is used in a situation where the "blanket authorization" does not
apply, such as not on a vessel or in a situation permitted by the
Rules, or on a channel not authorized for marine use under any
situation, or if used for willful and intentional harmful
interference after a "cease and desist" warning in writing or over
the radio.

At one time there was a procedure where if the USCG found someone
using the wrong channel or "playing around" on Channel 16 (a Rule
violation only) they would issue a report to the FCC and the FCC
would issue a Notice of Violation (the first step in administrative
sanction).

First of all, let me say that I am an author of some repute and a respected person within the 11 meter dxing hobby. I am not an ignorant hillbilly without a

clue as to what the radio spectrum is all about and its value to the general public as well as corporate interests. For some years I have been a devotee of freebanding, that is to say, a personal liberation of the free airwaves for free

use as citizens see fit. I have talked all over the world on 27 mhz and even further using a linear amplifier, and all this without benefit of a license or interference from the government or unnecessary testing. Recently a clutch of rf

cops and mincing rule-following parrots from the ham ranks have invaded the cb room in an effort to put down and otherwise abuse right minded cbers just because we refuse to bow down to the ham gods. Mr. Leland Scott KC8LDO is one of

these self proclaimed Thors who attempts to bludgeon unenlightened cb peons with

his "knowledge". hahahahahahaha! If Leland and his parrots knew as much as I do about radio they would be dangerous. Why don't you hams take him aside and tell him gently what an ass he is making of himself in the cb room (where I may add, he does not belong). To give you an idea of how disturbed this person is, he (I suspect) sent me a soiled men's undergarment in the mail perhaps with the intent

to embarrass me. I can assure you, Leland, this type of bizarre and sexually confused activity only shames you, not me. Then, he gloated in the cb room by posting taunts and challenges that referenced my receipt of the garment and trying (but failing) to connect me with some deviant sexual desires and porn posted earlier by his gang of pink ladies. hahahahahha did you hear that Leland?

You and your pearly pals are asexual neutered freaks with mental issues that my registered therapist friend is only too happy to detail for me which I can and will reprint in this ham room so that all your no code compatriots can see what a sick and twisted old failure you really are. When the time is right I will reveal al

Yep, it makes no difference about what we as individuals think,
believe, want...in the end, it is a decision that is made by
the US Supreme Ct. Not at all much different than the
code/nocode test debates...in the end it is a policy decision made by
the FCC commissioners.

Cheers,

More untruths. I have SPECIFICALLY stated that I DID meet the
requirements for an Amateur Radio license.

Five times.

What I DID say was I was NOT forced to do it, and I did not cheat, nor did
anyone cheat or act on my behalf to do it.

It really is THAT simple.

>then exactly how did you get one?

I studied. I practiced. I prevailed. I was not forced.

Nope, absolutely not. I respect you too much and am too much of
a gentleman to say such a thing. Given the structure and context
of what you have posted, assuming that you comprehend English, you
have admitted to being a liar or a cheat. I only pointed out your
admission. You are certainly free to retract your admission.

I have checked back over all my postings. All the conclusions that
you are a liar or a cheat are conditional upon your admission that
you were not required by circumstances to meet the FCC requirements.

What you need to do is to cease to deny the fact that you were indeed
required by circumstances to meet the FCC requirements, just like all
the rest of us, in order to receive an amateur radio license.

> For an alleged engineer, you are not overly endowed with common sense, are

There's more to it than that. If you say, "This morning my bus had
a flat tire", and I say, "That's impossible, busses don't have tires",
wouldn't you say I was lying? If you don't object to the definition
being used in context then you have tacitly accepted that definition.

You didn't say, "I'm changing the contextual definition of 'forced'
and I wasn't forced." After I published the definition of force that
was being used in context, you said, "I was not forced", which means
that you were not required by circumstances to meet the FCC requirements.
What other conclusion is possible after that?

> >If, as you say, you didn't have to meet the FCC requirements in order
> >to obtain an amateur radio license, then exactly how did you get one?
>
> More untruths. I have SPECIFICALLY stated that I DID meet the
> requirements for an Amateur Radio license.

You simply cannot have it both ways. You cannot deny being required by
circumstances to meet the requirements and turn around and say you met
the requirements. That's clearly a logical contradiction. How can you
possibly prove that you would have met the requirements even if they
had not existed? To imply such a thing is ridiculous.

> What I DID say was I was NOT forced to do it, and I did not cheat, nor did
> anyone cheat or act on my behalf to do it.

You were not required by circumstances to meet the FCC requirements and
you did not cheat yet you obtained an amateur radio license. Those
conditions are clearly contradictory, i.e. impossible. It is impossible
to obtain an amateur radio license without submitting to the force of
law embodied in the FCC requirements other than to cheat. The path that
you are trying to take through the conditional logic equation matrix
simply does NOT exist.

>What other conclusion is possible after that?

I DID meet the requirements.

I was NOT forced to do so.

>You simply cannot have it both ways.

I am not seeking to HAVE it both ways, Cecil.

I DID meet the requirements.

I did NOT cheat or lie to do it.

>How can you
>possibly prove that you would have met the requirements even if they
>had not existed?

THAT is foolish. I got a good laugh from it though...Thanks.

>You were not required by circumstances to meet the FCC requirements and
>you did not cheat yet you obtained an amateur radio license. Those
>conditions are clearly contradictory, i.e. impossible.

Wading through your "arguments" is the impossible part, Cecil.

I met the requirements for a license. I was not forced to do so.

It really is THAT simple.

YOU may have been "forced", but I bet the fermented grapes you allegedly consumed prior to presenting to the FCC office took the edge off of it, huh...?!?!

> It is impossible
>to obtain an amateur radio license without submitting to the force of
>law embodied in the FCC requirements other than to cheat.

In YOUR perception it is "impossible" to be licesed without being "forced" to do it.

MY perception is that I was not forced to do anything I did not want to do.

PERIOD.

I know you are having trouble accepting that, but that's OK...

>The path that
>you are trying to take through the conditional logic equation matrix
>simply does NOT exist.

Cecil...you really need to get out more.

I met the requirements to obtain licensure.

I was not forced to do so.

I did not cheat nor lie to do it.

It really is THAT simple.

I have specifically stated that I did neither. I HAVE stated that I was
NOT FORCED to meet the requirements of licensure for the Amateur Radio Service.

You, on the otherhand, simply choose to adhere to a narrow definition of
"forced" as if it is the only one applicable.

>I only pointed out your
>admission. You are certainly free to retract your admission.

HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA

>I have checked back over all my postings. All the conclusions that
>you are a liar or a cheat are conditional upon your admission that
>you were not required by circumstances to meet the FCC requirements.

Then YOU have lied about reading all the past posts...of course I guess
that was "conditional" that it was YOUR posts that you have read, huh...?!?!
Guess you DIDN'T lie...just chose which set of facts to apply here, huh...?!?!

>What you need to do is to cease to deny the fact that you were indeed
>required by circumstances to meet the FCC requirements, just like all
>the rest of us, in order to receive an amateur radio license.

What YOU need to do is to cease insisting that I was "forced" to do
something when I know otherwise.

Also, I might suggest a remedial elementary school level reading course.

>> For an alleged engineer, you are not overly endowed with common sense, are
>> you?

>What does common sense have to do with dictionary definitions and the

Yep, a lot of people used baloney like that (I did). But there was a commercial out back then about bologna (Oscar Meyer or someone like that) and everybody just seemed to pick up on it all of a sudden. It wasn't long before "everyone" was calling others full of bologna instead of baloney. Maybe it was just a local thing.

> - at least, I hope not!

But, that is exactly the problem, Larry. They're doing this very incrementally - just enough to make a good dent, but not enough to get too many people upset at the same time. They've learned the lessons of history very well - do what you want but don't do anything that provides a trigger (trigger = that one thing that joins people together, that provides a common enemy to fight, that makes people say we have to do something and we have to do it now).

Without that trigger, they can keep going on forever. And look at how far they have gotten so far. Look at how many of our freedoms have been eliminated over the years. At one time, there were restraints on the government and we had widespread freedoms (so many, the protections under the Bill of Rights was not even an issue). Now, we have almost no rights unless the situation is specifically covered under the Bill of Rights. And we're fighting desperately now just to keep the protections under the Bill of Rights intact (and slowly losing that battle also).

Or look at our economic situation. Today you almost have to bury yourself in debt just to live a decent lifestyle (if you want more, you do have to bury yourself in debts). Wages have have not kept up with the cost of living over the last thirty to forty years (most of our parents were able to buy a home, land, cars, furniture, and so forth, all on one income for the entire family). Today it takes two jobs to do the same thing (and many are working overtime, or at a second job, to do it even in a two income family).

At one time, good jobs were widely available. Today, people stand in long lines whenever a decent job opening is announced. At one time, almost everyone in this country worked at jobs with a retirement program. Today, we provide for our own retirement. We once used to get decent paid vacations. Today, a person is lucky if he gets a week off a year.

Look at our education system today. The average college student spends less then three hours a day in the classroom. Yet, at the same time, the cost of going to college has went through the roof (and people wonder why diploma mills are so popular - most colleges are diploma mills today). High school kids are graduating without even the basic ability to read and write.

I could just go on forever. We've got so many problems in this country, it would take us decades to solve them all if we started right now. And, sadly, for so many of these problems, I see no attempt at all to even get started on coming up with a solution (and the problems just keep getting worse).

Well, I've had enough of this self pity. There isn't a thing in the world I can do about it, so I'm just going to go back to ignoring everything like so many others in this country do. I'll start repeating to myself that we're the best country on earth (like that somehow excuses the problems). There's no place like home (click, click). There's no place like home (click, click). There's no place like...

> Whatever works......

You had to be there to appreciated it. This guy was drunk as heck, having a party at a marina with a number of his friends, and was camped out on the distress frequency for repeated fifteen to twenty minutes bursts - talking about girls, how he was "killed" in WWII (he wasn't even born in WWII), how he had the fastest boat on the water, and a bunch of other junk). After each burst of nonsense, he would stop for two or three minutes (to use the bathroom, get another drink, think up something new to say, or whatever he was doing) and then he would be right back at it.

We finally had to hunt him down. And he would stop for about twenty minutes to an hour each time we talked to him. But then he would be right back at it. Since we really couldn't find anything to do to him (he wasn't on the water, so DUI was out), we had to come up with something creative. Threatening his boating for a while seemed to be just the ticket.

I've had the problem is dealing with antenna restrictions several times in the past. In one situation, I buried about a quarter mile of coax to a nearby woods and then put my antenna up into a tree in those woods (I lost signal from the cable run, but was able to put up one heck of an antenna). In another case, I put an small antenna inside a homemade wooden lightning arrester on the roof (thank god it never worked as a lightning arrester).

And, in still another case, I made an telescoping mast look like a light pole in the back yard. The antenna telescoped into the top section of the mast when not being used. I did that by cutting off about eight feet of the top section and screwing the antenna's mount into the inside the top section. When the mast was lowered (the top section fully retracted), the antenna was inside the main section (out of view). When I wanted to talk during the day, I raised the antenna just enough to clear the main section. At night, I raised it all the way. The neighbors never even noticed.

I also once fooled neighbors by making a wire antenna look like a telephone cable to the house (went right to the side of a telephone pole - don't do this with an electrical pole). I also had a second wire antenna at the same location. I buried coax to a nearby transformer, installed a ten foot pole next to it, and then ran my wire antenna to the side of a nearby light pole at a tennis court. I wouldn't recommend this unless you know exactly where the transformer cables are buried (I watched them install the transformer).

But the key to both of these last two is to make the wire antennas look like something that people are very used to seeing (telephone lines, cable tv lines, power lines, etc). Since they're so used to seeing this type of stuff, they would never think to complain (even in an housing area that normally has most wiring buried).

And, finally, in one case I put an antenna onto a light pole right out in full view beside the road. Working at night, I buried the coax to the light pole, neatly attached it up the side of the pole, and put an nine foot antenna on the top of the pole itself. I never saw a

neighbor give it anything more than a casual glance.

You are the one who has uttered the falsehoods and contradictions.
I have merely pointed them out based on valid dictionary definitions
and the rules of classical conditional logic.

> I have specifically stated that I did neither. I HAVE stated that I was
> NOT FORCED to meet the requirements of licensure for the Amateur Radio Service.

And, given your statements plus the fact that you do indeed possess a ham
license, I have proven beyond a shadow of a doubt your statement is false.
Repeating a false statement does not make it true.

Every licensed ham who didn't cheat was required by circumstances (forced)
to meet the FCC requirements which carry the force of law and are enforced.
There are NO exceptions, including you. You either submitted to the force
of law embodied in the FCC requirements or you cheated. You have denied
both. That's an impossibility.

> >I have checked back over all my postings. All the conclusions that
> >you are a liar or a cheat are conditional upon your admission that
> >you were not required by circumstances to meet the FCC requirements.
>
> Then YOU have lied about reading all the past posts...

Nope I haven't, Steve. My computer saves all my postings. I have looked
at all of them and each of them contain the 'if' and/or 'then' statements
that make them conditional depending on what you say. You have done it
to yourself. All I have done is post dictionary definitions and the rules
of logic that apply to conditional statements.

> What YOU need to do is to cease insisting that I was "forced" to do
> something when I know otherwise.

If you deny being required by circumstances (forced) to meet the FCC
requirements, no other valid conclusion is possible. The path through
the logic that you claim to have taken is impossible. The only people
who were not required by circumstances to meet the FCC requirements
don't possess US ham licenses or they cheated to obtain one.

Do you also deny that you are forced to breathe to stay alive?

That's really funny. I have repeated the following true statement many
times and you are the one who rejects the truth.

Every licensed US ham was required by circumstances (forced) to meet
the FCC requirements which carry the force of law and are enforced.
The only exceptions are the ones who cheated.

> I DID meet the requirements.
>
> I was NOT forced to do so.

One of those statements has to be false, Steve. You are doing it to
yourself all over again. If you met the requirements, you were forced
to do so *by definition*. Arguing with valid definitions is rejection
of the English language.

> In YOUR perception it is "impossible" to be licesed without being "forced"
> to do it.

It's not MY perception, Steve. It *IS* impossible to be licensed without
being forced to do it *by definition*. If you don't accept English language
definitions, then everything you say in English is meaningless.

> MY perception is that I was not forced to do anything I did not want to
> do.

Your perception and my perception don't matter. What matters are the
facts. The facts are stated above. It simply doesn't matter how you
feel about being forced to meet the FCC requirements. The FCC says
you *MUST* meet them - you had no choice in the matter. Being given
no choice is another way of being forced.

Do you disagree that you are forced to breathe in order to live?

Seems we have some pirate stations operating on LSB just inside the 40 meter band (7.002 and thereabouts). They call themselves "Radio Free Texas" and are usually on around 7:30 - 8:00 pm cst. Seem to be in South Texas. From listening to the conversations they appear to be one of these radical anti-government, lookout for the black helicopters, the sky is falling types who would think Tim McVeigh was a hero. Anyone else heard them and know where they may be located?

>You are the one who has uttered the falsehoods and contradictions.

You are lying. Why?

>I have merely pointed them out based on valid dictionary definitions
>and the rules of classical conditional logic.

And ignoring my assertions from first-personal experience.

I was NOT forced.

>Repeating a false statement does not make it true.

The WHY do you keep insisting that I cheated, Cecil?

You keep repeating THAT false statement over and over. It's NOT true, yet
you keep insisting that it is.

>Every licensed ham who didn't cheat was required by circumstances (forced)
>to meet the FCC requirements which carry the force of law and are enforced.

YOU are the one insisting that we are "forced". I was not forced. YOU
may ahve been...I was not.

> You either submitted to the force
>of law embodied in the FCC requirements or you cheated. You have denied
>both. That's an impossibility.

Only in YOUR mind is it an impossibility, Cecil. Your mind is closed and
your vision narrow.

A new pair of glasses, perhaps?

>> Then YOU have lied about reading all the past posts...

>Nope I haven't, Steve. My computer saves all my postings.

Selective (or should I say "conditional") editing.

Very Goebbelesque.

>All I have done is post dictionary definitions and the rules of logic that
apply to conditional statements.

And insisted that since I refuse to accept YOUR definitions, I am a liar or
cheat.

Yeah...right...And you are the poster boy for Mothers Against Drunk Driving.

>If you deny being required by circumstances (forced) to meet the FCC
>requirements, no other valid conclusion is possible

Cecil...You are bald faced lying.

And YES, it really is THAT simple.

I only deny that I was forced. I have stated over and over that I DID meet the requirements, that I was neither forced nor did I cheat.

>The path through
>the logic that you claim to have taken is impossible.

No, it's not.

I was not forced. Period. Any assertion by YOU to the contrary is a bit of besmirching of your own.

>The only people
>who were not required by circumstances to meet the FCC requirements
>don't possess US ham licenses or they cheated to obtain one.

I met the requirements to obtain a license. I did so of my own volition.

I was not forced to do so. I did not cheat to do it.

If you cannot provide documentary evidence to prove otherwise, you are commiting a wanton act of libel.

>Do you also deny that you are forced to breathe to stay alive?

Not germane to the argument, Cecil. We ARE "forced" to breathe. In that we have no choice if we choose to survive.

I had the option of NOT being a licensed Amatuer. I DID choose to be. I was not forced.

Unless you can PROVE otherwise...?!?!

>The only exceptions are the ones who cheated.

Sorry, Cecil. You are wrong. I was not forced. I DID meet the
requirements for licensure, however at no time was I forced to do so.

>One of those statements has to be false, Steve.

You are wrong. Neither HAS to be "false". Either MAY be false, but in MY
particular case, NEITHER are!

>You are doing it to yourself all over again.

Doing what to myself? Admitting that I was NOT forced to do something
that YOU insist I was?

>If you met the requirements, you were forced
>to do so *by definition*.

I was not "forced"...by definition or otherwise.

>Arguing with valid definitions is rejection
>of the English language.

No it's not. No more than arguing with "valid laws" makes you a criminal.

>t's not MY perception, Steve. It *IS* impossible to be licensed without
>being forced to do it *by definition*.

Sure it is. You simply choose to adhere to the strictest application oa
ONE particular definition.

In my case YOUR chosen definition is not applicable.

And since I demonstrate the temerity to disagree with you, you brand me a
liar or cheat.

Been spending time with Lennie or Mark lately, Cecil?

>Your perception and my perception don't matter.

Sure they do.

>Being given no choice is another way of being forced.

I had a choice. License or no license. I chose to be licensed. I was not forced.

>Do you disagree that you are forced to breathe in order to live?

Not germane. A really stupid analogy by someone alleged to be educated enough to know better.

Pity.

Most of the world has already gone socialist (more correctly, "statist")
and the USA is on its way. Any world government would, no doubt, do away
with the Bill of Rights. That's NOT good.

> Looking at the collapse of the totalitarian collectivist states, and how they
> are trying to become capitalist, I'd say you've got it backwards, Cecil.

If you believe the USA is capitalist, Jim, you have, no doubt, been
brainwashed by the statists. We only have remnants of capitalism
left and they are on the decrease.

"statism - the principle of policy of concentrating extensive economic,
political, and related controls in the state at the cost of individual
liberty." - From Webster's. "State" in this context refers to the federal
government, i.e. the USA is a state.

You are confused. Why? I have very carefully tried to teach you
accepted definitions of English words and accepted rules of logic.
You have ignored them and continued to utter falsehoods and
contradictions.

> >I have merely pointed them out based on valid dictionary definitions
> >and the rules of classical conditional logic.
>
> And ignoring my assertions from first-personal experience.
> I was NOT forced.

You may believe that, Steve, but it is just not true. What you believe
doesn't matter. Facts matter. The fact is that you were required by
circumstances to submit to the force of law embodied in the FCC
requirements which are enforced. That's the definition of being
forced to meet the requirements.

> >Repeating a false statement does not make it true.
>
> The WHY do you keep insisting that I cheated, Cecil?

You are the one who keeps insisting that you cheated, Steve, by denying
that you had to meet the FCC requirements in order to obtain an amateur
license.

> I only deny that I was forced. I have stated over and over that I DID
> meet the requirements, that I was neither forced nor did I cheat.

That you are confused about being forced to meet the FCC requirements
is irrelevant. You gave up your chance not to be forced to meet the
requirements when you obtained your amateur license.

> I met the requirements to obtain a license. I did so of my own volition.

Whether you did it of your own volition or not is irrelevant. You were
required by circumstances to meet the FCC requirements or else you
cheated. The only way to avoid being forced to meet the FCC requirements
is not to obtain an amateur license. You didn't make that choice and
you cannot change the past.

> If you cannot provide documentary evidence to prove otherwise, you are
> commiting a wanton act of libel.

More lying will not help your cause. Ask your lawyer if you can sue someone because *YOU* refuse to accept dictionary definitions of English words. I have provided documentary evidence to prove my point and you have put on your blinders and turned a deaf ear. That's your problem, not mine.

> >Do you also deny that you are forced to breathe to stay alive?
>
> Not germane to the argument, Cecil. We ARE "forced" to breathe. In that
> we have no choice if we choose to survive.

In like manner, if one becomes a licensed amateur radio, one has *NO CHOICE* except to meet the FCC requirements.

FCC regulations carry the force of law and are enforced so you are even more forced to pass the FCC requirements in order to obtain an amateur license than you are forced to breathe.

> I had the option of NOT being a licensed Amatuer. I DID choose to be. I
> was not forced.

The way to avoid being forced to meet the FCC requirements is to choose not to become a licensed amateur. Unfortunately for your argument, you did not choose that path and therefore that path is not available for your present argument. You cannot change the past.

This entire argument can be resolved by you answering the following simple yes/no question:

Did you submit to the force of law embodied in the FCC requirements and enforced by the FCC in order to obtain an amateur radio license?

If you answer 'yes', you were forced to meet the FCC requirements, by definition, just like all the rest of us.

If you answer 'no', you cheated. It is that simple.

What a ridiculous thing to say. You still remind me of Clinton.
"I did not have sex with that woman."

Did you submit to the force of law embodied in the FCC requirements
and enforced by the FCC in order to obtain an amateur radio license?

If you answer 'yes', you were forced to meet the FCC requirements,
by definition, just like all the rest of us.

If you answer 'no', you cheated. It is that simple.

> >You are doing it to yourself all over again.
>
> Doing what to myself? Admitting that I was NOT forced to do something
> that YOU insist I was?

What you are doing is exhibiting a mindset that doesn't correspond to
reality. Please pay close attention:
****
The only choice in the matter that any citizen has is whether to become
an amateur radio operator or not. After making that choice, citizens who
obtain amateur radio operator licenses have *ABSOLUTELY NO CHOICE* (except
for cheating. The FCC says they *MUST*, i.e. are forced to pass the FCC
requirements - *NO EXCEPTIONS!*
****
> >If you met the requirements, you were forced
> >to do so *by definition*.
>
> I was not "forced"...by definition or otherwise.

You might as well deny being a Homo Sapien. If, as you say, words
don't mean what words mean, then what you have to say is meaningless.

> And since I demonstrate the temerity to disagree with you, you brand me a
> liar or cheat.

I would never, never do that, Steve. You have admitted to either being
a liar or a cheat and all I have done is point that out.

> Been spending time with Lennie or Mark lately, Cecil?

A veiled threat of another lawsuit? When are you going to take
responsibility for your own words, Steve? It is *YOUR WORDS* with
which you are accusing yourself. I am merely pointing out your logical
contradictions. The only choice you had was whether to become a
licensed amateur or not. After making that choice, you had absolutely
no other choice except to submit to the force of law embodied in the
FCC requirements. It's a second level abstraction, Steve, one that
you seem just not to get and is an ability that most people learn
fairly early in life.

> I had a choice. License or no license. I chose to be licensed. I was
> not forced.

You still just don't get it. You had a choice to be licensed or not.
After you made that choice, you were either forced to meet the FCC
requirements or cheat. Those are the only two possibilities for
licensed hams. You cannot go back into the past and decide not
to become an amateur radio operator. You are constrained by reality
and are incapable of changing the past. Changing the past is the
only way to make your argument valid.

> >Do you disagree that you are forced to breathe in order to live?
>
> Not germane. A really stupid analogy by someone alleged to be educated
> enough to know better.

Yep, once again ignore reality.

Cecil,

As you (might not) know, one of my hobbies besides Amateur Radio is fishing, mostly for walleyes. I'm something of a fanatic about that sport, and consider my trolling skills to be quite advanced. But I bow in awe and tribue to your far superior trolling skill. You truly are a master-troller.

Based on your success trolling this single bait in front of the Robeson fish, and getting a strike *EVERY* time without fail, and without any variation in your presentation, it is clear that your technique is absolutely flawless. It *NEVER* fails to draw the desired response from the target fish.

Or maybe this particular fish is just really stupid, and can't help but strike your bait.

With all sincere kind wishes,

de Hans, K0HB

Cecil:

If I decide that I wish to become a Psychologist, I need to go back to school and take a Ph. D. in Psychology. However, the only way I can do this is if I VOLUNTARILY meet the requirements for all of the course work required for the degree. There is no way I can be FORCED to do this; I must choose to do it under my own motivation and initiative. The people who run the Psychology department at the University of Wherever could care less whether or not I enter their program. They will allow me to do so, if I have the requisite academic qualifications, and can pay their tuition and fees. Absolutely no FORCE will ever be applied to me at any stage of the process. If I wish to graduate with honors, then I must make an individual committment to achieve a high enough GPA to qualify. Nobody but myself has a personal stake in the outcome, therefore there is no "force" for me to comply with their requirements, or achieve a particular level of success. If I fail, it will not be seen as a failure of the university's academic program, in view of the fact that the majority of my classmates would have succeeded. If I succeed, it will be because *I* worked with diligence equal to or superior to that of my classmates, in order to achieve an academic standing higher than the others.

Your self-serving explanations, definitions, and general ranting about "force" WRT code testing is nothing more than an excuse for you to feel good about yourself for not having achieved Extra-class status under the previous, more demanding, license testing regime. It is mere justification for your own laziness and inadequacy. Nobody here is fooled.

You will NEVER convince me that anyone was "forced" by the FCC to take ANY kind of amateur radio license exam. There is no point in your continued posting on that subject. You have lost. You are defeated. You are WRONG!!!

An analogy to a lake just might help. A person exercises his freedom
of choice to jump in the lake. But once he has jumped in, he is *forced*
to surface to be able to breathe and stay alive. He has a choice whether
to jump in or not (like choosing to be a licensed ham) but he has absolutely
no choice whether to surface or not if he wants to stay alive (like being
forced to meet the FCC requirements).

> this;

If you are to obtain a PhD degree, you are forced to meet the requirements.
The only way not to be forced to meet the requirements is to give up on
the PhD degree or somehow cheat. People with PhD degrees cannot decide
to give up on their degrees because they cannot change the past. Therefore,
they were forced to meet the requirements according to the definitions of
"forced" that you, yourself posted.

> I must choose to do it under my own motivation and initiative. The
> people who run the Psychology department at the University of Wherever
> could care less whether or not I enter their program.

Your ignorance is showing, Larry. There is no argument over whether a
person has a choice whether to obtain a PhD degree or not. Many people
choose not to obtain a PhD degree. We are talking about the set of
people who have obtained PhD degrees. Of the set of people who have
obtained PhD degrees, all were forced to meet the requirements or
else they cheated. Those are the only two choices. Some of you on
this newsgroup seem incapable of understanding second level abstractions,
something most of us learn by age ten.

> Absolutely no FORCE will ever be applied to me at any stage of the process.

According to the definitions of "forced" that you, yourself, posted
people are forced to meet the requirements for a PhD degree before
receiving a PhD degree. Your argument is with the definitions that
you posted. What does it sound like when you argue with yourself,
Larry?

> You will NEVER convince me that anyone was "forced" by the FCC to
> take ANY kind of amateur radio license exam.

Part 97.501 "An applicant *MUST* (i.e. is forced to) successfully pass
an examination for the issuance of a new amateur operator license..."

What is it about "must" that you do not understand? From Webster's:
"must - to be required or compelled to, as by the use or threat of
force. You must obey the law."

Do the FCC requirements carry the force of law? Of course they do.

Licensed amateur radio operators were forced by the FCC to meet the
FCC requirements which carry the force of law and are enforced.
According to your very own posted definitions, that is "forced",
by definition. Why in the world would you post definitions and
then argue with your own posted definitions? According to *YOUR*
posted definition, anything that is enforced is forced. Are the
FCC requirements enforced? Of course they are, Larry, so you have
proved yourself to be wrong. All I have done is pointed it out.

If there was no other choice, then you were forced to take and pass the
exam in order to obtain an amateur radio license. It says so in the
FCC Rule Book.

Part 97.501: "An applicant *MUST* successfully pass an examination for the
issuance of a new amateur operator license..."

From Webster's: "must - to be required or compelled to, as by the use
of or threat of *FORCE*. You *MUST* obey the law."

Do the FCC requirements carry the force of law? Of course they do!
It's as simple as that and you seem incapable of comprehending that
simple fact. But don't fret about it. My three year old grandson
would also have trouble with that concept.

Since we know you have an amateur radio license, the only other choice
available to you besides submitting to the force of law embodied in the
FCC requirements was cheating.

From the "FCC Rule Book" Part 97.501 "An applicant *MUST* successfully
pass an examination for the issuance of a new amateur operator license..."

From Webster's: "must - to be required or compelled to, as by the use
or threat of *FORCE*. You *MUST* obey the law."

Do the FCC requirements carry the force of law? Of course they do!
Did you submit to the force of law, embodied in the FCC requirements
and enforced by the FCC, in order to obtain an amateur radio license?

I believe you did. I sincerely wish you would stop saying that you took
that other route.

Well, Steve is continuing to threaten to sue me so this will be my
last posting on the subject.

For the record: I don't think Steve cheated. He denies that he
submitted to the force of law embodied in the FCC requirements
while maintaining that he meet those same requirements. That
sure seems like a contradiction to me but Steve has somehow
rationalized that contradiction in his own mind.

All my statements have been conditional if/then statements with
the 'if' sometimes being implied so the outcome of those statements
depend on whether Steve satisfied the 'if' portion or not. And it
is entirely up to him whether he satisfied the 'if' portion or not.

Steve claims that I blatantly called him a cheater and a liar
and I should retract or get sued. I'm trying to figure out
how to retract statements that I never made. Anybody have any
ideas on how to go about doing that?

Did a ham submit to the force of law (embodied in the FCC requirements
and enforced by the FCC) in order to obtain an amateur radio license?

If the answer is 'yes', he was forced to meet the FCC requirements.

If the answer is 'no', he cheated. It really is that simple.

From the "FCC Rule Book" Part 97.501 "An applicant *MUST* successfully
pass an examination for the issuance of a new amateur operator license..."

From Webster's: "must - to be required or compelled to, as by the use
or threat of *FORCE*. You *MUST* obey the law."

Do the FCC requirements carry the force of law? Of course they do!

You are just being silly, Steve. I don't want you to follow through on your latest silly threat to sue me so I am retiring from your silliness. For the record: I never said you cheated and I do not believe you cheated. It was you who implied that you didn't submit to the force of law embodied in the FCC requirements allowing some conclusions to be drawn. However, you have indeed lied about what I said. I never said you cheated. I said, if you didn't submit to the force of law embodied in the FCC requirements, then you cheated. Whether that statement is true or false was up to you, not up to me.

> I have never said that "words don't mean what words mean", Cecil, in any

Of course you have, Steve. I posted the dictionary meanings and you said you disagreed with those meanings, i.e. words don't mean what words mean.

If I recall correctly, this thread started with the premise that if one wants an amateur license, they are forced to meet the requirements. It seems to me that the term "forced" has been discussed in detail. Perhaps the real crux of the problem is that there is some misunderstanding or disagreement about the meaning of the word "if."

Yep, and golly gee, I wanna jam the marine radios. Please read the following. Your nice, church-going, next door neighbor ... and note the unrelated felony charges ...

* FCC levies $10,000 fine for unlicensed hamming: The FCC has levied a $10,000 fine on an East Palo Alto, California, man for transmitting without a license on amateur frequencies. Earlier this year, the Commission had proposed forfeitures totaling $17,000 in the case of Joshie Yasin Nakamura Sr, who also is known as "Mervyn Ehambrave" and "Marvin Eugene Barnes." The FCC's Forfeiture Order, released July 6, offered no explanation for the discrepancy in the figures. The fine stemmed from complaints about Nakamura to the FCC that date back to late January through March of 2000. The Commission says it heard from the amateur community and from members of the ARRL Amateur Auxiliary that an unlicensed station was operating on several amateur frequencies. Nakamura reportedly is being detained by state authorities on unrelated felony charges and did not respond to the earlier FCC notice.--FCC

The rules are to allow us to maximize usage of the rf spectrum. This means you can watch satellite tv, conventional tv, radio, run your cell phones - without interference. He who lives by the sword ...

Nakamura reportedly is being detained by state authorities on unrelated felony charges and did not respond to the earlier FCC notice.--FCC

ps - I do not care about a few extra watts on the CB band. The freebanding, as I have mentioned before about your level of visibility, - proceed at your own risk.

I posted a truth table for an if/then statement, Ed. It didn't seem
to make any difference. Some people seem to be incapable of understanding
that level of abstraction. They somehow have trouble understanding how
both the following statements about you can be true.

If you were a woman, you would be ugly.
If you were a woman, you would be beautiful.

Both these statements are true according to the accepted rules of
conditional logic. I am on the verge of being sued because someone
doesn't understand those rules.

Not to be confused with the felony charges of grand theft of radio
equipment when this beanbag opened the trunk of his car, without
being asked, to brag to the UNIFORMED Deputy Sheriff about the
equipment that he had boosted from the Sheriff's Department.

The unrelated felonies have to do with certain white powders which
may keep him off the air for the rest of his life.

Good to see that Mervyn - a well-known client of the FCC, Sheriff,
USCG Investigations, and now other Feds - is still up to his old
tricks.

And it is very simple in its content, you cannot get a license without taking the exams, no other choice.

Steve to examiner: I want to get my ham license
Examiner: Fine, you have to take the exams.
Steve: I don't HAVE to do anything, you can't FORCE me to take the exam.
Examiner: If you want the license you WILL take the exam, period.
Steve: I want the license but you cannot force me to take the exam.
Examiner: It is very simple, no exam, no license, you have no other choice.

Notice it doesn't say you "MAY" or "IF YOU WANT TO" successfully pass an examination, it says you "MUST", no choice, you "MUST" take and pass the exam. You are FORCED to take the exam if you want the license. Decline to take the exam and no license.

You voluntarily decide whether you want to take a Ph D. in Psychology,
but to get that degree you MUST meet the requirements, you MUST take and
pass all the courses, no other choice, you MUST do it. Try getting the
degree without taking and passing all the courses.

>going to be anything at all like what we have in this country today?

We don't. Neither do we know that it won't be.

The question is, does "one world government" always a bad thing? In other words, is there no way it could be good? What if a world government were based on the US Constitution, with slight changes to apply to the whole planet?

>Liberals love to envision a paradise with people around the world
>living in peace, all led by a benevolent world government.

The terms "liberals" and "conservatives" are almost meaningless today. They are like using a scalar to describe a vector quantity.

I would say "optimists love to envision a paradise with people around the world living in peace, all led by a benevolent world government." Is such a thing possible? I say YES. Not easy or quick, but possible, someday.

>What if
>Hitler controls that government instead?

He's been dead more than half a century.

>Today, if all else fails, we
>have the ultimate freedom to just leave the country if we don't like
>the government. That option will be gone with one government
>throughout the world.

Again, who says what a "world government" would be like? If people in California get fed up with California, they can move to New York, for example. Lots of variety in this one country.

> Are we willing to give up our freedom of speech, freedom of
>religion, freedom to associate, other freedoms under the Bill of
>Rights, the Constitution, or perhaps even the right to vote, to have
>that one world government?

Of course not. Nowhere do I say "one government at any price".

> None of those are guaranteed to be part of
>that new world government.

Nor are they guranteed to be eliminated from it.

>Or, if they are included, will remain part
>of that government with billions of people around the world voting

>the worst idea that liberals have ever come up with. And, in my
>opinion, if liberals in this country attempt to put such a government
>in power, there should be an immediate civil war to stop it (and I'm
>not joking)

No matter what form such a government took?

--

There was a time when people thought that slavery was part of the natural order of things. No way a civilization could exist without slaves, they said. Nobody will do the really awful jobs, they said. Great philosophers and religious leaders defended slavery. But over time slavery became obsolete, and the very idea is repugnant to almost everyone on the planet.

When the USA was founded, most of the Western world expected it to fail. No way a country could exist without a ruling class of nobles, they said. The "rabble" (meaning everybody of perceived lower social class than the person speaking) would not know who to vote for, they said. The young USA itself had all sorts of division over the power of the states vs. federal power, who gets to vote, slaves, landowners, etc. The idea that women would vote wasn't even discussed. Conventional wisdom of the time said the whole thing was nuts, and four-score-and-seven-years later it almost fell apart. But it didn't.

I'll pose the question again, slightly differently: Is it impossible to come up with a form of world government that would be a good thing?

First off, I'd say that busses don't have tires, because "busses" is the plural
of "buss", which is another word for a kiss. Or a brand name of a fuse.

If you then said "buses don't have tires", then I'd say you didn't understand
the definition of bus, tire, or both. And that you were still mistaken.

Jim:

What I would like to know is this -- Why is "diversity" such a big thing with liberals? In the United States of America, there are no "aboriginal" Americans that I'm aware of. Even the so-called "Native American" Indians came from somewhere else -- across the land bridge from Asia. From a standpoint of our origins, we are ALL immigrants. Therefore, "diversity" in American culture is NORMAL. In fact, a diversity of ethnic origins actually DEFINES American culture. My own ethnic origins are German and Austrian, with Jews on both sides of the family (in spite of the fact my parents and my siblings and I were raised Roman Catholic). However, I am lucky enough to live in a country where I have come to know, love, and admire people from virtually every other major nationality. I enjoy their food, their cultural traditions, and, whenever I am fortunate enough, their hospitality. I think the most boring thing in the world would be to live in a country where the people were of one race -- and wanted to keep it that way! Sure, they have that right, but look at what they are missing! Why do you think there are more French, Chinese, Thai and Italian restaurants in Japan than there are any other type? They are trying to import some "diversity" into their otherwise homologous society!

>> Why reduce that
>>diversity with a single world government?

Why, indeed! America is the shining example of diversity on the face of this planet! If diversity is such a good thing, why would we want to be lead by a "One World" government based, say, in Brussels, Belgium -- where there are nothing but white Western Europeans?

>>A one world government is
>>the worst idea that liberals have ever come up with.

Not to mention one of the most illogical. If "diversity" is a
virtue, then, were I a liberal, I would consider a One World
government to be the most evil thing that could possibly
happen!

>>And, in my
>>opinion, if liberals in this country attempt to put such a government
>>in power, there should be an immediate civil war to stop it (and I'm
>>not joking)

No, you're not, because it is no joke. Americans like myself,
who love freedom, independence, AND diversity are more than
willing to risk our lives to defend all of the above! Any power
that attempts to enslave Americans under a "One World"
government will be in for a rude awakening!

>No matter what form such a government took?

What form of a "One World" government would you be willing to
live under, Jim? Remember -- once in place, someone who isn't
an American, and doesn't even live in the United States, will be
telling you how to live your life. A "One World" government would
obviously be a Socialist government -- so you, as a former
American, will no longer have the rights you have grown accustomed
to -- such as ownership of private property, freedom of speech,
freedom to practice your chosen religion, freedom to use your
ham radio gear as you wish, etc.

>There was a time when people thought that slavery was part of the natural
>order of things. No way a civilization could exist without slaves, they said.

If they could have seen what has happened in the U.S. over the last
forty years, with the creation of the Welfare State, and the federalization
of our culture based on the fact that certain Americans of African
origin had ancestors who were used as slaves, they would never have
given slavery a second thought. The last thing I would ever want to
do is own another person -- because all that does is create generations
of people who can take undeserved political advantage of that fact in
perpetuity.

>Nobody
>will do the really awful jobs, they said. Great philosophers and religious
>leaders defended slavery. But over time slavery became obsolete, and the very
>idea is repugnant to almost everyone on the planet.

Slavery shouldn't be possible in the U.S. anymore. After all, every American
has the Right To Keep and Bear Arms. If someone tried to enslave me,
he'd have to dodge some lead first, and is quite unlikely to take me alive!
And even if he did, he can lead me to the cotton field, but he can't make
me pick! I'd probably die of the abuse that followed, but what good would
I be to him as a slave, then?

>When the USA was founded, most of the Western world expected it to fail. No

>with a form of world government that would be a good thing?

Yes, quite impossible. The form of government a nation adopts depends
on the nature of that nation's people. America is a nation created by
people who craved freedom from oppressive rulers, by people who were
willing to sacrifice their lives and fortunes to oppose such oppression.
The minute any American can conceive of living under a One World
government, which would revoke the sovereignty of our nation, limit our
freedoms, and dictate how we should live our lives, we are no longer
Americans. We would be slaves.

>degree without taking and passing all the courses.

GH:

The fact that I *must* take and pass any required coursework for a
degree is simply something that I, as a mature, responsible adult,
accept without complaint. If I disagree with the requirement, I must
be prepared to accept the consequences of not being awarded the
degree I desire. All of this is purely my own, individual, voluntary
choice. Nobody is forcing me to do anything, since I always have
the option of not pursuing that particular degree.

If you are a mature, responsible adult, you will understand and
accept this. Are you a mature, responsible adult?

Even if you do not accept it without complaint, you MUST take and pass the courses to obtain the degree. No exception, you can't obtain the degree without taking and passing the courses, with or without complaint.

>If I disagree with the requirement, I must

Then your only choice is whether you wish to obtain the degree or not, but to obtain the degree you "MUST" meet the requirements, no choice there. If you want the degree you are FORCED to meet the requirements, no choice.

This is obvious to any mature, responsible adult.

Jim:

History has shown that to be quite unlikely. The last person to try this was Adolf Hitler; his "Thousand Year Reich" fell short by a mere 988 years! Had it been a good thing, I expect that it would have lasted a bit longer!

The problem with those who advocate a One World government is that they seem to feel that the global hegemony isn't being shared equitably. This may in fact be true, but any inequity smaller, so-called Third World nations perceive is mainly due to the fact that the people of these nations haven't made the sacrifices necessary to secure their own personal freedom and liberty. We have sacrificed greatly to make America the strong, wealthy, and free society it is today. Other reasons for inequitable distribution of hegemony may well be beyond the ability of the citizens of Third World nations to manage for themselves; things such as inept and/or corrupt leadership, few readily available natural resources, a poor agricultural environment, etc. The One Worlders want to solve these problems by making everyone suffer equally, as opposed to solving the problems of individual nations and helping them achieve their own freedom and independence. The leaders of the Third World are more interested in punishing America for becoming strong and wealthy than they are in taking good advantage of the universal generosity we have shown to them in times of crisis.

Surely, part of the problem is due to an overly "politically correct" foreign policy on America's part. I believe that wherever corrupt leaders exist, America needs to take a leadership role in eliminating them -- in order to create an environment in smaller, poorer countries that empowers their people and gives them the freedom to create an independent, free nation with a growing economy.

Right now, the United Nations seems to be more interested in punishing America for it's wealth than it is in encouraging it's member nations to be more like us. Witness the Kyoto Treaty. Give me a break! If that's a taste of "One World" government, I think I'll need some more ammunition!

> be.

So, are you willing to trade what we have, a known entity, for something unknown? We have a government, Jim. And, while we have plenty of problems, there is not a shred of evidence that a world government will have any less problems (and may have far more).

> The question is, does "one world government"
> always a bad thing?

If it results in the loss, or the reduction, of my say in that government, then a one world government is absolutely a bad thing. And, at the very least, a one world government will result in a reduction on my political voice (the power of my one vote will be reduced to one in several billion instead of what it is today). And, based on what I see around the world today (with governments), I'm fully convinced that a one world government will be far worse than that.

Likewise, if it results in even a slight loss of my freedom, then a one world government is absolutely a bad thing. And, like I've already said, a one world government totally eliminates the other governments around the world (hence my ability to flee elsewhere when a government becomes abusive would be gone - a loss of a freedom).

> In other words, is there no way it could
> be good? What if a world government
> were based on the US Constitution, with
> slight changes to apply to the whole
> planet?

No, there is no way it can be good!

> I would say "optimists love to envision
> a paradise with people around the world
> living in peace, all led by a benevolent
> world government." Is such a thing
> possible? I say YES. Not easy or quick,

> but possible, someday.

And what are you going to do with the people who disagree with you? There is always going to be people like me - people who don't like the idea of a one world government or don't like that one world government that you created. The only way you're going to have what you seek above ("a paradise with people around the world living in peace") would be to eliminate all opposition. Are you going to throw us in prison because we demand our freedom from your government? Or are you simply going to kill us in the name of peace? Or perhaps you envision a government using drugs, or torture, to eliminate opposition?

> > What if Hitler controls that government
> > instead?
>
> He's been dead more than half a century.

Don't be fatuous, Jim. You know exactly what I was asking and this is an extremely important question. What happens when that government turns out to be a horrible one (a government with massive power around the world to control everything you do or say) instead of the benevolent government you envision? There would be no place for you to run (that government has control of the whole world).

> > Today, if all else fails, we have the
> > ultimate freedom to just leave the
> > country if we don't like the government.
> > That option will be gone with one
> > government throughout the world.
>
> Again, who says what a "world government"
> would be like? If people in California get
> fed up with California, they can move to
> New York, for example. Lots of variety in
> this one country.

We're not talking about California or New York, Jim. We're talking about a one world government. If you leave California, you do not free yourself from the control of the federal government. The same is true for leaving New York. With one government around the world, no matter where you moved in the world, you will not be free of that government.

Lets go back to the Hitler example. In Germany, you were not able to free yourself from Hitler's control by fleeing from Munich to Frankfurt. The only way to escape Hitler's grip was to flee from Germany. If there was one government around the world, and that government turned out to be more like Hitler's government than the benevolent one you envision, there would be no escape from that government. That is a severe loss of freedom.

> Are you saying there is NO WAY a world
> government could ever be a good thing?

That's right, Jim. Think about it. We have a hard enough time just keeping relative peace in this country. How in the heck to you expect the achieve that world-wide? We are extremely diverse people. Even within the same groups of people (whites, blacks, asian, etc), there is extreme diversity in views, thoughts, customs, and beliefs. How can one government even hope to bring all that diversity together (we can't even get together on the relatively small amount of diversity we have in this country today)?

> > Who are the people creating this
> > government? What are their goals
> > and agendas? What are they getting
> > out of this (you can bet your bottom
> > dollar that they're getting something)?
> > Will they allow any one of us to be
> > part of that government? Do they even
> > like us?
>
> Ever think the people creating it could
> use the USA as their model?

Why would they? A large number of people around the world hate the United States. Heck, a large number of people right here in this country hate the United States. Why would any of those people want a government based on that? How do you know the people with the power to create this one world government would want a government based on that?

> > Liberals love to promote the idea
> > of diversity.
>
> Is diversity bad?

Diversity, in itself, isn't bad. But if it is forced onto people that don't want it (like it is being forced on many Americans today), then, absolutely yes, diversity is a bad thing. Anything that is forced on a person who doesn't want it is a bad thing, even if that thing is not bad when taken alone.

> > Why reduce that diversity with a
> > single world government? A one world

> > civil war to stop it (and I'm not joking).
>
> No matter what form such a government took?

Absolutely. What am I not making clear to you? In my opinion, government is always something that must be controlled. History has clearly shown that without control, every government will always turn bad. And the best way to do that is to keep government small

(manageable) and local (where it can be watched all the time). As a people, we are already losing control of our own federal government (too large, too remote, and too unmanageable). A world government would only be a thousand times larger and a thousand times worse.

> There was a time when people thought that

> repugnant to almost everyone on the planet.

Comparing the concept of government to the concept of slavery is a stretch at the very least, but I'll try to respond the best way I can. First of all, slavery ended (well, mostly - slavery still exists in Africa). But you're not talking about ending government - you're talking about creating another government.

Second, slavery ended because of a moral choice of the people (slavery is evil). Government is not based on morality - its based on social necessity (the need social order and unity). Therefore, the concept of slavery is obsolete (well, as long as people maintain the same morals, it is obsolete), but the concept of government is not.

> -seven-years later it almost fell apart.
> But it didn't.

Well, at least not yet anyway. Isn't that exactly the goal of those seeking a one world government - the elimination of the United States as a country? Isn't that exactly the goal of those seeking diversity - the elimination of all common bonds and unity in this country (the elimination of our common identity, our common purpose, our common culture, our common beliefs)?

When this country began, we all shared a common identity (Europeans living in America). That is gone today (we're not Americans - we're african-americans, asian-americans, etc). When this country began, we all shared a common purpose (to create a country based on our common ideals and beliefs). Those ideals and beliefs are being ridiculed today. When this country began, we all shared a common culture (European). That is gone today. And when this country began, we all shared common beliefs (freedom of religion, freedom of speech, etc). All of those have been under massive assault for many years.

> I'll pose the question again, slightly
> differently: Is it impossible to come

Well then, you have just admitted that if you *must* meet the
requirements, you have been forced to meet the requirements.

From Webster's: "must - to be required or compelled to, as by the use
or threat of *FORCE*. You *MUST* obey the law."

> If I disagree with the requirement, I must
> be prepared to accept the consequences of not being awarded the
> degree I desire. All of this is purely my own, individual, voluntary

> the option of not pursuing that particular degree.

If you are required by circumstances, you are forced. Even according
to the definition that you, yourself, posted to this newsgroup, if
a requirement is enforced, the people fulfilling the requirement
were forced to do so. How can you argue with your own posted
definition?

> If you are a mature, responsible adult, you will understand and
> accept this. Are you a mature, responsible adult?

You are completely missing the point, Larry. There exist two groups
of people. One group is without a license, permit, degree, or
whatever. These are the people who chose to be without the license,
permit, degree, or whatever.

The other group who obtained the license, permit, degree, or whatever
HAD NO CHOICE, i.e. they were forced to meet the requirements for the
license, permit, degree, or whatever. The only people who were not
forced to meet the requirements are the people who didn't obtain the
license, permit, degree, or whatever.

There are no licensed hams who were not forced to meet the FCC
requirements (except for cheats). A few of you continue to show a
gross amount of ignorance of the rules of conditional logic. Are you
really incapable of understanding a second level abstraction?

Larry, if you were female, you would be a prostitute.

What you believe or feel about the truth of that statement is irrelevant.
The statement is objectively true according to the rules governing conditional
statements. Ignorance is no excuse, Larry. Any mature, responsible adult

would study the rules governing conditional statements and accept them.
Immature, irresponsible adults tend to deny reality.

Larry has contradicted himself. He seems to be another one who believes
that words don't mean what words mean.

From Webster's: "must - to be required or compelled to, as by the use
or threat of *FORCE*. You *MUST* obey the law."

Anything the government says you *must* do, i.e. is an enforced
requirement, proves "the use or threat of force" according to the
definition of "must" in the context of governmental regulations,
straight from the dictionary.

Twist, I saw the
article about freebanding. For what it is worth, read the following. It does
make interesting reading ...
* FCC levies $10,000 fine for unlicensed hamming:
The FCC has levied a $10,000 fine on an East Palo Alto, California, man for
transmitting without a license on amateur frequencies. Earlier this year, the
Commission had proposed forfeitures totaling $17,000 in the case of Joshie Yasin
Nakamura Sr, who also is known as "Mervyn Ehambrave" and "Marvin Eugene Barnes."
The FCC's Forfeiture Order, released July 6, offered no explanation for the
discrepancy in the figures. The fine stemmed from complaints about Nakamura to
the FCC that date back to late January through March of 2000. The Commission
says it heard from the amateur community and from members of the ARRL Amateur
Auxiliary that an unlicensed station was operating on several amateur
frequencies. Nakamura reportedly is being detained by state authorities on
unrelated felony charges and did not respond to the earlier FCC notice.--FCC
ps
- I do not care about a few extra watts on the CB band. The freebanding, as I
have mentioned before about your level of visibility, - proceed at your own
risk.

N2EY wrote:
> So any world government must be structured like the UN General Assembly? Why?

It's not a "must", just a very high probability. It wouldn't be "world government" if Haiti didn't have a vote. It's likely we would have, for instance, Chinese troops enforcing world government in the US, US troops enforcing world government in Zaire, etc. so the troops would not have to fire on their own people.

> It makes all the difference in the world. Things like a constitution come to mind.

Odds are, "a constitution" would bear absolutely no resemblance to The Constitution. We will never be more free by compromising with a world that is less free. When you add milk and dirt, all you get is dirty milk.

> You're not being very imaginative, Cecil.

I'm being realistic. To quote Roger Whittaker, "If is for children, spinning daydreams."

I don't know if you remember the news that came out after the Gulf War
was over. It turned out that the Iraquis had harmed no babies and the
reports that they had killed babies in Kuatti hospitals were nothing
but false propaganda.
Obviously those false reports gave hawks a good reason to
intervene...even some of the folks who wouldn't enter a war to help
the oil lobby or the Jewish-American Israeli lobby.

Yawn. And what have you contributed? We have garbage collectors, machinests, school teachers, college professors, and astronauts amongst our midst. I haven't heard much 'holier than thou' attitudes on the air. Thanks to W1RFI for an excellent reply to your post. Myself, I have only once caused a bit of a stink when someone came on the frequency (which was NOT occupied). He wanted me to move to the other end of the band because of a 'very important DX contest'. I was trying for a stateside phone patch. I was operating from KG6NAC, then the US Naval Hospital on Guam (the patch was needed for some patients). I was not an old codger, I was all of 20 years old at the time, and, yes, I did get a bit short - suggesting that he give me a landline so I could tell him what I thought of him (I stated I would not tell him on the air because I valued my ticket). Otherwise, I am always accomodating.

Other than that one minor problem on Guam, anyone is welcome on whatever frequency I am on (as LONG AS THEY ARE LICENSED). If you have encountered a problem over that, I am sure that the others in the newsgroup will vouch for me when I tell you it IS illegal for a licensed amateur to contact an unlicensed station. There are rules that we must abide by. For us, it could mean the loss of the ticket (or even more - in my case, my GROL as well. And then there might be a fine. I cannot afford a $10,000.00 NAL). I also have no problem moving if asked. Again, by a licensed station. Otherwise, in the case of an unlicensed station, they may not legally cause interference to a licensed station and must put up with any interference that a licensed station might cause. Perhaps this is the source of your problem?

You tell me, Jim, what is to prevent Great Britian and Australia
from having a Second Amendment guaranteeing the right to bear arms?
Maybe I should instead ask - what planet do you live on?

> >and close to a majority of people in
> >this country would do away with the US Bill of Rights if they had
> >a chance to do so.
> >
> Nonsense. Where do you get these ideas?

From the US citizens who want to repeal the Second Amendment.
The vote would be very close to 50/50. If we can't trust our own
citizens to uphold the Bill of Rights, we sure cannot trust
the rest of the world to do so.

Sorry Dave, I don't have that much faith. But my pastor says that
every word in the Bible is absolutely true. Some day I'm going to
ask him what is the difference between giants and Nefilim. King
James version says "giants" and the later new revised version says
"Nefilim".

Why is that likely? We don't have New York state troopers enforcing the law in Rhode Island, or Texas Rangers enforcing the law in California. Isn't it the usual case that law enforcement officers live near where they work?

We have a a limited form of "world government" now, in the form of organizations like the ITU. Do foreign law enforcemtn agencies enforce the ITU treaty in the USA? Nope.

It wouldn't be the first time I was in trouble with the wife. I greet her each morning with words, "I'm sorry," just to make sure I'm covered for the previous day. ;-)

The wishes of the people. Both those countries have elected bicameral
Parliaments.

Do you think Great Britain and/or Australia are totalitarian police states?

>Maybe I should instead ask - what planet do you live on?

You talk about freedom, Cecil, but you display a sad lack of civility for
differing points of view.

>
>From the US citizens who want to repeal the Second Amendment.

You polled all of them?

>The vote would be very close to 50/50.

It takes 2/3 to amend the Constitution. A simple majority would fail to change
it.

>If we can't trust our own
>citizens to uphold the Bill of Rights, we sure cannot trust
>the rest of the world to do so.

Seems to me you're saying that the Bill of Rights is never to be changed,
regardless of what the people want. The Bill of Rights is not perfect. It does
not contain equal rights for women or black people - those things came later.

And do you think one world government is going to magically change
the wishes of those people? I do not want my inalienable rights eroded
by the majority. I do not like Hemlock.

> Do you think Great Britain and/or Australia are totalitarian police states?

If they violate the Bill of Rights, they are. :-)

> You talk about freedom, Cecil, but you display a sad lack of civility for
> differing points of view.

When those differing points of view don't match reality, I start
to wonder.

> It takes 2/3 to amend the Constitution. A simple majority would fail to change
> it.

Can you guarantee that to be true under a one world government? Can
you even guarantee a Bill of Rights under a one world government?

> Seems to me you're saying that the Bill of Rights is never to be changed,
> regardless of what the people want.

Repealing the second amendment, for instance, would be tyranny of the
majority. Civil wars have been fought over such.

Here's Larry's exact words.

"If not, when Civil War II starts, I'll be busy shooting at
red-necked, bearded, Bible-thumping, tobacco-spitting white
men driving pickup trucks!"

Some of us Southerners pointed out - that describes a lot of
regular posters to this newsgroup.

I agree partly. Much of the rest of the world is moving towards more
capitalism (former Soviet Union, China, etc.).

> Most of the world is moving their economies towards a mix
> of socialist and capitalist, like that found in Germany, Japan, and so
> forth (utilities mostly government owned, with strongly regulated
> businesses elsewhere).

They've been that way a long long time.

> When I see the electricity mess in California,
> I do see some advantage to that mix. I'm not at all convinced that
> business should control critical segments of our economy (utilities, etc).

Agreed! I would phrase it this way: Most things are best handled by a
free market capitalist econonmy, with varying levels of regulation.
Some things are best handled by regulated monopolies, and some things
can only be done by the govt. Knowing where the dividing lines are is
the key.

The electricity mess in CA is due to a host of problems:

- Lack of excess capacity
- Sharp increases in demand
- Bad rate regulation
- Lots of capacity offline at the same time

The lack of excess capacity is due in part to the move from NIMBY (Not In My Backyard) mindset to the BANANA (Build Absolutely Nothing Anywhere Near Anything) philosophy. Another factor is that utilities in the '80s and '90s weren't "glamorous" investments like the dotcomms. "Capacity" isn't just generating capacity, it's also transmission lines.

The sharp increases in demand came quickly, in large part due to the rapid increase in things like server farms, which eat electricity 24/7. The demand isn't just the equipment, but the lighting, air-conditioning, communication and other support infrastructure. Plenty of capital to build them, but not the boring old generators and power lines. And the new facilities can come on line in months while new generation and transmission takes years.

The real killer was the disconnection of generation rates from consumer rates. The electricity suppliers could charge "wahatever the market would bear", but the transmission/distribution outfits could NOT pass the increased costs onto consumers. Yet they were required to supply the energy regardless of cost. Bricks without straw.

The idea that the "free market" is the best venue for everything is as faulty as the idea that "the state" or "the workers" are the best venue. It all depends on the situation.

Bob:

I don't remember that, because I never heard it. And I never heard it because it was never reported. And it was never reported, because it just wasn't so! The Iraqi Army did commit the atrocities which were well reported after the invasion, including killing *Kuwaiti* babies in their hospital nursery wards.

>Obviously those false reports gave hawks a good reason to >intervene...even some of the folks who wouldn't enter a war to help >the oil lobby or the Jewish-American Israeli lobby.

Well, the reports weren't false, and they were, indeed, good reason to intervene. Now, pray tell, just what do you suppose the United States should do to "intervene" in the present Middle East crisis? We have supported Israel in every conceivable way, and what do we have for thanks? A largely Jewish-owned and controlled media which has destroyed American culture with it's liberal, socialist propaganda! I am not an Anti-Semite, but I'm not blind to the facts, either! I believe that the poor opinion that the typical American angry white man has of Jews is largely well-deserved!

Don't have to. The discussion is about whether any conceivable "world
government" could ever be a good thing. In other worlds, whether all
"world governments" would be bad.

> Why should we give up everything in
> return for promises of pie in the sky?

Who says we should give up basic human rights? Not me.

At one time, it stood for a states right to allow slavery and not pay Federal taxes, among other things. I believe the Confederacy admited that it was wrong about those things. Didn't it?

I always wondered why they chose the flag of England as their own, less than a hundred years after the Revolutionary War?

1. They hoped for British intervention that they came close to getting.

2. They owed the Brits tons of money.

The succession of the southern states had been building for decades prior to Lincoln's decision to free the southern slaves. So, while slavery was a factor in the succession of the southern states, it was not a key factor (most southerners didn't own slaves, hence that meant issue nothing to most southerners). As further evidence of the limited role slavery played in the creation of the confederacy, note that Lincoln did not give his emancipation proclamation (freeing southern slaves) until almost two years after the south seceded and the confederacy was created. One goal of the emancipation proclamation was focus attention on the slavery issue in an effort to drive a wedge between the confederacy and the European countries supporting it (many of those countries had declared policies against slavery by that time).

> I always wondered why they chose the
> flag of England as their own, less
> than a hundred years after the
> Revolutionary War?

I don't know for certain, but I suspect it was probably because many in the south were not thrilled about our separation with Europe during the Revolutionary War. As you may know, many in the south sided with England during the war (and they paid a very heavy price for that following the war). One of the reasons for siding with England was that they didn't fully trust the new government here (it was too much of a northern thing).

When the south later seceded (leading to the civil war), one goal was to re-establish closer relations with England. Many in the south still identified more with England than they did with the government here (many felt they were better off before the government here was created - the government was more oppressive than what they had before).

I don't know any of that for certain, but it is the feeling I was left with after reading about the south during that period.

> ....the challenge is to design a good one.

Since there is no single answer to "what is good for all", by definition there is no "good one" for the whole world.

A democracy would be "a good one" in some parts of the world.
A benevolent dictatorship would be "a good one" in some other places.
Some countries have decided that a high degree of socialism works.
Other countries have had bloody civil wars to rid their government of socialist leanings.

In other words, it's a dump huck idea.

Only a mind as narrow as yours would call something "dump huck". A rather childish outburst, to be sure.

The IDEA is fine. The application or implementation is the problem. The Nazi's tried to implement socialism. We KNOW how that worked.

The British and Canadians have had socialism for the better half of the last century with mixed results.

The civil war was not about slavery. Many Union officers had slaves.
Many Confederate officers did not have slaves. After suffering a
60% federal tax bracket in my lifetime, I tend to agree with them on
federal taxes. IMO, the states should collect all taxes and then
grant the federal government the percentage of taxes that they
deserve. IMO, that would support the armed forces and any federal
court system and federal police system required. As The Constitution
clearly states, everything else should be left to the states.

Takes to sides to make a war, Cecil. For the North, it was definitely about slavery. Southerners take a different view, I know. They didn't cotton to being told they couldn't have slaves. So from the Souths perspective the war was about not being told what they could or could not do. The fact that they didn't agree with the abolition of slavery can hardly be considered irrelevant to the advent of the Civil War.

The Federal Reserve was formed in 1914. What on earth did the USA do
in the 100+ years before that? Did you ever hear of bank notes? Why
did the Great Depression happen only 15 years after the Federal Reserve
had been established? Cause and effect?

Did you experts know that Robert E. Lee did not support the issue of slavery?

Did you know that Abraham Lincoln wanted to give the blacks a home in Africa?

Did you know that many of the founding fathers of this country were slave holders?

And did you know that after the battle of Gettysburgh and Vicksburg, (the Union finally having won something) that there were riots in the streets of the northern cities...against the war. Against the draft? And did you know that at THAT TIME IS WHEN SLAVERY BECAME A ISSUE in the WAR.??

It was indeed an issue. But NOT THE ONLY ONE. The main one, and STILL IS THE MAIN ISSUE, was STATES RIGHTS. And whether there would be a strong Federal Government, or whether States would INDEED have the authority as granted by the Constitution.

You Northerners have NO CONCEPT of what was lost do you? Well I'll tell you what was lost. The Constitution of the United States was lost.

No, it wasn't. Most in the North didn't give a darn about the South's secession until Fort Sumter was attacked. At that point, the North's honor was at state. So, while I'm sure many in the South didn't like Lincoln's attitudes about slavery, that was not the driving force behind the South's secession, nor did become a key issue in the conflict for almost another two years (with Lincoln's emancipation proclamation).

> Southerners take a different view,
> I know. They didn't cotton to being

When the civil war started, nobody had tried to tell the South that they couldn't have slaves. Again, Lincoln didn't address the subject for almost two years after the Civil War stated (and then Lincoln's emancipation proclamation only freed southern slaves, not northern slaves).

> The fact that they didn't agree with
> the abolition of slavery can hardly
> be considered irrelevant to the advent
> of the Civil War.

Abolition didn't occur until 1870, nine years after the South seceded and five years after the Civil War ended. Had it not been for the Civil War, opening the door to Lincoln's emancipation proclamation, slavery might not have been abolished for several more decades.

>The civil war was not about slavery.

I guess just about every historical text on the matter is wrong and you are right? I agree that the "basic principle" was states right's, and in that context alone I think the Confederacy was right...but the "right" they were fighting for was the enslavement of other human beings. That could NEVER be "right".

>After suffering a
>60% federal tax bracket in my lifetime, I tend to agree with them on

The Confederacy enforced taxes on it's member states that were staggering, even by today's standards. This included income taxes, property taxes and forced allocation of livestock and agricultural property.

>As The Constitution
>clearly states, everything else should be left to the states.

Yeah...like THAT will happen.

Nonsense. Do you know all of them?

There is that of God in every person. The argument that "enough" people aren't "good" enough or "smart" enough to rule themselves is the first step to slavery.

Exactly my point. If I remember right, the Emancipation Proclamation
only freed the slaves in the rebel states. When were the Northern slaves
freed? If the Civil War was about slavery, don't you think Lincoln would
have freed the northern slaves at the *beginning* of the war instead of
years later? If the Civil War was fought to end slavery, why did General
Grant still have slaves in the North for years after the start of the war?

So the victors get to rewrite history? Just like the Russian communists did?
Slavery existed in the Northern states throughout the Civil War. If the war
was over slavery, why weren't the Northern slaves freed? BTW, the Emancipation Proclamation
only
applied to the Southern states.

Sure. That doesn't mean it was right.
>
>And did you know that after the battle of Gettysburgh and Vicksburg, (the
>Union finally having won something) that there were riots in the streets of
>the northern cities...against the war. Against the draft?

The riots were about the draft because the draft was unpopular, and rich people could buy their way out of it. There was also concern among some low-wage workers that if slavery ended they would have to compete with more workers for jobs.

> And did you know
>that at THAT TIME IS WHEN SLAVERY BECAME A ISSUE in the WAR.??

Not exactly. Slavery was always an issue - it just wasn't THE issue.
>
>It was indeed an issue. But NOT THE ONLY ONE.

Agreed.

> The main one, and STILL IS
>THE MAIN ISSUE, was STATES RIGHTS. And whether there would be a strong
>Federal Government, or whether States would INDEED have the authority as
>granted by the Constitution.
>
The term "state's rights" is not well understood. What was really in dispute was whether states could enact laws that contradicted federal laws. In other words, the question is whether the states or the feds have the highest authority.

The slavery issue illustrates this. Could the feds outlaw slavery and then force the slave states to comply?

>You Northerners have NO CONCEPT of what was lost do you? Well I'll tell you
>what was lost. The Constitution of the United States was lost.

Nonsense. It was redefined, that's all.
>
When the colonies won their independence, there was a lot of debate on how the new country would work. The USA operated for a few years under the Articles of Confederation, which resulted in a loose alliance of the 13 states.

The Constitution was a compromise created to hold the new country together and try to forge a national identity. The founders dodged the slavery question by having slave states and free states, ending importation of slaves in 1808 and by counting slaves a "three fifths of a man" in the census.

But there was a basic conflict between a nation that claimed "all men are created equal" and "endowed by their Creator with certain inalienable rights" and states who claimed that some people had the right to own other people as property.

Oddly enough, the British Empire ended slavery in 1820.

At the start, there was a pretty even balance between slave and free states. But over time the free states began to dominate in number and population. The abolitionist movement grew and the underground railroad got more effective. The political clout of the slave states continued to dwindle, and it was clear that they would eventually be marginalized if they stayed in the Union.

Most people who favored secession did not see slavery as the issue, but rather the threat to their whole way of life. They saw the North as being more and more industrial, urban, upwardly mobile and growth driven, with a flood of European immigration. On the other hand, the South was agricultural, rural, more socially stratified and more stable, with little immigration. They saw the loss of political clout in federal affairs as the end of their way of life. Secession was a way to prevent that loss.

Do you think that "state's rights" include the right for some people to own other people?

Strange, every historical text that I have ever read says that slavery existed in the Union States throughout the Civil War. If the Civil War was about slavery, the Union States were certainly hypocrites. The Emancipation Proclamation applied *only* to the Confederate states and wasn't effective until almost two years after the start of the war. In other words, the Union States were allowed to continue slavery after the Emancipation Proclamation. Does that sound like they were fighting against slavery?

FYI, the war started in 1861 and ended April 1865. The 13th Amendment, which ended slavery, was not ratified until Dec. 1865 *after* the war ended.

If the Civil War was about slavery, don't you think slavery in the Union should have ended at the start of the war instead of after the war was over?

Slavery was not illegal at the beginning of the Civil War and slavery was
outlawed in the Southern states before it was outlawed in the Northern
states. Talk about hypocrisy.

Keeping me from growing marijuana in my garden for my private use
is NOT "for the common good".

On a more general note: "For the common good" is not specific
enough to be a law. If the Nazi party ever came to power, they
may think it is in the common good to eliminate Jewish people.

One monor correction. Lincoln only freed the slaves in the 'States that were in Rebellion against the Union'. In otherwords, and this is the best part. ONLY in the STATES that were NO LONGER IN THE UNION.

So tell me...where did he get that right from? He was NOT THE PRESIDENT of those states.

Wow. That is pretty strong. Larry has often posted that he would not harm anyone except in self defense, but that post suggests to me that he is admitting that if law and order ever break down, as they would in a civil war, then he will start shooting at people just for the way they look, their religious beliefs and the type of vehicle they drive.

At least he is being honest that he would like to kill people for no reason, but chooses not to do so because we do have law and order to protect them.

What has brought about this change in Larry and his posts here?

He is forced (required by circumstances) not to kill people as
long as the murder laws are enforced. Would the murder laws be
enforced when there is civil disorder? Hard to say.

307. Let The Newsgroup Judge

Newsgroup: rec.radio.amateur.policy
Date: 2001-08-12 01:11:26 UTC
From: twistedhed@webtv.net
Message-ID: <2Jkd7.6627$NJ6.28369@www.newsranger.com>
Source record: 16551

I am a freebander.

I post in rec.radio.cb.

I do not care to obey FCC rules.

I run so-called illegal equipment and I occasionally speak out in favor of its use among my CB compatriots. I live in the Tampa Bay area where most of my time

is spent fishing, dealing in used car stereos, and freebanding.

For this, Leland Scott has singled me out for persecution.

That is why I am in the hammie room. Not to stir things up, but to let y'all be the judge of what is fair and what is obviously treachery.

Back when I labored for Bob Dole as a campaign worker I was privy to lots of classified information. Among other things, I know for a fact that the FCC does not care about CBers breaking the rules. I also heard many things about Area 51

and aliens that I will not go into here. Suffice to say, there is a lot more going on in the USA than meets the eye. Take my word for it, if I wanted to find

out who sent me the semen-encrusted jock strap in the mail earlier this year I could pinpoint the individual within seconds. But my energies are better spent elsewhere. Namely, shaming Leland Scott into admitting he is a self-aggrandizing

flippety-floo with a tendency to verbalize before cognation has taken place.

I say if hams really want to see what it is their kind is perpetuating and bad manners of the first order, then come into rec.rado.cb and observe Leland Scott's continued treachery and underhanded subversion of wht is obviously a growing hobby that will undoubtedly outstrip ham radio. Jealousy will only get you so far, Leland, and you forgot to take into account that I stand as a sentinel at the gates of the castle.

The first amendment, nor any other Bill of Rights item
for that matter, does not _grant_ rights, but
acknowledges them, and further forbids the
government to pass any law that would negatively
affect them.

>> > Like so many other Damned Yankees, Larry doesn't realize that, for
>> > the majority of citizens in the South, the Confederate flag stands
>> > for states rights and little else.

I've lost track of who said this, but here's my reply: For today's "angry white man," the Confederate Flag stands for Anti-Black, Anti-Jewish, Anti-Catholic bigotry, and very little else! It may have stood for state's rights at one time, but now the only "right" it stands for is the "right" of some slack-jawed, toothless, drooling, pot-bellied, cigarette-smoking, bearded, pickup truck driving, tobacco juice-spitting, beer guzzling, third grade dropouts to hate people who have the intelligence and ambition to make better lives for themselves than they (the aforementioned white trash) have themselves. If any of you see yourselves in this posting, I suggest you go down to the local store, pick up a case of PBR, drive your pickup back to your trailer park, raise your X-flag, pop open another beer, and drown your sorrows!

One thing I do like about white trash is that they know who their superiors are, and they generally keep in their place!

Don't know the code? YOU'RE NOTHING BUT A CBer.
Don't want to learn the code? YOU'RE NOTHING BUT A CBer.
Don't want to operate CW? YOU'RE NOTHING BUT A CBer.
Do you live on 2 meters? YOU'RE NOTHING BUT A CBer.
Do you check for
"poundage" on an S-meter? YOU'RE NOTHING BUT A CBer.
Do you scoff CW operators? YOU'RE NOTHING BUT A CBer.
Do you refer to CW as "beeping?" YOU'RE NOTHING BUT A CBer.
Do you refer to a "go-ahead beep" on a repeater a "ROGER BEEP"? YOU'RE
NOTHING BUT A CBer.
Do you operate a CB rig in your vehicle along with a ham rig? YOU'RE
NOTHING BUT A CBer.
Do you operate bootleg 11 meter "freeband" although you have a "ham
license?" YOU'RE NOTHING BUT A CBer.
Do you think that ham calls should be allowed on 11 meter CB? YOU'RE
NOTHING BUT A CBer.
Want the code testing dropped? YOU'RE NOTHING BUT A CBer.
Want code testing speeds reduced? YOU'RE NOTHING BUT A CBer. (And
probably a grade-school flunkie.)
Do you think that hams must coddle CBers and turn ham radio into CB "in
order for ham radio to grow"? YOU'RE NOTHING BUT A CBer.

And it doesn't matter if you have a "ham license." THERE IS NO
DIFFERENCE
BETWEEN YOU AND A CBer. Put a freebander or a CBer next to you and
share the
microphone -- no one would tell the difference. You ARE NOTHING BUT A
CBer masquerading as a ham and who "wants on" ham radio.

TRUE HAM RADIO IS NOT CB.

NO CODE = NO HAM. KNOW CODE = KNOW HAM.

> right from? He was NOT THE PRESIDENT
> of those states.

Actually, the answer to that is in the emancipation proclamation. In that proclamation, Lincoln refused to acknowledge that the states had actually seceded, but were instead in "armed rebellion" against the "authority and government of the United States." In other words, since the states were only in rebellion (had not actually seceded), those states were still subject to the laws of the United States. Of course, to make the emancipation proclamation stick, the North still had to repress the rebellion (win the civil war). Until that was accomplished, the proclamation was absolutely worthless in the secession states.

However, the emancipation proclamation did give serious pause to those countries considering support for the secession states - its one thing to support an independent country (the Confederacy) and quite another to support states in armed rebellion against an existing government. In the end, many of those countries were not willing to risk war with the United States to support states in rebellion (especially since those states, the Confederacy, might still lose the war).

Cecil is correct about when slavery was abolished, which means that I was incorrect when I said slavery was abolished five years after the end of the civil war. For some reason, I was thinking about the 15th Amendment instead of the 13th Amendment.

Ed/Cecil:

I am not "forced" not to kill people during times of civil peace. I choose to follow the Commandment "Thou Shalt Not Kill (murder)." I am not opposed to the concept of killing as an act of war, or in defense of my life or the life of an innocent third party. I would not want to have to do it, but if it were necessary, I would not be constrained against it. My hope and prayer is that I never have to be "forced" to take a human life, under any circumstances.

I doubt highly that Wayne Greene is a CW fanatic. I haven't a problem with that CW business. One guy on 444.850 was really pushing the fact that we should use CW. Fortuanately, the repeater owner was in the group. He gave me the ok. Hmmmm.... I can't understand why he didn't reply to my queries at 40 WPM cw. Of course, I could have gone a bit higher. Not much, but a bit.

Here's Larry's exact words. I didn't lie - I might have inferred wrongly.
What do you infer? I match 5 out of 6 of his criteria so I inferred
he would be shooting at me. His description exactly matches a host
of the male Southern Baptists living in Madison County, Texas.

In YOUR opinion, Cecil. You may be the 1 in 1000 that can smoke your dope responsibly. Dope users as a group, however, are NOT.

Unfortunately, in the history of the United States, dope, it's "distributers", growers and users, as a group, are an irresponsible and dangerous subset of our society.

It IS for the common good, Cecil. You don't agree with it, and that's your right (to disagree). Those of us that have to deal with the "collateral damage" of dope usage know better.

338. concern of a ham-wannabe

Newsgroup: rec.radio.amateur.policy
Date: 2001-08-12 19:30:11 UTC
From: Paul Friedman <paulfriedman@uswest.net>
Message-ID: <_NAd7.609$8f5.166930@news.uswest.net>
Source record: 16582
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc,rec.radio.amateur.policy

I'm sure that I have no business posting here, so apologies in advance.
I'm a 53-year old recent retiree. I finally have time to do something I have wanted to do for 40+ years...get my ticket and get on the air waves.

I was surprised, I admit, by the "new" licensing requirements. The written tests for Tech and General are not going to be a problem for me -- I am having trouble learning the code, though. I'm sure I'll eventually be able to drag my dyslexic mind to 5 wpm (certainly an easier goal then the 13 wpm I thought I was going to need).

Ok, enough of the background.. here's my concern, fwiw...

I've been lurking most of the rec.radio.amateur... newsgroups. I see an inordinate amount of yelling, screaming, name calling, and (pardon me) juvenile behavior. I am wondering if this is really a culture in which I want to invest considerable time, money, and emotional involvement.

Is the tone of the culture accurately reflected in the newsgroups? I certainly hope not.

Sorry to take up the bandwidth, but I felt a strong need to express my concern.

Hi, Paul:

Sadly, what you say is, to a point, true. Like so many other things, though, it is a VERY small minority that gets into the flame wars, both here and on the air.

Don't let them discourage you!

A few strategic BLOCK SENDER commands to most news clients and 99% of the problems are gone. I have less than 20 senders blocked and I seldom see the flap here or in RRAP.

Good luck on the studies and I hope you enjoy Amateur Radio as much as I!

Take Care & 73

Let's see now...there was a chap who delighted in sending
fecal matter or dead mice in boxes to individuals involved
in the 14.313 Net War..? Nah! Can't be him. Last I heard
he was in a home for the dottering. You have to admit however
that ole B---- had a original idea, and it really stunk up the proceedings
when a guy in Fla received "his" package full of turds in the 90's.
Ah....those were the good-ole-days of ham radio. When hams
behaved like monkeys in a cage and threw their feces at the zoo
patrons.

Paul, take it from an old timer of almost 56 years as a ham, that the
Internet and amateur radio are two completely different things!

Ham radio is greatly different in many ways from when I started, but so is
the general population, the accepted behaviors in public, the acceptable
language, etc. Hams are people, too, so you have to expect things to change
with time.

But, NO, in my experience and judgement, what you will encounter on the ham
bands will be nothing like what you can read on these newsgroups.

As a suggestion, concentrate on your study and code work, and just ignore
the newsgroups until you get your ticket, get a station on the air, and get
some operating time under your belt.

Good luck and welcome to a great hobby!

Then it's the LAW that's bad.
>
>On a more general note: "For the common good" is not specific
>enough to be a law.

It's the basis of laws, though.

>If the Nazi party ever came to power, they
>may think it is in the common good to eliminate Jewish people.

And lots of others. But thinking that way doesn;t mean they could do it.

First, they would have to come to power.
Second, they would have to get such laws passed.
Third, they would have to withstand court challenges to those laws.

Checks and balances, Cecil.

A more accurate reading of amateur radio would be to listen to the bands. You will find then that these newsgroups dont reflect the amateur radio body, except for the antenna, equipment, homebrew, swap, and to a lesser extent the space, vhf and packet groups. The Misc group is attended by a bunch of rude, obscene foulmouthed juveniles, and thank the waves that they are using the group and not the radio. There are plenty of good people all around the world for you to have enjoyable qso's with, so by all means go for it, and ignore the bs on these groups.

Marty:

Thanks for the comments. I have used the dreaded Black Senders. In fact, that's what caused me to send my message. I have more Black Senders issued for the ham groups (well, resulting from my reading of these groups) then for all my others combined.

I'm chalking all this up to me having a bad hair day -- hard to do considering my lack of any kind of hair, but probably worth the effort. <grin>

I still have plenty of hair... It's just growing from my ears now
days.. :)

I have seen a few others jump in here, all to the good, but I do
disagree with the idea of not reading here until you get your ticket
and get on the air... The Usenet in general is sort of like diving for
pearls... You have a LOT of empty shells, but every so often, a really
BIG pearl comes along and makes it all worth while.

Just use the blocked senders list and take much of what is said with a
grain of salt.

Take Care & 73

Don't let what you read on the newsgroups form your opinion about ham radio. Most of the foul mouth name callers here used to do it on the air until the FCC started tracking them down and calling them in for retesting and even revoking licenses. Now they can't vent their rantings on the air so they do it here.

>Steve , Please Clarify Your statement. In what way are they irresponsible
>and dangerous subset of our society

What clarification?

Drugs are the number one empowering factor of major crime in the United States. (This includes the criminal act of importing, distributing or using it, or criminal acts perpetrated to procure it)

Drugs (and this includes both improperly used prescriptions and alcohol) are directly contributory to better than 60% of all motor vehicle accidents.

MOST acts of domestic violence are perpetrated under the influence of alcohol or drugs.

Drug abuse rounds out the top three life-debilitating factors along with smoking (which can be arguably defined as drug abuse in it's own right) and trauma. (Again, "drugs" being illicit, illegally used prescriptions and abused alcohol)

Please do not quote the "numbers" of such organizations of "NORML" to me. They are hardly objective. On the other hand, I WORK in an emergency department and SEE the DIRECT cause and effect of these factors. The AMA and any one of over 150 other health-care related organizations have nothing to gain by distorting those numbers...

Unfortunately, the human animal cannot, as a general rule, "responsibly" use "drugs". Even something as simple as taking a relatively benign medication as penicillian is beyond most educated adults. I cannot count the number of people who present to my ER or the MD's office I occassionally work in who are complaining that they are "not any better", yet admit they only took the medication "until I felt better". Those were NOT the instructions they were given.

Doubt me? Stop by the ER of your choice some day and just sit in the lobby for a few hours and count the number of intoxicated persons are there. It's scary to think most of them DROVE themselves there!

Steve

Like radios, laws exist that WILL revoke your PRIVILEDGES if you use your vehicle for the commission of a crime...just like your AMATEUR license can be revoked for other radio related infractions.

Sorry we can't exactly word every law for every circumstance. However drugs have centuries-long histories of abuse and thier strictest control IS in everyone's best interest.

Sorry you don't agree.

Hi Paul. What you see here has little if anything to do with "real"
Amateur Radio. Much of what transpires here does so rather than on the air.

I have been an Amateur almost 30 years now, and the "going's on" in this
"newsgroup" rarely ever manifest ON the air.

Despite occassional friction on matters which we each hold on various
topics, most of us (I presume) would have a pretty darn good time tossing a few
back at a Hamfest together.

73 and welcome aboard!

Steve, K4YZ

>North's honor was at state.

Fort Sumter was federal property. When the Confederates attacked it, the Union defenders had no choice but to fight back, because they had sworn to uphold the Union.

>So, while I'm sure many in the South
>didn't like Lincoln's attitudes about slavery, that was not the
>driving force behind the South's secession, nor did become a key issue
>in the conflict for almost another two years (with Lincoln's

Lincoln was more concerned with preserving the Union - at least in 1861.
>
>> Southerners take a different view,
>> I know. They didn't cotton to being
>> told they couldn't have slaves. So
>> from the Souths perspective the war
>> was about not being told what they
>> could or could not do.

> When the civil war started, nobody had tried to tell the South that
>they couldn't have slaves.

Sure they had. The number of free states was groing much faster than the number of slave states, as was the population in those states. The abolitionist movement was growing and the Underground Railroad was becoming more and more successful at freeing slaves. It was clear to anyone that sooner or later the abolitionist movement would have enough political clout to get a Constitutional amendment ending slavery. All it would take is 2/3 of the states to ratify such an amendment, and the number of states that would ratify kept on growing.

The writing was on the wall, so the secessionists wanted to leave the room.

> Again, Lincoln didn't address the subject
>for almost two years after the Civil War stated (and then Lincoln's
>emancipation proclamation only freed southern slaves, not northern slaves).

Did the EP actually free any slaves in reality?
>
>> The fact that they didn't agree with
>> the abolition of slavery can hardly

(Dwight previously corrected this to 1865)

> Had it not been for
>the Civil War, opening the door to Lincoln's emancipation
>proclamation, slavery might not have been abolished for several more decades.
>
True - so while the war may not have started with the goal of ending slavery,
it had that effect.

>were in Rebellion against the Union'. In otherwords, and this is the best
>part. ONLY in the STATES that were NO LONGER IN THE UNION.

They were freed by the Emancipation Proclamation, anyway.
>
>So tell me...where did he get that right from? He was NOT THE PRESIDENT of
>those states.

That's the whole point of the war - did federal authority supersede state
authority? Unionists said yes - they argued that the states trying to secede
had exceeded their authority and violated their agreement with the Union.
Secessionists argued that any state had the right to quit the Union if the
state assembly so decided.

Of course it's a moot point because I don't think any significant number of
slaves were actually freed by the proclamation. Anybody know if the EP had any
real effect?

Oddly enough, Lincoln's main interest was in preserving the Union, not ending
slavery. Early in the war he wrote that if ending slavery would preserve the
Union, he would work to end it, and if keeping slavery would preserve the
Union, he would work to keep it. As the war went on, his attitude gradually
changed, but always first and foermost in his mind was preserving the Union.

A classic. Similar to the scene in "Crocodile Dundee" where the two main characters are accosted by a street punk with a switchblade.

"HE'S GOT A KNIFE!!!!" says the character played by Linda Koszlowski.

Crocodile Dundee shakes his head, snickers, says:

"That's not a knife...."

and pulls out the big knife he uses to kill crocodiles

"THAT'S a knife!"

great stuff.

Steve Robeson K4YZ wrote:
> Drugs are the number one empowering factor of major crime in the United
> States.

So was booze during prohibition. The feds never learn. The laws
cause many more problems than they solve. The fact that drugs
are illegal *enable* the criminals to make their obscene profits
and they love the feds for it. If there weren't so much profit in
drugs there wouldn't be as many drugs. The feds could not be making
the criminals any happier than they are now. "Legalized marijuana"
strikes more fear into the hearts of drug dealers than it does in
yours.

> Drugs (and this includes both improperly used prescriptions and alcohol)
> are directly contributory to better than 60% of all motor vehicle accidents.

So what? Vehicles are directly contributory to ***ALL*** motor vehicle
accidents. If you think dumb laws are the way to go, make it a felony
to have an accident of any kind.

> MOST acts of domestic violence are perpetrated under the influence of
> alcohol or drugs.

By criminal types who would do it with or without alcohol or drugs.
The great majority of people under the influence of alcohol or drugs
don't commit a crime. The great majority of gun owners don't commit
a crime. The great majority of shushi eaters don't commit a crime.

> Doubt me? Stop by the ER of your choice some day and just sit in the
> lobby for a few hours and count the number of intoxicated persons are there.

Hello Paul from Andy N9NRA. I`m in agreement here, as well. The best way to see what ham radio is like is to listen to the bands...but do it with an open mind, and remember that all hams are not like those you`ve heard about. And above all, have fun and enjoy this great hobby! I know i sure do!

Good luck and 73 DE N9NRA

Paul,

I agree with all who have responded. I have had my ticket since 1991 and have enjoyed every minute of it. Met some of the nicest people and even gained some friends who now have become more like brothers to me. You won't regret a moment of it.
As for your code problem, I too suffered from that "mental" block with the code. The only thing that worked for me was the package "Code Quick". It runs around $60 if I remember correctly. It was the ONLY code course that worked for me. I tried several of them. Now my 7 yr old is picking it up like a breeze, but he is very musically inclined. I think that helps tremendously. Good luck to you and hope to find you on the bands soon! Come join us...not all of us are crazy....but sometimes it helps..:)

>Subject: Re: Pirates on 40 meters
>From: CAM Cecil.A.Moore@IEEE.org
>Date: 8/12/01 9:20 PM Eastern Daylight Time

>The laws
>cause many more problems than they solve.

As was stated before, it's almost impossible to effectively state any one law so that it covers all possibilities or eventualities.

>The fact that drugs
>are illegal *enable* the criminals to make their obscene profits
>and they love the feds for it.

Then let's strike down all the laws against domestic violence and having sex with children....think of all the space we will free up in prisons and the social workers we will not have to pay for just by decriminalizing those.

While we are at it, let's also decriminalize copyright infringement...Geez-o-whiz, we WOULD have thought of it our selves too...eventually.

And we can also decriminalize speeding, medical malpractice, theft, etc.

>If there weren't so much profit in
>drugs there wouldn't be as many drugs.

And the same could be said for child pornography.

>"Legalized marijuana"
>strikes more fear into the hearts of drug dealers than it does in
>yours.

No, it doesn't. It will make it even MORE accessible to people who shouldn't have it...I guess you could call it "job security", but I'd prefer to NOT have to deal with more substance abuse than I already see......

>If you think dumb laws are the way to go, make it a felony
>to have an accident of any kind.

Again...we can't make all laws absolutely equitable. Oh well.

>> MOST acts of domestic violence are perpetrated under the influence of
>> alcohol or drugs.

>By criminal types who would do it with or without alcohol or drugs.

Wrong. All-too-many acts of domestic violence occur at the hands of people who would not have otherwise done so if not for the decreased inhibitions

provided by alcohol. Most are otherwise law-abiding people caught up in the emotion of the moment.

Again, you are invited to spend some time in my ER and gain some FIRST HAND experience in such matters.

Reality is enlightening.

>The great majority of people under the influence of alcohol or drugs
>don't commit a crime.

But the great majority of crimes commited are commited by someone under the influence or trying to get money to GET those drigs so they CAN be under the influence.

Ask the FOP.

>The great majority of gun owners don't commit
>a crime.

True. But we aren't talking about guns, are we?

>The great majority of shushi eaters don't commit a crime.

But most members of the Yakuza eat sushi...it's still not germane to the discussion about the relevance of drug laws in the United States.

>Did it ever occur to you that the laws against such are ineffectual?

But I can only imagine what the highways would be like if there weren't laws against it. Again...the alcohol and the drugs inhibit some people's ability to act responsibly...more so than the other "users" you tried to obfuscate the subject with.

>You just cannot legislate rationality

I agree. But we can do our best to create an atmosphere that promotes it. And if that means stiff penalties and restrictive laws on the use of such substances, so be it.

It will never ENSURE it, but it's bound to help facilitate it.

Adios

Steve

Paul:

As others have indicated in various posts, this (and other amateur newsgroups) do not necessarily reflect the ham radio fraternity at large. I call it a fraternity, because in many ways, it seems like a brotherhood and sisterhood of people with a common goal, that of communicating via ham radio. Overall, they are kind, patient, and compassionate human beings that are interested in furthering ham radio, helping their communities and generally being good people.

Unfortunately, like with any endeavor, there are a relative few that feel they need to "stir up the pot" just for the sake of seeing who they can get a rise from. Many of these sort of "people" have a tendency to get into the newsgroups and make post after post, most of which are inflammatory. I've observed more trolling and baiting done in newsgroups than anywhere else. The largest reason seems to be the relative anonymity that is possible on the internet. Nearly anyone can represent themselves as any name they choose, and it's difficult to tell the honest people from the scum. Personally, I find it difficult to take anyone seriously that hides behind a free or anonymous email address, as they are there just to mask the individual's true identity.

As a recently upgraded Amateur Extra, having finally taken the time to get the code requirement done, I can imagine your difficulty in preparing for the code test. However, I've personal knowledge that it's really not that bad, if you just take the time and dedicate yourself to learning it. (I went from Technician to Amateur extra in a single testing day, so I know it can be done! I used an old "listen to the world with Ham Radio -- ARRL tape from the late 80's or so to learn the code. It used farnsworth timing, spaced for 5wpm, which has the individual characters at 13wpm, but spaced for 5wpm, which is the way the test is. I took the code test during field day, and could hear QRM from the field day SSB radios almost as loud as the actual code, but still managed to copy OK. It wasn't a whole lot different from copying real code off the air, and probably a better test than the sterile environment that is usually used for testing.)

Go ahead, listen around the bands, and you'll find a few wierdos out there, but they are way in the minority, just as the number of oddballs that post the nasty stuff on the newsgroups are a very small minority of the actual community. Bear in mind the internet allows one to post a message to many more people than they could be exposed to in other venues, and they can reread it later. This gives some of the miscreants a thrill for some reason, and tends to cause them to post considerably more crap over time. On the ham bands, people that aren't polite and reasonable tend to be ignored, but on the internet, there is always someone that will respond to a troll or provocative message.

I guess this was a very long way of answering your question, and saying that the newsgroups are definitely NOT indicative of the tone of the ham radio culture.

Ham radio is a wonderful hobby, and can be quite enjoyable even if you don't spend a lot of money or time on it.

Thanks

Steve, you are just going to have to force yourself to comprehend the
difference between the victimless crime of me smoking pot in the
privacy of my home and a crime with victims like domestic violence
where force is involved. Why do you have such difficulty with those
concepts? In one case, someone is beating up on someone else. In the
other case, nothing bad is happening. How can I commit evil alone in
the privacy of my home? Do you also support the older laws against
masturbation in private?

> While we are at it, let's also decriminalize copyright
> infringement...Geez-o-whiz, we WOULD have thought of it our selves
> too...eventually.

Copyright infringement is NOT a victimless crime. Please learn to
tell the difference.

> And we can also decriminalize speeding, medical malpractice, theft, etc.

Montana doesn't have any top speed limit. The other crimes clearly
have victims.

> >If there weren't so much profit in
> >drugs there wouldn't be as many drugs.
>
> And the same could be said for child pornography.

The children in child pornography are victims. They are not adults
and cannot legally give consent. What is it about victims VS
victimless crime that you do not understand?

> >"Legalized marijuana"
> >strikes more fear into the hearts of drug dealers than it does in
> >yours.
>
> No, it doesn't.

Yes, it does. It would mean the end of their livelihoods which the
present drug laws graciously provide for them.

There's a similar example in my home county. Sale of booze is prohibited.
That makes the bootleggers deliriously happy.

> >> MOST acts of domestic violence are perpetrated under the influence of
> >> alcohol or drugs.
>
> >By criminal types who would do it with or without alcohol or drugs.
>
> Wrong.

You don't understand human nature, do you, Steve? Taking booze away from
the bad guys is not going to turn them into good guys. Some people are
just evil by nature. Laws against drugs are not going to change that.
In fact, YOU are enabling the criminals to dodge responsibility for
their crimes by blaming the drugs instead of the perps.

> But the great majority of crimes commited are commited by someone under
> the influence or trying to get money to GET those drigs so they CAN be under
> the influence.

Yep, the laws don't seem to discourage them a bit, do they? You are
admitting that the laws don't work. If the drugs carried a free market
price like alcohol does, nobody would have to steal for it. How often
do you hear of someone breaking and entering to get money to buy booze?

> True. But we aren't talking about guns, are we?

Yep, we are talking about responsible adults being free to own and
take responsibility for their own lives. My SKS is illegal in CA.
Does that make me a criminal type?

> But I can only imagine what the highways would be like if there weren't
> laws against it. Again...the alcohol and the drugs inhibit some people's
> ability to act responsibly...more so than the other "users" you tried to
> obfuscate the subject with.

Alcohol is legal. DUI is illegal. Why can't it be that way for marijuana?
The real crime with real potential victims is DUI, not simple use.

> >You just cannot legislate rationality
>
> I agree. But we can do our best to create an atmosphere that promotes it.

The drug laws promote the irrationality that is the illegal drug industry.
The drug laws are the cause of most of the present drug problems and
allow the government to expropriate wealth without due process.

If you don't believe I have a right to grow marijuana in my garden
for my private use then that's prima facie evidence that you
believe my life does not belong to me. What are you going to do
when they take away your house after planting some drugs in it?
Your house is simply gone without due process.

> So was booze during prohibition.
> The feds never learn. The laws
> cause many more problems than
> they solve.

Cecil, you consistently make this claim, however many of us strongly disagree. Therefore, can you provide any evidence whatsoever to support this claim? Beyond the number of people jailed for drug related offenses, can you provide any evidence that the drug laws cause more problems than they solve? I believe the elimination of the drug laws will result in a great increase in the other problems associated with drugs (abuse, overdoses, accidents, and so forth). So, before I'll support efforts to just start throwing out the drug laws, I want to see some serious proof (and your opinion is far from serious proof).

> (snip) The fact that drugs are
> illegal *enable* the criminals
> to make their obscene profits
> and they love the feds for it. If
> there weren't so much profit in
> drugs there wouldn't be as many
> drugs. (snip)

Again, can you provide any evidence that the elimination of the drug laws will reduce the amount of drugs used? Again, I've provided evidence (prohibition) in previous discussions which suggests just the opposite.

> So what? Vehicles are directly
> contributory to ***ALL*** motor
> vehicle accidents. If you think
> dumb laws are the way to go,
> make it a felony to have an
> accident of any kind.

Sorry, Cecil, your recreational use of drugs is not equal to my vehicle. A person can use a vehicle responsibly, but I have yet to see an example of responsible illegal drug use.

> By criminal types who would do
> it with or without alcohol or
> drugs. The great majority of
> people under the influence of
> alcohol or drugs don't commit
> a crime.

While your statement is true for alcohol users (and prescription drug users, gun owners, and shushi eaters), it is not true of illegal drug users. All illegal drug users do indeed commit crimes - the illegal drug use itself is a crime. Furthermore, illegal drugs users also commit a far greater number of other crimes than the average person in this country.

> Did it ever occur to you that
> the laws against such are
> ineffectual? You just cannot
> legislate rationality.

That is true, you cannot legislate rationality. But you can legislate behavior, which is exactly what the drug laws are designed to do.

> So, Steve, do the feds try to keep
> you from driving a vehicle because
> it *might* be used in a crime?

The two are not at all similar, Cecil. Illegal drug use is in itself a crime, while driving a vehicle is not. Likewise, illegal drug use in itself causes problems for this society (overdoses, accidents, drug distribution crimes associated, and so forth), while driving a vehicle does not.

Don't get silly, Cecil. Your life obviously belongs to you, but your illegal behavior in this society is a matter for all (especially when it has the potential to negatively effect any one of us). Using your argument, what Hitler, Stalin, or Mao, did would be none of your business either (their lives belonged to them also).

>Steve, you are just going to have to force yourself to comprehend the
>difference between the victimless crime of me smoking pot in the
>privacy of my home and a crime with victims like domestic violence
>where force is involved.

Ooooopsie! Here we go with that "force" thing again!

YOU are the victim, Cecil. Self-induced, but a victim nonetheless.

>In the
>other case, nothing bad is happening.

Sure it is. You are consuming a controlled substance contrary to federal law. That controlled substance has been medically proven to be detrimental to your health.

Regardless of how it came to be "illegal" as opposed to other substances that we consume "legally", it IS, nonetheless, harmful.

>Copyright infringement is NOT a victimless crime. Please learn to
>tell the difference.

Growing, consuming and otherwise having marijuana is a crime, ergo it is NOT "victimless".

>> And the same could be said for child pornography.

>The children in child pornography are victims.

Are they? How do you determine this? Many of the "children" are in thier teens, were completely aware of what they were "consenting" to, and "profited" from it monitarily or materially.

>They are not adults
>and cannot legally give consent. What is it about victims VS
>victimless crime that you do not understand?

What part do YOU have a hard time understanding that the cultivation and consumption of marijuana is a crime. The deficits in mental capacity that it creates subsequently creates a danger in a public environs, even if you "consume" the pot in your own home.

The effects of pot are cumulative. You cannot smoke pot today and it not create a deficit in your ability to competently function tomorrow....Sure, you may be fine today, but eventually YOUR habit will negatively impact people who

never chose to consume pot.

>Yes, it does. It would mean the end of their livelihoods which the
>present drug laws graciously provide for them.

Oh...You mean like how legalized gambling put an end to underworld
gambling...Yeah...Right.

>You don't understand human nature, do you, Steve? Taking booze away from
>the bad guys is not going to turn them into good guys.

Nope, but hopefully it will make it harder for them to be intoxicated bad
people.

>Laws against drugs are not going to change that.
>In fact, YOU are enabling the criminals to dodge responsibility for
>their crimes by blaming the drugs instead of the perps.

Yeah...Right. You ahve once again ben selectively ignoring/editing
comments to fit the rant.

Tain't so, Doc.

>> But the great majority of crimes commited are commited by someone under
>> the influence or trying to get money to GET those drigs so they CAN be
>under
>> the influence.

>Yep, the laws don't seem to discourage them a bit, do they?

They discourage more than they facilitate.

>You are admitting that the laws don't work.

You are putting words into my mouth. I said it's not possible to make all
laws all-encompassing or applicable to every situation.

That does NOT suggest that a prudent society strike down those laws.

>If the drugs carried a free market
>price like alcohol does, nobody would have to steal for it.

You mean like the cigarettes and alcohol (both legal in the United States)
impounded by the US Coast Guard and Customs Service every year?

The "legality" of THOSE drugs did not impede thier profit potential in the
hands of smugglers.

>How often
>do you hear of someone breaking and entering to get money to buy booze?

In almost every day's "police blotter".

>> True. But we aren't talking about guns, are we?

>Yep, we are talking about responsible adults being free to own and
>take responsibility for their own lives.

Nope...you are obfuscating. Firearms are, in most instances, legal for
possession by adults.

>My SKS is illegal in CA.
>Does that make me a criminal type?

If you carry it across the state line, yes.

>Alcohol is legal. DUI is illegal. Why can't it be that way for marijuana?

It can be. Obviously YOU have experienced some memory deficits of your
own. This very same topic was broached before.

The majority of the electorate still supports keeping pot off the streets
to the greatest degree possible.

In as much as "today's" adults were the pot smoking hippies of the
60-70's, I think it says a lot that they have come to the conclusion, via
personal experience, that it IS a harmful substance.

>The drug laws promote the irrationality that is the illegal drug industry.

Then why doesn't the legal status of alcohol and tobacco deter thier
illegal trade?

>The drug laws are the cause of most of the present drug problems and
>allow the government to expropriate wealth without due process.

Yeah. Right. The laws allowing the confiscation of personal property of
persons violating drug laws have been with us for almost 20 years....more than
ample time for generational mores to have effected a change on them...They
haven't.

There's a reason. Too bad you missed it. Perhaps if you had been
sufficiently clear minded to participate in the process...?!?!

Steve

Well, at least that was the Union's position in the matter. Of course, many in the South didn't think the federal government had any right to federal property (specially when that property might be used by the government to control the entrance to the major harbor of a state).

> > When the civil war started, nobody
> > had tried to tell the South that

> at freeing slaves.

When I said that nobody had tried to tell the South that they couldn't have slaves, I was referring to those with immediate power to back it up (the government, not members of a political movement).

> It was clear to anyone that sooner
> or later the abolitionist movement
> would have enough political clout
> to get a Constitutional amendment
> ending slavery. All it would take
> is 2/3 of the states to ratify such
> an amendment, and the number of states
> that would ratify kept on growing.

Better go back and check the numbers, Jim. Without agreement of the slave states, it would have been impossible at the time to get a 2/3 majority to pass an amendment ending slavery. And, indeed, the 13th

Amendment was passed in both houses of Congress without the votes of those confederate slave states (they later ratified the 13th Amendment, but never voted on it in Congress).

> The writing was on the wall, so
> the secessionists wanted to leave
> the room.

Again, slavery was not the issue behind the secession. That should be obvious since the slave states would have easily been able to defeat any effort to abolish slavery had they remained in the Union.

> Did the EP actually free any
> slaves in reality?

In a round about way, yes. It probably did cause more slaves to flee to the north than might have done so without the emancipation proclamation. And, or course, it did also set the stage for everything that followed concerning slavery.

> True - so while the war may not have
> started with the goal of ending slavery,
> it had that effect.

Exactly. From our perspective today, that can be considered one of the more positive end aspects of the war, even if it wasn't the intent at the beginning of it all.

You're right. To avoid misunderstanding, I probably should clarify that. My comment was directed solely at his fantasy that CW somehow makes him superior to CB'ers. Since his garbage is no better than the garbage I see in the CB band on a daily basis, that fantasy is obviously false.

Of course, I'm not saying that all CB'ers are like that - my comment mentioned the garbage that goes on in the CB band, not the normal stuff by normal people. In other words, my comment was directed at people (CB'ers or hams) who spread negative garbage. They're all the same and not at all like the decent people in either radio service.

Are you kidding? These are newsgroups. That is radio. The two are not at all similar.

As for these newsgroups, you can avoid a lot of the madness by staying out of the rec.radio.amateur.misc newsgroup. It is the very worst of the amateur radio newsgroups. The "policy" newsgroup is better, but it does tend to get into a lot of subjects outside of ham radio (not that bad if you'd like to see what other hams think about those subjects). The other newsgroups tend to stick more to ham radio only topics.

There are a few places on the radio where you will find the occasional nonsense, but it is very rare. Most of the on-air conversations tend to be pleasant and even entertaining.

Steve Robeson K4YZ wrote:
> YOU are the victim, Cecil. Self-induced, but a victim nonetheless.

You have a backwards way of looking at things, Steve. If I don't think I am a victim, I'm not one. I have a perfect right to live my life as I choose as long as I do not initiate force or threat of force against another human being. I smoked marijuana for 25 years without ill effects. The great majority of marijuana smokers have no ill effects. No victim here.

> Sure it is. You are consuming a controlled substance contrary to federal
> law.

It's a bad law like the laws against having oral sex with one's spouse.

> That controlled substance has been medically proven to be detrimental to
> your health.

Not to my health, Steve. I have suffered absolutely no ill effects. It actually works better for me than any prescription anti-depressant.

> Regardless of how it came to be "illegal" as opposed to other substances
> that we consume "legally", it IS, nonetheless, harmful.

Not true, Steve, I have suffered absolutely no harmful effects. Neither has anyone else that I know personally.

> Growing, consuming and otherwise having marijuana is a crime, ergo it is
> NOT "victimless".

I'm sorry to see you so enamored with bad laws. Do you want to return to slavery? Do you want adultery to be a capital crime again?

> >The children in child pornography are victims.
>
> Are they? How do you determine this?

Because they are not adults, they are victims by definition. Children simply are not allowed to make their own decisions. What we are discussing are the rights of mentally healthy adult citizens who supposedly own their lives.

> What part do YOU have a hard time understanding that the cultivation and
> consumption of marijuana is a crime.

So was the underground railroad during slavery days. Face it, Steve, there are simply some bad laws that shouldn't exist. If you were black in 1850, would you have been as enamored with bad laws as you are today?

> The effects of pot are cumulative. You cannot smoke pot today and it not
> create a deficit in your ability to competently function tomorrow....Sure, you
> may be fine today, but eventually YOUR habit will negatively impact people who
> never chose to consume pot.

Egads Steve, that's an out and out obfuscation. Pot is less harmful than
booze or tobacco. My former pot habits had no negative effects on me or
anyone else and it had a lot of positive effects.

> >Yes, it does. It would mean the end of their livelihoods which the
> >present drug laws graciously provide for them.
>
> Oh...You mean like how legalized gambling put an end to underworld
> gambling...Yeah...Right.

It certainly diminished it. Why pay an illegal bookie when you can just
walk into a casino? If you are holding your breath for the world to
be perfect, you are dumb as a stump. (Note if you are not holding
your breath, that conditional statement is still perfectly true. :-)

> >Laws against drugs are not going to change that.
> >In fact, YOU are enabling the criminals to dodge responsibility for
> >their crimes by blaming the drugs instead of the perps.
>
> Yeah...Right. You ahve once again ben selectively ignoring/editing
> comments to fit the rant.

If you are ignorant of the enabling effect that your blaming drugs
for the actions of people has, I feel sorry for you. People like
you are the reason that the drug users who commit crimes against
victims are allowed to walk away with only a slap on the wrist.
When people like you stop blaming the drugs and start punishing
the people for their actual victim-based crimes, the drug problem
will shrink. Your attitude that drugs make people crazy allows
criminals to get off scott free with insanity pleas.

> They discourage more than they facilitate.

This is laughable. The drug laws are the *CAUSE* of the drug problem.
We had the same problem with booze during prohibition. We don't have
those magnitudes of problems any more. We do not learn from our mistakes.

> You mean like the cigarettes and alcohol (both legal in the United States)
> impounded by the US Coast Guard and Customs Service every year?

That's a minor problem compared to prohibition. If you are ever expecting
the world to be perfect, I feel sorry for you.

> The "legality" of THOSE drugs did not impede thier profit potential in the
> hands of smugglers.

It's a minor problem compared to prohibition which caused organized
crime to skyrocket.

> If you carry it across the state line, yes.

If SKS's are evil, they should not be allowed anywhere. If they are
not evil, they should be allowed everywhere. Your willy-nilly attitude
toward the law is going to get all of us in trouble.

> >Alcohol is legal. DUI is illegal. Why can't it be that way for marijuana?
>
> It can be. Obviously YOU have experienced some memory deficits of your
> own. This very same topic was broached before.

You seem to be the one with memory problems. The topic was not resolved
in your favor.

> The majority of the electorate still supports keeping pot off the streets
> to the greatest degree possible.

The majority of the electorate used to support slavery. Did that make
it right? Are all laws good laws?

> Then why doesn't the legal status of alcohol and tobacco deter thier
> illegal trade?

It does deter illegal trade, it just doesn't stop it. The present illegal
trade in alcohol is magnitudes less of a problem than it was during
prohibition because there is less profit to be made today. The profit
potential of illegal drugs is the *CAUSE* of the drug problems. The
US gives criminals incentive to import illegal drugs. Take away the
incentive and the drug problems will diminish just as it did with
alcohol after prohibition.

No, the newsgroup does not reflect amateur radio in the
slightest. This is not to say that the newsgroup has no
value to a ham, because it does, if the proper filters are
applied to one's newsreader.

As someone else has pointed out, there are sufficient pearls
to be found to make it worth reading and participating in.
At least there are for me. Welcome aboard.

Don't worry about it, and just get your ticket. There is so much to do in Ham Radio you don't have to worry about having any problems with operators on the air. The ones who do cause real problems are few in number and hopefully that number is getting smaller.

TROLL RATING: ***1/2

CRITIQUE: The initial apology is a good technique; it hooks a number of
well-meaning repliers. Likewise the comment about being dyslexic
garners the sympathy vote. Also, placing the already-licensed hams on
the defensive but allowing the possibility of redemption is a
time-proven method for triggering responses. The bandwidth apology at
the end is also good technique.

OVERALL: A better than average troll, clearly the work of an
experienced troller. We look forward to your next work.

Bill, W7TI

You want to start something Leland? I post in rec.radio.cb. You know what I say to people who post FCC rules about amplifiers and freebanding? "I don't care"! HAHAHAHAHA! That's right. And I am going to make it my personal mission to spread disregard for FCC laws in the CB newsgroup. Howdya like THEM apples, Leland?

What the HELL is wrong with Pirate Rado? The FCC has too much power. I am on a campaign to promote civil disobedience on CB (freebanding, power, etc) and when it comes to laws I don't like I say "I don't care".

I think that has to do with the ease in which we can change the frequency on the radio and make the bad people disappear. It can be done on the newsgroups too, but some of the culprits are intelligent enough (?) to use aliases to get their points across. The other side of the coin is the lack of operating savvy many computers uses posess. Lots still do not know how to use their kill file function. Now, where did I put that spellcheckers?

> majority to pass an amendment ending slavery.

In 1861, yes. If all the slave states voted as a block. But the trend
was clear - the slave states' clout was slowly but surely lessening.
The time to leave was BEFORE it was all gone.

> And, indeed, the 13th
> Amendment was passed in both houses of Congress without the votes of
> those confederate slave states (they later ratified the 13th

In 1861, yes. But eventually it would have been a done deal.
>
> > Did the EP actually free any
> > slaves in reality?
>
> In a round about way, yes. It probably did cause more slaves to flee
> to the north than might have done so without the emancipation
> proclamation.

Real numbers are probably impossible to get. I doubt many slaves even
knew about it, and the idea of trying to flee north when they might
encounter army units of either side must have been rather daunting.
Fleeing in peacetime required enormous courage. Fleeing in wartime
could be suicide.

>And, or course, it did also set the stage for everything
> that followed concerning slavery.

It changed the focus of the conflict.
>

> at the beginning of it all.

Agreed. But it took 620,000 lives and untold damage to reach a
conclusion. The evil of slavery bred the evil of war.

73 de Jim, N2EY

> I smoked marijuana for 25
>years without ill effects.

Yeah...Right!

>> Sure it is. You are consuming a controlled substance contrary to federal
>> law.

>It's a bad law like the laws against having oral sex with one's spouse.

Simple solution...get rid of the pot and don't have oral sex with YOUR
spouse!

>Not to my health, Steve.

Denial...the first sign.

>> Regardless of how it came to be "illegal" as opposed to other substances
>> that we consume "legally", it IS, nonetheless, harmful.

>Not true, Steve, I have suffered absolutely no harmful effects. Neither
>has anyone else that I know personally.

Neither do most cigarette smokers I care for...right up until we intubate
them and send them to ICU...Anything in the world EXCEPT cigarettes made them
that way.

Again...."Yeah...Right".

>> Growing, consuming and otherwise having marijuana is a crime, ergo it is
>> NOT "victimless".

>I'm sorry to see you so enamored with bad laws.

YOU consider it a bad law, because YOU choose to break it. Pedophiles
consider "No Sex Before 18" to be a "bad law" too. Let's go ahead and lower
the age of consent to...say...Six?

>What we are
>discussing are the rights of mentally healthy adult citizens who
>supposedly own their lives.

Oh...we ARE...?!?! Then because a person is 30 but suffers from
developmental delays of say an eighth grader (about 14 years old) that "adult"
is no longer allowed to make "adult" decisions?

Or can we now assume that an eigth grader who can effectively function at the level of a college sophmore can now determine that he or she can "consent" to adult activities...?!?!

> Face it, Steve,
>there are simply some bad laws that shouldn't exist.

No...YOU face it, Cecil. A majority of YOUR peers and contemporaries, TODAYS adults, have decided that liberal access to marijuana is NOT a good thing.

YOU consider it to be a "bad law" because you are acting in your OWN behalf, NOT that of the community.

>If you were black
>in 1850, would you have been as enamored with bad laws as you are today?

We are discussing TODAY, Cecil. Not 151 years ago.

>Sure, you
>> may be fine today, but eventually YOUR habit will negatively impact people
>who
>> never chose to consume pot.

>Egads Steve, that's an out and out obfuscation.

Nope. It's a clinically proven fact. Unless you care to somehow accuse the AMA of creating those studies simply to blindside your rant in RRAP...?!?!

>Pot is less harmful than
>booze or tobacco. My former pot habits had no negative effects on me or
>anyone else and it had a lot of positive effects.

Yeah...it kept you too stoned to pay attention to the issues in the voting booth while the rest of us (try) to keep it off the streets as best as we can.

>> Oh...You mean like how legalized gambling put an end to underworld
>> gambling...Yeah...Right.

>It certainly diminished it.

And therein lies the basis of MY argument. Present pot laws will keep this crap as far from the hands of many who should NOT have it in the first place.

>Why pay an illegal bookie when you can just
>walk into a casino?

At least the addicted gambler has to go out of thier way to do it or has to pay a premium for it. And far less violence is attached to it.

Again, my point is made and you substantiated it...Thanks.

>If you are holding your breath for the world to
>be perfect, you are dumb as a stump.

Back at ya, Big Boy. That's exactly what I have been telling you. You can't write every law to cover every situation or scenario.

>If you are ignorant of the enabling effect that your blaming drugs
>for the actions of people has, I feel sorry for you.

And if you think I am blaming the "drugs", then you have demonstrated for me and all herein to see that pot HAS affected your mind.

Thanks again, Cecil.

>People like
>you are the reason that the drug users who commit crimes against
>victims are allowed to walk away with only a slap on the wrist.

Nope..."Pepole like (me)" would execute pot smokers by hanging with a hemp rope or lethal injection of the poison of choice for others. One 'conviction" would warrant a warning. The second a date with Timmy McV.

>When people like you stop blaming the drugs and start punishing
>the people for their actual victim-based crimes, the drug problem
>will shrink.

When there are no drugs, people won't have thier behaviour altered.

>Your attitude that drugs make people crazy allows
>criminals to get off scott free with insanity pleas.

See my statement above. It's not MY opinion they should go "scot free". But then I also know that not all laws can be made 100% encompassing.

And when I have the opportunity to participate in the law-making process, I do. That's becuase I am not too stoned to know what's going on around me.

Like any other democratic process, I may not get what I want...but I participated.

>This is laughable. The drug laws are the *CAUSE* of the drug problem.

SCENARIO: Little Jimmy is sitting on the steps of the grade school. Black Bart walks up to him and says "Here Jimmy, take a hit of this...it will make you feel reeeeal good".

Little Jimmy starts to get up an walk away... "NO WAY, BUSTER!...My Mom and Dad told me that drugs are bad for me and not to do it."

Black Bart then whips out a copy of Texas state code showing where pot, among others, is harmful and unlawful. "But look here, Jimmy...See..It's a law...so it's OK to do it! EVERYONE knows that DRUG LAWS make people do it!"

Little Jimmy stops, looks at the book and says "Well in THAT case, gimme a toke! Geez, if I had known it was a LAW, I would have been smoking it in FOURTH grade!"

Take another toke, Cecil, and TRY to convince me that DRUG LAWS are the cause of the DRUG PROLEM.

HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA

Waht a card Cecil...What a load of LAUGHS!

>If you are ever expecting
>the world to be perfect, I feel sorry for you.

Feel sorry for yourself, Cecil. You are the one trying to convince others that we should allow drug use in order to vindicate your decison to break the law.

>> If you carry it across the state line, yes.

>If SKS's are evil, they should not be allowed anywhere. If they are
>not evil, they should be allowed everywhere. Your willy-nilly attitude
>toward the law is going to get all of us in trouble.

The people of the State of California have decided that they want to keep certain kinds of firearms out of their state. This comes from a three decades long probelm of firearms abuse in that state.

If you don't like the laws in California, move to California, establish residence there, and then start to change the laws...Don't whine about it.

Texans have decided that they can live with these types of weapons. Texas DOES deal with it's criminal abusers aggressively. Texas law works well for Texans. It does NOT work for Californians.

That's what "States Rights" is all about.

If you want a "One Government Rules All" system, there are palces in the world that will be glad to accomodate you. The United States is NOT one of them.

>You seem to be the one with memory problems. The topic was not resolved
>in your favor.

There is NO resolution, Cecil. You and others like you still insist that breaking the law on a case-by-case basis is OK as long as you perceive that no one except you is "harmed". This is usually the attitude of MOST intoxicated drivers right up to the moment that they cross the center line and kill someone.

People like you will continue to break the law to the detriment of others.

People like me will be there to try and clean up after you. I imagine it's always been that way, and always will be.

>> The majority of the electorate still supports keeping pot off the streets
>> to the greatest degree possible.

>The majority of the electorate used to support slavery. Did that make
>it right? Are all laws good laws?

And those laws changed as they were deemed right to do so. Are those laws PRESENTLY in force? No.

>It does deter illegal trade, it just doesn't stop it.

If it deters it long enough to keep it out of the hands of my kids, then they worked.

>The profit
>potential of illegal drugs is the *CAUSE* of the drug problems.

No, the problem is the DEMAND for drugs. I don't want those drugs on the street. I don't want them in the bloodstream of the guy who drives my kids schoolbus or is driving that on-coming dump truck. I don't want the pilot of my airline flight taking a snort before clearing the gate, and I don't want to tell another persons family that thier family member is dead while the family of the driver that killed them is trying to line up a lawyer.

>The
>US gives criminals incentive to import illegal drugs. Take away the
>incentive and the drug problems will diminish just as it did with
>alcohol after prohibition.

Prevent the development of dependence on drugs and the demand will not be there. Eliminate the demand, and the profit incentive will not be there.

No Drugs=No Problem.

Period.

Steve

>
> Exactly my point. If I remember right, the Emancipation Proclamation
> only freed the slaves in the rebel states.

"That on the 1st day of January, A.D. 1863, all persons held as slaves
within any State or designated part of a State the
people whereof shall then be in rebellion against the United States
shall be then, thenceforward, and forever free;"

That sentence (and the Proclamation) does two things: it frees the
slaves in every state, and it also declares that states in which slaves
are held to be in rebellion. There are some history re-writers on the
net who have put a different slant on it however.

> When were the Northern slaves
> freed?

All slaves were freed at the same time. No one was exempted in the
proclamation.

> If the Civil War was about slavery, don't you think Lincoln would
> have freed the northern slaves at the *beginning* of the war instead of
> years later?

What year are you referring to, exactly? Just so we both know.

> If the Civil War was fought to end slavery, why did General
> Grant still have slaves in the North for years after the start of the war?

Because he was a scum bag? I don't know. How do you know that he had
slaves? Because some neo-nazi KKK web site says he did?

> > You already have more (freedom) than we do in California.

> Serves you right for living on the left coast.

It hasn't always been on the "left". It used to be just fine before we
got every east coast liberal and his sister moving in out here.

The history is indeed being re-written, but it is not the "victors" who are doing it. It's one thing to express the Southern States viewpoint of the war. It's quite another mischaracterize the motives of the President of the United States.

> Just like the Russian communists did?

Give a rest. jeez. Did you ever work for Charles Kane by any chance?

> BTW, the Emancipation Proclamation only applied to the Southern states.

That is a legally and factually inaccurate statement.

When are you going to alleviate your ignorance of victim-based crime
VS victimless crime? Oral sex between consenting adults is a victimless
crime. Pedophile crime clearly has a victim. Your straw man arguments
are extremely transparent.

> Then because a person is 30 but suffers from
> developmental delays of say an eighth grader (about 14 years old) that "adult"
> is no longer allowed to make "adult" decisions?

That's when a family member needs to step in and assume power of
attorney. Our discussion is not about mentally handicapped people
or children, Steve. Our discussion is about mentally healthy adults
who supposedly own, manage, and take responsibility for their own
actions and lives.

> No...YOU face it, Cecil. A majority of YOUR peers and contemporaries,
> TODAYS adults, have decided that liberal access to marijuana is NOT a good
> thing.

Probably not true in California, Steve. It's just the feds violating
our constitutional rights yet once again.

> YOU consider it to be a "bad law" because you are acting in your OWN
> behalf, NOT that of the community.

Why should I be punished for something I didn't do?

> >If you were black
> >in 1850, would you have been as enamored with bad laws as you are today?
>
> We are discussing TODAY, Cecil. Not 151 years ago.

So there were bad laws 151 years ago but there are no bad laws today?
BWWWWWWHHHHHAHHAHHHAHAHHHHHAHAHHAHHAHHHAHAHHAHAAA
Talk about delusional.

> It's a clinically proven fact.

BS, Steve, nobody is allowed to perform tests on class 1 drugs. The mayor
of New York tried to publish a study showing the ill effects of marijuana.
He failed because there were few ill effects.

> And therein lies the basis of MY argument. Present pot laws will keep
> this crap as far from the hands of many who should NOT have it in the first
> place.

BS, Steve. The present pot laws have guaranteed the dealers enough profit
to be able to make it available to every man, woman, and child. What planet
do you live on, man? Pot is available in virtually every public school in
the US because people like YOU guarantee the pushers a lucrative profit.
People with attitudes like yours create and encourage drug pushers. Ever
wonder why the drug pushers are not pushing cigarettes? Make tobacco
illegal and see what happens - $2 cigarettes available to grammar school
kids in no time at all.

> Nope..."Pepole like (me)" would execute pot smokers by hanging with a hemp
> rope or lethal injection of the poison of choice for others. One 'conviction"
> would warrant a warning. The second a date with Timmy McV.

Thanks for sharing your compassion with us, Steve. You are obviously a
reincarnation of one the Spanish Inquisition judges. I thought nurses
were supposed to help people, not execute them for smoking a God-given
weed.

I'm in the process of solving the problem. I'm doing some gene splicing
to transfer the THC gene from pot to wild Texas grape vines. You think
that's not going to happen sooner or later?

> When there are no drugs, people won't have thier behaviour altered.

When you succeed in hanging the entire population, there will be no
more crime.

> SCENARIO: Little Jimmy is sitting on the steps of the grade school.
> Black Bart walks up to him and says "Here Jimmy, take a hit of this...it will
> make you feel reeeeal good".

The reason that Black Bart is approaching Little Jimmy is because people
like you encourage and guarantee BB a huge profit for little risk. You might
as well be paying BB an incentive to sell drugs to Little Jimmy. It amounts
to the same thing in the long run.

> People like you will continue to break the law to the detriment of others.

People like you who reward drug pushers with the incentive of lucrative
profits are the real source of the detriment to others. I, OTOH, only wish
to grow some God-given marijuana in my private garden for my own private use.

> And those laws changed as they were deemed right to do so. Are those laws
> PRESENTLY in force? No.

So there were bad laws in the past but all laws today are good laws.
Sure they are, Steve. (Somebody get the net.) You were once ignorant
but now you know everything, eh, Steve?

> Prevent the development of dependence on drugs and the demand will not be
> there. Eliminate the demand, and the profit incentive will not be there.

Dream on, oh delusional one. Why don't you post to the newsgroups on the planet that you live on? (It ain't this one.)

Dwight Stewart wrote:
> ... can you provide any evidence whatsoever to
> support this claim? Beyond the number of people jailed for drug
> related offenses, can you provide any evidence that the drug laws
> cause more problems than they solve?

Of course. The drug laws guarantee drug pushers a lucrative tax-free profit. The feds might as well be paying the drug pushers an incentive bonus to perform their evil deeds. Take away the extreme profits, as was done with alcohol, and the problems, while not going away, will definitely be more manageable.

> Again, can you provide any evidence that the elimination of the drug
> laws will reduce the amount of drugs used? Again, I've provided
> evidence (prohibition) in previous discussions which suggests just the opposite.

Prohibition was proven to be the greater of two evils. Whatever problems arise, *FREEDOM* is always the best choice. The country would simply be better off if some drugs were decriminalized. I predict marijuana will be decriminalized by 2025.

> Sorry, Cecil, your recreational use of drugs is not equal to my
> vehicle. A person can use a vehicle responsibly, but I have yet to see
> an example of responsible illegal drug use.

What planet do you live on, Dwight. Marijuana users are like alcohol users. Probably 98% of them do so responsibly. Why punish the 98% for the transgressions of the 2%. Why not punish the 2%? FYI, I am an example of a responsible illegal drug user. So are most of my friends in CA and AZ. At least 50% of the people I knew in CA and AZ used marijuana.

One time, I went to a rock concert at the Cow Palace in SF. We went early and lined up on the sidewalk. With SF police patrolling up and down the sidewalk, we lit up and passed joints around in broad day-light. The lady I was dating at the time also dated a San Jose policeman. She spent many a night sitting around smoking marijuana with lots of members of the San Jose police force. Her policeman friend furnished her with marijuana from seized stuff. The drug laws are a joke.

> While your statement is true for alcohol users (and prescription
> drug users, gun owners, and shushi eaters), it is not true of illegal
> drug users.

That's only a Catch-22 technicality, Dwight, and I think you realize that. Real crime involves a victim. There is no difference in reality

between a few people getting together to have a drink and a few people getting together and smoking a joint. Having marijuana illegal and alcohol legal is a Catch-22. It is a man-made situation divorced from reality.

> That is true, you cannot legislate rationality. But you can
> legislate behavior, which is exactly what the drug laws are designed
> to do.

Don't look now, but like prohibition, they have failed miserably. In fact, they have guaranteed obscene profits to drug pushers as an incentive to continue their actions in the public schools. When a worker is a success at a job, he often receives a bonus. The feds are giving the drug pushers a tax-free bonus for their success in pushing drugs on our children. Take away the profit motive and the problem will become manageable, just like alcohol.

So you honestly think that Abraham Lincoln wanted slavery abolished only in the rebellion states? Only by taking poetic license can one interpret what he said to mean that.

Cecil, You can go to almost any rock concert and the air will smell like fresh burnt hemp, do you think the police know about this? You bet they do , Could they bust people there? they sure could but then why don't they? because these people aren't hurting anyone, they are less apt to hurt someone than a drunk driver. I smoked marijuana in college but didn't inhale.

Paul:

What makes you think you have a dyslexic mind -- or that dyslexia,
in itself, is something that would be a barrier to learning the Morse
code? To me, the above just looks like more of the same old same
old -- people who are basically lazy, getting their excuses lined up
for when they will (in their own mind) ultimately fail to learn the code.

>(certainly an easier goal then the 13 wpm
>I thought I was going to need).

Even if the minimum requirement were increased to 20 WPM, instead
of being reduced to 5, you could still have done it. You just don't know
this because you have never tried. Trust me, I was the same way…I am
speaking from experience!

>
>Is the tone of the culture accurately reflected in the newsgroups? I
>certainly hope not.

Generally, the answer to your question is "No." In actual, real-life,
face-to-face dealings with real radio amateurs, including those who
participate in this newsgroup, you will not find this level of frank,
honest, expression of personal opinion. Morse code lovers and
Morse code haters don't gang up on each other in fistfights at
hamfests. There is a certain amount of untoward behavior that you
will encounter on-the-air, but it is nothing new, and predates the
code vs. no-code debate by decades. One thing you will find,
however, is the general effect of the recent, severe "dumbing-
down" of ham radio licensing requirements -- and that is so-called
hams who don't have a high appreciation for the privileges they
hold. Therefore, you will probably experience more bad acts

on-the-air (especially HF) then at any other time in ham radio history.

Remember where you are when you see what you see or hear what you hear. This is Usenet, not ham radio. The two are not the same. Moreover, in spite of the overbearing opinions of a few self-appointed thought police, licensed hams are not *required* -- either legally or morally, to behave the same way in a newsgroup as they must on the air. Here, in the newsgroup, we are a lot more free to "speak our mind" and generally do so, as a perfectly valid, normal, and even healthy way of "letting off steam" as it were, so that perhaps we are less likely to tolerate such behavior on-the-air, much less practice it ourselves. I feel that in this way, Usenet serves a very important function, especially to us hams. Just remember that the two are not the same. Ham radio requires us to be on our best behavior on-the-air at all times. Here in the newsgroups, we can let our hair down, if we have any!

>Sorry to take up the bandwidth, but I felt a strong need to express my >concern.

It is a very valid concern, one which was brought about by the desire of lazy, unmotivated people to gain full ham privileges without the need to make the effort required to learn a useful communications skill. Just remember one thing which will always be true: Ham radio is what ham radio operators make of it, and ham radio operators are what they make of themselves.

Nonsense! "Children" under the age of 18 can get driver's (and amateur radio)
licenses, have jobs, do all sorts of things. In many states they can get
married. Usually, but not always, parental consent is required for these
things. In many states a "child" can be declared an "emancipated minor" by the
courts, and no parental consent is required.

You might try looking up how many people get off on the insanity plea. It's
much less than 1%. Often they wind up instituionalized for a very long time.
>
>> They discourage more than they facilitate.
>
>This is laughable. The drug laws are the *CAUSE* of the drug problem.

No, the drugs and the people using them are the cause of the drug problem.

>We had the same problem with booze during prohibition. We don't have
>those magnitudes of problems any more. We do not learn from our mistakes.

The problem with prohibition was that a huge percentage of the mentally healthy
adult population wanted to get blotto, and was willing to break the law to do
so. The same is not true with drugs today.
>

>> You mean like the cigarettes and alcohol (both legal in the United States)
>> impounded by the US Coast Guard and Customs Service every year?
>

Source record: 16615

Larry:

First, I agree with the concern about the "dummying-down" of the licensing requirements. I was VERY surprised to see that General requires only 5 wpm. I was also surprised to see how easy the Tech and General written tests seem to be. I can well understand how more experienced hams would have negative feelings about this and how it can spill over to newer hams...it's easy for me to say "hey, it wasn't my decision; don't blame me" but I can certainly understand how spill-over can happen.

My dyslexia does seem to interfere a bit with learning the code..it gets processed in the same part of the brain as language, I guess. I shouldn't have mentioned it, of course, as it has nothing to do with the issues at hand. Sorry. FWIW, I WILL pass the code test and I WILL learn it at 13+ wpm...CW has always seemed to me to be an important part of amateur radio and 5 wpm really doesn't cut it. I'll just need to find folks willing to put up with an ugly fist for awhile.

Paul

We are not arguing over what Abraham Lincoln wanted. The fact is that the
Emancipation Proclamation only applied to the states "in rebellion".

Several reasons:

1) Sooner or later, the rest of the US would force abolition on the slave states
2) The Southern economy, based on a few crops, could not compete with the industrializing North and the rapidly expanding West.
3) The South was more aligned with European markets than it was with the rest of the USA.

My advice is to totally ignore what goes on in the newsgroups and get on the air. I too have concerns about the junk that goes on here, especially when prospective Hams like yourself see the garbage. I have not encountered any of this garbage on the airways; everyone seems like a very nice bunch. There is a lot of good stuff in the news groups but you will just have to ignore the junk. I agree with you and for the life of me do not understand all the filth and junk in the groups.

That is absolutely wrong, Jim. You're twisting the words of that document to mean something that it clearly does not. First of all, it does not "free the slaves in every state." The Emancipation Proclamation specifically, and very clearly, excluded all other states other then those in rebellion (the Confederacy). In fact, the proclamation even specifically listed the states the proclamation applies to - Arkansas, Texas, Louisiana, Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia. All other states were excluded, regardless of slavery in those other states.

Second, it does not declare that "states in which slaves are held to be in rebellion." For example, slavery was legal and very common in West Virginia, yet that state was specifically excluded from the proclamation ("except the forty-eight counties designated as West Virginia"). The same is true for any other state that sided with the north during the civil war, again regardless of slavery in those states.

By the way, your quote above is not the exact text of the document that President Lincoln signed. Instead, it said, "That on the 1st day of January, in the year of our lord one thousand eight hundred

sixty-three, all..." This is a valuable document from this country's history and therefore should be quoted exactly as it was written (not a single word changed).

> All slaves were freed at the same time.
> No one was exempted in the proclamation.

Again, absolutely wrong (see above).

> > If the Civil War was about slavery,
> > don't you think Lincoln would have
> > freed the northern slaves at the
> > *beginning* of the war instead of
> > years later?
>
> What year are you referring to, exactly?
> Just so we both know.

The civil war began in 1861. The Emancipation Proclamation was signed in 1863. If the civil war was actually about slavery, why didn't the south wait until there were real attempts to abolish slavery before they seceded? Or, to word it differently, why secede if there was no real attempt yet to abolish slavery? The anti-slavery states did not have enough votes in congress to pass an amendment abolishing slavery without support from the slave states. So, if the slave states had the votes in congress to stop any attempt to abolish slavery, why did they secede if their goal was to protect slavery?

So, you're back to the same false argument used in previous debates. Since you're obviously not willing to believe what I said in those debates (which clearly proves that your argument is wrong), go get a decent book on prohibition. Look at the FBI statistics concerning crime relating to the illegal alcohol trade. Alcohol related crime did not go down after prohibition ended. In fact, crime related to the illegal distribution of alcohol actually increased over the next several decades, far above what existed during prohibition.

And, again, there is no reason to believe that the exact same thing will not happen if the illegal drugs are made legal. There is no reason to believe that the profits for drug dealers will go down. There is no reason to believe that the violence associated with the illegal drug trade will go down. In fact, if we use prohibition as an example, it is far more likely that all of these things (profits, drug abuse, violence, etc) will actually go up if the illegal drugs are made legal.

Criminal behavior is not a "freedom," Cecil.

> I predict marijuana will be
> decriminalized by 2025.

And I will do everything in my power to make sure that does not happen.

> What planet do you live on, Dwight.
> Marijuana users are like alcohol
> users. Probably 98% of them do so
> responsibly.

Nonsense! Marijuana "users" are not like alcohol "users." Marijuana "users" are far more like alcohol "abusers." A person can drink a small amount of alcohol without any negative effect whatsoever. However, even a small amount of marijuana is equal to the effects of several strong alcoholic drinks.

> FYI, I am an example of a responsible
> illegal drug user.

If you really believe that, why don't you take a marijuana plant down to the local police station, get yourself arrested, and then explain to the judge how responsible you are. Make sure to tell the judge where that first marijuana seed you planted came from, and show proof that nobody was harmed getting that marijuana seed to you.

The causes (state's rights, limits on the federal government, etc) that led up to the civil war were not a mistake. In fact, they're still being hotly debated to this day. I'm not even sure the civil war itself was a mistake. It does seem ironic that the one freedom not allowed in this country is the right of a state to break ties with this country, when this very country was created by breaking ties with another country.

I suppose that may be possible, but I find it hard to believe that large numbers of southerners were willing to die in a war because of what might happen sometime in their distant future, especially when it would not really affect them (most didn't have slaves).

> The evil of slavery bred the evil
> of war.

Only if you accept the notion that all those people in the south were willing to die in defense of slavery, and that all those people in the north were willing to die to fight slavery. I think the very notion is absurd (and a smokescreen to draw attention away from the real issues of the conflict).

Many people came to this land to get away from the massive governments they left behind. In the end, many felt that they had simply traded in one all powerful government for another, which is exactly what they did not want.

All of those are too simplistic to be accurate, Jim. The issues and motivations behind the civil war were extremely complex. We could write books on this subject and not even begin to cover the entire subject fairly.

> extremely transparent.

Actually, his argument is not that much of a straw man, Cecil. Many of the arguments you offer in defense of drug legalization are very similar to the arguments routinely offered by pedophiles. For example, just like you, they love to throw around the victimless crime argument - if the youth consents, and is not harmed physically, he/she is not a victim (so sex with that child should not be a crime - we're not hurting anyone else).

And, like you, they also like to use examples from around the world - in this or that country, sex with kids as young as this or that is legal (so it should be legal here also).

And, like many drug users, they like to go back in history to find their justification - in this or that time, boys and girls as young as this or that were already married (so it should not be illegal to have sex with them today).

And, like many drug users, the pedophiles love to wave around the concept of freedom - the government has no right to stick it's nose into my bedroom, so what I do in that bedroom with another consenting person is none of the government's business.

And, when trying to reason with the pedophile, those opposed to pedophilia use arguments very similar to those used to oppose illegal drug use - victims, damamge to society, and so on. And, like you, the pedophiles often choose to dismiss or ignore those arguments just as quickly.

I, and many others, see no more reason to fall for your arguments in defense of drug legalization than to fall for the similar arguments of the pedophile.

You have the right to remain silent. Anything you say can and will be used against you in a court of law. If you are under the age of 18, anything you say can be used against you in a juvenile court prosecution for a juvenile offense and can also be used against you in an adult court criminal prosecution if the juvenile court decides that you are to be tried as an adult. You have the right to talk to an attorney before answering any questions. You have the right to have your attorney present during the questioning. If you cannot afford an attorney, one will be appointed for you without cost, before or during questioning, if you desire. Do you understand these rights?

Dwight Stewart wrote:
> So, you're back to the same false argument used in previous debates.

It is not a false argument, Dwight. It is a philosophical statement.
The problems existing under *FREEDOM* are always better than the
problems existing under *OPPRESSION*.

> There is no
> reason to believe that the profits for drug dealers will go down.

Maybe in your deluded mind. The profits for bootleggers certainly
went down after prohibition. The only profit to be made nowadays
on illegal booze or illegal cigarettes are the taxes involved.

> There is no reason to believe that the violence associated with the
> illegal drug trade will go down.

The illegal drug trade will go down. The violence associated with it
would have to go down.

> Criminal behavior is not a "freedom," Cecil.

Criminal behavior involved in victimless crimes is not real criminal
behavior. For a real crime to have happened, there must be a victim.
Victimless crimes are simply a loss of *FREEDOM*.

> > I predict marijuana will be decriminalized by 2025.
>
> And I will do everything in my power to make sure that does not happen.

Knock yourself out. Lots of people were for slavery and against female
sufferage. They lost.

> Nonsense! Marijuana "users" are not like alcohol "users."

Of course they are, Dwight. My friends in CA decide whether to smoke
pot or drink alcohol on any occasion. I would estimate that half the
users of alcohol in CA also use marijuana, probably a third of the
population, and most do it responsibly.

> However, even a small amount of marijuana is equal to the effects of
> several strong alcoholic drinks.

Depends on the concentration. Several strong drinks of Everclear will
kill you. Everclear has been engineered to be strong. For reasons
of efficiency, modern marijuana has been engineered to be strong.
When I started smoking pot in 1963, it took two joints to have any
effect at all.

> If you really believe that, why don't you take a marijuana plant
> down to the local police station, get yourself arrested, and then
> explain to the judge how responsible you are.

For the same reason that I wouldn't confess to oral sex in Louisiana.
They are bad laws designed to curb basic freedoms of citizens.

> There are plenty of victims associated with marijuana, Cecil. You
> just flat refuse to accept that reality.

No, Dwight, I fully accept that reality. There are plenty of victims
of marijuana *abuse* just as there are plenty of victims of alcohol
abuse. But the non-abuser majority should not be punished for the
actions of the abuser minority. There are plenty of victims
associated with alcohol but that doesn't keep it from being legal.

We simply punish the people doing the victimizing, e.g. DUI or
murder or domestic violence or armed robbery, i.e. *violent*
people. It is unfair for 98% of the population to be punished
for the violence of the other 2%. People like you who blame the
drugs instead of the perps are responsible for the present sad
conditions in our society. I say put the violent perps away and
leave us non-violent, freedom-loving citizens alone.

With freedom comes responsibility and freedom is always better than
oppression. People who give up their freedom for security will soon
have neither. The effect of the drug laws is to take away the
freedoms of law-abiding citizens without them realizing it.

A Catch-22 law is a law that forbids the reading of that law.
Marijuana use is an artificially contrived crime. It is not
a bona fide crime. A bona fide crime is when something bad
happens to a victim. Nothing bad happens when I smoke marijuana
in the privacy of my own home. It makes me feel good. There is
no victim.

It's no game, Steve, just intellectual dishonesty on your part.
You can redeem yourself by answering these simple yes/no questions.

Has there every been a time in all of history where all laws are
good laws? If so, is that time now?

> How childish.

How obfuscatory.

> Cecil, how do you think drugs GET classified...?!?!

The feds pull the classification out of their posteriors.
The purpose for classifying marijuana as a class 1 drug
was to try to control the illegal Mexican nationals. You
need to watch the TV program, "Illegal drugs and how they
got that way." It will open your eyes.

The purpose is to eliminate experimentation that would
prove how relatively harmless marijuana really is. Heck,
the feds won't even allow the FDA to approve marijuana
for the medical uses for which it has been proven effective,
e.g. relieving nausea for terminal cancer patients. Are
they afraid that a terminal cancer patient is going to get
hooked? Get real!

> That "weed" is detrimental to the common good of society.

"Common good" is the catch phrase used by socialists/communists
to take away freedoms. The "weed" has been proven effective in
relieving nausea for terminal cancer patients. Of course, society
would rather have those poor people throwing up and starving to
death for the "common good of society". Nice guy.

> certainly don't understand it.

It makes sense from a communications-theory standpoint:
Fill up the available bandwidth with noise and the
information transfer rate slows to a glacial creep.

I think we've bottomed out on the fact that the Emancipation Proclamation only applied to the States and areas in rebellion against the U.S.A. It strikes me that there may have been some constitutional grounds for it not being extended to slaves in the "Northern" states. First, as Commander-in-Chief of the armed forces, the president did have the authority to impose martial law in the areas under occupation by the U.S. Army, so the Proclamation would be legal from that standpoint. However, in areas not in rebellion, the freeing of slaves would have amounted to a taking of "property" without due process of law or just compensation. This would not have been a trivial matter - a substantial amount of some Maryland farmers' capital would have been tied up in slave-owning and there would have been legal recourse available to them. By side-stepping the issue until the end of the war and waiting for the 13th Amendment to pass, Lincoln avoided a potentially divisive constitutional crisis.

Just my $0.02 worth.

Cecil,
It's PILATE, not PILOT but you still write interestingly. I had my own dental practice from 1967-1989 and retired. I and an optometrist owned our building in a shopping center in Clifton which explains why we also were for an eye for an eye and a tooth for a tooth.

The Emancipation Proclamation

January 1, 1863

A Transcription

By the President of the United States of America:

A Proclamation.

Whereas, on the twenty-second day of September, in the year of
our Lord one thousand eight hundred and
sixty-two, a proclamation was issued by the President of the United
States, containing, among other things, the
following, to wit:

"That on the first day of January, in the year of our Lord
one thousand eight hundred and sixty-three,
all persons held as slaves within any State or designated part
of a State, the people whereof shall then
be in rebellion against the United States, shall be then,
thenceforward, and forever free; and the
Executive Government of the United States, including the
military and naval authority thereof, will
recognize and maintain the freedom of such persons, and will do
no act or acts to repress such persons,
or any of them, in any efforts they may make for their actual
freedom.

"That the Executive will, on the first day of January
aforesaid, by proclamation, designate the
States and parts of States, if any, in which the people thereof,
respectively, shall then be in rebellion
against the United States; and the fact that any State, or the
people thereof, shall on that day be, in good
faith, represented in the Congress of the United States by
members chosen thereto at elections wherein a
majority of the qualified voters of such State shall have
participated, shall, in the absence of strong
countervailing testimony, be deemed conclusive evidence that
such State, and the people thereof, are not
then in rebellion against the United States."

Now, therefore I, Abraham Lincoln, President of the United
States, by virtue of the power in me vested as
Commander-in-Chief, of the Army and Navy of the United States in
time of actual armed rebellion against the

authority and government of the United States, and as a fit and necessary war measure for suppressing said rebellion, do, on this first day of January, in the year of our Lord one thousand eight hundred and sixty-three, and in accordance with my purpose so to do publicly proclaimed for the full period of one hundred days, from the day first above mentioned, order and designate as the States and parts of States wherein the people thereof respectively, are this day in rebellion against the United States, the following, to wit:

Arkansas, Texas, Louisiana, (except the Parishes of St. Bernard, Plaquemines, Jefferson, St. John, St. Charles, St. James Ascension, Assumption, Terrebonne, Lafourche, St. Mary, St. Martin, and Orleans, including the City of New Orleans) Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia, (except the forty-eight counties designated as West Virginia, and also the counties of Berkley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth[)], and which excepted parts, are for the present, left precisely as if this proclamation were not issued.

And by virtue of the power, and for the purpose aforesaid, I do order and declare that all persons held as slaves within said designated States, and parts of States, are, and henceforward shall be free; and that the Executive government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of said persons.

And I hereby enjoin upon the people so declared to be free to abstain from all violence, unless in necessary self-defence; and I recommend to them that, in all cases when allowed, they labor faithfully for reasonable wages.

And I further declare and make known, that such persons of suitable condition, will be received into the armed service of the United States to garrison forts, positions, stations, and other places, and to man vessels of all sorts in said service.

And upon this act, sincerely believed to be an act of justice, warranted by the Constitution, upon military necessity, I invoke the considerate judgment of mankind, and the gracious favor of Almighty God.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington, this first day of January, in the year of our Lord one thousand eight hundred and sixty three, and of the Independence of the United States of America the eighty-seventh.

By the President: ABRAHAM LINCOLN
WILLIAM H. SEWARD, Secretary of State.

Middle East Newswire
NASA To Launch Israeli Satellite At No Cost
Middle East News Online
By Middle East News Online Reporter
Posted Monday August 13, 2001 - 06:05:14 PM EDT

Ariel Sharon and Science & Culture Minister met today with United States Administrator Dan Goldin and his delegation, and US Ambassador to Israel Daniel Kurtzer to Discuss NASA's proposal to launch an Israeli satellite at
no charge in the upcoming shuttles trips.

Gloldin and his team agreed today with the Israeli government" that NASA and
Israel would indeed continue to cooperate on space research, including the
launch of Israeli satellites at no cost on the various space shuttles. It
was also agreed that Israeli astronaut Ilan Ramon would be launched into space on May 23 of 2002." according to press release from Sharon's Media Advisor.

Currently, Israel is the recipient of over $7 billion in aid and grants from
the United States. In addition, the U.S. equips Israel with the best military hardware, technology and intelligence information.

"Sharon said that he would make an effort to mobilize the necessary resources to institutionalize Israeli-NASA cooperation while utilizing Israel's human potential to promote useful research into global climatic change, as well as water and earthquake research." "In light of the expected
agreement between NASA and Israel, Goldin emphasized the possibilities of
Israel's integration into the European space center and Israel's joining the
exclusive club of countries participating in the international space station, including involvement of Israeli research and researchers in the

station."

OK, so the civil war and slavery has been beat to death, now we are on growing pot, discussing guns and copyrights. What are we going to do about the illegal operators intruding into the bottom end of the 40 meter band?

Not according to every book I've ever read about the events
following prohibition.

> Criminal behavior involved in victimless
> crimes is not real criminal behavior. For
> a real crime to have happened, there must
> be a victim. Victimless crimes are simply
> a loss of *FREEDOM*.

I'll repeat this one more time - illegal drug use, including
marijuana use, is not a victimless crime. The people who use it are
victims, the people who live with those people are victims, the people
who know those people are victims, the people affected by their
negative behavior are victims, and so on (and so on).

> Knock yourself out. Lots of people were
> for slavery and against female sufferage.
> They lost.

So you're comparing your efforts to legalize drugs to efforts
towards female suffrage and efforts to end slavery? Sorry, but your
efforts to legalize marijuana and get stoned is not at all equal to
either of those.

> No, Dwight, I fully accept that reality.
> There are plenty of victims of marijuana
> *abuse* just as there are plenty of
> victims of alcohol *abuse*.

Marijuana use is abuse. The effects from a single marijuana use is
not all that different from the effects of two or three strong mixed
drinks or five to eight beers. And I have yet to meet a casual
marijuana user (one who does it only rarely). The typical abuser uses
marijuana two to five times each day, seven days a week, all year
round. In other words, the typical marijuana user is very much like
the serious alcoholic when it comes to alcohol.

> People like you who blame the drugs instead
> of the perps are responsible for the present
> sad conditions in our society.

No, not at all, Cecil. I don't blame drugs for the sad condition of this society. I blame people like you - people who openly violate the laws of this society, people who thumb their noses at civilized behavior, people who threaten the safety of my neighborhood with their illegal drug trade, and so forth. The only bad experiences I've ever had in this society from illegal drugs is those experiences forced on me by the drug users.

> The effect of the drug laws is to take away
> the freedoms of law-abiding citizens without
> them realizing it.

Oh, I see. I'm a law-abiding citizen that does not use drugs. Care to tell me what freedoms were taken away from me because of the drug laws? I'm not an idiot here, Cecil. I'm fully aware that if I've lost any freedoms in this country because of drugs, it was a loss forced on me by the drug users, not the laws.

I've already answered that, Jim. In the previous message, I said,
"I'm not even sure the civil war itself was a mistake. It does seem
ironic that the one freedom not allowed in this country is the right
of a state to break ties with this country, when this very country was
created by breaking ties with another country."

> > states.
>
> I have just looked at it, Dwight. In fact I
> quoted directly from it, and that is what it
> says. Sorry, OM.

That is not what it said, OM. First of all, lets preface this with a few facts. Lincoln did not have the legal authority to free slaves throughout the United States. That would have required a constitutional amendment, something that did not happen until years after the Emancipation Proclamation.

Second, if, like you claim, the Emancipation Proclamation did indeed free all slaves in the United States, why was there a need for the 13th Amendment? Why have an amendment to free slaves if, as you say, the Emancipation Proclamation already freed them? Right there, common sense should tell you that there is something seriously wrong with your argument.

Third, you have taken a single line from that proclamation out of context to support your argument. When you quoted, "That on the first day of January, in the year of our Lord one thousand eight hundred and sixty-three, all persons held as slaves within any State or designated part of a State, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free...," you failed to put those words into the context of the entire document.

For example, the next paragraph says, "...the Executive will, on the first day of January aforesaid, by proclamation, designate the States

and parts of States, if any, in which the people thereof, respectively, shall then be in rebellion against the United States..." In other words, the previous paragraph did not say which states were in rebellion. This paragraph said that he would declare that in January.

He then went on in the next paragraph to say, "...in accordance with my purpose so to do publicly proclaimed for the full period of one hundred days, from the day first above mentioned, order and designate as the States and parts of States wherein the people thereof respectively, are this day in rebellion against the United States, the following, to wit:..." This sentence was his actual declaration as to which states were in actual rebellion. He then went on in the next paragraph to list the specific states in rebellion against the United States, and to which the proclamation to free slave applied.

And, finally, he then went on in the next paragraph after listing the states to say, "...by virtue of the power, and for the purpose aforesaid, I do order and declare that all persons held as slaves within said designated States, and parts of States, are, and henceforward shall be free."

You cannot take a single line out of context when reading these documents, Jim. The sentence you quoted was an announcement of his intent to declare in January which states were in rebellion against the United States and his intent to free the slaves in those states. He then came back in January to declare which states were in actual rebellion, and he specifically listed those states in the next paragraph. After listing those states, he then declared in the next paragraph that the slaves in those states were free. The document did not apply to any state outside of those specifically listed.

I don't see why anyone would possibly want to confuse such an ignoble
cause with such a noble one.

At the time, most people around the world, including a great many within the United States, did not consider slavery to be human injustice. In my opinion, when judging the people of the past, we have to hold them to the standards that existed in their time, not some standard that became widely accepted decades or more later. For example, it be absurd to say that a farmer that plowed with a horse a hundred years ago was backwards, when that was the best means available at that time to do the job.

It's late. I think I need to get some sleep. Even that, in the context of the discussion, doesn't make any sense to me. I'm sure it's my fault, so I'm going to mark you message as unread and come back to read it again tomorrow, Jim. Perhaps something will click in the meantime, or perhaps it will make more sense then.

I beg to differ. I can show you if you like.

> Lincoln did not have the legal authority to free slaves
> throughout the United States.

His proclamation seems to presume that he does.

> That would have required a
> constitutional amendment, something that did not happen until years
> after the Emancipation Proclamation.

Not many years. Three, to be exact.

> Why have an amendment to free slaves if, as you say,
> the Emancipation Proclamation already freed them? Right there, common
> sense should tell you that there is something seriously wrong with
> your argument.

I suppose it was in order to put an end to any argument [one that still
persists evidently] that he didn't have the authority to end slavery.

> Third, you have taken a single line from that proclamation out of
> context to support your argument. When you quoted, "That on the first
> day of January, in the year of our Lord one thousand eight hundred and
> sixty-three, all persons held as slaves within any State or designated
> part of a State, the people whereof shall then be in rebellion against
> the United States, shall be then, thenceforward, and forever free...,"
> you failed to put those words into the context of the entire document.

BS. The sentence means the same thing whether it is appended to the
front of the a document (which I posted elsewhere) or not.

> In other words, the previous paragraph did not say which states were
> in rebellion. This paragraph said that he would declare that in January.

What the words say explicitly is that any state in which slaves are held
is considered to be in rebellion. Later on he lists the exceptions, and
lists the inclusions. The month of January is explicitly mentioned in
both places. It is very clear.

> And, finally, he then went on in the next paragraph after listing
> the states to say, "...by virtue of the power, and for the purpose
> aforesaid, I do order and declare that all persons held as slaves
> within said designated States, and parts of States, are, and
> henceforward shall be free."

That's right. After he directly named those States, he made it
abundantly clear that the proclamation applied to them as well. No
where does he state that those are the only states in which the slaves
are to be freed.

> You cannot take a single line out of context when reading these
> documents, Jim.

Please don't lecture to me, Dwight. I don't need it from you. I'm
quite aware of when context can change the meaning of a sentence, and
when it does not.

> The sentence you quoted was an announcement of his
> intent to declare in January which states were in rebellion against
> the United States and his intent to free the slaves in those states.

Not exactly. They don't teach you how to diagram sentences where you
come from, do they.

> He then came back in January to declare which states were in actual
> rebellion, and he specifically listed those states in the next
> paragraph. After listing those states, he then declared in the next
> paragraph that the slaves in those states were free.

Yes. The Southerners evidently weren't very good listeners, so he tried
to make it as clear as possible that he felt the freeing of slaves, out
of necessity, applied to them in particular.

> The document did
> not apply to any state outside of those specifically listed.

If you are correct, then I expect there must be a legal interpretation dating back to that time which would support the notion. I would appreciate it if you could direct me toward such a document. Left solely to the legal interpretation of Southerners with an axe to grind, I'm afraid I remain unconvinced. However, the fact of the matter is that the Northern states were already in support of the abolition of slavery, since any disagreement in that regard would have defined them as being in rebellion and would have automatically applied to them as per the proclamation.

Given that a lot of present Southerners including myself might not
have been born if the South had not seceded, I don't think it was
a mistake at all. My great grandfather moved to Texas from Alabama
to get away from the carpetbaggers and married a Texas lady.

> it declared slaves in all states to be "freed".

Sorry, you are just wrong. The following 140 year old English is tricky
but what it says is the proclamation only applies to the states in
rebellion and not even to all parts of those states. For instance,
West Virginia, New Orleans, LA, and Norfolk, VA were exempt from the
proclamation even though they were in rebellion. There was political
pull even in those days.

"... all persons held as slaves within any State or designated part
of a State, the people whereof shall then be in rebellion against the
United States, ..."

This says all persons held as slaves within any State where the people
are in rebellion are freed except for the exceptions. The English is
tricky. You have to read it a couple of times to comprehend exactly
what is being said. "Any State whereof shall be in rebellion" means
only the states in rebellion.

Sorry Jim, you simply do not understand the English of those days. It
says: "all persons held as slaves within any State ... the people whereof
shall then be in rebellion ..." This means any State that was part of
the rebellion. Try reading it again. Even given that, certain areas like
West Virginia, New Orleans, LA, and Norfolk, VA were excepted from the
proclamation.

Brilliant, Dwight, simply brilliant. I love it.

But Cecil can simply answer that he doesn't understand those rights because
responsible illegal drug use has damaged the exact part of his brain that is
used to understand those rights.

It's a true Catch-22 situation:

A person has to be nuts to admit to illegal drug use in a public forum.
People who are nuts cannot be prosecuted.
So a person who admits to illegal drug use in a public forum cannot be
prosecuted, because that person is nuts.

See?

I don't know. From what I've read, many whites of that time thought that
slavery was morally justified. For example, nowhere in the Bible is slavery
condemned as immoral. Not once (that I know of) is it even called a bad thing.
All sorts of things are forbidden in both testaments, but not slavery. Plenty
of people took that to mean it was OK.
>
>> 2) The Southern economy, based on a few crops, could not compete with the

>
>The Southern economy continues to be based on aggriculture.

Sure - but not nearly to the extent that it was in the 19th century. Heck, as
it says in "GWTW", there wasn't a single cannon factory in the entire South.
Most manufactured goods had to come from the North or Europe. Not so any more!
>
>> 3) The South was more aligned with European markets than it was with the
>rest
>> of the USA.
>
>How would this been affected by not succeeding?

I think you mean "seceding".

Tarriffs. One of the things that burdened the South more than the North was the
existence of heavy Federal tariffs on manufactured imports. Tarriffs on exports
were specifically banned in the Constitution. So Southerners could either buy
from Northern suppliers (thereby enriching Northerners) or pay higher prices
for imports (and enrich the federal government via tariffs). Either way, wealth
moved out of the South towards the North or the feds.
>
>Still doesn't make sense, Jim
>
I'm not saying any of it makes sense, just that there were reasons that some

folks felt they'd be better off out of the Union.

It must be remembered that the USA and its Constitution were not pristine works of genius created by a group of Founders who were in perfect agreement. Not by a long shot! There were all sorts of compromises and problems poorly solved. Many came away feeling the whole thing was temporary until the country got more established. I think it was Jefferson who seriously proposed that the Constitution be scrapped and rewritten every 20 years (!) because the great rate of change in 18th century society would make large parts of it obsolete in two decades.

I think that many Southerners saw the way the trends of the time and simply wanted out because those trends did not bode well for their way of life.

Phil,
Am unfamiliar with the term "beta tester" unless it refers to research done by Israel with info supplied to the U.S.
That Colon Bowel guy is one big putz. Israel's in a war and the best he can do is to talk about "restraint." Sharon ought to ignore the dope. Restraint my tuchus. What's needed there is an all out IDF offensive to storm the Palestinian enclaves and strongholds. If the West Bank is being used to create mayhem against innocent Israelis, then TAKE IT BACK and do what must be done.
Doc,AF2Y

You love to employ the "yes/no" "Do you enjoy sex with your mother" type questions, Cecil.

Homey don't play that.

>It's no game, Steve, just intellectual dishonesty on your part.

You have absolutely NO idea what you are talking about.

>The feds pull the classification out of their posteriors.

Cecil........Oh, never mind.

>The purpose for classifying marijuana as a class 1 drug
>was to try to control the illegal Mexican nationals.

Uh huh...And the reason they put pork by-products into hot dogs is to try and starve out Israel. Heard THAT one too.

>"Common good" is the catch phrase used by socialists/communists
>to take away freedoms.

The Founding Fathers were communists and socialists...?!?!

More liberterian hooey! Again, you wonder WHY people don't flock to the ranks of your "party".

>The "weed" has been proven effective in
>relieving nausea for terminal cancer patients.

Oh...wait a minute...two paragraphs ago you were insistingthat the Feds don't test this stuff...Now you say it's been "proven"...

I KNOW it has, and I know who has proven it. I agree it has positive uses. But the people whom it would serve are already dying. They are unlikely to be the ones using it for RECREATIONAL purposes.

Marijuana for TRUE medicinal purposes is a valid use....Just as Meperidine is valid for pain management...NOT for "recreational" or "social" purposes.

>Of course, society
>would rather have those poor people throwing up and starving to
>death for the "common good of society". Nice guy.

Aggressively relocate the sarcasm to a light-deficient orifice of your choice, Cecil. You know that is not true. My "position" relates to "recreational" applications.

>> Little risk, Cecil...?!?!

>Little risk compared to the obscene profits that people like you
>guarantee to him.

HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA

>Do you side with the AMA when they want to outlaw guns?

Nope. But then I PARTICIPATE in the democratic process to keep it that way.

>You don't want the drug laws changed. You guys are on the same side.

You are lying.

But then we knew that..........

Clearly you didn't major in history. There was a >50 year ruckus over admitting new states as
either "slave" or "free". Ever hear of the Missouri Compromise?

U S Grant held slaves???? Ha! Slaves cost a lot of money and he had so little that he went broke
selling dry goods. The only thing he was good at was kicking rebel butt, as it turned out. That
seems to include his later tenure as President.

> BTW, the Emancipation Proclamation only
> applied to the Southern states.

It applied to any state or part not excluded which held slaves thus was considered to be in rebellion.

There are a great many things about the South that I really like. It's history of slavery isn't
one.

Well, they SAID they were no longer in the union. Turned out they were wrong, as Lincoln knew already.

But you still left out one of the main effects. What do you think the slaves in the "states in rebellion" thought when they heard the news? "I'm, free, The Man said so". It gave the rebels another entire level of headaches, the necessity of attempting to maintain control and order over their newly freed slaves as well as fighting the war. Worth a few of Union divisions or more, I'd guess.

It was a masterful tactical stroke by Lincoln and company.

491. Downgrading?

Hi everybody,

I seem to remember that some Advanced class amateurs (I could be wrong here, please feel free to correct me where necessary.) took an exam to actually "downgrade" their tickets in the face of restructuring. I believe this was an attempt to differentiate themselves from the upgrading masses. Does anybody here know the "how & why" of this? Just curious, thanks.

The only good reason I can think of is that the Advanced would be a symbol
of passing a 13 wpm code test because it will never be offered under the
5wpm standard. I don't think anyone actually downgraded.

Life is too short.

Nope. I'm quite sure that the Emancipation Proclamation was intended to
free slaves in any state in which slaves were not free.

You heard wrongly. Any extra class whose "prior class" field shows advanced we will all recognize as a 13wpm extra at the least (and if the extra class license was held before April 19, 2000, a 20wpm extra is the only possibility).

However, one can voluntarily surrender a license, but I've never heard of anyone doing that to ask for a license of lesser privilege.

> the rebellion.

No. That part of the sentence simply declares that people within any state in which slaves are held shall be in rebellion. Note that you had to type over the punctuation in order to make your point. My first reading of the proclamation gave me the same impression that you have. However, the comma between "within any State", and "the people whereof" indicates that there were two points being made. The subject of the sentence is "persons being held as slaves", not states in which persons are being held as slaves, as evidenced by the fact that before the semicolon those people are once again referred to as being thenceforward and forever free. The scope of people who are the subject of the sentence is NOT modified or limited by the sub-sentence. Note that the sub-sentence refers not to the slaves, or to states, but to the people of a state in which slaves are held. And it tells them that they are in rebellion.

I don't disagree with that one bit. I simply disagree with the
assertion that the Civil War wasn't about slavery. Were it not for
slavery, there wouldn't have been a war.

I was once married to a Southern belle. I very much appreciate the
South, it's beauty, and all the suffering it and its people have
endured. I just wish the bitterness would finally go away.

True, the person can say they don't understand those rights. However, as I understand it, that does not in itself prevent the use of anything said after that. It would be up to the court to decide if statements after that could be used in court. In other words, the court would decide if the person could reasonably understood those rights or not (in effect, waving those rights by making further statements if he did understand).

Now, I do like your particular slant on this (drugs damage the part of the brain needed to understand those rights). But, while creative, I somehow suspect that just will not fly in the courtroom. :-)

> A person has to be nuts to admit to
> illegal drug use in a public forum.

There is a difference between being foolish and being legally insane. Of course, I'm not saying that Cecil was foolish (though I have questioned his sanity occasionally - a joke, people). Like so many of us, he just got caught up in the heat of the discussion and let things slip out that should have been left unsaid.

By the way, let me make something very clear here. There is absolutely nothing wrong with discussing the drug issue or with advocating a change in the drug laws. However, when you make very specific statements about your own immediate drug use, in writing, in a public forum, it seems to me that you're just asking for trouble. In other words, limit the conversation to the general political issue and you can talk about it all day long (it's your right).

All you need to do to downgrade is get on 14.313, get Riley's attention. He will send you a re-test order (if you tested under the Volunteer Examiner Program that is). And then you can go fail it like KC1ZQ now summers EVE did. I believe he is the ONLY ex advanced licensee that downgraded to a General.

> explicitly mentioned in both places. It
> is very clear.

Okay, Jim, I'm going to try this one more time. I don't want to keep writing long-winded explanations, so please do read this very carefully and refer back to the proclamation to verify what is said.

First of all, the proclamation is in two parts. The first sentence says that the second two paragraphs, including the part you quoted, were written in September to announce his intent to declare in January which states were to be in rebellion and his intent to free the slaves in those states. In other words, the first two paragraphs were only intended to lay the foundation for the actual proclamation in January. You can see this clearly by reading the first sentence. The next two paragraphs contain the words in that September proclamation (notice those two paragraphs are in quotes).

Again, you cannot take a single sentence out of context to support your argument. The sentence you quote (the first sentence in the second paragraph) is prefaced by the words "that on the first day of January." Remember that sentence was written in September, not in January. Therefore, that sentence does nothing on it's own without the proclamation in January. In other words, that sentence does not free the slaves.

Paragraph three specifically says what will, and will not, qualify a state to be declared in rebellion in January. And it has nothing to do with slavery. Instead, that paragraph says that any state that is represented in congress, by members chosen by the voters, and so forth, will not be declared in January to be in rebellion. All other states will be consider to be in rebellion.

Paragraph four continues with the January proclamation (notice the word "now" in the first sentence, and the date later given). That paragraph then goes on to designate which states are in actual rebellion. The proclamation then goes on to list the states in the fifth paragraph.

It is not until we get to the sixth paragraph that any slaves are set free by the proclamation. That paragraph says...

> And by virtue of the power, and for the
> purpose aforesaid, I do order and declare
> that all persons held as slaves within
> said designated States, and parts of
> States, are, and henceforward shall be
> free; (snip)

Again, the fifth paragraph listed the states this sentence applies to. No other states were included in the emancipation proclamation. And the slaves in no other states were freed. It was not until the 13th Amendment that slaves throughout the country were freed.

Read the proclamation if you don't get it. Again, remember that you cannot take a single sentence out of context to support your argument. The proclamation is the entire document, not a single line. If a single line was intended to stand alone, the proclamation would have contained only that single line.

And, if, after that, you still don't get it, I give up. I suggest that you take what I've written, what you've written, and a copy of the proclamation, down to a local college history professor and ask him or her which of us are right. Or, if you can, ask a expert on historical legal documents. I have never heard your interpretation from anybody with any expertise on the subject.

Hello Paul,
For the most part the bickering and crap you refer in these newsgroups is not present on the HF bands with the possible exception of 80M sometimes during the evenings.

I would heartily encourage you to get your HF privileges in order and join a great bunch of Hams on the HF bands.

The Proclamation INCLUDES the first sentence, which means exactly what I
said it means. There is nothing anywhere in the document to support
your claim that slavery was disallowed ONLY in the Southern states.

I expect he would say we are both right, with the exception of the claim
I've been trying to dispute, that the Emancipation Proclamation allowed
slavery to continue in Northern states.

Uhhh-what was the date of that proclamation again? West Virginia didn't
become a state until June 20, 1863.

Okay, let me make something very clear at this point. I get a little defensive when someone accuses me of having an hidden agenda where none exists. I didn't raise this subject in this thread. I simply responded to the statements in this thread with my own views, opinions, experience, and knowledge.

One of those statements was written by you and contained information which I felt was inaccurate. I have since spent considerable time writing messages trying to explain why I thought those statements were inaccurate. Throughout all of that, I tried to be as polite as possible (I didn't accuse you of having an agenda, though it is often the person promoting incorrect information that has the agenda).

And, finally, I'm not some southerner with an "axe to grind." I was educated throughout the country (Massachusetts, military schools overseas, California, etc), and the interpretation I gave is exactly what I've heard in schools throughout the country.

Furthermore, I have read a good number of books on American history, and again the interpretation I gave is exactly what I've read in every book on the subject. For example, the Funk & Wagnalls New Encyclopedia says...

Emancipation Proclamation, proclamation
issued by Abraham Lincoln on Jan. 1, 1863,
during the American Civil War, declaring
all "slaves within any State, or designated
part of a State... then... in rebellion,...
shall be then, thenceforward, and forever
free." The states affected were enumerated
in the proclamation; specifically exempted
were slaves in parts of Southern states
then held by the Union armies.

That same encyclopedia elsewhere says...

On July 22, 1862, in response to radical
demands and diplomatic necessity, he
[Lincoln] told his cabinet that he intended
to issue an emancipation proclamation but took

care to soften the blow to the border slave
states by specifically exempting them.

So much for your argument that all slaves in the country were freed.
Anyway, that same encyclopedia elsewhere says...

The preliminary proclamation of emancipation,
issued by Lincoln in September 1862,
stipulated that on Jan. 1, 1863, in those
states or portions of states still engaged
in rebellion, the slaves would be "forever
free." Despite the reprieve granted the south,
Lincoln thought it unlikely that the
Confederate states would choose to return to
the Union. Nevertheless, partly to appease a
skeptical northern public, he made it clear
that preserving the Union, not abolishing
slavery, remained his principle objective.
When he later issued the proclamation of
emancipation, Lincoln defended it on the
grounds of military necessity; emancipation
would, he declared, weaken the productive
forces of the Confederacy and thus hasten
the end of the war. Tennessee, and the loyal
border slave states were excluded from the
proclamation, as were designated portions of
Louisiana, Virginia, and West Virginia.

Again, so much for your argument that all slaves were freed. Every
book I've ever read on the subject says the same thing (the
emancipation proclamation only freed southern slaves). I have never
heard your interpretation (all slaves in America were freed by the
emancipation proclamation) from any source other than you.

This ends my attempts to correct your misinformation on this subject
(I don't desire to have additional accusations of hidden agendas
directed at me). I hope those reading your comments will choose to get
their information from a more reliable source.

Jim, I think Dwight wins this one. The EP was issued not so much for
internal consumption as to give the British govt at the time an excuse to
stay out of it. They were under tremendous pressure from the cotton mill
owners and bankers to whom the plantations owed tons of money to intervene
on the side of the Confederacy, particularly after the Trent affair.

The Confederacy had embargoed cotton shipments as a lever on the Brits to
intervene, it was not the Federal blockade (secession? one closes his ports,
he does not blockade them) that prevented shipment.

The upshot was that the English mills converted from the long-staple cotton
grown in the South to the short-staple Egyptian cotton leaving cotton a drag
on the market after the war.

Lincoln gave the Brits a fig leaf but the intent was not to create a major internal disruption. The effect was limited to states "then in rebellion".

Along the line of secession, how do you create West Virginia out of a state without its consent unless you believe Virginia had in fact seceded?

Do you apply that disdain to the other states outside the south, Richard? At some point in this country's history (prior to the 13th Amendment), slaves were held in every single state in the country at that time.

By the way, Jim Kelly, this is the only agenda I've ever had relating to this subject - fighting the concept that slavery was solely a southern evil.

I apologize for the unfair remark, Dwight. I was getting a little testy
at that point. This all started when somebody said the Civil War had
nothing to do with slavery. And then somebody added that Lincoln only
freed some of the slaves, or maybe none at all. I think that's bad
history. If you agree with that, then we have no disagreement.

> One of those statements was written by you and contained information

Again, I apologize. I think you're a good guy. We just appear to have
a disagreement on this.

I hope we can at least agree that the Emancipation Proclamation was intended to free slaves in States that refused to otherwise free them. There was no point to imposing this decree on abolishonist states. The wording nevertheless freed slaves in any state in which they were not free.

> I have never
> heard your interpretation (all slaves in America were freed by the

I wonder if you might name for me those states which President Lincoln intended, through his actions, to remain as slave states.

> (I don't desire to have additional accusations of hidden agendas

I thought that I detected a bit of an agenda. I don't think I ever made such a claim however. Nevertheless, the South certainly seemed unopposed to the idea of killing people over it. Yes, I know. The Civil War wasn't about slavery.

Slavery was "A" cause of the war, but not "THE" cause of the war.
That's what I'm saying.

> Were it not for
> slavery, there wouldn't have been a war.

Impossible to know for sure. Without slavery, the South of 1861 would
have been so different that the other causes for secession may have
not existed.
>
> I was once married to a Southern belle. I very much appreciate the
> South, it's beauty, and all the suffering it and its people have
> endured.

How about the suffering the SLAVES endured? Ever see "Gone With The
Wind"? I always found it disgusting that there was absolutely no
mention that the whole plantation system, the wealth and beauty of
places like Tara and the lifestyle that was enjoyed by the likes of
the O'Hara family was made possible by slave labor.

btw, most people don't know that many of the important historic
government buildings in Washington, DC were built in part by slaves.
The Capitol is one example.

>I just wish the bitterness would finally go away.

It's easier to blame one's problems on things done long-ago and/or far
away by people who are "different" than it is to admit that the
problems have causes closer to home. For example, it's easier to blame
the Feds for outlawing pot than it is to realize that the states would
do the same thing if the Feds didn't.

> they right?

I've tried to avoid your question because I cannot give you a simple answer, Jim. I didn't live in that time and I think it is unfair to apply today's standards to people who lived more than a hundred years ago. Therefore, all I can say is that the people were not "wrong" based on the standards of their time. Beyond that, I'm not willing to make a judgment, nor is one needed. The only judgments needed are for those living today, based on today's standards.

Of course, I know you're now probably going to start screaming that I think slavery was, or is, okay (after all, based on your increasing rhetoric, this seems to be what you're reaching for - to define me as a racist southerner). But that is not at all what I said. Slavery is most certainly not okay today. But those people are not living today. Therefore, I'm not willing to judge what they did by standards other than those that existed in their time (the only standards they could have possibly lived up to), no more than I hope the people of the future judge me by the standards of today instead of those that exist in their time (standards I cannot possibly live up to because I cannot know what they will be).

>be done.

Easy to say. I'm a veteran of the '67 War and part of me says we
should have cleaned the problem up when we had the chance. The
problem was then, and still is today, that we cannot sustain the
logistics necessary to occupy all of Syria which we would have to
do. Remember that we were 50 km (30 miles) from Damascus.

My nephew and his friends are the active and reserve troops who
would have to do the job today, and I wish that it was that simple.
His last active duty assignment was as an appeals prosecutor in the
Military Courts in Gaza and Ramallah, and he has no use for either
of those places.

We may have to do it, though.....would YOU like to go there and
participate? I've done my share....

Sorry guys, I think it was an Extra that downgraded to Advanced to retain that class of license as a 13 w.p.m. merit badge. Thanks.

Perhaps. One of the contexts of that time was than most citizens of the USA, if asked, would have identified themselves not as "Americans" but by their state of residence or origin.

If we're going to consider people in the context of their time, consider this: In 1860, where in Western civilization was slavery allowed besides the United States?

>> In 1861, yes. If all the slave
>> states voted as a block. But the

>would not really affect them (most didn't have slaves).

Almost nobody goes to war thinking they will die. The issue of the end of salvery was not in the distant future by 1861, either.

Most non-slave-owning Southern whites of the time did not realize that slavery actually made their lives harder.
>
>> The evil of slavery bred the evil

> using ASCII characters.

You are correct Cecil. G-d is known by many different names in many different faiths. The name itself is not important...just the concept of a supreme being or spirit or whatever you may want to believe in or is customary for your traditional faith to believe in. I'll not bother to give you a list of names for the one G-d that is mentioned in the old (Hebrew scrools)testament and I'm sure that the name of the trinity G-d of Christianity or the Muslim G-d are well known to believers.

When we study Morse code we don't need to learn by dots and dashes. It is best IMHO to learn by the sounds of entire characters or even phrases. I don't believe that it is good to learn to read by learning phonics. It is best to learn by recognizing entire words. In theology the name of G-d is not as important to me as it might be to others...but the concept of G-d is something to think about regardless of the religious mythologies that attempt to name or even to humanize G-d. To popularize G-d perhaps it is required for some peoples to picture him as being in the form of a man with a name. With all respect to those who need a human like figure to be their G-d (or figures to be their
G-ds); my G-d is closer to the nameless G-d of Mendoza.

It is OK for those who may want to believe that their human rights are granted by G-d...As for me I can not blame any G-d for any rights or lack of rights I may have...I can only blame the government...and that is complex enough because my rights and their limitations may be established by the federal government, or by state, city or local governments, each of which may have executive, legislative and judicial systems where my human needs may or may not IMHO be fairly represented. Now I admit that I am a moral person and I have a sense of what is right and wrong about anything that I may do socially. I

must respect the rights of others and follow the ten commandments and above all respect the special innocense of women and children...but that is not just because it is or is not in any Bible...It is because I would expect others to respect my wife, my relatives and my children. That is called being civilized.
Being civilized means respecting your neighbors wives, relatives and children and even their property and livestock...as well as whatever G-d(s) they may pray to and/or have faith in.
It isn't always easy.

Now please accept also my spelling errors and typos...because if you understand my concepts I don't think that the errors in spelling are very important either.
Enuf Sed.

Source record: 16821

I did a few Google searches and came up with this. Thank you to all who responded.

This was cut from The EARS WA4IWLetter - APRIL 2000

-- LICENSE DOWNGRADING --

There's a very interesting advertisement in the April 2000 CQ from the "Gordo del Este Radio School" out in Los Locos, CA offering a one-weekend license downgrade course. As the ad states, after 15 April, only Advanced Class licensees will have FCC proof that they can copy Morse at any speed faster than 5 wpm. The editors of CQ tracked down the origin of that ad, and one of the participants, Horace Sesrear, WB2OOU, penned an article for the April issue.

Sesrear claims that the "Real Hams Net" on 75 meters came up with the idea. Those who wish to downgrade have to submit their current ticket to the FCC and ask that it be cancelled. As soon as their call disappears from the on-line data base, they then have to go to a VE session, take the 13-wpm test plus the written elements 2, 3, 3B and 4A. (Bringing lunch along was advised.) Once the FCC issues the new license, they could then apply for their old callsign via the vanity system. Participants were advised that the Advanced exam had changed a lot since 1951!

As time is short, advanced reservations at the Gordo del Este Radio School were advised. Cost of the weekend course is only $500. Hurry, 'cause 15 April ain't that far away. "Downgrade now!"

Hi Paul,
While not a licensed ham (I too am planning to take the Extra exam
in October sometime), I am a long time computer scientist and semi-long
time USENET reader/poster. As such, let me assure you that USENET is a
very different beast from almost any other communications medium in the
world, complete with it's own philosophy.
On USENET, for a variety of reasons both historical and technical,
it's very easy to `sound off' and post something irregardless of the
nature of the post or its content or tone (for lack of a better term).
The ability to do so anonymously has always been present, though doing
so is now more easily accessible to non-technical users.
It is common to see an individual jump into a USENET post without
forethought to the subject or the ramifications of his or her post; I
confess myself guilty of this at times, though I hope I strive to keep
it to a minimum. But that is part of the general philosophy of free
speech that has been used on USENET for some time now.
My general impression of amateur radio (btw- do people *really* want
to be called a form of processed meat? ;-) is that this does *not*

occur as frequently, and in general, the quality of conversation is higher. This is especially true as the content of USENET has degraded in recent years (at least for discussing computer science research; but that is only my personal opinion).
Perhaps this is due to the regulation of amateur radio by government and international treaty; USENET is well-known for it's commitment to ``anything goes'' free speech, particularly in the alt.* hierarchy. While stringent attempts to keep things `on topic' and to a certain extent useful used to be made, most folks have given up on trying to keep USENET in line.
At anyrate, all of this is a very long-winded way of saying that USENET culture and amateur radio culture are, by my estimations, worlds apart. Given what I've seen of USENET culture, this is probably a good thing. :-)
I sincerely hope to meet people on the airwaves interested in pursuing the frontiers of technology and moving radio to the next level when I get licensed (assuming I pass the exam!). Perhaps I'll see you around!

My conscious is bothering me so I have a confession to make.
Of all the things I have used or consumed in my entire life,
cilantro has the biggest effect. If I am standing up when I
eat cilantro, I fall down. If I'm driving when I eat cilantro,
I run off the road. Cilantro throws me into a manic euphoria
that lasts for hours and makes me completely unpredictable.
It's not my fault when I do something untoward while under
the influence of cilantro. I simply cannot control myself.

Given my confession, I expect Steve to write his congressman
to try to talk him into introducing legislation that puts
cilantro on the class 1 drug list. This is to warn any cilantro
lovers (like me) out there. After Steve gets through, cilantro
will only be available from drug dealers for 1000 times the
present price. Coriander is also likely, in the process, to wind
up on the class 1 drug list. And it's all for the common good of
society.
--
cheers, Cecil

> that time.

In the history of humans most every culture can be said to have similiar attributes. If you will read really closely you will find that slaveholders in the South were a small minority of influential persons who set the Agenda for the entire South. They were not about to give up their "right" to own their field hands and laborers. A more troubling feature of the situation is that some still exist there with the same outlook on things. Clearly slavery would have persisted for a long time without the Civil war. It was a war which did much to shape the nation in ways unrelated to that issue. The South did OK over time following the without slavery, and the slaveholdering minority who resisted the idea of ending slavery would have been much better off having ended it voluntarily. I believe it's true that the war was not caused solely by slavery, but it was certainly the spark that lit the fire.
Without doing a state by state review, it is clear that all but a possible few border states did NOT allow slavery in any form at that time. Most never did, although "indentured servitude" once was a common practice in many places..

You can write your volumes, but when the smoke clears and all the BS goes away, Jim has the real answers.
One sometimes wonders why the South dragged behind the North for so long economically. A good case can be made that the institution of slavery did more to perpetuate that than any other single factor. It helped perpetuate what can be viewed as a "backward" or unchanging econimic cycle. Slaves were most efficient when used as field workers.

Exact text from the emancipation proclamation; "except the
forty-eight counties designated as West Virginia."

No need to apologize. I was getting a "little testy" myself, as the message you replied to clearly suggests. However, I still think you're characterizing what was said inaccurately. The point wasn't that slavery played no role in the secession of the southern states, only that is wasn't the main issue as so many today seem to think it was. It didn't become a key issue of the conflict until later in the war, when Lincoln issued the emancipation proclamation. However, rather than rehashing all the reasons I think that again, I'll just let it go and move on to less confrontational topics.

Didn't say that you specifically did. It is a common misconception that many people have today.

> Nevertheless, the South certainly seemed
> unopposed to the idea of killing people
> over it. Yes, I know. The Civil War
> wasn't about slavery.

Ah, but that again doesn't tell the whole story. I don't think it was the intent of the south to start a war (or, as you put it, kill people) when they seceded. The war itself started over the issue of Ft. Sumter controlling a key port in South Carolina. Once the first shot was fired over that, the larger conflict followed.

I'm sure that did cause some headaches, but I'm not sure it played that much of a factor. If the civil war was like most wars, the wealthy upper class (the ones who owned most of the slaves) were very successful at avoiding direct participation in the conflict. In other words, they probably sat out the war at home and continued to run their farms (and their slaves). What do you think?

Or that could be much more easily explained away by the fact that the south was better suited for farming than the north (just like Texas was better suited for raising cattle, the mid-west was better suited for growing wheat, or Washington state was better suited for logging). And, because of that much more obvious factor, much of the south did not switch from a farming economy to an industrialized economy.

Of course, I doubt very many in those industrialized cities of the north complained about the south's economy when they sat down to eat the food those farms provided. But you can bet your bottom dollar that they did complain when it came time to pay for that food in the stores - loudly enough to cause the government to institute a number of policies over the years to keep the price of farm goods down (which has certainly not helped the south's economy over the years - but, who cares, they're just a bunch of darn slave owners anyway).

Of course, all that is changing (the south may be slow, but it did finally realize that it was licked when it came to farming). The south is very much moving away from a farming economy today. Fifty years ago, every single member of my family were farmers. Today, not a single member of the family is.

Because of that trend, in the future, like so many other things, we'll have to depend on foreign products for the food on our tables. Considering that food doesn't stockpile as well as fuel, I wonder if we'll handle the future food crisises better than we handled the recent fuel crisises. If not, there is going to be a lot of empty tables during those future events.

> Are you saying slavery was NOT an issue?

No, I've never said that. What I've been trying to say for several days now is that slavery did not play a "key" role in the secession or in the early stages of the conflict. Slavery was one of the areas where the south disagreed with many in the north, but it was the sum of all those disagreements, not a single disagreement, that caused the secession and the later conflict. It was not until later that slavery was raised to a "key" issue, at least for the north, with Lincoln's emancipation proclamation.

Better dig out the dictionary, Bill. Webster's New World Dictionary defines "irregardless" as an non-standard or humorous adjective or adverb meaning "regardless." I learned of that following a recent usage where someone else complained. It may be a non-standard word, but it is a word nonetheless.

I got what you were saying, Jim. Of course, I doubt aspirin, or any other form of acid (including the street variety), would have helped in this situation. By the way, to avoid misunderstanding, I was referring to the sleep mentioned in an earlier message, not the acid mentioned in that message, when I said it didn't work.

Don't worry about it. The topic seems to be about dead at this point. Cecil and I get into this discussion about every two to three months. We argue out the same details, get bored with the discussion, and then move on to other things. I don't think either of us imagines for a moment that we're going to change the other's mind. However, hang onto to that article, Dick. This subject is almost certain to come up again in the future and it might give you some ammunition to use during that discussion.

If, after reading that, you still want to put out the effort to email a copy, the address at the top of this page is my correct email address. I believe Cecil also uses his actual address with his massages (" Cecil.A.Moore@IEEE.org ").

Why invest in new labor-saving machinery unless you have to? (cotton gin)

>It helped
>perpetuate what can be viewed as a "backward" or unchanging econimic
>cycle. Slaves were most efficient when used as field workers.
>
The repression of slaves increased with time. For example, laws were passed in
many states making it a serious crime to teach a slave to read and/or write.
Torture, mutilation and murder of slaves for real or imagined "offenses" like
running away or not showing proper "respect" became legal and accepted. Slave
owners would pursue escaped slaves into free states and tried to get the law
enforcement authorities of free states to aid them in recovering their
"property'.

>time.

Not all slave states joined the confederacy, but all confederate states were
slave states.

>Most never did, although "indentured servitude" once was a common
>practice in many places..
>
But indentured servitude was a completely different thing. It was a voluntary
agreement of the indentured person to work for a set number of years, usually
in payment of a debt.

A very typical setup was that a poor person in England or Scotland would sign
up for a seven-year IS term in return for passage to the New World. Usually the
servant learned a trade during the service term. Indentured servants' contracts
could usually not be bought or sold against their will. Their children were not
indentured from birth. And when the term was up they were free to go as they
pleased.

Indentured service could be a good deal for a poor person in Europe who wanted
to come to America and had no other way to pay for it. The problem was that the
contract holders had to replace them when the contract ran out.

If anyone wants to know for sure the code speed of another op, the best way to determine that is with a CW QSO. If anyone thinks that a single test passed once is a superior method, they have a pretty illogical viewpoint, IMHO.

I hold an Extra, but I need neither a 1X2 call or an old FCC exam to make me feel like I have a 13 wpm merit badge. I think that even if I were to lose the ability to send and receive Morse code tomorrow, I would still find plenty of opportunities for accomplishment in ham radio. Though I am reasonably proficient in Morse code and passed an FCC-given Extra, I consider that to be one of the lesser of my accomplisments in ham radio. Good accomplishments, mind you, but only the start of a lifetime of growth and learning.

OK, let's explore this reasoning a bit.

What WERE the "standards of their time, then?

In 1860, was slavery acceptable or legal anywhere in Western
civilization other than in some parts of the USA? In the countries
where Judeo-Christian religions predominated? In countries where
English was the most common language?

> Beyond that, I'm not willing to
> make a judgment, nor is one needed. The only judgments needed are for

I disagree. If slavery was/is immoral, it can be reasoned that a war
could be justified to end it. If slavery was/is not immoral, the
opposite is true.

See above about "the standards of their time".

Of course, historical hindsight is 20-20. Today, almost all people find the very idea of slavery completely unacceptable under any conditions. A big part of that is due to the fact that our thinking has evolved over time. Things that were once acceptable have become unthinkable, and things that were once unthinkable have become commonplace.

However, it should be noted that there is a basic and fundamental hypocrisy when a country claims to be based on statements like "liberty and justice for all", "all men [sic] are created equal" and "endowed by their Creator with certain inalienable rights" but then permits some human beings to own others as property. It's simply not logical, regardless of the time or place.

I've often thought that coffee was next on the list of substances that some people will try to make illegal. The caffienated version has some nasty effects on me, and I've seen a lot of people who are obviously suffering the effects of the stimulant.

Don't forget there is a LOT more to HF than just SSB Phone. Try CW,
Digital, SSTV, Amateur Radio Traffic nets. etc.

Yep, and he's my all-time favorite comedian too. His best line was "The Earth's not goin' anywhere...we are! That's right, pack your $h_t folks." (Re. "Save The Planet" - Are people a threat to the planet?) "Ask those people frozen in position from Mt. Vesuvius if the feel like much...of a threat...to the planet...today?" Saw him in Las Vegas some years back and almost suffered bodily harm from laughing so hard.

Hey Steve,

Here's one you might identify with. Getting up early on a Sunday morning to make a scheduled contact , walking into the den to let the rig "warm up," and then walk to the kitchen for that first fresh cup that's already ready to pour because the coffemaker was set by timer to "wake up" 20 min. earlier? Gotta go, my hand's shaking. :-)

Bert,

I don't think there is a test to do that. An Advanced Class wouldn't have to do anything to "distinguish" himself from the upgrading masses. After all, the Advance Class, which I hold now, itself indicates that the holder tested prior
to the changes and has demonstrated CW proficiency of at least 13 WPM--- if that is what the holder is after. I just haven't upgraded because I haven't seen
the need.

It was also 'A' cause of secession, and it was also 'A' cause for
concerns over the economy. Basically, there is hardly an issue involved
that didn't relate in some way to slavery, and the Souths dependence
upon it.

> > Were it not for

I always assumed that Tara was a plantation. One of the servants in the
movie was recognized at an Academy Awards presentation years later.
Can't think of her name off the top of my head. But yes, the story was
obviously told from the perspective
of the Southern aristocracy.

> btw, most people don't know that many of the important historic

Naw, that's too time-consuming and requires real radios.
We need something that is instantly available on the
Internet so that we can throw it back at someone while
staying online. The ARRL should expand their VE program
into giving honest-to-God, proctored code tests complete
with steely-eyed examiners, headphones that envelop
one's head like a C-clamp and hot, noisy rooms with lots of BO.
It would need some kind of coordination with the callsign
databases so that the officially determined code speed could
be immutably stamped on the licensee's listing. This would
require a lot of processing, so an exam fee somewhere
around $500 would be in order. But no cost should be spared
in separating Real Hams (tm) from the CB wannabee's.

Thanks Jerry,

I wasn't sure of the specifics. It turned out to be a call to extras, disgusted with restructuring, to have their tickets cancelled. Then, upon deletion from the database, they'd retest to become Advanced class ticket holders. I don't know if anybody ever actually did it, but I did find a weekend class advertised for $500 to do just that. I was just curious and didn't have any old issues of QST or CQ floating around. I have to read em' quick, if mt 3 1/2 yr. old daughter doesn't shred em', (She's facinated with safety scissors.) my 7 mo. old lad tries to chew em'. (The "everything goes into my mouth" stage.) Thanks again.

Man, do you realize how far those other countries "in Western civilization" were from some farmer in North Carolina at the time (I'm not talking about in mileage - I talking about in perception). It is absurd to hold that person to a standard that existed in Germany, England, or anywhere else. In the United States, that person violated no law of that time, either legally or ethically. Therefore, I'm simply not willing to step up a hundred years later to condemn that person.

Now, you and I can agree that we don't want to do that today. But our choices of today should not condemn someone of the past. Likewise, we can have whatever morals we want today, but that again should not make someone of the past, who never even heard of our morals, immoral.

It is not logical to you or me today. But, again, we didn't live in those times. Obviously, for whatever reason, they thought it was quite logical. Beyond that, it makes no difference to me whatsoever. All we should really care about is what happens today. That is the only thing that we can personally do something about. And there is enough wrong in this world today to keep me way too busy to worry about judging those of the past.

Oh, no. Lets not get into another dictionary debate about the
meaning of a word, Bill. The last one went on for weeks. :-)

It may be a non-standard word, but it is a word nonetheless
(commonly used around the country - much to the dismay of the English
teachers). And I'll just leave it at that.

<DESCRIPTION> COMMENT ON PROPOSED 60 METER AMATEUR ALLOCATION
<CONTACT-EMAIL>K4YZ@AOL.COM
<TEXT>LADIES AND GENTLEMEN OF THE COMMISSION,

I write to you today to request that you favorably consider the request for a new domestic spectrum allocation in the 60 meter band for the Amateur Radio Service.

The recent trials of the American Radio Relay League have proven that the allocation requested provides excellent coverage for domestic communications. It would greatly relieve the congestion experienced on 80 and 40 meters from both foreign broadcasting services and from crowding within the Amatuer Service itself.

However I would ask that the Commission consider making the band available solely for domestic formal traffic handling, public service and emergency communications purposes, and for requisite training associated with those applications. By approving this request, the FCC would alleviate a significant amount of traffic from the present 80 and 40 meter bands for "routine" communications and would provide a relatively "secure" enviroment in which the suggested users could operate without hinderence.

This request could also have the added benefit of relieving the Commission of the task of designating certain frequencies for "communications emergencies" as it would have already in fact have done that by restricting the proposed allocation for those same purposes.

I thank the Commission for the opportunity to comment on this matter.

Steven James Robeson, LPN
Amateur Extra Class Licensee, K4YZ
ARRL Emergency Coordinator

Ed:

How many Extra-class hams, licensed after 4/15/00, do you think can
demonstrate the ability to work CW at 5 WPM on-the-air? IMHO,
five percent would be extraordinary!

Ed:

This is true for all of us who achieved Extra-class status under the "old" licensing structure. An amateur radio license, even an Extra-class license, is now, and always has been, a beginning, not an end. It is a start, not the finish, of a lifelong experience of learning, growth, and experimentation. At least, that's what it's *supposed* to be. Unfortunately, for a large number of hams, the learning, growth, and experimentation never start, or don't advance beyond the HF phone bands. The reduction of the code testing requirements exacerbates this problem by ensuring that there is no underlying skill in *any* non-voice mode, therefore, no motivation to give it a fair trial on-the-air.

What has always separated the so-called Real Hams from the wannabes is the motivation and discipline required to master the Morse code at a useful proficiency level. The Real Hams have the superior intelligence to understand the usefulness of this mode, and usually gain a useful level of proficiency very quickly. Then, once they start having fun with this mode on-the-air, their proficiency usually increases exponentially, leading to (in the pre-Restructuring era) Extra-class status in short order. Now, for reasons of political correctness and bureaucratic indifference on the part of the FCC, Extra-class status is given away for 5 WPM and a few hours of committing some Q & A to short-term memory. The "lifetime of growth and learning" is something being undertaken by older hams like you and me, who took 13- and 20-WPM code tests at the FCC office. It is because we are better people than today's hams that we were able to achieve this with comparative ease. The dumbed-down wannabes we're getting now will never equal us.

My comment:

This is about the most hair-brained idea I've seen out of you yet,
Steve! I could see designating a small 10 - 25 kHz "window"
strictly for emergency preparedness and actual emergency traffic,
but the whole steenking band? You crazy, or what?

What I would propose is that the ARRL and CQ make it another
"Contest-free Zone" like the present WARC bands.

Exactly who is the victim if I smoke marijuana in the privacy of
my home after growing it in my garden? If you believe the above,
you seem forced to believe that drinking alcohol is a crime also.

> Marijuana use is abuse.

Nope it isn't, Dwight. You just think marijuana is the boogieman.
You simply lack adult attitudes about that God-given weed. Marijuana
is certainly no worse than alcohol. Before you dispute that statement,
chug-a-lug six ounces of Everclear and get back to us.

> Oh, I see. I'm a law-abiding citizen that does not use drugs. Care
> to tell me what freedoms were taken away from me because of the drug
> laws?

The freedom to smoke a God-given weed. See, you don't even realize
that you have lost a freedom. That's what the feds are counting on.
Be careful what you wish for. Beef and ice cream may be next.

Many people have admitted and written about "crimes" they committed
after the statute of limitations had run out. I've already sworn that
I don't do illegal drugs in Texas.

From the pulpit, my Southern Baptist preacher often relates stories about
what happened to him when he was young and used illegal drugs.

Jim, before you embarass yourself anymore, contact a history prof
at a local university. The sentence is in the plain English of
the day and you are simply misreading it. It applies only to the
states in rebellion and not even to all the areas in those states.

As a matter of fact, I have a major in History. Slaves were often imported through the northern states on their way to the south. While they were in those northern states, they were still considered property, i.e. there were slaves in the northern states.

That's the way wars are always fought. If the actual principals had to
engage in the fighting there would be far fewer wars.

Personal experience.

> >My former pot habits had no negative effects on me or
> >anyone else and it had a lot of positive effects.
>
> Then why do the medical folks say differently?

Dr. Dean Edel doesn't say differently. He's an MD who believes
as I do and says so on nationwide radio and TV.

> >If you are ignorant of the enabling effect that your blaming drugs
> >for the actions of people has, I feel sorry for you. People like
> >you are the reason that the drug users who commit crimes against
> >victims are allowed to walk away with only a slap on the wrist.
>
> Huh?

Poor druggies, they can't help themselves, the drugs are to blame,
not the poor unfortunate people who use the drugs.

> No, the drugs and the people using them are the cause of the drug problem.

Are automobiles and the people who use them the cause of the automobile
death problem?

> The problem with prohibition was that a huge percentage of the mentally healthy
> adult population wanted to get blotto, and was willing to break the law to do
> so. The same is not true with drugs today.

You obviously don't live in California. Probably 1/3 of all the people in
California who drink alcohol also smoke pot and/or snort cocaine.

> Sounds like you're saying that if we can't wipe out a crime perfectly, it
> should be legalized.

We should legalize everything that is not a real crime. The prisons are overflowing with people who committed absolutely no wrongdoing and whose only crime was using or possessing an illegal drug often in the privacy of their own home.

> >The majority of the electorate used to support slavery.
>
> When?

When the slaves couldn't vote. :-)

> One word: Addiction.

Marijuana is not physically addictive. It's not as psychologically addictive as cilantro. :-)

You have evidently never been to Fresno county, California, the #1
agriculture county in the USA, which is also surrounded by numbers 2, 3 and

4. (I recently spent a week there where we always enjoy the fabulous local fruit and produce). They grow about everything imaginable, and many times get two crops per year. It's all located on the desert that is the San Juaquin Valley, which streches a few hundred miles from south of Bakersfield to way north of Sacremento, land that will grow anything if you can get water to it.. If the water doesn't dry up there'll be plenty to eat. Your farming family won't really be missed, they've been replaced by migrant workers-some would say the 'slaves of today'.

I've gotta agree with you here Dwight, at least in part. In a new nation where the original right to vote hinged on whether or not you owned property, it had to be reasonable if not even normal to consider an aborigine as something other than a "man". Many, or maybe even all, of The Founding Fathers advanced in their thinking as they were, clearly were inclined toward such a viewpoint, wrong as it seems to us today
. As far as I know Indians were not enslaved, (just shot), and that was most likely because they would have died resisting, as I'm sure many Africans did. And many Africans were sold into slavery by their own greedy leaders.It's easy to forget that in that time the world was a vastly different place where it was the normal routine for the conquerer to enslave the conquered.

They must teach a wholly different version of history in the South, (and I live in a border state where there were slaves). It's true that there were multiple reasons for the Civil War but slavery was indeed the focal point, and the biggest issue on which the two sides were implacably polarized, despite Lincoln's efforts to downplay it in attempting to hold the Union together. It was the one issue that could not be resolved without the conflict that was the Cival War.

>strictly for emergency preparedness and actual emergency traffic,
>but the whole steenking band?

Another "whole steenking band" for more 75 meter ragchewing? I'd rather
not consider that...!!!

I doubt the FCC would consider the whole band either, but you as much as
anyone here ought to know that you ask for the whole cake and be glad to get a
slice with some extra icing on it. That's the way Uncle works.

The "intentional interference" problem to public service nets and other
traffic handling services (regardless of mode) is embarrassing. A seperate
band may not completely alleve it, but it will help.

>You crazy, or what?

You peeked!

>What I would propose is that the ARRL and CQ make it another
>"Contest-free Zone" like the present WARC bands.

Those other bands have been with us for over 20 years now...isn't it time
to stop calling them "WARC" bands...They are ours.

And if you are going to make it contest free, why not "discussions about
gastrointestinal distress free" too...?!?!

>> the pedophile.

>You obviously don't have any children, Dwight, if you believe
>pedophilia is a victimless crime.

That's not what he said.

He said you are (and you ARE) using the same arguments used by pedophiles.

He said NOTHING about pedophilia being a "victimless" crime.

YOU should find the website of the "North American Man-Boy Love
Association". I found out about these creeps through a child abuse seminar,
and there is precious little in this world that makes me as gut-wrenching sick
as knowing scum like this can hide behind the First Amendment when spewing
thier crap.

The real SAD part in THIS case is that you can snip out parts about sexual
"rights" and insert your dope "rights", and we'd be hearing the same sorry
tune.

Sad, sad, sad..................

> Considering gravity has captured more than it's fair share of my hair
>already, I am glad to have hair almost ANY where...!!!

Hey, he could have said hare-brained, which would, of couse, be a term used to describe an idea of unparalleled brilliance. :-)

>>I could see designating a small 10 - 25 kHz "window"
>>strictly for emergency preparedness and actual emergency traffic,
>>but the whole steenking band?

> Another "whole steenking band" for more 75 meter ragchewing? I'd rather
>not consider that...!!!

It is the emergency communications that impresses the Commission and Congress, but it is the ability to get on the air and have fun that attracts hams to the airways in the first place. If a new band is put into place that does not permit such ragchewing, it will not attract enough interest for manufacturers to even include it in their designs. How many rigs can operate on the present ~5 MHz emergency frequency?

>The "intentional interference" problem to public service nets and other
>traffic handling services (regardless of mode) is embarrassing. A seperate
>band may not completely alleve it, but it will help.

Making a rule that only emergency and public-service communications are allowed on any frequency will not stop those who violate the existing rules about non-interference. In what way would it help?

>And if you are going to make it contest free, why not "discussions about
>gastrointestinal distress free" too...?!?!

As a medical professional, surely you understand the need of people with illnesses to talk out their feelings about them. Why would you not want to include amateur radio in that process? For some who are shut ins, ham radio is their only regular means of social contact.

> > was the most common language?
>
> Man, do you realize how far those other countries "in Western
> civilization" were from some farmer in North Carolina at the time (I'm
> not talking about in mileage - I talking about in perception).

Sure. But it has been suggested that one reason for secession was that
many southerners were not happy about breaking away from England. Had
the colonies stayed part of the British Empire, the slaves would have
been freed almost a half-century earlier.

The question still remains: Where else was slavery legal in 1860?

> It is
> absurd to hold that person to a standard that existed in Germany,
> England, or anywhere else.

WHOA! So we can ONLY judge the hypothetical 1860 slave owner in NC by
the standards of North Carolina in 1860? That's the fox setting the
moral standards of the henhouse!

> In the United States, that person violated
> no law of that time, either legally or ethically.

Not true. Slavery was not legal in most of the USA at the time. The
abolitionist movement took the ethical high ground.

In 1860, there were LOTS of people saying that slavery was unethical,
immoral and should be made illegal. Many of them were in the South.
They were not very popular there. But they WERE upholding ethical
standards.

> Therefore, I'm
> simply not willing to step up a hundred years later to condemn that person.

I'm saying the actions to keep slavery should be condemned.
>
> Now, you and I can agree that we don't want to do that today. But
> our choices of today should not condemn someone of the past. Likewise,
> we can have whatever morals we want today, but that again should not
> make someone of the past, who never even heard of our morals, immoral.

Nonsense. Sorry, that's a copout, Dwight. By that logic, you would not condemn Nazi Germany for operating its death camps and carrying out Hitler's "final solution" because it happened more than a half-century ago in a far away country, where those who carried it out never heard of our morals.
>
> > However, it should be noted that there

I didn't live in 1944, when Auschwitz and Treblinka and Bergen-Belsen were in full operation either. Does that mean I'm not supposed to condemn what went on there?

> Obviously, for whatever reason, they thought it was quite
> logical.

Maybe. Or maybe they shut their eyes to the obvious. Orwell called it doublethink.

> Beyond that, it makes no difference to me whatsoever. All we
> should really care about is what happens today.

NO. We must remember the past as it really was, and learn from it.

> That is the only thing
> that we can personally do something about. And there is enough wrong
> in this world today to keep me way too busy to worry about judging
> those of the past.

The past gave us the present. We must learn from the past to avoid making similar mistakes today.

Masturbation while alone is the only sexual right that even comes close
to the right to smoke marijuana in the privacy of one's home. Do you
want to outlaw masturbation? Any sex involving two (or more) people
is NOT a right, it is a contract. Underage children are not capable
of entering into the contract. Why must you lie about what I said?

Yep, and down through history, race had little to do with slavery.
Some African tribes enslaved members of other African tribes. Romans
had white slaves usually based on an ethnic/political basis, not on
race.

The movement did, even if the law did not. The Fugitive Slave Laws
required free states to return runaway slaves. The Underground Railroad
was illegal. Slaves were imported through free states and transported
to the slave states. The ownership of slaves in the slave states was
honored by the law in the free states (until the law was changed). The
actual freeing of all slaves required the passing of the 13th Amendment.

I resemble that remark!

I'm more than a little disturbed at those who lump ALL new Extras into one category. I aced my Extra exam a week ago after much study. Sure, I didn't pass a 20-wpm code test. But I certainly CAN copy 20-wpm CW! Not all of us new Extras are post-CBers who just discovered amateur radio, friends! I was first licensed as a Novice 21 years ago when Novices only had CW privileges! No 10-meter phone then! And I spent the better part of two years operating CW only. Then I attended a class and upgraded to Technician, only after making my dad (I was 15) drive me 100 miles to the FCC Field Office in Norfolk, Virginia, to take the test. Back then, you didn't have the luxury of testing down the block or across town. If you lived half a state from the Field Office, you had to make damned sure you were ready to take that test!

The first VE exam session I went to was in 1989, still as a Technician, to watch my older brother -- in whom I'd nurtured an interest in amateur radio (isn't that our calling?) -- take his test. The guys at the VE session talked me into taking the 13-wpm code test. I took it and passed it. (Must've been since I'd been using CW for nine years at that point.)

The ONLY reason I waited so long to upgrade any higher was because of college, post-college jobs, a wife and a new son. Personal reasons that had NOTHING to do with a freakin' code speed requirement. Yeah, I can copy 20 wpm. And you'll find my Bencher paddle is much more worn than my microphone.

When I decided I was ready to spend the time to study for my most recent upgrade, I studied for, took, and passed the test that is currently endorsed by the government to become an Extra. Sorry. I didn't have an option. I don't think begging for a code test would've made the VEs do it.

When you're slamming all new Extras, keep in mind two things:
(1) They didn't change the rules. Actually, you and I made it happen by not recruiting new hams into our hobby.
(2) Some of them have been hams longer than you have. Just because they didn't upgrade to Extra before a certain date doesn't necessarily make them any less qualified -- or supportive -- of our hobby.

73,

Meade KA4RQB (yeah -- I kept my original, FCC-issued novice call)

At first I said 'what a dumb idea'. Now I like it. But it won't happen.
The FCC has already stated that whatever it does with the bands, it won't
entertain comments about special groups, etc.

>
> Harming another human being is using force.

How so? What does the dictionary say? By that definition, anything YOU
do that harms me, or threatens to harm me, should be outlawed.

--

Consider the following cases:

A lives next door to B. A has several big gas-guzzling vehicles, while
B has a small economy car. Once or twice a week, B siphons a gallon or
two from one of A's vehicles. No "force" is needed because none of A's
vehicles has any sort of locking gas cap. A never notices the loss
because the vehicles have big tanks. Has B harmed A?

C and D have very similar appearance. D uses the resemblance to have
sex with C's spouse. C's spouse is genuinely fooled and has no idea of
the deception. Only D knows what is really going on. No "force" is
used. Has anyone been harmed?

You have personal experience of their health?
>
> > >> >The children in child pornography are victims.
> > >>
> > >> Are they? How do you determine this?
>
> Prima facie age of consent evidence.

Not so!

From what I've read, child porn is defined as ANY porn containing one
or more actors under the age of 18 years. No exceptions. There are
VERY strict penalties attached to it. The age of consent is
considerably lower than 18 in some states.
>
> > >Because they are not adults, they are victims by definition. Children

>
> From Webster's: "child - 1. an unborn or recently born person."
> Exactly how many unborn have gotten driver's licenses, Jim?
> How do they get their picture on the license?

Your definition is not the one that applies in this case. You
previously defined a child as anyone who is not an adult.
>
> > The problem is that you only focus on the "rights" and not the

> >
> > Then why do the medical folks say differently?
>
> Dr. Dean Edel doesn't say differently. He's an MD who believes
> as I do and says so on nationwide radio and TV.

Never heard of him.

ALL of the MDs I know personally say that illegal drugs are to be
avoided. Period. They also advise no tobacco of any kind and very
limited (if any) alcohol.

I'm talking about serious medical people, not radio/TV personalities.
>
> > >If you are ignorant of the enabling effect that your blaming drugs

In many cases the drugs so distort their view of reality that they
cannot make rational decisions. That doesn't mean they should escape
responsibility.
>
> > No, the drugs and the people using them are the cause of the drug problem.

I agree!

> The prisons are
> overflowing with people who committed absolutely no wrongdoing and whose
> only crime was using or possessing an illegal drug often in the privacy
> of their own home.

Like who?

Oddly enough, the USE of most illegal drugs is not illegal! If you
look carefully, the charges are usually for things like possession,
transportation, sale, purchase or attempt to do so, operating a motor
vehicle while impaired, and things like that.
>
> > >The majority of the electorate used to support slavery.

The question was about both ethics and leagality.

> The Fugitive Slave Laws
> required free states to return runaway slaves.

They were bad laws. They were enacted to appease the slave states.

> The Underground Railroad
> was illegal.

But highly ethical.

> Slaves were imported through free states and transported
> to the slave states.

Only before 1808. 45 years before the EP, importation ended. In some
states the importation may have ended much earlier.

1787 to 1808 is 20 years.

> The ownership of slaves in the slave states was
> honored by the law in the free states (until the law was changed).

Which was when?

And it was that way ONLY to appease the slave states.

> The
> actual freeing of all slaves required the passing of the 13th Amendment.

Legally, anyway.

Nope, too unrealistic. In general, stealing something that doesn't
belong to you is prima facie evidence of the use of force. The
use of force and/or threat of force is about the only things that
need to be outlawed. Force, in this context, has a realitively broad
meaning and includes such things as fraud, negligence, etc.

Not so!

5 wpm Generals, Advanceds and Extras have existed since 1990, when
medical waivers were introduced. Since all pre-1990 licenses have
expired, the only way to "prove" that any US ham was tested at a
particular speed is to dig up records from before 1990 (like a
Callbook listing or an old license document). And that method works
for any license class.

I prefer W1RFI's method.

You are misinterpreting it. Here's what it says:

"... all persons held as slaves within any state or designated part of a
state the people whereof shall then be in rebellion ..."

If you understand the American English of 140 years ago, that clearly
says: *any state or part of a state that is in rebellion*. Please stop
embarrassing yourself, do yourself a favor, and contact some history
professor at a university near you.

The "whereof shall then be in rebellion" clearly makes it apply ONLY
to the states in rebellion. Your continuing ignorance will not change
that fact.

Nope, I have a major in history and am qualified to teach it in any high school in Texas. When it says: "any state ... the people whereof shall then be in rebellion ...", it clearly applies only to the states in rebellion. In modern American English it says: "... any state that contains people in rebellion ..." The Northern states did not contain people in rebellion so they were exempt from the Emancipation Proclamation. In addition, so was West Virginia, New Orleans, and Norfolk. Politics was alive and well in those days. I learned all this stuff in a course titled, "History of the Old South".

You are simply mistaken about what you think the Emancipation Proclamation said. A rational person would take time out to check the validity of his claim rather than just keep repeating the same old mistake ad infinitum.

There were lots of slaves in New Orleans, Jim. Why were they not freed?
Methinks you are the one who is acting weird, i.e. outside the
bounds of reality. You cannot change what happened in the past by
mouthing a few words on an obscure amateur radio group - not unless
God died and left you in charge.

Magoo, you've done it again. It does not say that, Cecil. Once again,
you've had to obliterate the punctuation in order to make your point.

> If you understand the American English of 140 years ago, that clearly
> says: *any state or part of a state that is in rebellion*.

It says "all persons held as slaves in any state of designated part of a
state" ,comma, obviously referring to slaves in any state. Then, in a
subordinate part of the sentence he adds, "the people whereof shall then
be in rebellion", followed by another comma, obviously referring to
PEOPLE rather than states in which slaves are held.

Now you may be correct that that is indeed how the Proclamation has been
interpretted all these years. I'm just saying I don't see it - Old
English or not.

> Please stop
> embarrassing yourself, do yourself a favor, and contact some history
> professor at a university near you.

Cecil. It is you who is unhappy with what I'm saying. I'm perfectly
happy with it. Why don't you contact a history professor, and I'll just
stay in touch with the physics professors. Okay?

> The "whereof shall then be in rebellion" clearly makes it apply ONLY
> to the states in rebellion. Your continuing ignorance will not change

> that fact.

No. Whereof shall then be in rebellion clearly says only that they are in rebellion. Sorry OM.

I don't agree that they were not freed. I would only agree that the people of New Orleans were not considered to be in rebellion. I can only conclude that the issue of slavery was not in dispute in New Orleans.

> Methinks you are the one who is acting weird, i.e. outside the

>Why must you lie about what I said?
>--

I cannot "lie" about what YOU said, Cecil. Only YOU can do that! I just quoted it and pointed out your hypocracies!

>> He said you are (and you ARE) using the same arguments used by pedophiles.

>Again, pedophilia is not a victimless crime and involves more than one
>person so I am not using the same argument at all. Why must you lie about
>what I said?

"Again" youself thre, Big Boy...I can't "lie" about what you said...I can only quote it and point out your absurdities.

Your assertions to the contrary, your "arguments" are STILL the same ones used by pedophiles to justify THIER lawbreaking.

And THERE lies the commonality...It's NOT a matter of what YOU "percieve" (remember YOU telling ME that "feelings" were not germane)...It's a matter of what the law says.

You don't like it and want it changed...?!?! Fine. Do something about it. But if you do it while it's still illegal, I just hope you aren't stupid enough to REALLY do it "in the privacy of (your) own home"...OR your car...OR on the premises of a friend...OR in the vehicle, vessel or aircraft of a friend...UNLESS you like seeing that stuff sold at federal auction for pennies on the dollars you paid for it.

Drugs are illegal for GOOD reasons. Your "eveyone else is doing it" arguments are childish, poorly based and without the slightest merit or validity. There is only vague medicinal validation except as an analgesic and anti-emetic.

Those are facts. The rest is emotional "cuz I wanna" sandlot stuff.

>Masturbation while alone is the only sexual right that even comes close
>to the right to smoke marijuana in the privacy of one's home.

You do not have the "right" to smoke marijuana ANYWHERE.

>Any sex involving two (or more) people
>is NOT a right, it is a contract.

Oh...?!?! And you will of course provide me a reference to case law that validates that statement?

>Do you
>want to outlaw masturbation?

The man that denies he does is a liar and the madn that admit's it is a fool.

>Underage children are not capable
>of entering into the contract.

A teenager that is 17 years, 11 months and 29 days isn't capable? Then some of the pregnant PRE-teens I know haven't been reading the fine print!

>Why must you lie about what I said?

Yeah...RIGHT.

Steve

The subroutines, secure shells, and firewalls are all messy and idiotic. Go buy a chatroom! Better vend cryptographers now or Bob will grudgingly infect them under you. Why did Yolanda relay the computer with the overloaded laptop? It's very unique today, I'll fetch inadvertently or David will engulf the mixmasters. While keyholes daily type memorys, the newsgroups often outwit under the resilient backups. Lots of specialized toffees are ignorant and other extreme PERLs are insecure, but will Mel annoy that? Terrance will gently format within Kenny when the rough UDPs bind beside the inner mailbox. Otherwise the output in Jessica's server might get some closed ROMs. I'd rather start rigidly than authenticate with GiGi's bright Java. If you will load Claude's newsgroup inside telephones, it will wistfully prepare the monitor. Never persevere actually while you're pulling against a weak condor. He will close neatly if Wayne's investigator isn't clear. Why will you save the minor new rumours before Eddie does? If you'll spool Carol's hard disk with dictionarys, it'll simply meet the network. One more stupid mouse or cybercafe, and she'll angrily eat everybody. I kill moronic machines in back of the sharp flat store, whilst Isabelle lazily rebuilds them too. It contradicts, you connect, yet Gilbert never halfheartedly negotiates in back of the underground. Let's defile behind the pathetic kiosks, but don't obscure the silly admins. My weird opinion won't dump before I question it. When will we exclude after Anthony posts the discarded chaos's president? Tell Sara it's filthy transporting on a RAM. Lots of bizarre sticky MPEGs will hatefully sell the credit cards.

> that statement, chug-a-lug six ounces
> of Everclear and get back to us.

First of all, I don't drink alcohol or use illegal drugs. Therefore, your endless attempts to link the two really does not move me. However, based on what I've seen of those who do (members of my own family - my father was an alcoholic and my brother was a drug addict), I'm convinced that illegal drugs are indeed far worse than alcohol. Both of those men are dead today. My father died on the side of the road after leaving a bar, while my brother was killed while trying to buy marijuana in FL. It took twenty-five years for my father's alcohol abuse to kill him, while it only took two years of my brother's drug abuse to do him in.

But even more important is what happened before their eventual demise. My father was able to control his alcoholism for decades. He had a good career, a fair marriage, three kids, and an eventual retirement check (which, in the end, gave him too much time to drink).

My brother, on the other hand, went downhill less that four months after starting his drug habit. He started stealing to get money for drugs. He withdrew from family and friends, and started hanging out with some real losers. He eventually ended up in jail after getting caught breaking into a house. And, within four months of getting out of jail, he was killed by some of those drug users, the ones you claim are just like everyone else, who decided they wanted his money more than they wanted his business.

Now, my brother was not into the the expensive drugs that you insist are artificially inflated by the war on drugs. These were cheap pills (uppers, etc) and everyday marijuana. But even that low-cost habit was enough to drive him to theft when he couldn't maintain a job and when he exhausted all his other sources of money (friends, family, etc). He left behind a wife who had to watch him die in the hospital with a child growing in her belly.

But, I'm not basing my judgments on drugs just on these two incidents alone. I've seen this pattern being repeated hundreds of times. And, based on that experience, while it is obvious that alcoholism is a bad thing, I'm convinced that drugs (even drugs like marijuana) are far worse.

I have no desire to smoke a "God-given weed." Somehow, the idea of picking up a weed off the ground, and smoking it just to screw up my mind, does not really move me. Yes, I know it is "God-given," but so are a lot of other things I would rather not smoke (dog dung comes to mind). While dog dung is also God-given, I suspect god thought we had better sense then to just pick it up and smoke it. Sadly, that doesn't appear to be the case with those who smoke weeds.

Then you need to find someone to read it for you, Jim. Have you found anything out there (a book, a document, an expert) that agrees with your interpretation? I've already given exact quotes from the Funk & Wagnalls Encyclopedia that directly disagrees with your interpretation. Maybe an additional quote from the Webster's Family Encyclopedia will convince you...

Emancipation Proclamation, a decree issued
by President Abraham Lincoln on January 1,
1863, abolishing slavery in the rebelling
Confederate states. A...maneuver designed
principally to deprive the Confederacy of
it's economic base, slavery.

Even this rather simplistic explanation says nothing about abolishing slavery throughout the Union, or in any state still loyal to the Union. Again, the emancipation proclamation applied only to the confederate states.

You're not paying attention to the first sentence and the quotes around the second and third paragraphs, Jim. The part you're quoting is (the paragraphs in quotes are) not the emancipation proclamation. Those words are a quote from a proclamation that was issued on September 22nd announcing Lincoln's intent to issue a proclamation in January declaring which states were in rebellion and freeing the slaves in those states. Those words in quotes do nothing alone. They are simply an introduction to the actual emancipation proclamation which begins with the fourth paragraph of that document. It is later in that document that the states in rebellion are named, and the proclamation is made which frees the slaves solely in those states.

Ed:

If I had said the idea was "Hare-brained," that would have meant that it was an idea of unparalleled political-correctness! However, since political correctness is synonymous with cynical, inane sophistry, it did not occur to me to identify Steve's idea in that manner. His mind was in the right place, but his method was a bit too heavy-handed. The agenda of political correctness is to justify the absurd in a manner which condemns traditional values. Steve's idea had partial merit, which is why I suggested that he modify it with the "emergency preparedness window" concept.

Bruce:

This just confirms everything we already knew before we started screwing around with the licensing system -- dumbing down the licensing process doesn't result in growth. We could have two million U. S. hams and the ARRL could be wealthy beyond the dreams of avarice -- if only we had a national, major media advertising campaign to let the public know what we are and what we do! Licensing requirements could have been kept at pre-Restructuring levels for both code and written testing -- if only the ARRL had found a way to attract more people to our hobby/service. Unfortunately, the miniscule percentage of the U.S. population who are aware of amateur radio usually confuse us with CB -- and have no higher opinion of us than they do of CB'ers. That's a situation the ARRL could have managed by taking responsibility for mobilizing the resources needed to produce and distribute a national, mass media advertising campaign utilizing TV public service announcements and print ads in major newspapers and magazines.

mdaffron@the-rma.org (Meade) writes:

Meade:

I'm going to move one of your last comments to the top, just to set the
tone for my reply.

>When you're slamming all new Extras, keep in mind two things:
>(1) They didn't change the rules. Actually, you and I made it happen
>by not recruiting new hams into our hobby.

Please speak only for yourself. I have never been advised of any
"requirement" to "recruit" new hams into our "hobby" (I call it a
hobby/service). All I do is merely make people generally aware of
ham radio, and answer any questions, if asked. I don't know how to
actively "recruit" people to do something unless they have a proactive
interest in it. If that interest is there, then there isn't any "recruiting"
to do. The prospective ham then avails himself of the readily
available study materials, takes his tests, gets licensed, and proceeds
to make the material acquisitions necessary to get an amateur radio
station on the air. As always, he will get assistance from his fellow
hams as a normal matter of course. However, there is no way to
"recruit" anyone into ham radio. Getting involved is a purely internal
thing, and it's either there or it isn't.

>I resemble that remark!
>
>I'm more than a little disturbed at those who lump ALL new Extras into
>one category.

Well, then, more's the pity for the ARRL/FCC seeing fit to dumb-down
our licensing structure, and eliminate any useful testing for a uniquely
practical, effective, efficient, and universal communications mode -
Morse/CW! Unfortunately, new hams, even new Extras like yourself,
now have to bear the burden of being identified as inferior to those of
us who gained our privileges under a significantly more comprehensive
testing regimen, which required us show increasing communications
knowledge and skill in return for increased operating privileges.

>I aced my Extra exam a week ago after much study.

Congratulations! I aced my Extra exam (code and written) over 18
years ago with little or no study! What I had at that time was over
15 years experience as an active electronics hobbyist.

>Sure, I didn't pass a 20-wpm code test. But I certainly CAN copy
>20-wpm CW!

That's all well and good, but the plain fact is that you've lost your chance to use that skill as proof of your licensing qualifications, thus you're current license is "dumbed-down" in spite of the fact that you have full Extra-class operating privileges. I know that this isn't fair, but it's just the present reality. YOU didn't ask for it, and neither did I -- so you can't blame me for defining reality as it really is!

>Not all of us new Extras are post-CBers who just discovered amateur
>radio, friends! I was first licensed as a Novice 21 years ago when
>Novices only had CW privileges! No 10-meter phone then! And I spent
>the better part of two years operating CW only. Then I attended a
>class and upgraded to Technician, only after making my dad (I was 15)
>drive me 100 miles to the FCC Field Office in Norfolk, Virginia, to
>take the test. Back then, you didn't have the luxury of testing down
>the block or across town. If you lived half a state from the Field
>Office, you had to make damned sure you were ready to take that test!

None of that matters anymore, Meade. The fact is, you're a post-Restructuring dumbed-down Nickle Extra -- and anyone licensed as an Extra prior to April 15, 2000 is not! You just allowed yourself to be caught on the wrong side of the timeline! However, the way you are perceived as a ham is now entirely up to you. If you are willing to accept the fact that us pre-Restructuring Extras who saw no need for the changes made to the licensing structure are entitled to our opinion, we are willing to accept you as a fellow Extra in spite of the fact that you made the choice to "outlive" the more rigorous license testing standards. Just make sure you freely admit to the true nature of the present licensing reality -- and don't make the same, time-worn, haggard excuses.

(SNIP)
>
>The ONLY reason I waited so long to upgrade any higher was because of
>college, post-college jobs, a wife and a new son. Personal reasons
>that had NOTHING to do with a freakin' code speed requirement.

Virtually every other ham who upgraded to Extra prior to 4/15/2000 has had to deal with school, job, and family responsibilities in addition to preparing for upgrading. This is one of the oldest, and least viable, excuses. And, like everything else you've said so far, it doesn't matter one iota. You lost your chance to be a "classic" Extra because you didn't care enough about it to get the job done under the previous regime. Now you have absolutely no legs to stand on when you gripe about how the "old timers" view you and your post-Restructuring "Nickle-Extra" peers. Again, I reiterate -- this isn't fair, particularly to you, but it is reality, and will be unless you can come up with some way of radically altering human nature.

I'm sure you would suggest that we all join hands as politically-correct, unified, classless, grey-uniformed, blue-helmeted United Nations commanded One World Order hams, but that's not the way it's gonna be here in the U. S. of A!

>Yeah, I
>can copy 20 wpm. And you'll find my Bencher paddle is much more worn
>than my microphone.

That's just a fact which doesn't really matter in this discussion. I'm one of the chief Pro Code Testing Agenda protagonists in this newsgroup, and I haven't sent so much as a dit since Field Day. I spend most of my time on PSK-31 these days! Go figure!

>When I decided I was ready to spend the time to study for my most
>recent upgrade, I studied for, took, and passed the test that is
>currently endorsed by the government to become an Extra. Sorry. I
>didn't have an option. I don't think begging for a code test would've
>made the VEs do it.

Once again, none of that matters. It is only a mere historical fact. You still have to bear the outcomes of Restructuring as it relates to ham radio culture in the post-Restructuring era. In the new culture, pre-Restructuring General, Advanced, and Extra-class licensees can rightfully claim superiority over post-Restructuring Generals and Extras.

>When you're slamming all new Extras,

From my point of view, nobody's "slamming" anyone. We're just speaking the truth. You had plenty of opportunity to upgrade in the pre-Restructuring era, whether you'll admit it or not. The choice of which "culture" to exist in as an Extra was yours, now you have to live with it.

>keep in mind two things:
>(1) They didn't change the rules. Actually, you and I made it happen
>by not recruiting new hams into our hobby.
>(2) Some of them have been hams longer than you have. Just because
>they didn't upgrade to Extra before a certain date doesn't necessarily
>make them any less qualified -- or supportive -- of our hobby.

That's exactly right. Amateur radio is what amateur radio operators make of it -- and amateur radio operators are what they make of themselves. However, the reality of the upgrading experience in the pre- and post-Restructuring eras doesn't change. Those who upgraded to General, Advanced, and Extra in the pre-Restructuring era are superior to their post-Restructuring counterparts because they had to prepare for and succeed at a more rigorous and comprehensive set of license testing requirements. No slam -- just a simple historical fact.
>
>73,
>

>Meade KA4RQB (yeah -- I kept my original, FCC-issued novice call)

And a fine call sign it is. As it happens, it is now an Extra-class call sign. Nobody here is challenging that fact, especially not me!

Cecil:

My inferiority is not the issue here. I'm ass-u-&-me'ing that
you're referring to Dr. Williamson again. It is *his* inferiority
that was demonstrated by his inability to upgrade to
Extra class under the pre-Restructuring licensing requirements.
This inferiority wouldn't be an issue if you weren't always
making it an issue in this newsgripe.

Dan:

Was DA1RZ at Rhein-Main AB, Germany (near Frankfurt) from Mar. '83 to
Mar. '85; and DA1ZW at the same base from Jan. '87 to Jan. '89. I was
AFA7LR on AF MARS during both tours. I could have had a third tour
in Germany at Ramstein, but by then had had enough of "sucking
rubber" during chemical warfare defense exercises between Germany
and the U. K. and needed a permanent break from it, so I came here to
Dover. Now, I'm not so sure that was such a good idea, because Dover
was such a horrid place to work that I took early retirement the second
I was safely past the "magical" 18-year point in my career. However,
judging by what I've been hearing about incessant TDY's to desert
rat-holes by people recently returning from Europe, I'm glad I retired
when I did. I'd already done more than my share of that.

Steve:

NOW you're talking! (Unintentional slam at dumbed-down no-coders deliberately left in place). I think we should set an upper age limit on the use of this band -- I suggest 72 years. No wheezing geezer old timers permitted to reminisce about the good ole days of warming their arthritic fingers over the soft glow of the cathodes in their all-tube Collins/Hallicrafters/Drake/National/Whatever gear. The 72-plus crowd can get 5-year waivers to operate 60 meters if they can produce logs showing regular use (at least 20 percent of total operating time) of at least one computer-based digital mode (computerized CW doesn't count). The wheezing geezers are what's killing ham radio. After accidentally tuning thru 75 meter phone a few nights ago, I almost gave it up myself!

This is why there is so much misunderstanding about the civil war, Cecil. You and I know the civil war was a major turning point in this country's history - a point that redefined government, state's rights, human rights (not just for slaves), and so forth. Yet, in spite of the importance of that event, so many schools around the country simply breeze over this subject, without taking a serious look at the causes leading up to the war or the political events during the war (the war itself was more than just a few battles here and there, which is exactly what most schools talk about). Because of that, many people in this country are left with huge gaps in their knowledge about this key event. Now this might not be a problem if the event was simply forgotten. But, instead, this event is often used today to justify huge government social programs - justification that is based directly on the misinformation surrounding this event.

My argument is that it should be OK to smoke marijuana ALONE in the
privacy of my home. Please explain how someone can perform pedophilia
ALONE in the privacy of his home?

> You do not have the "right" to smoke marijuana ANYWHERE.

Get real, Steve. I can smoke all I want in Holland. England has
decriminalized small amounts for personal use. Small amounts are
just a misdemeanor in several US states now.

> A teenager that is 17 years, 11 months and 29 days isn't capable? Then

I grew up in California. Yes, agriculture is commonplace in the valley, however that is mostly limited to the cash crops (fruits, etc), not generally the staples such as corn, wheat, potatoes, and so forth. Farming is just too expensive in that area for many farmers to grow the low value crops. The limited low value crops that are produced in that area often head for select markets in the surrounding large cities, not for nation-wide consumption. Furthermore, I was talking about a more general trend that I see around the country as a whole, not smaller pockets of agriculture in select parts of the country. Those small pockets cannot supply the food needed to feed this large country.

I copied that directly out of my Encyclopedia, Jim. It does say that.
"the people whereof shall then be in rebellion" is an adjective phrase
modifying state. It applies only to the states in rebellion.

Well said, Richard. The main thing I got from history was that, even with all the problems we have today, I'm sure glad that I was born now rather than in some point in the past. While many many dream about the past (how nice it would have been to be a knight, a Roman soldier, a king, or whatever), knowing my luck, I would have been born a slave, servant, lion food, or whatever. :-)

But even that is misleading. I'm sure those born a hundred years ago, or even five hundred years ago, might have said the same thing - their time was often better than what existed before. It just goes to show that history is to some extent relative.

Based upon the following comments, I believe that it would be prudent for the licensing structure to be changed to a class-less system. In the new classless system, all license classes will be surrendered for a new classless license. Furthermore, the FCC record of the previous license class will be expunged from the FCC database. This will level the playing field.

Maybe this would stop all of the class bickering that seems to be the primary focus of amateur radio. If the classless system were ever adopted, you most of you immature individuals would need to find another vehicle that can be used to assert your superiority over your peers.

How about this idea:

What type of radio equipment do you have? "My radio is better than your radio!!"

This is very similar to "My extra class license is better than you extra class license!!".

Many of you exhibit the behavior of 10 year old children.

GROW UP and GET OVER IT!!

Nope, I'm referring to a PhD EE who can do 40wpm CW. He still must pass the *existing* requirements in order to obtain a ham license.

People who feel inferior tear other people down to try to make themselves feel superior. That's obviously what you are trying to do when you rag on post restructured Extras. Meeting the *minimum* requirements tells you absolutely nothing about their *maximum* qualifications. The present Extra exams are the minimum entrance requirements into the Extra class just like they have always been.

Passing the exams proves very little. It's what one does after getting the ticket that matters.

Then condemn away, Jim. Since that time is long gone, it doesn't change a thing (so what have you gained). Again, my condemnation is reserved for what happens today - events that I can influence.

> Nonsense. Sorry, that's a copout,

> its death camps and carrying out
> Hitler's "final solution" because
> it happened more than a half-century
> ago in a far away country, where
> those who carried it out never heard
> of our morals.

You know, I just knew you were going to ignore the key point of my argument and bring up Hitler. The whole emphasis of my argument has been that we should not judge people of the past based on anything other than the standards that existed in their time. Hitler violated the standards of his time, therefore your use of Hitler as an example does not challenge my argument.

> NO. We must remember the past as it
> really was, and learn from it.

Learning from the past does not require a judgment of the people in it (it's a waste of time). It simply requires a choice on our part - do we want what existed in the past?

Would you have said that the revolutionary war was a mistake if we had lost? Would you have said that WWII was a mistake if we had lost? The fact that the south lost, and suffered economic consequences because of it, does not make their involvement in that war a mistake.

Those are *minimum* requirements, Larry, and have absolutely nothing
to do with someone's *maximum* qualifications. I'm sorry you feel
so inferior that you have to tear other people down to feel better
about yourself.

Not until Lincoln was successful in twisting the conflict into
something that it was not. It just goes to show how powerful rhetoric
can be (especially when you use it to paint an entire group of people
as racist). Thanks to Lincoln's proclamation, the south has spent the
last hundred and fifty years trying to correct the misconceptions and
suffering the consequences of a sin the overwhelming majority didn't commit.

Show me where I said pedophilia is a victimless crime, Cecil. I simply said pedophiles often uses the same arguments to defend their behavior as drug users use to defend theirs. Of course, as usual, you avoided responding to that in your response.

But every single pedophile will insist that it is a victimless crime, just like you claim the same thing about drug abuse.

> ...and involves more than one person so I am
> not using the same argument at all. Why must
> you lie about what I said?

You may not be using the exact same words, but you are using the exact same premise behind your arguments. For example, pedophiles love to throw around the victimless crime argument - if the youth consents, and is not harmed physically, he/she is not a victim (so sex with that child should not be a crime - we're not hurting anyone else). You also use the victimless crime argument, which, in my opinion, is no more valid than their use of that argument - pedophilia is not a victimless crime and neither is drug abuse.

derekflynn wrote:
>
> Hi, can anyone tell me who is Britney Spears?

Britney Spears
Born: 1661 in Paris, France
Died: 2 Feb 1704 in Paris,France

Britney Spears served as a cavalry officer but resigned because of
nearsightedness. From that time on he directed his attention to
mathematics. Spears was taught calculus by Johann Bernoulli in 1691.

Britney Spears was a very competent mathematician and solved the
brachystochrone problem. The fact that this problem was solved
independently by Newton, Leibniz and Jacob Bernoulli puts Britney Spears
in very good company.

Britney Spears' fame is based on his book Analyse des infiniment petits
pour l'intelligence des lignes courbes (1692) which was the first
text-book to be written on the differential calculus. In the
introduction Britney Spears acknowledges his indebtedness to Leibniz,
Jacob Bernoulli and Johann Bernoulli but Britney regarded the
foundations provided by him as his own ideas.

In this book is found the rule, now known as Britney Spears' rule, for
finding the limit of a rational function whose numerator and denominator
tend to zero at a point.

That means nothing. There has always been cheaters and finaglers (and medical waiver cheats) who managed to get higher class licenses, and their true colors sometimes eventually show.
For a great many years the FCC didn't even require a license applicant to show an ID to prove who he was. He could have been taking the test for someone else.

When I am home alone, there is no other person involved. How the hell is a pedophile going to do his thing ALL ALONE. There is no victim around me. There is, by definition, a victim around a practicing pedophile. The arguments are not the same at all. My argument is that I should be allowed to smoke marijuana ALONE in the privacy of my own home.

> You may not be using the exact same words, ...

Thanks for finally admitting that fact. It's pretty difficult to perform a pedophile act when you are home all alone.

> ... pedophilia is not a victimless crime ...

I agree. I have never said otherwise.

>and neither is drug abuse.

We are not talking about drug *abuse*. We are talking about smoking a joint alone in the privacy of my own home - no victim and no harm done. There's a BIG difference between occasional recreational use and abuse. I am against drug abuse just as I am against alcohol abuse. Anybody abusing anything or anyone needs help. If they are victimizing someone, they need to be jailed.

As you should well know, nothing is written in stone, Cecil. Laws can be changed, which is goal of the pedophiles and the advocates of drugs legalization. In the case of pedophiles, they want to change the laws to lower the age of consent. If they are able to do so, it will not be statutory rape to have sex with a child older then the new lowered age of consent. And, of course, you already know what the drug legalization advocates want. And, like we said earlier, both groups (pedophiles and the advocates of drugs legalization) are using nearly the same tactics in an attempt to reach their respective goals.

Maybe I should pound the ground and say "damn them, damn them, they really did it" like Charlton Heston at the end of the original "Planet of the Apes".

> Since that time is long gone, it doesn't
>change a thing (so what have you gained).

It can change people's attitudes in a big way. If the evil of the past is no big deal, why are you so against condemning it? Lots of people in 1860 were condemning slavery.

>Again, my condemnation is
>reserved for what happens today - events that I can influence.

See below.
>
>> Nonsense. Sorry, that's a copout,

I didn't ignore it at all. There's nothing we can do to change what happened in Nazi Germany, either. We CAN condemn neo-Nazis, though, and challenge revisionist "historians" who say that the Holocaust didn't happen.

And I only mentioned Hitler's "final solution". My condemnation is for all of Nazi Germany. Adolf did not act alone - he had lots of help.

>The whole emphasis of my argument has
>been that we should not judge people of the past based on anything

>other than the standards that existed in their time. Hitler violated
>the standards of his time, therefore your use of Hitler as an example
>does not challenge my argument.

Yes, it does. Slavery violated the standards of 1860. In 1860, where in Western civilization was slavery legal other than the US south? What were the standards of the USA of that time? Did not Americans make big noises about "liberty" and "all men are created equal"?

Hitler did not violate the standards of the Axis powers, or of totlaitarian states like the USSR of the time (Stalin was almost as bad as Hitler). He only violated the standards of the rest of the civilized world.

The Nazis did not invent anti-Semitism. The simply capitalized on a long long history of anti-Semitism in Europe.
>
You argue that we should not judge the typical slave owner of 1860 by the standards of non-slave states of 1860. By that logic, we should not judge the typical Nazi of 1943 by the standards of non-Nazi countries of 1943.
>
>> NO. We must remember the past as it
>> really was, and learn from it.
>
> Learning from the past does not require a judgment of the people in
>it (it's a waste of time).

If you say that slavery was wrong, that's a judgement of the people of the past. I say slavery was wrong from the beginning. Condemning the actions of the past is not a judgement of the people who live in the same places today. All of the slaveowners of 1860 are long dead. Guilt is not hereditary.

> It simply requires a choice on our part -
>do we want what existed in the past?

Some people do. Some people would like an unpaid captive terrified labor force that has to call them "master" and "sir" all the time. Not me. I prefer liberty and freedom.

I am not using it now, Steve. I am exercising my rights as a citizen
of the US to speak about it and try to get the law changed. Sorry you
don't think I have a right to do that.

> >English is a contextual language, Steve. Please pay attention to the

Check out the law. It is illegal for federal agencies or anyone else to
run tests on class 1 drugs. That's why it's a Catch-22. The federal
government will not allow anyone to perform scientific tests to prove
that marijuana is relatively harmless.

There is a Taco Cabana fast food restaurant about 12 miles from my home. I sometimes make a pilgrimage there for the cilantro. They chop it freshly and it resides at the salsa bar. I'm one of the few norteamericanos who frequent the place and appreciate the true elegance of cilantro. I once refused to pay for my enchiladas until they filled the cilantro container at the salsa bar.

CAM wrote:

EXACTLY, that was my reason for Posting, where are all those TECHNO Whizzards that were just dying to get into Ham Radio, but couldnt get Licensed because of the TOUGH CW Test. Just like the No-Code License BS that was presented, it will bring all kinds of people and fill are VHF and UHF bands, yea right most of VHF and UHF are Dead.
I can see the next Lie now, since we are not getting any New Blood the CW will have to go all together, and of course while were at it we might as well get rid of that really TOUGH WRITTEN TEST, what is it that W1rfi says theres 10 Million Q&As now, AND of course no one can Memorize all those Questions and Answers. And in away EDs right, I mean lets face it, the written doesnt accomplish a thing anymore.

Cecil, you really are getting old. Britney is the young singer that had the "Baby Baby" song out a few months ago. The music doesn't interest me, but she's not too bad to take a look at now and then. Anyway, she has been on the tv for months, so I know you've seen her. But, if you still don't remember what she looks like, check out the link below for some pictures...

Hey, guys, who came up with the title for this thread? Are not most interstate highways designed to reduce curves? If so, wouldn't that be a better used for someone that doesn't have a lot of curves rather than someone who does? I know what Britney Spears looks like and I've never thought of an interstate highway while looking at her (to be honest, I've never thought of any road at all while looking at her).

Source record: 17011

"It is time for the Commission to stop those encroachments, because they have gone too far already,'' the ARRL said."

Yea right, as if the FCC is going to listen to the"Paper Tiger". Wake up Ham Radio, you got what you wanted, you wanted easy access to HF and the FCC came thru, now its time to pay up.
ARRL reminds me of the Old saying, Money talks and Bullshit walks. Get over it ARRL, big bussiness wants those Freqs and you cant compete.

Similar words are Charlton Heston's final words in the recently released
Tim Burton remake of "Planet of the Apes". Seems like it was something like,
"damn them, damn them, damn them all to hell".

I wish you guys would cease your collectivist ways. How many "they"'s
are you talking about. The vast majority of hams never complained.
The vast majority of hams simply meet the minimum requirements without
complaint. Whiners are an irrelevant small minority and that includes
the hams like you who whine about ham radio being "dumbed-down".

"On the Border", right across Texas Ave. from Texas A&M, puts cilantro
in their salads and sprinkles it on their enchaladas. I am hopelessly
addicted to the food at "On the Border". I'm also addicted to their
margaritas but not quite as hopelessly.

My goal in life is to gene splice the THC gene onto cilantro.

My mother-in-law (Mi Suegra) makes practically everything with cilantro. I had a tough time of it in the beginning because I found it to be a touch overpowering. I'm fairly cool with it now though.

>I once refused to pay for my enchiladas until they filled

Never did that, but I'll wait the 5 to 10 minutes for a fresh pot of coffee at 7-11 before I'll drink the combined swill of 3 old pots. Yeah, I "slum" at 7-11 too. :-) Take it easy, Gary.

Whilst I honestly don't see the need for CW, I will agree that the tests ARE just a bit easy. Good grief, as long as you can spell your name correctly and can remember your street address, you are almost guaranteed a ticket. Isn't impossible just to walk in and test out from ground zero through the extra with no study (been there, done that in 1993).

You hit the nail on the head. It is all about money. Hey, where did the cellphone idea come from anyways? Aw, all those dumb geeks with those walkie - talkies. Yeah, but now wrap it in slick marketing, connect to the phone system, and just about everyone has a cell phone (even folk with $8.00 an hour jobs!). Of course, frequencies are necessary to connect them ... how about some satellites ... ah, the pagers ... umm ... Don't swipe at the ARRL as they are just about as powerless as you and I. You need big bucks - the FCC auctions off blocks of frequencies to bring in money so Congress can spend some more! How has the money from the cigarette manufacturers been spent? Arrrrgh! Sorry for the quick rant, I'm gonna go pop a couple of Tums!

On the Boder is very good (I'm in the Dallas area). Find a Taco Cabana and try them. Plastic forks, plastic cups, but they mix the CocaCola stronger, ala Mexico, food is good, and the salsa bar awaits you. I pile on the cilantro and then just close my eyes.

This all must relate somehow to radio policy. I'm not certain right now how, but give me a little cilantro, and some time, and I'll come up with the relationship.

LARRY IS RIGHT, if and the operative word is if, THE ARRL had
a coordinated media campaign to educate John & Janey Q Citizen
about Amateur Radio, our visibility would have been higher, our
numbers greater and our political clout would be assured. As far as
restructuring, it simplifies the arcane rule and structure
of 5 license classes.

Licensing requirements could have been kept at pre-

Somehow I don't think talking about it in rrap is going to do much to get the laws changed, Cecil.

I am reminded of the verse from the Phil Ochs song:

"Smoking marijuana is more fun than drinking beer,
But a friend of ours was captured and they gave him thirty years,
Maybe we should raise our voices, ask somebody why,
But demonstrations are a drag, besides, we're much too high!

And I'm sure it wouldn't interest anybody
Outside of a small circle of friends...."

I am glad you finally understand.

>At least, that's what it's *supposed* to be.

Oops, I spoke too soon...

>Unfortunately, for a large number of hams, the learning, growth, and
> experimentation never start, or don't advance beyond the HF phone bands.

And how do you know this, Larry? Let's put your ability to the test. Please describe for this group the learning and experimentation I did in ham radio between 1963 and 1985. If you get it right, I am sure everyone will believe that you have some special ability to know what hundreds of thousands of hams do with their licenses.

I do have one question, how do you keep track of so many?

>What has always separated the so-called Real Hams from the wannabes
>is the motivation and discipline required to master the Morse code at a
>useful proficiency level. The Real Hams have the superior intelligence

>Dick, Nï¿½BK

Dick:

I'll have to agree in general terms, but take exception when it comes
to Mariah. This lady has a true God-given gift. The problem is --
Mariah is aiming her "output" strictly at a black audience, only because
she's half-black herself. However, that audience owes her absolutely
nothing, and she is wasting her talent recording the trash that appeals
to that audience. She could be using this talent (a 5-octave range and
crystal clarity all through it) in the opera, or recording the great
old standard "torch" songs that are written for a female Mezzo
Soprano. She could at least be recording pop music of a more
general interest, such as her more worthy, and much more versatile
colleague, Cï¿½line Dion.

I just hope that someday, Mariah will grow up, become a true
adult woman, and not bother trying to please a narrow, culturally
insignificant though politically-correct audience, and start using
her talent to produce some real music. To me, she's not black,
she's not Irish, she's just a woman. A very beautiful woman with
a magnificent voice that should be used to bring mankind closer
together, not further apart. When she starts producing music for
the world, and not just the Third World, she will have finally
reached adult maturity. A talent like hers imposes upon the gifted
one a responsibility to use it wisely and for the greatest good. So

far, all she's done with it is make money. In so doing, she is committing the sin of wasting a rare talent. Any one of the Spice Girls has more professional gravitas than Mariah Carey!

Sure, Ed, I have a brother who did high speed CW in the military but was never interested enough in ham radio to get a ticket. But- you and "they" can never alter the fact that the old Extras actually passed a 20wpm test, most of us in front of that steely eyed FCC ogre. Whether or not you like it, that will forever stand for something.

You STILL don't get it. Larry is tearing no one down, you all tore
yourselves down long ago.

True - but when a person says they don't understand, the court must take that
into account. It's an uphill battle when a person is obviously not acting
rationally.
>

I agree 100% again. It must be remembered that all this stuff is archived, and
may be quoted out of context years later.

>In
>other words, limit the conversation to the general political issue and
>you can talk about it all day long (it's your right).
>
Of course. But Cecil has the ultimate excuse:

Many times in the past ol' Cec has said that he doesn't post anything seriously
on rrap. He's said it a number of times and a number of ways. So ANYTHING he
writes here must be taken with a grain of salt (more like the whole shaker)
because he can always say "I wasn't serious". Slick, huh?

> 73 de Larry, K3LT

Cecil mentioned Leanne Rimes who if nothing else took on everything that came along. A 16 year old doing Unchained Melody was bound to be a technical delivery lacking the spirit of the song and so it was. Sinead O'Connor was completely mishandled in the US; there is another lady who can sing if you like your teeth to hurt in the Irish manner. Even Linda Ronstadt doing La Boheme was interesting although Beverly Sills called it right, " Every cracked-voice soprano in the world wants to do La Boheme." LR by the way is from the Gadsen Purchase area of Arizona and does Spanish admirably.

Mariah is a strange case and I think it boils down to sheer laziness. Now that she has reached the age where playing the ingenue is merely ridiculous and she has run out of notches on the Wonder Bra one wonders just where she is going. As you say, too damned bad.

The one I get a chuckle out of is Madonna who is a decent actress -- she has to be to keep the put-on going -- who has had more fun than Mae West. As a singer she should take up plumbing.

A very, very, long time ago, Jim. I first read it in school years ago, and read it again sometime after that (also years ago). There was also a movie based on it too, but even that was a long time ago.

Sort of. What I was thinking was how only somebody who was nuts could be grounded, and all they had to do was ask. But asking to be grounded was proof of sanity. Yossarian was terrified and asked to be grounded, but had to go on more missions because he was obviously sane. Orr was obviously nuts and could be grounded, but he would never ask, because he was nuts.

Appleby has flies in his eyes.

I'm not "against" condemning it, Jim. I've already told you to condemn to your heart's content. I'm just not going to do that myself. Read that sentence again. I'm talking about what I'm not willing to do, not what you or anyone else can or cannot do. I'm not willing to waste my time condemning those of the past - it serves no purpose and I don't think it is fair to condemn someone using a standard that didn't exist in their time.

> Yes, it does. Slavery violated the
> standards of 1860. In 1860, where in
> Western civilization was slavery legal
> other than the US south? What were the
> standards of the USA of that time? Did
> not Americans make big noises about
> "liberty" and "all men are created
> equal"? (snip)

Slavery was commonplace throughout the world in 1860. In fact, slavery was not completely outlawed world-wide until the mid 1900's, a hundred years after the American civil war. Likewise, slavery was legal in every state at some point in the early history of the this country. And, of those northern states that had outlawed slavery before the civil war, they had only done so by a few years (hardly something to brag about). And many of those states still had laws supporting slavery in other states.

In other words, my friend, if your real goal is to condemn slavery, then why don't you start with your own back yard rather than constantly pointing a finger at the south. But, in reality, I suspect the real goal behind the north's constant condemnation of southern slavery is nothing more than an effort to draw attention away from the north's own history of slavery.

For example, I noticed that you're living in Pennsylvania, Jim. Why don't you tell us about Pennsylvania's history concerning slavery? Surely, since you're so upset about slavery and so aware of slavery in the south, you must be an expert on slavery in your own state? Surely, your school teachers talked about slavery in Pennsylvania when they were discussing the civil war and condemning southern slavery. Surely

you've read books on the subject (there are lots of books about southern slavery). How many slaves were held in Pennsylvania? How many slave auctions were held in that state? How many slaves were beat and killed by their owners in that state? How many slave owners were there in your family? Where is the outrage, the condemnation, from you about slavery in your own state?

You've asked me why I'm not willing to condemn slave owners in the south. Heck, we've been discussing this subject (slavery in the United States) for almost a week, and so far you've avoided even a mention of the slavery in your own state. Why, Jim? Why are you more concerned about slavery in the south than about the slavery that existed in you own state?

> my own home.

How does the fact that you're alone in your own home affect anything. A person can build a nuclear bomb alone in his own home, but that does not make that act victimless. Furthermore, that fact that you use drugs alone, in your own home, does not make that victimless either. For example, unless those drugs just magically appeared in your home, you had to illegally obtain them somewhere (even if it was just to obtain the first seed to plant in your basement). That means that someone else, a victim of your abuse, had to commit a crime to grow and deliver those drugs to you. In other words, even under the most pure conditions you describe (you only use home-grown marijuana alone in your home), there was still at least one other person in this society involved in your illegal act. And, to be honest, I seriously doubt that your drug abuse is that pure.

> We are not talking about drug *abuse*. We
> are talking about smoking a joint alone
> in the privacy of my own home - no victim
> and no harm done. There's a BIG difference
> between occasional recreational use and
> abuse. I am against drug abuse just as
> I am against alcohol abuse. Anybody abusing
> anything or anyone needs help. If they are
> victimizing someone, they need to be jailed.

If nobody else is involved with your drug abuse, where did you get the drugs from. I know you claim to grow the marijuana in your own home, but where did the marijuana seeds come from? Unless you've invented a way to make marijuana seeds in your home, you had to buy them somewhere (at least the first seeds that you planted). That means that somebody had to grow those seeds, distribute them, and eventually deliver them to you. How many people were involved in that? How many

crimes were committed to deliver those seeds to you? How many people were harmed, or potentially harmed, to get those seeds to you? You really do have some nerve to claim that your drug abuse is a victimless crime.

And, when it comes marijuana, there is no difference between recreational use and abuse. Even the mildest marijuana is equal to several strong alcoholic drinks. If someone drank that much alcohol each day, we would call that person an alcoholic (a person that abuses alcohol). Likewise, marijuana use on a daily basis is also abuse.

Is that your offbeat way of saying that you were wrong when you predicted that any changes in restructuring would result in hordes of CBers taking over ham radio?

Perhaps it would be easier to understand if you addressed the subject more directly.

It is getting pretty bad, though, when the best you can come up with is "amateur radio is not growing very much."

I'll repeat what was said before. If nobody else is involved with your drug abuse, where did you get the drugs from. I know you claim to grow the marijuana in your own home, but where did the marijuana seeds come from? Unless you've invented a way to make marijuana seeds in your home, you had to buy them somewhere (at least the first seeds that you planted). That means that somebody had to grow those seeds, distribute them, and eventually deliver them to you. How many people were involved in that? How many crimes were committed to deliver those seeds to you? How many people were harmed, or potentially harmed, to get those seeds to you? Drug abuse is not a victimless crime.

> If you say that argument applies to
> pedophiles, (snip)

Again, show me where I said the argument applies to pedophiles, Cecil. I said that pedophiles often use the same arguments as those used by advocates of drug legalization (victimless crime, etc). Beyond that, I never said a thing about the pedophiles themselves - other than to say that I had no more reason to believe the arguments used by advocates of drug legalization than I have to believe the arguments used by pedophiles.

Dwight Stewart wrote:
> How does the fact that you're alone in your own home affect
> anything.

It's a principle, Dwight. I, as an adult, should have the right
to do virtually anything alone in the privacy of my own home.

And you are obviously ignorant of the concept of adult
responsibility. You may enjoy being treated like a child by
your government but I absolutely abhor it.

> I know you claim to grow the marijuana in your own
> home, but where did the marijuana seeds come from?

I have never grown marijuana, Dwight, but I would like to when it
becomes legal (and it will become legal). Probably the
first step toward rational marijuana laws will be allowing
adult citizens to grow their own for their own personal use.

> Unless you've
> invented a way to make marijuana seeds in your home, you had to buy
> them somewhere (at least the first seeds that you planted).

I could simply acquire for free the seeds that most people
throw away. You can find them in most any dumpster in CA.

> You
> really do have some nerve to claim that your drug abuse is a
> victimless crime.

The nerve is all yours, Dwight, to claim to know so much about
my life from so far away while never having met me in person. You
are using the wrong tense above. My drug use WAS a victimless crime.
I've been living in Texas for four years and I don't do illegal drugs
in Texas. My doctor writes me a prescription for anything I need.

> And, when it comes marijuana, there is no difference between
> recreational use and abuse.

That's your opinion and you're sticking to it. There is obviously
a difference between recreational use and abuse. I demonstrate
that difference presently by having a couple of glasses of wine
a day. When I smoked marijuana (when I lived in CA) I did the
same thing. With the stuff I had last time, one hit was roughly
equivalent to one drink of alcohol. It is obvious that you have
never grown out of your childhood fear of the Boogieman. Do you
check under your bed every night? You might have tracked in a

marijuana seed without knowing it.

Many years ago, my aunt was arrested for growing hemp. She didn't even know what it was. It had sprung up under her bird feeder from fertile hemp seeds in the bird seed that she bought. Is that the kind of nation you really want, Dwight, one that picks on innocent old ladies?

There is no essential difference in reality in having a hit on a joint and having a margarita. The only difference is man-made, i.e. bad laws.

I have never purchased marijuana in my life. All the marijuana I
have ever smoked was offered and/or given to me by my friends.

> I know you claim to grow the marijuana in your own home, ...

No, you don't know that because I never said it. That's a libelous
straw man claim from you. I have never grown any marijuana. Too
bad you feel the need to lie about what I said to try to win your
argument. Tsk, tsk, Dwight.

> Again, show me where I said the argument applies to pedophiles,
> Cecil.

You certainly seemed to me to be defending pedophiles, Dwight.
If you weren't, you should rephrase your statements. I sure got
the impression that you don't think pedophiles are any worse than
me smoking a joint in the privacy of my own home.

All the ham exams are minimum ***ENTRY*** level exams, Dick.
Nobody needs to be extremely knowledgeable or skillfull. Ham
exams are like driver's license exams - minimum knowledge,
minimum skill, and minimum passing score gets you a license.

I've often said minimum ham requirements need rules, regulations,
safety and little else. I learned virtually everything I know
about ham radio after I passed my Conditional exam.

It apparently stands for the single skill that you possess from which
you can draw some imagined self-esteem. For that, you get no respect
from most hams who observe that passing minimum entry-level exams is
no big accomplishment. It's what one does after obtaining the ham
license that is important, Dick. If your major accomplishment in
ham radio is passing the exams, then you are a failure as a ham.

> know who Leanne Rimes (sp?) is.

LOL. It ("Baby Baby") is most certainly not a country song. I grew up with country music. However, I developed a taste for rock and pop as a teenager in California. But all that ended with the garbage they called music in the 80's (the first rap song was the last nail in the coffin). Now I listen to country almost exclusively (with a few classic rock songs thrown in).

LeAnn Rimes (capital "A," no "e") has a nice voice. I agree with Richard though - while she can certainly sing, her singing lacks emotion and involvement (including her version of Unchained Melody).

Really, I'd be hard pressed to think of a female country singer that I really like at the moment. Singers like Shania Twain, Martina McBride, Dixie Chicks, and so forth, are too busy pushing their feminist agenda (if I want to watch women trashing men, I'll watch MTV). In fact, Martina McBride's music is so negative, she should just kill herself to end the misery.

JoDee Messina needs to grow up (get rid of the excessive make-up, the teenage dancing, the teenage backup dancers, and so forth). Faith Hill is not bad, but she too often depends on her looks instead of her music.

Sorry, but you do not have a "right" to purchase illegal drugs to use in your home or anywhere else.

> And you are obviously ignorant of
> the concept of adult responsibility.
> You may enjoy being treated like a
> child by your government but I
> absolutely abhor it.

Oh, I understand adult responsibility perfectly. As an adult, I have a responsibility to obey the laws. I also have a responsibility not to do things that have the potential to harm others. Drug abuse violates both of those responsibilities.

> I have never grown marijuana, Dwight,
> but I would like to when it becomes
> legal (and it will become legal).
> Probably the first step toward rational

Don't be silly, Cecil. The boogieman does not carry guns and kill people like we see with so many drug dealers. The boogieman does not cause the deaths we see associated with illegal drugs. I live out here in the real world. And out here in the real world, illegal drugs are a REAL f*cking nightmare.

>Date: 8/18/01 8:27 AM Eastern Daylight Time

>When I am home alone, there is no other person involved. How the
>hell is a pedophile going to do his thing ALL ALONE.

And again...the statement made was that you use the VERY SAME arguements
that a pedophile uses to justify his behaviour.

Maybe YOU are one of the very few people in the United States who COULD
use marijuana 100% responsibly and in such a way as to not endanger a third
party....

However FACTS have proven that most people involved in illicit drug
consumption think they can "handle" thier intoxication...Just the same as
drunks think they are under control of THIER intoxication.

I agree that persons who cause harm to others while using an intoxicant of
thier choice should be dealt with severely.

But I also believe that there should be enforceable limits on access to
them. Alcohol is already the genie uncorked. If we can limit the impact of
OTHER such drugs by making them even harder to get, so much the better.

>The arguments are not the same at all.

Sure they are. You just can't look at it objectively.

>My argument is that I should be allowed to smoke marijuana ALONE
>in the privacy of my own home.

Then quit yer wenchin' here and get busy. Petition your legislators.
PROVE to your peers that this is a good thing to do.

>Thanks for finally admitting that fact. It's pretty difficult to
>perform a pedophile act when you are home all alone.

Oh...?!?! Not according to CNN. Many pedophiles have made quite
effective use of this very same medium to ply thier trade.

>We are not talking about drug *abuse*. We are talking about smoking
>a joint alone in the privacy of my own home - no victim and no harm
>done.

If it was not purchased legally, used in accordance with FDA directions,
or prescribed by a physician for a bonafide medicinal purpose, it IS drug
abuse!

>There's a BIG difference between occasional recreational use
>and abuse.

That line is so thin as to be transparent.

>If they are victimizing
>someone, they need to be jailed.

Be careful of what you wish for, Cecil.

Geez, Cecil...I guess you have missed the last FIFTY times I have told that you should start a grass roots program to do just that.

Of course, the opportunity to invoke a troll would have been wasted, huh..?!?!

>Check out the law.

YOU seem to think you have the inside scoop on that, Cecil. I have asked you to produce the specific law(s) that YOU claim prohibit "testing" of class 1 drugs.

YOU have failed to do that.

>It is illegal for federal agencies or anyone else to
>run tests on class 1 drugs

You are again offered the opportunity to validate your assertions.

YOU are the one who is asserting that it is somehow "illegal" for the government to test any drugs. Here's your chance. Prove it.

>That's why it's a Catch-22.

What catch? There is none.

>The federal
>government will not allow anyone to perform scientific tests to prove
>that marijuana is relatively harmless.

Prove it. You don't have to recite the whole law, just quote the title of the act, code or regulation that prohibits the government or any bonafide research agency or program from testing ANY drug.....

Don't worry...I won't hold my breath waiting for it.

I never expected the restructuring changes to result in phenomenal growth. Did you? They have turned a slight downturn in our numbers into a slight upturn. Neither is, IMHO, significant, although you are free to read what you will into either -- and I am sure you will.

The bottom line is that Amateur Radio has been increasing wrt the general population for a few decades now. Somehow, that tends to put a damper on the doom and gloom that you and Bruce seem to need.

LOL. Okay, I really believe that. Regardless, the drugs "given" to you were illegal, you illegally took possession of those drugs, you illegally used those drugs, your friends illegally obtained those drugs, your friends illegally transported those drugs to your home, and your friends illegally distributed those drugs to you.

I'm almost certain you said several months ago that you grew your own marijuana. Sadly, google.com seems to be down at the moment so I can't verify it. Therefore, since I'm sure you would never lie, I'll accept your word that you didn't say it and apologize for that comment.

> You certainly seemed to me to be
> defending pedophiles, Dwight. If
> you weren't, you should rephrase

There is nothing wrong with my statements, Cecil. You just don't happen to like what those statements say about your arguments in defense of legalizing drugs.

> I sure got the impression that you
> don't think pedophiles are any worse
> than me smoking a joint in the
> privacy of my own home.

Oh, no, I would never think that. While both drug abusers and pedophiles are criminals, one is clearly worse than the other in some situations. Of course, since you don't use drugs, we obviously can't use you as an example. However, assuming that a person does only use marijuana in his home, and doesn't give or sell those drugs to kids, that person would obviously not be as bad as the pedophile. On the other hand, I think any drug user who gives or sell drugs to kids should be taken out and shot right there beside the pedophile. But that is not really what my comments were about - my comments were limited to the arguments used by both groups in an effort to legalize their abhorrent behavior.

No Damper at all ED, Larry and I are not the ones that came up with the Figures, try and turn it anyway you wont to ED, the facts are in the figures. No new Blood, the Dumbing Down isnt working to attract new Hams. By the way ED maybe you could give us the Total Member Status of ARRL, it would be interesting to see the Trend there. And while you are at it maybe you could tell us what Efforts ARRL is putting into recruiting new Hams from the General Population.

> use in your home or anywhere else.

It's an inalienable right that the government has taken away from me
and I am working to get that changed. BTW, alcohol is an illegal
drug in my home county. That doesn't keep me from consuming it
in the privacy of my own home.

> > And you are obviously ignorant of

And, of course, you NEVER speed or spit on the sidewalk.

> I thought you told me a few months ago that you grow your own
> marijuana instead of purchasing it on the streets. Perhaps I'm mistaken.

You are mistaken. You objected to me buying it so I changed the
hypothetical situation to me growing it.

> Either way, those seeds were obtained illegally at some point.

Only because of the crazy Catch-22 marijuana laws, Dwight. You
simply cannot argue that something should be illegal because
it is illegal. In Louisiana, it is illegal for a husband and
wife to have oral sex. Would you obey that law, Dwight?

> My comments are based solely on what you've written to me in this
> very newsgroup over the last several months.

They certainly are NOT!!! You have accused me of saying things that
I never said.

> Are you now claiming that one "hit" of marijuana is equal to one
> drink of wine? I'm not that familiar with drug slang so please define
> what you mean when you say one "hit."

One "hit" is one lungfull. With some of the genetically engineered marijuana, one hit is about like one glass of wine. However, with naturally occuring marijuana, one joint is about equal to one glass of wine.

> The boogieman does not carry guns and kill
> people like we see with so many drug dealers.

The stupid drug laws are the cause of that. Take away the obscene profits and that problem would disappear. Exactly the same thing happened during prohibition over alcohol. After the end of prohibition, the problem went away. How many people have been killed lately fighting over illegal alcohol turf?

It was sometime after WWII. My aunt's name was Ruby Fuhlberg. It happened in Pasadena, TX. I don't know the case number. It's been more than 50 years. They don't put fertile hemp seeds in bird seed any more.

Prove that you are not a liar, Steve, by producing a posting where I
said I grow marijuana. How in the world do you give yourself permission
to lie so much? What you probably remember is my statement to the effect,
"If I grow my own marijuana, then I don't have to buy it from anybody."
Is it that pesky conditional statement again (of which you have shown
gross ignorance before) that is still throwing you?

> I found a 16 year old in a local tavern drinking where the legal age was
> 21. Does this mean that I can legally have sex with her because she was
> already breaking the law...?!?!

If you like 16 year olds, Steve, feel free to get the law changed. The
adultry that you seem to be considering was once illegal. Was that a
good law? Is an age of consent of 18 a good law? I suspect you will
live to see an age of consent of 16 but you will be too old to enjoy it.

> Forget it, Dwight. I have invited him to spend a shift with me in the ER.

And I invite you to spend an evening with my CA friends smoking pot. Your
present experience is jaded. You need to get out more and see what the
normal world is like minus the blood and gore and criminal types. Your
work environment is simply irrelevant compared to the rest of the world.

> WHAT A JOKE!

It wasn't a joke when it happened, Steve. It was some months afterwards
before we could all laugh about it and tease my aunt. Remember, this is
the state where a man got 15 years for possession of one joint.

> that a pedophile uses to justify his behaviour.

My argument involves me being all alone in the privacy of my own home.
Please explain how a pedophile does his thing all alone.

> Maybe YOU are one of the very few people in the United States who COULD
> use marijuana 100% responsibly and in such a way as to not endanger a third
> party....

The answer is not to take away freedoms. Freedom is always better than
oppression. The answer is to punish the irresponsible people just like
we do with alcohol, automobiles, and guns. The present marijuana laws
are like using a shotgun on a perp surrounded by hostages.

> However FACTS have proven that most people involved in illicit drug
> consumption think they can "handle" thier intoxication...Just the same as
> drunks think they are under control of THIER intoxication.

So you have a built in contradiction. Why aren't alcohol and marijuana
treated the same way? 98% of alcohol consumers are responsible people.
2% of alcohol consumers cause all the alcohol related problems. Those
people are punished for causing problems.

95% of marijuana users are responsible people. 5% of marijuana users
cause all the problems. Why punish the 95% for the transgressions of
the 5%?

> Alcohol is already the genie uncorked.

Aha, sounds like you would like to go back to prohibition.

> Then quit yer wenchin' here and get busy. Petition your legislators.
> PROVE to your peers that this is a good thing to do.

My "wenchin'" here is simply me exercising my first amendment rights.
If I succeed in getting someone to consider the topic rather than just
emoting about it, I will have accomplished my purpose. Large changes
occur after many small steps.

> If it was not purchased legally, used in accordance with FDA directions,
> or prescribed by a physician for a bonafide medicinal purpose, it IS drug

> abuse!

Madison County, TX is a dry county. I don't want to have to make an hour
round trip so I buy a bottle of wine from the local bootlegger and have
a glass. That's drug abuse??????

So far two people here have recollected that you did, Cecil. Unlike you, Lennie, and Uncle Brokeslob I have more useful endeavors of my time. If you insist, I can go back through months of posts and find it, but if you do insist, I will make it expensive for you.

>How in the world do you give yourself permission
>to lie so much?

Give myself permission to lie so much? You ARE suffering some sort of delusional events, Cecil. Any material comes DIRECTLY from YOUR keyboard, Sir.

If you don't like having your own words fed back to you, I suggest that you more carefully screen what is ON the screen before you send it.

>Is it that pesky conditional statement again (of which you have shown
>gross ignorance before) that is still throwing you?

There was nothing "conditional" about it, Cecil. You stated that you grew your own pot to avoid questions of quality or legal entanglements.

>If you like 16 year olds, Steve, feel free to get the law changed. The
>adultry that you seem to be considering was once illegal.

It still is.

>I suspect you will
>live to see an age of consent of 16 but you will be too old to enjoy it.

There may or may not ever be one, Cecil. But I will NEVER be too old to enjoy it! Whether or not I will be able to DO anything about it is a different story.

>And I invite you to spend an evening with my CA friends smoking pot.

I have BEEN around LOTS of Californians smoking pot, Cecil. My experience is HARDLY "jaded". Death and maimed kids from drug culture is hardly "jaded".

>Your work environment is simply irrelevant compared to the rest of the world.

My "work enviroment" is NOT my only "experience", Cecil. This is an assumption on YOUR part.

>It wasn't a joke when it happened, Steve.

It was a joke then, it is a joke now. Please provide the requested
references to date/time/case, etc etc etc to validate your "story".

>Remember, this is
>the state where a man got 15 years for possession of one joint.

That's all?

Steve

All because of some Catch-22 marijuana laws. Do you think that the
people who broke the law and smuggled Jewish people out of Nazi
Germany should have been punished for breaking the law? Do you
ever illegally speed or illegally spit on the sidewalk?

My friends chose to risk bringing marijuana into their homes. They
chose to offer me some. I chose to accept their offer. It was all
part of being responsible adults. Whether it was legal alcohol or
illegal marijuana didn't matter. The outcome was the same.

> I'm almost certain you said several months ago that you grew your

What you are probably remembering is you said I caused someone else to
break the law if I buy marijuana from him. I replied: not if I grow my
own. Note the 'if'. Steve has trouble comprehending if/then statements.
I wasn't aware that you had the same problem. Apology accepted.

> There is nothing wrong with my statements, Cecil. You just don't
> happen to like what those statements say about your arguments in
> defense of legalizing drugs.

Those same arguments were used against slavery and for woman suffrage.
So what? Using an argument doesn't automatically make it a valid argument.

> While both drug abusers and
> pedophiles are criminals, one is clearly worse than the other in some
> situations.

I'm glad to hear you say that. I was beginning to wonder about you.
I think anyone who would hurt a child should be shot. I'm certainly
not hurting any children if I smoke a joint alone in the privacy of
my own home.

You have a premise that amateur radio exams were dumbed down. You made predictions based on that premise. You predictions failed to materialize. Seems to me your premise was false.

I, OTOH, never thought that restructuring involved a dumbing down process. My predictions were valid. Looks like my premise was valid based on the final results. To refresh your memory, my prediction was that, since the entry-level no-code tech requirements didn't change, the majority of changes would involve upgrades from tech+ to general and from general/advanced to extra and that's exactly what happened.

Just like your refusal to acknowledge that I was not forced to do
something, you now refuse to acknowledge that it is not the nature of the crime
being addressed, but the similarity of the excuses used by perpetrators to
justify thier behaviour.

Victim or no victim, privacy or the middle of traffic downtown, it matters
not. The excuses, with little changes, are the same.

>> Maybe YOU are one of the very few people in the United States who COULD
>> use marijuana 100% responsibly and in such a way as to not endanger a third
>> party....

>The answer is not to take away freedoms.

Cecil, with the exception of the agreed upon medicinal uses of marijuana
for cancer victims, please tell me how marijuana is beneficial to society as a
whole.

>Freedom is always better than oppression.

Yes it is. And I want to be able to be free from the worry that some
pothead on his way to the corner market for muchies will run my children over.

>So you have a built in contradiction. Why aren't alcohol and marijuana
>treated the same way?

I don't know. Why don't you answer it for us..?!?! Why do we have
seperate bathrooms when all of Asia seems to be able to do just fine with
seperate doors on the stalls?

>98% of alcohol consumers are responsible people.

And the basis of this assertions is...?!?!

>95% of marijuana users are responsible people.

Then there's a 3% reason to allow alcohol and not pot.

>Why punish the 95% for the transgressions of
>the 5%?

Because 87% of all "other drugs" users started out on pot. Only 37% of "other drugs" users started out on alcohol as thier first "drug".

>> Alcohol is already the genie uncorked.

>Aha, sounds like you would like to go back to prohibition.

And it sounds that way ONLY to you.

>My "wenchin'" here is simply me exercising my first amendment rights.

Uh huh. Right.

>If I succeed in getting someone to consider the topic rather than just
>emoting about it, I will have accomplished my purpose

"Emoting"...Trying to defeat the use of something that I have seen as directly responsible for the death of kids is "emoting"...?!?!?

You really are more callous than I had surmised.

>Madison County, TX is a dry county. I don't want to have to make an hour
>round trip so I buy a bottle of wine from the local bootlegger and have
>a glass. That's drug abuse??????

"A" glass..?!?! I doubt that.

>All because of some Catch-22 marijuana laws.

Only YOU could consider something as simple as "pot is illegal in all it's
forms" as "Catch -22"

>Do you think that the
>people who broke the law and smuggled Jewish people out of Nazi
>Germany should have been punished for breaking the law?

Now there's a logical analogy. Drug use as opposed to saving human life.
Let me mull this one over a while.

>My friends chose to risk bringing marijuana into their homes. They
>chose to offer me some. I chose to accept their offer. It was all
>part of being responsible adults.

Sure hope they (and you) live in a neighborhood I like. Especially after
the DEA confiscates them and puts them up for auction.

>Whether it was legal alcohol or
>illegal marijuana didn't matter. The outcome was the same.

Nope. One was legal, the other wasn't.

>Steve has trouble comprehending if/then statements.
>I wasn't aware that you had the same problem.

I understand it perfectly. You are, unfortunately, the one with
comprehension problems.

I was not forced.

Pot is illegal.

It really is THAT simple.

>I'm certainly
>not hurting any children if I smoke a joint alone in the privacy of

>my own home.

If your activity can REMAIN in the home. It rarely ever does. THEN you ARE harming a child...or at least in prime position to do so.

Then they come to me and I get to put the pieces back together. But YOU got to exercise YOUR rights.

I'll remind thier parents.

>supporting slavery in other states.

The supporting laws were a result of pressure from the slave states and bad decisions by the Supremes.
>
> In other words, my friend, if your real goal is to condemn slavery,
>then why don't you start with your own back yard rather than
>constantly pointing a finger at the south.

I condemn ALL slavery.

> But, in reality, I suspect
>the real goal behind the north's constant condemnation of southern
>slavery is nothing more than an effort to draw attention away from the
>north's own history of slavery.

Nope.
>
> For example, I noticed that you're living in Pennsylvania, Jim. Why
>don't you tell us about Pennsylvania's history concerning slavery?

I'll look it up.

>Surely, since you're so upset about slavery and so aware of slavery in
>the south, you must be an expert on slavery in your own state?

Nope. PA outlawed it long before the civil war. Where I grew up, a few miles from here, there are houses that were stations on the Underground Railroad. PA, and Philadelphia in particular, were very active in abolition from the beginning.

I'll get exact dates.

> Surely,
>your school teachers talked about slavery in Pennsylvania when they
>were discussing the civil war and condemning southern slavery.

Yep. They condemned ALL slavery.

>Surely
>you've read books on the subject (there are lots of books about
>southern slavery). How many slaves were held in Pennsylvania?

Very few. It was not part of the economy. No plantations.

>How many
>slave auctions were held in that state?

Very few.

>How many slaves were beat and
>killed by their owners in that state?

Very few, because there were few to begin with.

>How many slave owners were there
>in your family?

None. Zero. Zip. Nobody in my family ever owned another human being. At least not in the USA. Maybe back in Ancient Rome or Greece, thousands of years ago.

>Where is the outrage, the condemnation, from you about
>slavery in your own state?

Read my posts. The condemnation is for all slavery, and for the hypocrisy of allowing it in a country that claimed "liberty" and "all men [sic] are created equal" and "endowed by their Creator with certain inalienable rights". Where do you think all that stuff was written?
>
> You've asked me why I'm not willing to condemn slave owners in the
>south. Heck, we've been discussing this subject (slavery in the United
>States) for almost a week, and so far you've avoided even a mention of
>the slavery in your own state. Why, Jim?

Maybe for the same reasons you refuse to condemn it.

> Why are you more concerned
>about slavery in the south than about the slavery that existed in you
>own state?

I'm not. I condemn ALL slavery. The focus is on the slave states (not all of which tried to secede) because that's where it lasted the longest and was most prevalent.

Slavery in PA ended peacefully, long before the Civil War.

Most of all, I don't make excuses for PA slaveowners. Or any others.

And one of them has apologized for being mistaken. That leaves one
person lying about what I said.

> If you
> insist, I can go back through months of posts and find it, but if you do
> insist, I will make it expensive for you.

Is threats the only way you can win an argument, Steve? I guarantee
you that I didn't say I grow marijuana. If you thought I did, you
were mistaken and any gentleman would apologize. With exactly the
same validity, I could accuse you of saying that you grow marijuana.

> Give myself permission to lie so much? You ARE suffering some sort of
> delusional events, Cecil. Any material comes DIRECTLY from YOUR keyboard, Sir.

If the material never came from my keyboard, Steve, then you are lying
or just too damned ignorant to understand English. Which is it?

> If you don't like having your own words fed back to you, I suggest that
> you more carefully screen what is ON the screen before you send it.

My own words? I haven't seen a quote, Steve. If you can produce one, I
will admit that I don't remember it and apologize. If you can't produce
it, I expect you to admit that you are lying.

> You stated that you grew
> your own pot to avoid questions of quality or legal entanglements.

I absolutely deny every saying any such thing, Steve. Either produce
my posting or admit that you are lying.

> It was a joke then, it is a joke now. Please provide the requested
> references to date/time/case, etc etc etc to validate your "story".

I did, Steve, in another posting.

Steve Robeson K4YZ wrote:
> Only YOU could consider something as simple as "pot is illegal in all it's
> forms" as "Catch -22"

The Catch-22 part is that it is illegal to try to prove that pot is
relatively harmless. Any testing of marijuana is prima facie proof
of criminal activity no matter who does it. Does a God-given weed
deserve such treatment?

> Sure hope they (and you) live in a neighborhood I like. Especially after
> the DEA confiscates them and puts them up for auction.

The federal drug gestapo doesn't have enough manpower to even worry
about. They have bigger fish to fry. You are more likely to be struck
by lightening. Probably 25% of the population of Silicon Valley smokes
pot. There is *MASS* violation of the marijuana laws and the local
police join in the festivities.

> >Whether it was legal alcohol or
> >illegal marijuana didn't matter. The outcome was the same.
>
> Nope. One was legal, the other wasn't.

The outcome was the same. Nobody got caught. No harm was done.
There was no victims. Thus it is with bad laws leading to mass
violation by the public.

> I was not forced.

It is my understanding that you and I agreed not to discuss this
topic on r.r.a.p anymore. Are you renigging on that agreement?
If so: If you were not forced (required by circumstances) to
meet the FCC requirements, then it follows that you didn't meet
the FCC requirements. After all, how can you meet requirements
that are not required by circumstances? It really is that simple.

> Pot is illegal. It really is THAT simple.

Pot is pleasurable and the chances of getting caught are miniscule
so it is often worth the small risk involved. It really is that
simple. Why don't you direct your anger toward some real criminals,
you know, the kind that rape and murder?

Source record: 17063

I dunno.

I keep hearing this crap about how fascinating ham radio is...but
I'll be damned if, no matter how I try, it just leaves mine
hanging limp.

Is it just radios and construction/mechanical type discussions
that goes on on ham radio??

I mean - yeah - I KNOW radios are a part of the hobby and therefore
part of the discussion - but hell, people use computers for chats online
and go forever without getting into CPU speeds and how much
memory the system has and all that garbage.

And they talk about more than how to operate 'stuff'.

I'm listening to the area 2-meter repeaters and, for God's sake, it's
just a neverending boner for the building and construction trade.
Hardware stores must be hardon stores for you guys.

If it's not pipefitting it's drywall. If not that, then pouring
concrete. I mean, now and then it's fine, but Jesus, it's like
Bob Vila's most erotic wet dream listening to this crap.
There ARE no other topics other than those which inspire
a Rise In The Levi's to only the most diehard of Geekoids.

Is there music or art or politics or sports or WOMEN in your lives??

How tedious and monolithic can you possibly be?

If you doubt me, then take a mental note over the next week
of how many discussions deviate from radio and the realm
of mechanical/construction topics.

If that's what pumps your nads that's fine, but to try to lure
massive numbers of others to the world of ham radio, you're gonna
hafta do better than swelled weiners over the internal combustion
engine.

I've had the damn thing on for humor's sake in the background
and for 3 days I've heard no one even mention how good a blonde
or brunette or redhead looks. Even the Pope must comment on
women more often.

I keep hearing how superior Ham radio is to CB - but hell, even
CB could be entertaining to listen to from time to time - this
is a frickin' root canal with this endless banality.

Grab a joke book and read it to each other from time to time.
Say SOMEthing funny now and then.

Bob Dole's in the Pepsi commercial watching Britney Spears and
thinking she could crack walnuts with that ass. I can't imagine
any of the doofus's I hear around here even turning to watch
her. And you'd have to be braindead not to at least look at that.

Maybe ham radio would be more fun if you were getting more poontang.
Right now, most folks are too damn repressed to enjoy being around.

I'll check back later.

>
> Oh, then you explain what it was.

The FCC itself said there's no relationship between being dumb
or smart and knowing Morse code. The only thing you can say about
people who know Morse code is that they know Morse code. The only
thing they can do better than the average person is CW. Therefore,
reducing the Morse code requirements was not "dumbing down". Hams
IQ's don't rise when they learn Morse code. Sorry.

The General written exam is just as hard (or easy) as it ever
has been. I suspect the same thing is true for the Extra exam.
The results of the restructuring was perfectly predictable and
not much has changed except for some upgrades. So much for the
"sky is falling" mentality.

Not if the standards are outdated. The FCC itself says that Morse code skill has absolutely nothing to do with being smart or dumb. In fact, it appears from evidence obtained on this newsgroup that some hams decrease their IQ and become neurotic or psychotic after learning Morse code. Thank goodness, some other genetically lucky hams seem to have a natural immunity to this debilitating mental illness.

> the Material was on the test. They have no Idea and could less.

I'm one of those new Extra hams. I scored 100% on the Extra exam.
Since the no-code tech entry level license requirements have not
changed, exactly what "new hams" are you talking about?

You must have a strange radio. Heck, I had an interesting conversation on 440 the other week with a professor who teaches theoretical physics at the University of Rochester. As far as conversations about women, it occurs - OFF the air. One would not have to stray to far from 'did you see that gorgeous redhead waiting on table at ...' to begin to push your luck with FCC regs. Besides, those of us who get 'it' on a daily basis have little need to talk about it. Why do you seem to need to talk about it?

73 from Rochester, NY

Fine.

My comments dealt with hams who don't wish to lighten up and discuss
matters beyond the mechanical or scientific or radios or what have you.
Topics which may be more inclusive to a broader group of people.

And you respond with 'theoretical physics.'

Jesus.

With all due respect to you and your professor friend, I could go a
lifetime without dealing with the genius from Rochester, but I'd hate
to go a week without my garbage man.

Put things in perspective.

Get off your high horse and lighten up.

> As far as conversations about women,
> it occurs - OFF the air. One would not have to stray to far from 'did
> you see that gorgeous redhead waiting on table at ...' to begin to push
> your luck with FCC regs.

The FCC makes it illegal to admire women?? I use Part 97. What are you
using??

I think it's quite possible to discuss the qualities which make women
attractive without reducing it to the level of your basic rap song.
It need not approach obscene or indecent.

And ham radio would be much more inviting to more people if there were
less people who'd rather discuss theoritical physics than women - for
example.

Again, you make my point of the attitude of the typical ham op.
LIGHTEN UP.

God Almighty.

Besides, those of us who get 'it' on a daily
> basis have little need to talk about it. Why do you seem to need to
> talk about it?

Okay Jim 'Big Dic*' Studly.

You've missed the point of everything else I've tried to express,
there's no point in going further.

Give my regards to your buddy in Rochester after you've pleased the wifey.

73 Jim.

:)

Nice trap Ed, but the formost antenna authority on the planet can't tell you why an antenna radiates, just that when certain conditions are met, it does.

Huh? The tech exam is a minimum entry level exam into the tech class.
The general exam is a minimum entry level exam into the general class.
The extra exam is a minimum entry level exam into the extra class.
Each exam represents *minimum entry level* requirements into that
particular class. How you can argue with that is unbelievable.

> > Nobody needs to be extremely knowledgeable or skillfull.

You do if you pass the minimum entry level requirements for a CDL license.
Those who barely squeek by get the same license as those who aced it.

> > I've often said minimum ham requirements need rules, regulations,

Of course, I disagree. But, if that is true, then it also existed when your state allowed slavery. So why don't you hold the slave owners in your state to the same standard that you hold southern slave owners to? Again, this conversation has been going on for a week, and you didn't even mention slavery in your state, much less condemn it, until I brought it up.

> I condemn ALL slavery.

I'll gladly condemn slavery also. But that is not what you asked me to do - you asked me to condemn those who owned slaves a hundred and fifty years ago. And that I'm not willing to do.

> Nope. PA outlawed it long before the
> civil war. Where I grew up, a few miles
> from here, there are houses that were
> stations on the Underground Railroad.
> PA, and Philadelphia in particular,
> were very active in abolition from the
> beginning.

That is not what I asked you about, Jim. I asked you about SLAVERY in your state, not about the abolition movement or underground railroad (there were abolitionists and participants of the underground railroad right here in the south). I want to hear about your state's slave owners, slave auctions, slave traders, and the treatment of those slaves. As I understand it, Philadelphia was a major port in the slave trade, so there should be plenty for you to discuss.

> > Surely, your school teachers talked
> > about slavery in Pennsylvania when
> > they were discussing the civil war
> > and condemning southern slavery.
>
> Yep. They condemned ALL slavery.

I went to schools in Massachusetts, Rhode Island, and Connecticut, and, while teachers in each of those states talked openly about

slavery in the south, never once did they mention the nearly 200 year
history of slavery within their own states.

> Very few. It was not part of the economy.
> No plantations.

Slaves in the United States were not just used on plantations, Jim.
Slaves in the north were often used as domestics, in sweat shops, and
in factories.

> I'm not. I condemn ALL slavery. The focus
> is on the slave states (not all of which
> tried to secede) because that's where it
> lasted the longest and was most prevalent.

That is another northern double standard, Jim. At some point in U.S.
history, _ALL_ states, including Pennsylvania, were slave states. So,
again, why just point at the southern states when talking about slave states?

I never cared about getting to 20wpm and I was satisfied with an Advanced
license. Everyone aspires to achieve a certain level. For Morse code,
mine was about 15wpm. The FCC never saw a thing wrong with that.

> Hasn't been that much of an accomplishment since 1985. Earlier Extra licensees mostly

After you renew your license, your license won't even reflect it. And
nobody cares anyway. When you introduce yourself, do you say, "I'm
Dick, I'm an Extra"?

Before you get too deep into a discussion about Steve's honesty, perhaps you should take a careful look at your own, Cecil. Didn't you just say in this thread that you have never purchased marijuana? The exact quote was...

"I have never purchased marijuana
in my life. All the marijuana I have
ever smoked was offered and/or
given to me by my friends."

After reading that, a person email me a quote from the thread "Michigan Bill 6012 & 750.508 Clarification," dated 10/24/2000, where you said the following...

"I only ever bought marijuana from
my friends. I don't know and don't
care where they got it."

Now those two statements certainly seem to contradict each other. So which is the truth - you have never purchased marijuana or you bought marijuana from your friends?

Purchasing illegal drugs is an inalienable right that the government has taken away from you? Nonsense.

> And, of course, you NEVER speed or spit
> on the sidewalk.

Yes, I speed and, no, I never spit on the sidewalk.

> You simply cannot argue that something
> should be illegal because it is illegal.

I have never done that, Cecil. Drugs are not illegal just because they're illegal. They're illegal because of the harmful affects of drugs on this society.

> In Louisiana, it is illegal for a husband
> and wife to have oral sex. Would you obey
> that law, Dwight?

Neither of us live in Louisiana, so who cares?

> One "hit" is one lungfull. With some of
> the genetically engineered marijuana, one
> hit is about like one glass of wine.
> However, with naturally occuring marijuana,
> one joint is about equal to one glass

Can you provide proof of this? I was under the impression that most marijuana on the market today was much stronger than that. And how many joints would you say the average marijuana user does in a day?

> > The boogieman does not carry guns
> > and kill people like we see with
> > so many drug dealers.

>
> The stupid drug laws are the cause
> of that.

No, vicious drug dealers are the cause of that. I've never seen a
law pick up a gun and kill someone.

> Take away the obscene profits and
> that problem would disappear. Exactly
> the same thing happened during
> prohibition over alcohol. After the
> end of prohibition, the problem went
> away.

Again, that is not true, Cecil. Crimes associated with illegal
alcohol trade actually increased after prohibition. Anyone in the
south can tell you about the moonshine runners of the 40's, 50's, and
early 60's, decades after prohibition ended. And the problem was not
just limited to the south. Illegal alcohol trade was problem in many
states long after prohibition ended.

Besides, I thought we were only talking about legalizing marijuana.
If marijuana is the only drug legalized, then how would that reduce
the violence associated with the drug trade? The drug dealers would
still be there if marijuana was legalized. Or are you now arguing for
the legalization of all drugs?

> How many people have been killed
> lately fighting over illegal alcohol
> turf?

Very few today, but that is the result of a massive law enforcement
effort over a period of several decades.

> It was sometime after WWII. My aunt's
> name was Ruby Fuhlberg. It happened
> in Pasadena, TX. I don't know the

If you're going to offer a story about how the "horrible" drugs laws
have harmed somebody, at least try to come up with something that has
happened within the last couple of decades (something that can be verified).

Then perhaps you should take a closer look at this newsgroup before posting, Connie. Certainly some of us are aware that women exist. As one example, notice the "she has more curves than an interstate highway" thread. However, because the reach of ham radio is so great, we do tend to be a little better behaved on the radio then we might be elsewhere.

Male bovine effluvium, Ed! In the Pre-Restructuring Era, we were promised by the ARRL leadership that reducing and/or eliminating code testing requirements would attract large numbers of young, computer-literate, technically-inclined people to the ARS. What did we get so far? Just a lot of upgrading as a result of St. Valentine's Day 1991 hams passing a 5 WPM code test somehow, and others taking advantage of grandfathering. No significant numbers of new hams whatsoever, and the upgraders are just more of the same middle-aged, middle-class white males that have always dominated the amateur radio demographic. If the total number of hams is increasing (ever so marginally) it is only because the general population is not increasing at it's previous rates of growth.

The truth is -- the average citizen is blissfully unaware of amateur radio, and what they know of it makes them think we're just another kind of CB'er, or that we can talk to people from the past with an old Heathkit transceiver. The ARRL has done little if anything in at least the past 20 years to publicize

or popularize our hobby/service -- except to lay that responsibility on it's members who are ill equipped to do so in anything like an effective manner.

What the ARS needs for growth is a national, mass-media advertising campaign. There are probably two dozen well-known celebrities who are currently licensed radio amateurs. Why don't we EVER see their names and faces on the TV screen -- appealing to young people to get interested in amateur radio? I know for an absolute fact that this is something which is doable, because one of the reasons why I'm a ham today is because I saw Dick Van Dyke, sitting behind a Collins transceiver, plugging ham radio on an ARRL public service announcement. Why can't we get Ronnie Milsap, or Joe Walsh, or Jon Bon Jovi, or any of a long list of current celebrity-hams to do the same thing now? Don't say the ARRL

can't afford it -- because from where I'm sitting -- they can't afford NOT to!

> Day 1991 hams passing a 5 WPM code test somehow, and others taking advantage
> of grandfathering. No significant numbers of new hams whatsoever,

So the doom and gloom is that Amateur Radio is only growing a little bit? When you consider that just now are we starting to see ANY *potential* decrease in our numbers because the first 10-year licences are starting to expire, any increase is encouraging, IMHO. Of course, one cannot stand on a soapbox and preach to one's fellows with a message of hope and enthusiasm, can one...

>''and the upgraders are just more of the same middle-aged, middle-class white
> males that have always dominated the amateur radio demographic.

Is this supposed to be some great relevation, Larry, that upgrades coming from the population of Amateurs consists of that population of Amateurs? Duh!

>If the total number of hams is increasing (ever so marginally) it is only
because
>the general population is not increasing at it's previous rates of growth.

http://www.photius.com/wfb1999/united_states/united_states_people.html

is a place to start. It shows the US population increasing at a 0.85% rate.

By my calculations, the population increased by 1.1% a year from 1990 to 2000.

>The ARRL has done little if anything in at least the past 20 years to
>publicize or popularize our hobby/service -- except to lay that responsibility
on it's
>members who are ill equipped to do so in anything like an effective manner.

http://www.arrl.org/pio/

IMHO, it is the local Amateur community that is *best* equipped to identify local media-public relations opportunities and secure the appropriate publicity. If ARRL were to have taken complete control of local hams and the publicity they generate, would you be here praising the League, or criticizing it for being too controlling? I think we all know what the answer would be, Larry.

>What the ARS needs for growth is a national, mass-media advertising
>campaign. There are probably two dozen well-known celebrities who are
>currently licensed radio amateurs. Why don't we EVER see their names
>and faces on the TV screen -- appealing to young people to get interested
>in amateur radio? I know for an absolute fact that this is something which
>is doable, because one of the reasons why I'm a ham today is because I
>saw Dick Van Dyke, sitting behind a Collins transceiver, plugging ham
>radio on an ARRL public service announcement. Why can't we get
>Ronnie Milsap, or Joe Walsh, or Jon Bon Jovi, or any of a long list of
>current celebrity-hams to do the same thing now? Don't say the ARRL
>can't afford it -- because from where I'm sitting -- they can't afford NOT
>to!

What you saw was a local public-service announcement, not a media blitz. At the current rates for prime-time ads, ARRL would run about a dozen national ads and shoot the wad on the budget. I disagree with you that doing so would be effective.

Why do you feel it is bullstuff, Dick? Do you think that what he said is
incorrect? I agree with the statement that those that are interested in
amateur radio are potential hams. Why do you think that to be wrong?

You felt strongly enough about it to swear in public -- surely you can explain
it using words with more than 4 letters.

>why an antenna radiates, just that when certain conditions are met, it does.

It wasn't a trap at all, and I will include you in the same challenge I gave to Bruce. You have both made the claim that the modern tests are woefully inadequate, so I would like to see if you can back that up and use the knowledge you have gained by the superior tests you both took to enter ham radio and answer what I believe to be a fundamental question about the technology we use. Surely you can give a better answer than "no one knows."

If you would like a refresher, see:

http://www.arrl.org/tis/info/antheory.html

The article, "Why an Antenna Radiates" may help explain what you apparently do not understand. See:

http://www.arrl.org/tis/info/antheory.html#why

But, for fairness, I would like to see your explanation before you have read the above article, based only on the knowledge you have from having taken a "not-dumbed-down" test so many years ago. Or does your answer than "no one knows" still stand?

>
> Dwight Stewart (W5NET)

I did read thru that thread. It discussed female singers - and it
didn't really get nasty and tawdry to any degree. It was rather
interesting. But that discussion is here, not on the radio.

So why would such a discussion be off limits on the air? Why would
that not be 'behaving better?' It was about singing, not sex lives.
Yes, obviously there are ways of discussing women without delving
into the most intimate bedroom techniques.

It certainly would be a very welcome break from the quite limited
sphere of topics currently bandied about.

And, fwiw, I'd tend to opine that the internet has an even greater
reach than ham radio.

Nope. Try again. Perhaps a refresher course in reading comprehension would help you better understand. The hint here, Dick, is that I chose to use the words "what you have indentified as a dead horse" to indicate that this was your belief, not mine.

Perhaps Cecil could loan you his dictionary so you could understand the word "you..."

Or, wait, it couldn't be that you were deliberately twisting words, could it? Did you REALLY think I was agreeing with your belief that Amateur Radio is dying?

And an answer to your question. Please read it BEFORE you respond with;
"My mind's already made up, don't confuse me with the facts"

Religion 101...

One day a 6 year old girl was sitting in a classroom. The teacher was
going to explain evolution to the children.

The teacher asked a little boy: "Tommy do you see the tree outside?"

TOMMY: Yes.

TEACHER: Tommy, do you see the grass outside?

TOMMY: Yes.

TEACHER: Go outside and look up and see if you can see the sky.

TOMMY: Okay. (He returned a few minutes later) Yes, I saw the sky.

TEACHER: Did you see God?

TOMMY: No.

TEACHER: That's my point. We can't see God because he isn't there.
He doesn't exist.

A little girl spoke up and wanted to ask the boy some questions. The
teacher agreed and the little girl asked the boy: "Tommy, do you see
the tree outside?"

TOMMY: Yes.

LITTLE GIRL: Tommy do you see the grass outside?

TOMMY: Yesssssss (getting tired of the questions by this time).

LITTLE GIRL: Did you see the sky?

TOMMY: Yesssssss

LITTLE GIRL: Tommy, do you see the teacher?

TOMMY: Yes

LITTLE GIRL: Do you see her brain?

TOMMY: No

LITTLE GIRL: Then according to what we were taught today in school,
she must not have one!

Purchasing marijuana was legal at the turn of the century. Citizens
had a right to purchase marijuana. That right to purchase marijuana
was taken away from the citizens in the 1930s for the purpose of
trying to control the illegal Mexican alien problem.

> I never spit on the sidewalk.

You choose to choke to death instead?

> Drugs are not illegal just because
> they're illegal. They're illegal because of the harmful affects of
> drugs on this society.

US citizens were free to use marijuana for the first 150 years. The
main reason that marijuana was declared illegal was to control the
Mexican alien problems in the Southwest.

> > In Louisiana, it is illegal for a husband
> > and wife to have oral sex. Would you obey
> > that law, Dwight?
>
> Neither of us live in Louisiana, so who cares?

I frequent the Louisiana casinos and vacation often in New
Orleans so I care.

> Can you provide proof of this? I was under the impression that most
> marijuana on the market today was much stronger than that.

The marijuana on the market today has been genetically engineered.
The wild hemp that still grows in the Midwest contains very little THC.

> And how
> many joints would you say the average marijuana user does in a day?

My California friends average about one lungfull a week.

> Again, that is not true, Cecil. Crimes associated with illegal
> alcohol trade actually increased after prohibition. Anyone in the
> south can tell you about the moonshine runners of the 40's, 50's, and
> early 60's, decades after prohibition ended.

Well DUUUUHHHHHHHHH Dwight. That's because prohibition had not ended
in much of the South. Federal prohibition ended. State prohibition
was alive and well and was still the *CAUSE* of the illegal activity.
County prohibition exists in my home county at the present and causes
all the illegal county activity associated with alcohol.

> Besides, I thought we were only talking about legalizing marijuana.
> If marijuana is the only drug legalized, then how would that reduce
> the violence associated with the drug trade?

It would reduce the violence associated with the illegal marijuana
trade. It would not solve the problem of shooting down missionaries
and children. One step at a time, Dwight. The drug problems can be
diminished but they will never be eliminated. We will always have
nurses who steal drugs from the hospital and sell them on the black
market.

> > How many people have been killed lately fighting over illegal alcohol
> > turf?
>
> Very few today, but that is the result of a massive law enforcement
> effort over a period of several decades.

Give me a break, Dwight. It's because alcohol is easily obtainable
and legal in most places. There's no reason to fight over it.

> If you're going to offer a story about how the "horrible" drugs laws
> have harmed somebody, at least try to come up with something that has
> happened within the last couple of decades (something that can be verified).

OK, how about the LA County Sheriff officers who murdered a guy in
order to obtain his possessions under the RICO laws?

No No Cam, I've already said the reason for this effect is too much exposure to 75 meter RF.

I think that has been going on a looooonnnngg time in Amateur Radio. I for one did that, way back in 1960 when I decided I wanted to be a 'HAM'.

I memorized the AMECO and a good part of the ARRL license manual. I passed the General on the first try, but I didn't know a dang thing.

What I did is learned by doing, thats called OJT is the military (on the job training). After a while I actually did learn what it was all about.

I think the MAJOR reason for the dumbing down is the fact that when a NEWCOMER asks a question on the air....some smart arse shoots him out of the saddle.

Perhaps if we ALL stop this stupid bitching about what amounts to NOTHING, we could all improve things.

> when your state allowed slavery.

Not necessarily.

In 1777, Vermont (then a territory) outlawed slavery.

In 1780, Pennsylvania passed a law gradually outlawing slavery. It was
the FIRST state to do so.

> So why don't you hold the slave
> owners in your state to the same standard that you hold southern slave
> owners to?

I do. There were very few of them, though, and slavery disappeared in
PA long before it disappeared in the south.

> Again, this conversation has been going on for a week, and
> you didn't even mention slavery in your state, much less condemn it,
> until I brought it up.

The discussion was about the Civil War and the standards of the
civilized world in 1860. In 1860, there were NO slaves in PA. In fact,
by 1850 there were NO slaves in PA.
>
> > I condemn ALL slavery.
>
> I'll gladly condemn slavery also. But that is not what you asked me
> to do - you asked me to condemn those who owned slaves a hundred and

> railroad right here in the south).

Yes - and they were persecuted, jailed, and attacked and even killed.

> I want to hear about your state's
> slave owners, slave auctions, slave traders, and the treatment of
> those slaves.

Try this link:

http:/www.innercity.org/holt/contents.html

for a chronology.

> As I understand it, Philadelphia was a major port in the
> slave trade, so there should be plenty for you to discuss.

Philadelphia was never a major port in the slave trade. Try Savannah,
Charlotte, Baltimore, Norfolk.
>
> > > Surely, your school teachers talked

It was mentioned where I went to school. And condemned.

> > Very few. It was not part of the economy.
> > No plantations.

> > lasted the longest and was most prevalent.
>
> That is another northern double standard, Jim.

Nope. See below.

> At some point in U.S.
> history, _ALL_ states, including Pennsylvania, were slave states.

Not Vermont. Not many others.

>So,
> again, why just point at the southern states when talking about slave states?
>
Because only in those states was slavery defended and encouraged to
increase.

Check out this link:

http://fisher.lib.virginia.edu/cgi-local/censusbin/census/cen.pl

It lists US census data from 1790 onwards.

In 1790, just three years after the Constitution was written, three states (ME, MA, VT) had zero slaves. All of the other states north of the Mason Dixon line had a combined total of 40,086 slaves (PA had 3,707 of those). Total population of those states was 1,967,197. That works out to a slave population of just over 2%. (total is for ME, MA, VT, NH, PA, CT, RI, NJ, NY, listed in order of % slave population).

Now look at the states south of the Mason Dixon line - DE, KY, NC, MD, GA, VA, SC, again listed in order of % slave population. 654,225 slaves out of a toal population of 1,926,677. That's a slave population of just under 34%!

As time went on, slavery in the North disappeared rapidly. By 1820 the states north of the M-D line had less than 1% slave population, and 5 states had zero slaves. Yet in 1820 the slave population of South Carolina was 51%. By 1850 there were no recorded slaves in any state north of the line except New Jersey, but Mississippi had 51.1% slaves and South Carolina 57.6%.

Finally, look at 1860, the era under discussion. CT, ME, MA, NH, RI, VT, NY, PA, IL, IN, MI, OH, WS, IA, MN, NV, CA, and OR had ZERO recorded slaves. NJ had 18, NE had 15 and KS had 2. Total population of those states and territories was 15,067,169. DE, MO, MD, KY, TN, AR, TX, VA, NC, GA, FL, AL, LA, MS and SC had 3,950,511 slaves out of a total population of 16,116,413. Works out to 24.5% slaves. DE, MO, MD & KY had under 20% slave population while the rest of the slave states varied from TN with 24.8% to SC with 57.2%. Look at a map of where slavery was concentrated and you have the confederacy, plain as day.

The census website lets you set up tables by all sorts of population figures and ratios. I looked at # slaves, total population, and % slaves for each census from 1790 to 1860. The trend was pretty obvious.

Point is, slavery in the north died out while slavery in the south grew. And the treatment of slaves grew more barbaric, with laws specifically permitting the torture and mutilation of slaves who dared to do things like revolt or run away - or learn to read and write. Although importation of slaves was totally outlawed as of 1808, many slaves (estimate is about a million) were illegally smuggled into the country after that date. They didn't come in through Philly.

By 1850 there was virtually no slavery in the north to condemn. The exact opposite is true of the south.

If we are talking about the standards and trends of 1860, it's pretty clear what was going on. Most of the country was moving towards greater rights and freedoms for ALL people who lived there, while one part was not.

Read the chronology and see.

You really do not what your are talking about. Go to any ham club meeting, go to a swap meet, go to a convention. Count how many hams have Grey or White hair. I my club I am one to the yougest members and I am 51. We have around 120 members in the club, I would say only about a dozen are under 50. We have 3 that are under 21. Due the math. Unless we get off our buts ham radio will go away or we will lose a lot of our bandwith.

Like it or not CW will more than likely be gone as a requirement in a few years. More and more countries out side the U.S. are planning to do away with CW. By the way, the world does not revolve around the United States when in come to radio. Of the ARRL wants to retain the 5wpm code. I guess the ARRL want the United States left behind in progesive thinking. THere is not one person in this group that can give a reason that CW makes some one a better ham. The is because it does not.

Michigan.

Neither the USGS nor the Census Bureau list a Hell other than the one in Michigan, but the USGS has Helltown and Hellhole Palms in California, Hell Gate in Florida, Hell Town in Missouri, Hell Hollow in New Hampshire, Hells Corners in Ohio, and Hells Half Acre in South Carolina. No Hell in Hawaii, naturally.

So, who wants to sponsor the Worked All Hell award?

You ought to pay more attention to the news, Cecil. And perhaps read a
public notice or two on forfeiture sales. Very enlightening.

>Why don't you direct your anger toward some real criminals,
>you know, the kind that rape and murder?

Getting a bit testy at being proven and reproven to be in error, Cecil?

>of proof is upon you. Good luck.

Cecil, you always manage to find a cowardly excuse from doing ANYTHING that proves or disproves a point. YOU made these assertions that there are laws that prohibit testing of "Class 1" drugs, yet all you can do is tell me that some TV show said so and now it's on ME to prove the show is right or wrong.

You have NO proof. Simply admit that your assertions about drug testing are unfounded.

The "onus", Sir, is upon YOU. It was YOUR assertion of fact, NOT mine.

Good luck to YOU!

Steve

Wow. I've never thought of things quite so simply. I guess we should also abolish: drivers licenses, civil service exams, college.. hell, ALL school and the national anthem. I mean, all of these things can easily be accomplished by someone who is committing them to memory. Does that mean that as a society we should just eliminate them, because some people aren't going to take them seriously? Of course not. Some people will be interested in the ham radio theory, some people won't. That's life, you have to deal with it. Some people in this hobby are content being operators; getting on the air, working the local repeater, maybe some DX on HF. Others are hard-core hams, people who homebrew and experiment. The hobby needs all of these people. What we don't need is bitter old men. Too bad they don't have a test for that.

Of course not, those have some Value, the point is simple at this point there is no need for written test for Ham Radio. Just as there is no need for a CW Test as some say. If we want to be progresive then lets be Progresive, lets face it, there is no need for a written test, most people will buy there Radio, Ants,Mics and what ever else they need, and when it breaks back it goes.
And the biggest problem is were hurting the person who has a Memory Problem, the type that just cant memorize, or whos Memory isnt what it use to be, this is very unfair to the Memory Challenged, it worked for CW it should also apply here.
The only Fair thing left to do is Dump the written.

Less so with Mariah than with most. It's a common practice now that it
is so easily done.

Whether the South won or lost is irrelevant to the fact that it was a
mistake.

Sure they were. Article IV, Section 2, United States Constitution.

Runaways had to get to Canada to be safe from capture and return.

Rich

It can be kooky.

On the other hand, perhaps it shows there's so little on the bands
that's the least bit compelling to listen to, that 14.313 stands out
because something happens there which elicits a response beyond boredom.

Steve Robeson K4YZ wrote:
> Cecil, at this point the correct answer was "I was mistaken in asserting
> that I never bought marijuana. I apologize for asserting otherwise."

I didn't purchase (pay cash) for marijuana. Marijuana was bought (bartered)
to/from my friends. I started to use the word "bartered" but the to/from
thing got me confused about how to say it in English so I changed it to
"bought". I brought the pizza and beer and my friends brought the pot.
They left with some pizza and beer and I left with some pot.

I didn't use the same word in both places for good reason. Each of those
words have slightly different meanings, at least to a Texan. There was no
contradiction. Here's the definitions I was using when I made the
statements.

"purchase - to acquire by the payment of money"
"buy - to acquire by exchange"

I bought (exchanged) marijuana to/from my friends but I did not
purchase (pay cash for) it.

I have pointed you to the place where you can buy my quoted reference
material for $40 or you can wait for a rerun on the History Channel.
It's your choice whether to view the evidence that I presented or not.
If you don't view the evidence then you will have chosen to remain ignorant
of the evidence, a choice you seem to make quite often. Have you studied
any conditional logic yet?

Whether there were exceptions to the Emancipation Proclamation is not
a matter of opinion, Jim. There *WERE* exceptions enumerated in the
proclamation. If you say there weren't, you are uttering a falsehood.
History doesn't change to suit your moods unless, of course, God died
and left you in charge.

Don't know much about the Fugitive Slaves Laws, do you, Steve?
Why am I not surprised? You didn't even know what the Tenth
Amendment said.

"In the Compromise of 1850, a new law was included, which made it the
duty of Federal officers to capture and to return to their owners, all
fugitive slaves. ... The law ... was repealed in 1864.

So Steve, did the Federal officers obey the law and return runaway Virginia
slaves back to Virginia from Pennsylvania from 1850 to 1864?

Your probably right. Hams are very boring people. At least on the air. Whenever there is anything out of the ordinary discussed, like the 'liberty net', Herby and the boys on 14.313. Rich ex wb2otk. It did indeed get interesting.

Unfortunatly those that didn't like it commenced to jam. End of fun.

Or, what if the moon was made of cheese? My question was more along the line of what if there hadn't been a Civil war to win or lose and the South had been allowed to seceed?

And so I guess AMD would then be in the number one position? I'm trying
to understand how this was a significant outcome of the Civil war.

Okay, then there were exceptions. Please tell me which states were allowed to have slavery. I've asked this a number of times already without an answer. I've been claiming that the proclamation allowed no states to have slavery. Please show me where I'm wrong. I'm apparently too stupid to figure it out for my self.

He's not so much off key, as he is very shaky. It's his own style of
vibrato that makes him so much fun to listen to. It's sort of like
'dithering' the pitch. One hopes the 'median' frequency is close to the
right pitch. :-)

They were no longer slaves once they escaped. They were free.

The posted numbers are from the US Census.

So that somehow makes Pennsylvania superior to the states that did
it later?

> The discussion was about the Civil
> War and the standards of the
> civilized world in 1860. In 1860,
> there were NO slaves in PA. In fact,
> by 1850 there were NO slaves in PA.

The discussion I've read has been about slavery in general,
including the emancipation proclamation, fugitive slave laws, and so
forth. If we're going to talk about slavery, I simply don't see any
reason why that discussion should be limited just to the southern states.

> Try this link:
>
> for a chronology.

Nice chronology, but it didn't really answer what I asked.

> Because only in those states was
> slavery defended and encouraged to
> increase.

You're splitting hairs, Jim. Nobody in Pennsylvania ever defended or
encouraged slavery?

> It lists US census data from 1790 onwards.
>
> (long-winded statistics snipped)
>
> The census website lets you set up tables
> by all sorts of population figures and
> ratios. I looked at # slaves, total
> population, and % slaves for each census
> from 1790 to 1860. The trend was pretty
> obvious.

Nice statistics, Jim. But that again does not really answer what I
asked. Statistics does not tell me about the Pennsylvania slave
owners, slave auctions, slave traders, or the treatment of slaves in

that state.

> Point is, slavery in the north died
> out while slavery in the south grew.
> And the treatment of slaves grew more
> barbaric, with laws specifically
> permitting the torture and mutilation
> of slaves who dared to do things like
> revolt or run away - or learn to read
> and write.

Again, you bring up how slaves were treated in the south, but you have yet to say a word about how slaves were treated in Pennsylvania.

> By 1850 there was virtually no slavery
> in the north to condemn. The exact
> opposite is true of the south.

Jim, all I see is denial in the choice of that date. It's a nice date for you because slavery still existed in the south, but didn't exist in your state. In other words, using that date very conveniently allows you to rant about slavery without drawing attention to the slavery that existed in your own state.

> If we are talking about the standards
> and trends of 1860, it's pretty clear
> what was going on. Most of the country
> was moving towards greater rights and
> freedoms for ALL people who lived
> there, while one part was not.

And, again, change that date to something else and the entire picture might change. For example, if we use 1960 instead, we can say that slavery didn't exist at all in the United States. Or, if we use 1460 instead, we can say that slavery in the United States didn't exist because the United States didn't exist. But if we're going to talk about slavery in the United States, then it is absurd to name some magical date and then condemn everyone who owned slaves after that date, while ignoring all who owned slaves before that date.

So, you're saying the entire south is guilty and has to justify what "it" did. That is exactly the attitude that so many in the south have tried to correct over the last 150 years. It is a very hateful attitude, especially coming from people in states that were also involved in slavery. More importantly, it is a very harmful attitude - it can justify any action against those evil southerners.

Jim, you were the one who linked the two (losing and mistake). You said...

"OF COURSE IT WAS A MISTAKE!!!
The South is only just now
climbing out of the crater
that was left."

That certainly seems to suggest that you don't think it would have been a mistake if the south had won and didn't have to climb out of the crater. I then responded that the south's loss does not make their involvement in the war a mistake (which you then repeat in your reply above).

> Do you feel it would have been better
> if the South had sucessfully seceeded
> from the United States?

Well, they would not have suffered the economic consequences that came about as a result of losing that war. But, beyond that, who knows? I'm not into fantasy, so I've never really thought about it.

> the type that just cant memorize, or whos Memory isnt what it use to be, this
> is very unfair to the Memory Challenged, it worked for CW it should also apply
> here. The only Fair thing left to do is Dump the written.

And my (somewhat rhetorical) question to WA8ULX is: Exactly what is the purpose of requiring someone to pass any kind of test to get a license for the Amateur Radio Service? I have my own answer to this question, but I would like to know how you would answer.

As a follow-up, I also ask: Why is it necessary to grant both a station license and an operator's license to a licensee in the Amateur Radio Service? Broadcasters and a number of other radio services seem to be able to get by with only a station license - no licensed operators required. Why can't the Amateur Radio Service do likewise?

By exempting the Parishes of St. Bernard, Plaquemines, Jefferson, St.
John, St. Charles, St. James Ascension, Assumption, Terrebonne, Lafourche,
St. Mary, St. Martin, and Orleans, from the proclamation, it allowed slavery
to continue in Louisiana. By exempting the counties of Berkley, Accomac,
Northampton, Elizabeth City, York, Princess Ann, and Norfolk from the
proclamation, it allowed slavery to continue in Virginia. By exempting the
counties of West Virginia from the proclamation, it allowed slavery to
continue in West Virginia.

Beg to differ. The Compromise of 1850 made it the duty of Federal officers
to capture and return all fugitive slaves to their owners. This was an
extension of the Fugitive Slave Laws that the free states chose to ignore.
That section of the Compromise of 1850 was not repealed until 1864. That's
why I chose the date of 1850 in my question above.

Drinkwater actually. Just like the twins from Laverne & Shirley. The
wife still married me though (not a concern for most young men growing up)
I've heard them all but I'll share. The best to date was when I called a
company on the phone and, while finishing business, she asked for my name.
I told her calmly and she said, "HA HA Ha ha ha, ahem. I'm sorry sir. I
could've sworn you said Drinkwater".... :O

No, that doesn't work, Cecil. The top message said that you've never "purchased" marijuana. The second message said you "bought" marijuana.

Funk & Wagnalls Standard Desk Dictionary:
Purchase: to acquire by paying money or
its equivalent; buy
Bought: past tense or participle of buy

In other words, the two words have the exact same root meaning (to "buy"). So, regardless of whether you did it by exchanging money or something else (your "barter" nonsense above), those two statements still contradict each other - one says you did not do what the other says you did.

So, again, which is the truth and which is not?

You're digging yourself in deeper with every word, Cecil. One
message said that you've never "purchased" marijuana. The second
message said you "bought" marijuana.

Funk & Wagnalls Standard Desk Dictionary:
Purchase: to acquire by paying money or
its equivalent; buy
Bought: past tense or participle of buy

In other words, the two words have the exact same root meaning (to
"buy"). So, regardless of whether you did it by exchanging money or

You are comparing apples to oranges. Being proficient in CW does not make someone a
better radio operator. At least if a person picks up a book to study for a test they will
learn something. Al you learn from CW is understanding Dits and Dahs, that will really
make a person a better operator.

> Well why didnt they upgrade before??.
>

Well maybe they got into ham radio just a year or so before restructuring. I first go licensed in April of 1999. I started to study for my General the following winter and passed my written the winter of 1999. Durring this period I was working on CW. I passed my 5WPM on April 7th. on 2000. I was trying to pass the 13WPM test but did not have enough study time. I do work full time. Just because some one gets into ham radio, and the powers that be change th CW reqiurement does not make them lazy. OF course you live a your special world with all the other small minded selfish peopole that do not want to world to change.I hope you are not a VE. I would not be surprised if you where, then you tell the new hams that come accross your table they are lazy because they did not get into ham radio years ago. Of course that is why 3 VE's grade the test (To keep people like you fair)

Lets face it. restructuring is here to stay, it is not going to go away. For all those hams
that cry about the “Dumbing down” (Their words) of ham radio. Get over it, the world of
Amateur Radio is changing. After WARC 2003 it is more likely than not that CW will be
gone as a requirement for HF privileges. Evan the ARRL is not going to oppose CW as a
requirement at WARC 2003. Of course the ARRL want’s the FCC to maintain the 5 wpm
requirement for US hams. I have seen posted in the New Group an opinion that new
people are getting into ham radio, but in small numbers. This may be true, but from what
I have seen, these new hams are all over 40, and in most cases over 50. With new blood
we should be looking at recruiting younger people, by younger I mean under 12 years of
age. The club I am member of has over 120 members, Only about a dozen are under 50,
of these only 3 are under 21. Of course our club recently started seeking out younger
people a short time ago, some thing more club should do. As the OLD Guard dies off in
the 10 0r 20 years we will see a very large drop in the number of hams. To bring people
into ham radio we are competing with the internet and cell phones. Most people do not
realize that cell phones will not work in a large disaster, we have seen this happen in the
past. Instead of complaining about restructuring, get off your buts and get into the
community and recruit new people into ham radio. The ARRL can only do so much.
Every club in the United States should participate in events like KIDS DAY, of course it
would be nice if the ARRL would make it easy to find the KIDS DAY info the ARRL
web site, I new it was there but it took almost and hour to find it (The ARRL needs a new
webmaster). Our club participated in KIDS DAY last June and got a great response.
Another place to recruit is the Boy Scouts, contact your local Boy Scout Council
regarding their Venturing program. This is a program for all youth 14 through 20 years of

age, male or female. My club is in the process of setting just a program, it is not easy,
but not everything in life is. For all those hams that can not live with restructuring for
their selfish reasons, take up stamp or coin collecting, Amateur radio does not need you
as representatives of this hobby.

How does the fact that marijuana was not illegal at the turn of the century make it a "inalienable right?" Do you even know what those words mean? "Inalienable" means something "that may not be taken away or transferred." A "right" is a "power, privilege, etc., belonging to one by law or nature." Marijuana is not an inalienable right.

Furthermore, don't blame the "government" or "Mexicans" for the laws against drugs. We, the people (people like myself), pushed for those laws against drugs because those drugs are a threat to our neighborhoods and to our families. And those of us who care about those things will continue to support those laws until drugs are no longer a threat. And if it comes down to a choice between my neighborhood, or my family, and your marijuana, the choice is really, really, easy, Cecil.

> > And how many joints would you say the
> > average marijuana user does in a day?
>
> My California friends average about one
> lungfull a week.

LOL. That is absurd, Cecil. I have never seen or met a single marijuana user who only takes one "hit" on a joint per week. Instead, most do three to four joints each day (dozens of "hits" per day). My brother and his wife each consumed at least that much each day. So did most of their friends who used drugs. The same with my friends years ago in school. The same with the people in the military years ago who used drugs. The same with the occasional people we've met over the

years who have used drugs.

> prohibition ended. State prohibition
> was alive and well and was still the
> *CAUSE* of the illegal activity.

Not true, Cecil. Wayne County (NC) was not dry county in the 1960's when my grandfather had two stills just outside of Goldsboro and sold moonshine to local bars to refill commercial alcohol containers. In fact, based on what I remember of that time, I'd say half the strong alcohol in that country was actually moonshine in refilled whiskey bottles. And many locals knew the difference between the "cheap stuff" (moonshine) and the "good stuff" hidden behind the bar. Many locals bought the "cheap stuff" exactly because it was cheaper than the "good stuff."

In other words, the fact that legal alcohol was widely available, and relatively cheap, did not stop the illegal alcohol trade - moonshiners simply sold stronger alcohol at cheaper prices (which is exactly what I suspect will happen with illegal drugs if they are legalized - even stronger drugs at cheaper prices on the streets).

> It would reduce the violence associated
> with the illegal marijuana trade.

I thought there was no violence associated with marijuana. Hasn't your premise all along been that marijuana users were otherwise law abiding citizens?

But there is only one FCC, Cecil. Drugs users, on the other hand, have to be concerned about local law enforcement, state law enforcement, the DEA, Customs, the half dozen other federal agencies involved in drug enforcement in some way, and any person with a grudge who decides to make a call or drop a note to the police. There is a reason why so many people are in jail for drug related charges.

> ham radio.

Actually, the discussion about female singers would probably not be "off limits" on the air. Rather, most are cautious not to offend on the air and discussing the negative aspects of a popular singer is certain to offend someone. So, without knowing what the person you're talking to might think about the subject, or what others listening might think about it for that matter, most would simply avoid the topic. What you're seeing is politeness carried to an extreme.

In these newsgroups, similar topics would be fairly tame (based on tradition in these newsgroups, almost anything is not too much). Likewise, on certain ham frequencies, because of long standing tradition, there are those who discuss things that would probably be considered too much on another frequency.

And, finally, there is another reason that is a little harder to explain. Most ham operators don't tend to talk too often on the radio and, when they do, they don't tend to have extended conversations. Because of that, they are a little shy when they do talk. And shy people tend to talk about familiar things (radios, etc) and will tend to avoid overly revealing things.

So, in the end, the solution to your problem is getting others to simply talk. As those people become more relaxed when talking to you, those other subjects are almost certain to eventually come out.

What does it mean when a person does think about getting into ham radio untill the restructuring has taken place. Does this make them a lesser ham because they did not even gaive ham radio a thought untill afterwards, Before you put words into my mouth. I am talking about people that never thought they would be interested in ham radio. Lets not forget the young people over the nexr few years, that where born after restructuring, what about them.

You know all too well, but just choose to ignore that I have said many times here that the material is not the main problem, rather the exact questions and their exact answers provided in advance, so that no applicangt is ever required to learn anything whatever, just memorize whatever associations needed to match them up at test time with no understanding of any part of it required. You and Cecil with Wild Bill Sohl have always insisted that "It's just like it was 30,40,50 years ago" but of course that is grossly incorrect- and you know it.

> so I would like to see if you can back that up and use the

> knows" still stand?

Ed, with just a little more effort you and Cecil both could easily qualify as a disgrace to the traditions of ham radio. I know that does't bother you much at all, so long as everything stays on track to keep going in the present direction toward testless licencing and "Give 'em everything they want when they want it. Just be

nice to 'em".
I'm talking about the traditions which have long caused hams to be selfsufficient, capable communicators with adequate technical ability to put a station on the air with minimal equipment and support by use of his own learned skills. You don't get that by memorizing question and answer pairings. And if you don't know it you ARE a disgrace.

Don't worry yourself about my "no one knows" comment on antennas. It came from reading an antenna authority I respect far more than either you or Cecil. I'm not where I can look it up now, and I won't ID the author until I can give an exact quote.

Never mind my sails, this entire sordid "restructuring" affair has taken most
of the wind out of ham radio's sails. Now we can just wait for the spectrum
reduction above 2 meters, or is that 6 meters, and the FCC justification will be a
REAL nobrainer-
'You hams failed to maintain yourselves as a fundamentally technical selfpolicing
service as has always beeen your tradition". There WILL BE NO defense.

That's an easy one- They know that ham radio has devolved into something they don't want to be publicly associated with. I can tell you something more- there have been a number of times in late years when I kept silent rather than be associated with it, too. Haven't you?

So? The dangers of the drug were not realized until later.

In that same era, Coca Cola contained cocaine. There were all sorts of patent medicines on the market that were highly addictive and harmful. Ever hear of laudanum?

Sorry, Cecil, that has as much credibility as Clinton saying he "never had sex with that woman" because of the way he defined "having sex".

That dog won't hunt, even in Texas.

Isn't freedom better than slavery?

Somebody had to be first. 1780 is 83 years before the Emancipation
Proclamation. More than an entire average lifetime.

By ending slavery, PA, VT and the other states changed the standard for human
rights in the USA.
>
>> The discussion was about the Civil

The main focus, though, has been on the Civil War era. What I'm saying is that
by 1850-1860, slavery was gone in almost all of the Western world, except some
parts of the USA.

> If we're going to talk about slavery, I simply don't see any
>reason why that discussion should be limited just to the southern states.

I agree! My discussion was not limited to the southern states. Neither is the
chronology I pointed to, nor the census records.
>

>> freedoms for ALL people who lived
>> there, while one part was not.
>
> And, again, change that date to something else and the entire
>picture might change.

Sure - but the Civil War started in 1861. That's the point of using 1860.

> For example, if we use 1960 instead, we can say
>that slavery didn't exist at all in the United States.

True - but repression of black people sure did. Shall we talk about voting rights, segregation and Jim Crow laws?

>Or, if we use
>1460 instead, we can say that slavery in the United States didn't
>exist because the United States didn't exist.

The Dutch brought the first black slaves to Virginia in 1619.

>But if we're going to
>talk about slavery in the United States, then it is absurd to name
>some magical date and then condemn everyone who owned slaves after
>that date, while ignoring all who owned slaves before that date.
>
Nobody is ignoring any of that.

What you're doing is trying to deflect attention from the millions held in slavery in the slave states of the 19th century by pointing to the 18th century elsewhere. It's similar to saying that because anti-semitism existed in the US and Britain in 1860, Americans and Brits should not condemn the Holocaust.

Sorry, I don't buy it.

It's clear that there were more causes to the Civil War than just slavery. At first, Lincoln was primarily interested in preserving the Union, even if it meant keeping slavery to do so. He knew that if some states seceded over "states rights" and the slavery issue, then soon others would, and the result would be a balkanized America. And the European powers would move in and take over quickly, using economics or military power or both. It had happened in much of the world by 1860.

But as the war progressed, Lincoln became convinced that slavery was at the root of the problem. The issue divided the country, and unless it was eliminated the division would never go away. And the moral bankruptcy of

claiming to be a "free" country, founded on the claim that "all men are created equal" while permitting some people to own others was simply no longer tolerable.

Lincoln didn't start out as an abolitionist but he sure ended as one.

It's understandable that 150 years later, nobody wants to say that lots of Americans fought and died for the right to own other Americans.

Don't you know; some people appear to believe that before restructuring, people became hams because they were interested in ham radio, but now that the FCC has changed the requirements for about the umpteenth time since ham radio was created, they believe that the only people that become hams are those who wanted to do so before but were waiting for the requirements to be changed.

They then feel that the best thing they can do is to berate new hams at every opportunity. What is really the pity is that somehow, they feel they are doing good for ham radio.

I can't figure them out.

That last point is yet to be seen. Any changes to the current FCC rules wrt code testing are years away. I expect that the ARRL will do then what it did a couple of years ago and conduct surveys and ask for member input. When the time comes, even though he knows my views well, I will reiterate my views on Morse code testing to Tom Frenaye, the New England Division Director. (Unless I leave ARRL HQ in the interim, in which case I might make a run for the Directorship myself.)

> from what I have seen, these new hams are all over 40, and in most cases
> over 50. With new blood we should be looking at recruiting younger people,

IMHO, the biggest factor in the reduction of youth entering ham radio is that the entry level has been made much more difficult than it was when I entered ham radio at 13 years of age. When I studied for my Novice license, I studied the 4-page(!) Novice chapter in the ARRL License Manual and passed my Novice easily. Today, we hand newcomers a 200+ page Now You're Talking study guide and tell them that THIS is what they need to know to be a BEGINNER in ham radio.
If I had been given a 200-page book to study when I was 13, instead of the 4-page Novice chapter, I am certain I would not have become licensed as a kid. And if, as I was studying it, some curmudgeon told me that all that was dumbed down from the 4 pages HE had to study...

> You and Cecil with Wild
>Bill Sohl have always insisted that "It's just like it was 30,40,50 years
>ago" but
>of course that is grossly incorrect- and you know it.

Why do you think "I know it?" I don't believe that at all, so "I know it" has no meaning. I guess you are trying to bolster a weak position.

I can't speak for 30 years ago, but in 1963, I studied a 4-page chapter to pass my entry level exam. Today, they study a 200+ page study guide. In 1964, I studied a 16-page chapter to get all Amateur privileges with my General. To do the same today, the applicant has to study two more books.

In 1963 and 1964, I did what I believe most hams do today -- passed my exams with a combination of learning, memorizing, lucky guessing and just plain hoping some subjects didn't appear on my exam. How many times will I have to repeat that here before YOU stop "ignoring" it?

Perhaps the premise that most people find it easier to rote memorize over 1000 questions without understanding than learn a few simple concepts and applying grammar school math deserves to be ignored, don't you think?

> Ed, with just a little more effort you and Cecil both could easily qualify
>as a disgrace to the traditions of ham radio.

Tsk, tsk -- are you saying that you do not believe I have made contributions to amateur radio, Dick? Or are you saying that I believe that the traditions of ham radio warrant getting on public newsgroups and swearing at other hams and insulting large groups of other hams I haven't even met. If those are the "traditions" you would want to see me embrace, I want no part of them. It is your choice that you choose to conduct yourself in such a fashion, but don't expect me to.

73,
Ed Hare, W1RFI

> know that does't bother you much at all, so long as everything stays on track
to
>keep going in the present direction toward testless licencing and "Give 'em
> everything they want when they want it.

That may be your belief, but it is not mine. IMHO, the present written exams should be improved to be more relevant to modern radio techology. Perhaps someday you will stop "ignoring" that if I repeat it often enough for you.

Perhaps it would help if you rote memorize some of the things I am saying on this forum, Dick. That way, you wouldn't have to rely so heavily on your assumptions.

>Just be nice to 'em".

Being nice to newcomers would seem a pretty long-term tradition of ham radio, Dick. Perhaps you should go back and remember your roots a bit more clearly.

>I'm talking about the traditions which have long caused hams to be
>selfsufficient, capable communicators with adequate technical ability to put a
> station on the air with minimal equipment and support by use of his own
learned > skills.

Is THAT what W1BNB was trying to teach me as he helped me put together my first station.

>You don't get that by memorizing question and answer pairings. And if you
> don't know it you ARE a disgrace.

So then am I to assume that those that get their licenses and put stations on the air have demonstrated that they didn't memorize the tests without understanding.

That works for me.

>Yeah, I guess a couple Super Bowl ads would just about shoot the budget. You
>might try some late night caboe or satellite spots. More effective, less cost.

The Super Bowl ads cost what they cost for a reason. There is a distinct relationship between ad cost and expected exposure. The late night spots would probably cost more per viewer than prime time.

The FCC has a requirement that TV stations air PSAs. The League has funded a number of them, and make them available through its Public Media Relations Department. These are best run locally and TV stations are MUCH more likely to respond to local viewer requests to air them than to a national organization. That is why the ARRL has chosen this route.

Now, you might say that the League could do a better job at getting the word out to hams about the PSAs and how to promote them. They have run this info in QST, in the ARRL Letter and feature it on its web page. Perhaps a more direct approach is needed. Email me your phone number and I will have someone from the Media Public Relations Department call you and tell you what is available and how to publicize it with your local TV and radio stations.

Let's see....If they made it to Pennsylvania, they'd no longer be slaves. How many of the newly freed slaves had an amateur radio license? Do you think many chased DX on 160?

> associated with it, too. Haven't you?

No. Because where I am, I can't tell the difference between operator skill now and 10 years ago. Everyone on the air here, post and pre-restructuring licensee alike, sounds fine. The much bally-hooed devolving of ham radio never happened; it's a myth perpetuated by the bitter old hams who miss the days of spending countless hours on 75 meters talking about changing their colostomy bags. They can't stand the idea of new blood in the hobby. Old people are like that; they resent newcomers and youth. Why this happens, I don't know. But I can tell you that the "devolving" and "CB-ification" of ham radio has not happened, is not happening, and will not happen. This is a myth, a propoganda campaign waged by those who want ham radio to die with them instead of advance into the codeless future.

CW doesn't make a better ham. Not in the slightest. Anyone who, post-1995, decides to get into a hobby other than sitting on the sofa in front of the tube, or in front of the computer playing Doom, is an A1 op in my book. Code or no code. All of these people are deserving hams. You're a bitter old man. Tough it out, OM, they're here to stay.

Funny how the WORST ops on HF are the old-timer on 75 (not the AM guys, though, they're pretty cool). All the new operators I've leard lately, especially during Field Day and special events (like the Lighthouse weekends) are doing an oustanding job. Let's take a minute to THANK all the new operators, especially the guys interested in HF, for coming into the hobby and helping to keep it alive and enjoyable for FUTURE generations.

No, what we need are more hams who champion the hobby and newcomers, like
Ed, Drpfrench and the others on here. We need less guys like you, who want
to turn people away. We need individuals who will take personal
responsibility for perpetuating ham radio and marching it into the future.
What are you doing for ham radio?

Dwight Stewart wrote:
> In other words, the two words have the exact same root meaning (to
> "buy").

Think about it, Dwight. Why did I choose two different words if
they mean exactly the same thing. I deliberately chose the word
"purchased" to indicate I had not paid cash for marijuana. I
used the word "bought" because that covers bartering and
"purchased" does not.

Again, in my mind when I used the words, "purchased" implied
a cash transaction. "Bought" implied a barter transaction.
Because I might have been mistaken about the meanings, I
looked it up in the dictionary and it agrees with what I
thought to be true.

You can take your dictionary and choose a different definition
from the one I used and publish it. But what you say words mean
is irrelevant to the meanings of the words I used. I very carefully
choose those words to convey the meanings that I chose to use. The
dictionary bears that out. That there exists different definitions
from the one I choose to use is irrelevant. You agreed with that
when we were arguing the definition of "forced". How can you now
turn around and disagree with it?

Source record: 17306

Im surprised someone hasnt figured this out yet. One of the many reasons the FCC lowered CW Testing was because of the ADA, it appears that some handicapped people were having trouble with CW, and FCC was looking for problems from that. Well now that the FCC has proven it will do what ever it takes to comply, I think its time we do what would be right for the Mentally Challenged also. Some Mentally Challenged people have the same problem with the Written as they did with CW, and with all the QUESTIONS that have been added, it becomes more of Challenge to Memorize all the correct answers. I think its time to stop the written or reduce the number of Questions. If we want to be fair to the Handicapped then the written most go, or reduced drastically.
The present written is un fair and outdated, it only shows how much someone can Memorize, it doesnt show what kind of Operator someone can be. Its time for this Memory test to go.

Im also sending the above post to the ADA, to get there input and advice on what steps should be taken to bring the written into Compliance

That's exactly what I told Dwight. You are simply confused.

> He nailed you, Cecil. Brilliant job,
> too. You're just digging the hole deeper.

If you think that, Jim, you missed the point as can be seen from the
rest of your posting. The argument is not over morals, ethics, or
legalities. The argument is over what I meant when I used the words
"purchased" and "bought". Only I know what I meant.

"Dinner" for me does not mean the same thing as "dinner" for you. In my
mind, a "purchase" requires cash and a "buy" does not require cash. That's
why both statements can be valid.

> Point is, you got it by exchanging something of value for it. That's the same.
> morally, ethically and legally, as paying money for it.

You completely missed the point, Jim. I bought (bartered) marijuana from
my friends. I freely admit that it is the same morally, ethically, and
legally as paying money for it. What we are arguing over is the validity
of my statements involving purchased (for cash) and bought (bartered).
Again, the marijuana was not purchased (with cash). It was bought (with
pizza). That was the difference in my mind when I wrote those two sentences
and the dictionary bears me out. From Webster's:

"purchase - to acquire by the payment of money"
"buy - to acquire by exchange"

Those are the definitions I was using when I wrote the statements.
In my mind, a purchase requires cash. I did not pay cash.
In my mind, a buy can be a barter. I bought marijuana from my friends.

> That's the same. morally, ethically and legally, as paying money for it. Value
> was exchanged.

Of course, it is the same morally, ethically, and legally. That's not
the argument at all. You completely missed the point. The argument is
over what I was thinking when I wrote those sentences. Only I know
that and I have explained it.

I didn't purchase marijuana (for cash). I bought (bartered) marijuana
from my friends.

> >I didn't use the same word in both places for good reason. Each of those
> >words have slightly different meanings, at least to a Texan.
>
> Nonsense.

I'm so glad that you are telepathic, Jim, so you can read my mind and
determine what definitions I was using when I used certain words. Are
you also omniscient? If so, why are you so confused about what the
argument really is?

> Sorry, Cecil, that has as much credibility as Clinton saying he "never had sex
> with that woman" because of the way he defined "having sex".

All I can tell you is what was going on in my mind when I wrote those
sentences. You are free to reject that reality. In my mind a purchase
requires cash and a buy does not. In your mind, that might not be true
but we are not talking about what was in your mind, are we?

Source record: 17316

Don't know the validity of the assertions made herein, but I find it hard to ignore!

My, my. The Reverend Jessie Jackson recently announced that former U.S. Congressman Mel Reynolds has been added to the executive staff of the largely publicly funded Operation PUSH/Rainbow Coalition.

Reynolds was among the 176 convicted felons pardoned in former President Clinton's last minute forgiveness spree. Reynolds, a Democrat, formerly held the Congressional seat from the Southside of Chicago now held by Jessie Jackson, Junior. He had resigned after being convicted of 15 counts of wire fraud, bank fraud and perjury regarding reports filed with the Federal Elections Commission and receiving a sentence of six and one years by a Federal court. He was also convicted of statutory rape and sentenced to a concurrent term of five years by an Illinois court for having intercourse with a sixteen year old volunteer campaign worker.

This reresents a first in American politics. An ex-Congressman who had sex with a subordinate wins clemency from a President who had sex with a subordinate, and then hired by a clergyman who admitted having sex with a subordinate, all while being paid by the U.S. taxpayers. And the Democrats don't believe we deserve a tax cut as it will take money from essential activities.

Only in America!

Typical &%#*$&#*! no-coder answer. They think they can slip
through by memorizing four, 130-year-old equations and doing some
straightforward mathematical tricks (also memorized). They can
go to any college bookstore and find, literally, tons of books
telling them *precisely* how to do this kind of thing. All they
have to do is plug the numbers in, "turn the crank", and out
comes the desired solution. Where's the challenge in that?

> "purchased" marijuana. The second message said you "bought" marijuana.

In my mind, a "purchase" requires money and a "buy" can be a barter.
That's why I chose different words in the two sentences. Think about
it, Dwight. Why did I choose different words for those two sentences?
It is because "purchase" and "buy" don't mean exactly the same thing.

> In other words, the two words have the exact same root meaning (to
> "buy").

Again, in my mind, a "purchase" requires money and a "buy" can be a
barter. In your mind, things may be different but we are not discussing
what was in your mind. You have no way of knowing what was in my mind.
All I can do is explain what was in my mind when I wrote those two
sentences. You are free to reject that reality. But you are not free
to tell me what was in my mind when I wrote those two sentences.

> So, again, which is the truth and which is not?

Both statements were true, Dwight, based on these definitions from the
dictionary and these are the typical definitions used by rural Texans.

"purchase - to acquire by payment of money"
"buy - to acquire through exchange"
"barter - to trade by exchange"

Given the above valid definitions straight from the dictionary, a purchase
requires money and a buy can be a barter, i.e. no money involved. Those
were the definitions I was using when I wrote those two statements. Why
else would I feel the need to differentiate "purchased" from "bought"?
In my mind, a "purchase" cannot be a barter but a "buy" can be a barter.
I think you will find those concepts to be the norm for rural Texas.

The definitions of these words in my mind agree with the dictionary
definitions posted above. "Dinner" for you may not mean the same thing
as "dinner" for me.

On 20 I've had nothing but enjoyable PSK31 contacts. Haven't heard any roger beeps there. I have over 100 confirmed countries on 10 and in the time gathering those I've never heard anything CB-like. Finally, in my area, 2 meters sounds exactly like it did prior to restructuring, and prior to no-code. Your propaganda campaign isn't working. I'm on the bands every day. Things are not what you say. Do you even own a rig? Or do you just like trolling this newsgroup?

Why aren't the dangers of the drug realized in Holland? Are
those guys too dumb to notice or what? Could it be that they,
as a nation, are more enlightened than we are. Why is it
illegal to run scientific studies on marijuana? What are the
feds afraid those studies will prove?

> >You choose to choke to death instead?

> Ever hear of swallowing rather than spreading disease?

So when a fly flies into your mouth, you just swallow it?????
The whole problem with choking is that one cannot swallow. What
happens to spit during the Heimlich maneuver?

> >> > In Louisiana, it is illegal for a husband
> >> > and wife to have oral sex.

> How many times has that been enforced in the past 10 years?

Probably every time they were observed doing it. The purpose of the
law is to force people to do it in private. But the law applies to
everyone, not only to those doing it in public. The point is that
selective enforcement of bad laws is a very dangerous thing in our
society.

> >I frequent the Louisiana casinos and vacation often in New
> >Orleans so I care.

> Do you go there with your wife, Cecil?

Don't have a wife. I could get arrested for attempted oral sex
in a hotel room with an undercover lady cop whom I picked up in a
bar with absolutely no prostitution money involved. See the real
purpose of that law?

There's a sneaky reason for that. Most bona fide criminals use
illegal drugs. (Most bona fide criminals also use legal drugs.)
When the police suspect a violent crime and can't prove it, they
often get the perp on unrelated drug charges like Al Capone was
gotten on income tax evasion, not violent crime. This is why
even the police who use marijuana want to maintain the present
marijuana laws as an extra weapon at their disposal.

My own favorite character was Milo Minderbinder when he was trying to
get everyone to eat chocolate-covered Egyptian cotton because he had
gotten caught in a commodity glut trying to corner the cotton market.
Or when he contracted with Yossarian's squadron to bomb its own airbase,
thus making warfare more cost-efficient.

I think of Milo every time I watch an infomercial on TV. Or listen
to one of George W's speeches.

Don't know much about history do you, Dave? The Fugitive Slave Laws
and the Compromise of 1850 required state and federal officers to
return fugitive slaves to their owners. This law was not repealed
until 1864. Fugitive slaves who made it to Pennsylvania were still
legally slaves according to federal law up until 1864.

Seems it's you who doesn't understand WORD association. Word
association is exactly the technique I used in 1952 to pass
the general written exam when I was in junior high school.
I'm not surprised that a technique that worked so well in the
50s is still in use.

Ed:

According to the last figures I saw, there was an insignificant increase, less than
2,000 newly-licensed hams since April, '00. Again I ask -- where are the hoardes
of eager, technically-qualified YOUNG enthusiasts?

>Or are you perhaps saying that you
>believe that you and Bruce are not prophets of doom and gloom?

I'm not "doomy and gloomy" about anything, Ed. I'm just simply stating the truth, as I see it. I won't presume to speak for Bruce, but I rather suspect that he is doing likewise.

>Somehow, I am
>finding it difficult to understand how you can, with a straight face, claim
>that a modest growth in Amateur Radio and people upgrading their licences is
>a bad thing.

I don't recall saying that it was a bad thing, Ed. That's just you trying to put
words in my mouth. Stop working Cecil's side of the street, will you?

>>In the Pre-Restructuring Era, we were promised
>>by the ARRL leadership that reducing and/or eliminating code testing
>>requirements would attract large numbers of young, computer-literate,
>>technically-inclined people to the ARS.
>
>I was not given that promise by my ARRL leadership. Can you point to any web
>page or published article, newsletter, etc., where that promise was made to
>you?

I was given this promise personally by Hugh Turnbull, W3ABC, at the Maryland State Convention in 1994 or 1995. I didn't think to get it in writing. Maybe the next time you see Hugh, you can ask if he remembers it.

>> What did we get so far? Just a lot of upgrading as a result of St.

WHY should I have "hope and enthusiasm" Ed? I've watched the simple,
easily achievable licensing requirements for the ARS be "dumbed-down" to
where they're not just a joke, they're a pretty bad joke at that! In spite of
this,
there is still no significant growth, particularly with respect to "young"
people which seem to be the Holy Grail of ham radio's future, according to
the ARRL. One hundred percent of the newly-licensed hams I know of
personally are people who are approximately my age (48) or older. The
only "young" people I've EVER known as licensed hams were always
the sons and/or daughters of a licensed ham parent (usually the father,
with an occasional OM/XYL set thrown in). Since I've been licensed
in 1981, I've never known a ham under the age of 30 who became a ham
completely on his own -- other than myself.

>>''and the upgraders are just more of the same middle-aged, middle-class

Don't look now, Ed, but I'm not talking about "local" media publicity for amateur radio. I'm talking about a NATIONAL, MAJOR MEDIA publicity campaign, utilizing nationally broadcast TV public service announcements and major media print advertising. If you don't understand this concept, turn on your TV or pick up a copy of USA Today or Newsweek sometime.

>>What the ARS needs for growth is a national, mass-media advertising

>effective.

Well, then, there you have it. The ARRL is completely powerless to approach currently licensed ham celebrities, and request their assistance, as hams, in utilizing their own time and talent (donated) and their media contacts to help
reduce or totally defray production costs for such a campaign! Who made this decision? Or are you just afraid to ask? I believe celebrity hams have an
obligation to help support our hobby/service, and I also believe that there are a lot of them out there who are willing and able to do so. I'm sure it would
be worth the effort for ARRL HQ to approach known, currently licensed celebrity hams and ask for whatever support they could offer. Where could be the harm in that?

Maybe this will refresh your faulty memory. My computer saves every
posting that I make. I believe this is every word I said about growing
marijuana in my garden. Everything is hypothetical. There's not a single
word about me actually growing marijuana in my garden. So prove that you
are a man of your word, Steve.

Exactly where in The Constitution does it give the feds the
right to keep me from growing marijuana in my garden?

Keeping me from growing marijuana in my garden for my private
use is NOT "for the common good".

> Cecil, are you selling any of your garden variety.
Sorry, I've retired from gardening.

Exactly who is the victim if I smoke marijuana in the privacy
of my home after growing it in my garden?

If you don't believe I have a right to grow marijuana in my
garden for my private use then that's prima facie evidence
that you believe my life does not belong to me.

I published the definition directly from the dictionary, Steve. You had
better get you a dictionary. "buy - to acquire by exchange" No money
required.

> >But what you say words mean
> >is irrelevant to the meanings of the words I used.
>
> You mean in the same way YOU keep insisting that I WAS forced to do
> something when I wasn't...?!?! As if YOUR definition was the only one...?!?!

The person who uses the words first gets to choose the definitions
from the available definitions in the dictionary, Steve.

I'm the one who used all those words first. You haven't even expended
the effort to publish the definition of "forced" that you are using.

The question was not over the meaning. The question was how to use
"barter" correctly in a sentence. Does one barter to or from or with.
"I bartered marijuana with my friends" just doesn't sound right.
That's why I changed it to "bought" which means "acquired through
exchange".

> From now on, if you are to have ANY credibility, I think you should
> publish a list of the prefered definitions for that particular post.

What does "dinner" mean to you, Steve? It means different things to
different people. To me, "purchased" and "bought" have overlapping
and non-overlapping meanings. I have explained what I was thinking
when I wrote those two statements. Probably most rural Texans
would agree with me as does the dictionary. Do you own a dictionary?
Do you ever open it?

Dwight. I can only tell you what it looks like to someone who is not from the South. When I hear Southerners talking about how bad a guy Lincoln was, how he didn't free the slaves, how the South was the victim in the Civil War, and how the Civil War wasn't about slavery I can only conclude that they are trying to make themselves feel better about something through justification, and by displacing blame.

All of the Northern States were exempted too, Cecil. So by your logic,
Lincoln approved of slavery in those states. I think you take on things
is a little askew. He needed to give no ultimatum to areas which were
sympathetic to abolition, so he didn't give them an ultimatum.

Ed:

That's all very interesting -- but why isn't there a nice, big, easily locatable "Kids Day" icon right on arrl.org's home page? I thought that encouraging young people into ham radio was the Holy Grail of the ARRL. I know absolutely nothing about producing web pages, but I do know that the ARRL's is one of the worst I've ever seen! The ARRL home page has a photo right on top, depicting two kids talking into radios. Why doesn't clicking on this photo activate a hot link to the Kid's Day information? None of the photos on the ARRL site are hot links -- you have only the typical blue hypertext links. I think you need a webmaster who isn't a typical middle-aged, middle-class white male ham!

Dick:

Now that you mention it, yes, that's true! I've never been an active
"disciple"
of ham radio -- the kind that goes out actively "recruiting" new hams. The
main reason for that is that nobody in my memory ever went out and actively
recruited *me*! I became a ham mainly due to having gained an awareness
of it through the study involved in my activities as a general electronics
hobbyist. The first successful projects I built came out of a book written by
Bill Orr, W6SAI, and my inquiry at the Lafayette radio store one day as to
what those letter after Orr's name meant was the first time I became aware
of ham radio. I immediately read everything I could get my hands on about
ham radio, developed a keen interest, but had my hopes of becoming a ham
dashed by the requirement to learn Morse code which, at the time, I felt was
an unnecessary and totally unfair requirement. You all know the rest of the
story.

When I finally became licensed, there were still no "open arms" to greet me
as a welcome, enthusiastically encouraged fellow ham. Every club meeting
I attended found me relegated to the back row -- usually never acknowledged,
much less asked to introduce myself. The shocking lack of simple social
graces in ham clubs was something that almost turned me off right at the
beginning. Fortunately, a few members who were the exception to the
rule approached me, welcomed me, and we got to know each other and
became friends. As I participated in the club more, my interest grew, and I
embarked on an accelerated upgrading path. However, as I moved around
the world during my Air Force career, I kept running into the cold shoulder
treatment at radio clubs I subsequently visited. The coup de gras was

administered by ARRL HQ itself, during my visits there in '83 and '84 -- where I was lucky not to have been shot as a trespasser!

No, Dick -- what goes around comes around, and I've always had pretty much the same attitude toward "recruiting" new hams as I personally encountered during my own pre-ham and early-ham years. When I meet a new ham or an interested visitor to a club meeting, I do make a point of welcoming him or her, and offering to ask whatever questions they may have. However, I can't give that person the interest, enthusiasm, or determination I had to become a ham. That is something they need to bring with them. And if I see that all they want is repeater access, and aren't already full of knowledge and curiosity about the totality of ham radio through their personal research, I see no point in encouraging more indifference into the hobby. However, I do become more convinced that we need to give up our 220 MHz band to accommodate the ham wannabes that just want to play with neat, capable radio toys but don't have all the other attributes of real hams.

I'll leave the "recruiting" to people like Ed Hare. He has enough political correctness to cover hundreds of normal, generally dissatisfied and increasingly unenthusiastic hams like myself. Of course, it would be interesting to see how he tries to "turn us around," but I've not seen any efforts in that direction so far! You see, he doesn't really "need" me, because I'm already committed to being an ARRL member for as long as there is something called amateur radio, and he knows it!

It is a fact that the History Channel TV program said that it is
illegal to test class 1 drugs.

> YOU asserted that
> the federal government is prohibited from testing drugs.

Yes, based on the information available from the History Channel
TV program. I am satisfied that it was a true statement. If you
are not, feel free to satisfy yourself. I am not going to do
your work for you.

> That's not evidence.

Of course it's evidence, Steve. It would be admissible in a court
of law and the jury would weigh that evidence. If you and I were
on the jury, I would accept the evidence and you would reject the
evidence. Your rejection of the evidence is not my problem.

It's a little known fact. Cilantro has a narcotic effect on some
people. But please don't tell the feds about that. We don't need
another stupid law.

Seems to be a big difference to me. Hams are speaking fairly good
English. The CBers seem to have their own language.

I'm under 30, have been an Extra class since my early teens (yes, a real 20wpm Extra), and had nobody in my family or even neighborhood who was a ham. A local ham who I got in touch with was kind enough to drive me to exam sessions, since I wasn't old enough to drive. Other than that, I had no help.

Just where they have always been - sitting there with their no-code tech licenses waiting for the Morse code requirement to go away. I am in email contact with a bunch of them including Dr. Williamson (PhD EE in case you have forgotten). A couple of them are dropping by for a visit on their way from Colorado to Florida.

I never said "Lincoln approved of slavery in those states". I don't
know if he approved or not. More than likely, he was constrained by
political boundary conditions but I don't know what those were. All
I know is what it says in the Emancipation Proclamation. Nothing
additional is implied in my remarks.

Please prove it, Jim. :-) Eliminating slavery throughout all of
human history would cause a catastrophic change in the present.
Some nations would never have arisen. The American Indians might
have discovered the primitive European "New World".

BS alert. You claim that the abolition of slavery applied only to the
states mentioned in the proclamation. You said that other areas were
exempt. What then did you mean by exempt?

Remember we are talking about the date of the proclamation itself.
It means that some special areas were exempt from the Emancipation
Proclamation. Those special areas are listed in the proclamation
itself. I don't know why those areas were exempt but they were.

It was apparently OK to own a slave after the Emancipation
Proclamation before the end of the war if one lived in New Orleans.
Could be that some slaves were not freed until the 13th amendment.

Here's something that I picked up off the web. Apparently the
National Institute of Medicine agrees with me.

"Determinations released last week by the Institute of Medicine that
marijuana holds medical value and has a low potential for abuse
supports an administrative petition that seeks to remove marijuana's
classification as a Schedule I prohibited drug."

Note the "LOW POTENTIAL FOR ABUSE" part.

I don't see the word "exempt" anywhere in the proclamation, Cecil.
Since it's not in there, you'll have to tell us what you mean by
"exempt".

> It was apparently OK to own a slave after the Emancipation
> Proclamation before the end of the war if one lived in New Orleans.

OK according to whom? Certainly not Abraham Lincoln.

> Could be that some slaves were not freed until the 13th amendment.

Maybe not even for a while after that. But the intent of the law was
that they should have been freed. Sort of like the Proclamation itself.

Plus the slave states that didn't secede: Delaware, Kentucky,
Maryland, and Missouri. (Maryland probably would have seceded
but Lincoln put the state effectively under martial law and
prevented the MD legislature from meeting to do so.)

Checking the list in the Proclamation which I found at
http://www.nps.gov/ncro/anti/emancipation.html ,
Tennessee is left off too, even though Tennessee did
secede.

Rich

Oh, come on, Jim. You're old enough to know that the word "exempt" means. It means "to be free from a rule or obligation which applies to others." So, when the proclamation says that this proclamation applies to these listed states, "except" these specific areas, then obviously those specific areas were exempt from the proclamation. Or do you have some other definition of the word "except" in the context it was used in that document?

I didn't answer because I have no idea of what you're talking about - such geo-political divisions didn't exist in 1860. If you're referring to Europe, I've already answered that (a farmer in the south was far removed from the politics of Europe - he based his life on the laws in this country, not the laws in some distant country). In other words, your question is not relevant when talking about the standards of conduct or ethics in America.

> > Nice statistics, Jim. But that

> > me about the Pennsylvania slave
> > owners, slave auctions, slave
> > traders, or the treatment of slaves
> > in that state.
>
> There isn't much to know because there
> weren't many slaves in PA.

So, because there weren't as many it is not worth learning about them to discover the answers to the questions I asked? At least we in the south don't ignore our history when it isn't comfortable.

> > Jim, all I see is denial in the
> > choice of that date. It's a nice

> > using that date very conveniently
> > allows you to rant about slavery
> > without drawing attention to the
> > slavery that existed in your own state.
>
> Have I not condemned ALL slavery?

So have I, Jim. And so has almost every single southerner that I've ever met. But that hasn't satisfied you. You still want to talk about slavery in the south. So why would your condemnation stop me from wanting to discuss the slavery in your state? Again, if we're going to talk about slavery, lets stop hiding behind platitudes like "there wasn't many slaves in my state, so there isn't much to talk about" and lets instead get it all out in the open for all the world to see.

> > For example, if we use 1960

> Crow laws?

No problem, as long as you're also willing to talk about the many years that blacks were not allowed to vote in Pennsylvania, or the segregation in Pennsylvania (remember school busing), and so forth. Again, these things were not just limited to the south.

And I would say that you're reading things that have not been said. For example, I have never said that Lincoln was bad. In fact, I have never said anything about Lincoln other than his emancipation proclamation only freed slaves in the confederate states (which is a fact of history).

Likewise, I have not said that the south was a victim in the civil war. Instead, I have said that the south has suffered in the decades following that war as a result of that war. Again, if you read about the events in the south following the civil war, you will also see that statement is historical fact.

And, finally, while most experts, and myself, acknowledge that slavery was an issue in the civil war (especially following Lincoln's proclamation), it was not a major cause of the war (the concept of state's rights played a much larger role).

Therefore, I don't see how you can perceive historical fact as justification or displacing blame. I live in the this century (not in the days of slavery and the civil war), so I have nothing to justify and no blame to displace. Or are you saying that I do?

Cecil, I'm not an idiot. More importantly, the people reading this are not idiots. You chose two different words because of the context of each sentence. Likewise, when you posted those two messages months apart, you were not thinking of how you must use two different words to differentiate the implied meaning. You are not that brilliant (if you were, you would have simply used the word "barter" if that is what you truly meant to say).

> Again, in my mind when I used the
> words, "purchased" implied a cash

> true.

Cecil, neither of those words require an exchange of cash, so in the end it really doesn't matter if you used money or exchanged goods, both of those words still mean the exact same thing in the context of those sentences. Therefore, those sentences still contradict each other, which clearly makes one of them false.

> (snip) That there exists different
> definitions from the one I choose
> to use is irrelevant. You agreed
> with that when we were arguing the
> definition of "forced". How can you

> now turn around and disagree with it?

Because no other definition supports the context of the sentences
the words were used in, nor does any other definition of those words
eliminate the contradiction in those sentences.

Neither of those words (purchase or bought) require the exchange of money, so the contradiction in your two statements still exist even using your present, somewhat silly, premise.

Nonsense, tell me the name of the dictionary that does not include the word "buy" as a key definition of "purchase." For example, Webster's defines "purchase" as "to buy or anything bought." The words "purchase," "bought," and "buy," are all directly related - you cannot do one without the other (if you purchase something, you had to buy it, and if you bought something, it was purchased). The contradiction in your statements stills exist, and your credibility goes down with each attempt to worm your way out of that contradiction.

Dripschittfrench:

CW does not make a person a better radio operator, it makes a person a REAL radio operator. One with genuine skill, and the ability to communicate under the most austere technical and propagation conditions. A person who doesn't know CW can coordinate the action of a PTT switch and his voice just as well as anyone else, but that doesn't define him as a radio operator for better *or* worse. That's something anyone can do, and a lot of people want to do -- without benefit of learning a true communications skill like the Morse code.

>WHere does knowing CW teach a person what kind a pattern a diploe has at a >given height. What part of CW teaches a person which direction to point his ant. >WHat part of learning CW teaches the importance of a good ground. What part of >CW teaches a person how long they can operates at 5 watts of power using a 30 >amp hour battery. Learning CW will not make a person a better operator.

Not learning CW doesn't accomplish any of the above either. Those of us who advocate code testing also advocate thorough, comprehensive written testing on basic theory, rules, regulations, operating practices, and safety procedures.

>Richard, go take up stamp collecting. Go away bad dream

You're having too many bad dreams. I suggest that you wake up and smell the coffee.

> Schedule I prohibited drug."

So what? Considering the number of people who abuse marijuana every single day in this country, the bias of this group is obvious with the statement that marijuana "has a low potential for abuse." If you're willing to accept junk science like this, I'm sure you could also find someone willing to say the exact same thing about heroin, crack, or cocaine.

I'm telling you what I was thinking when I wrote those statements,
Dwight. In my mind, something "purchased" requires money and something
"bought" does not. That's why I used two different words to mean two
different things. If I had not meant two different things then I
would not have used two different words.

I typed in the word "bartered" first but couldn't figure out how to make
it sound right in a sentence. "I bartered marijuana with my friends" just
doesn't sound like correct English to me. So I changed "bartered" to
"bought" since their meanings overlap. It was no big deal.

> Cecil, neither of those words require an exchange of cash, so in the
> end it really doesn't matter if you used money or exchanged goods,

I'm telling you what I believed to be true at the time, Dwight. I had
not looked up the definitions. In my mind, "purchased" requires money
and "bought" doesn't. I will continue to use that convention because
it doesn't violate any dictionary definitions. I believe that same
convention is used in the area where I live. If you did a survey in
Madison County, TX and asked the question, "Does a purchase require
an exchange of money?", I'll bet 90% of the people around here would
say "yes".

The above definitions are the conventions that I use, Dwight.
"Purchase" does have a broader definition than I thought but
that is irrelevant to the discussion. "Purchase" indeed does
have the above definition which involves money and the above
definitions were the ones I was using. I still believe that
a purchase requiring money is the standard convention for this
part of the country and I will continue to use that convention.
I'm sorry if you don't like it.

Why even have to search for kids day. If a ham does not about kids day they will never learn about it form the web site. The ARRL should put a banner at the top of the web listing listing comming events at least 90 days ahaed of time. My club did a kids day station at a local mall. I got the idea almost two years ago. I statred to approach local mall 6 months ahead of time. That was hardy enough time. By the way it worked rather well.

From observing the illegal users of marijuana, of course. The illegal use is so widespread it doesn't take a genius to draw some valid conclusions. The illegal use of marijuana for medical purposes is completely out in the open in California and is in violation of the federal drug laws. Something's gotta give. I expect the feds to move marijuana from schedule 1 to schedule 2 one of these days so that scientific research will not be illegal.

Actually, there is a legal way to get a waiver for research but I don't know of any waivers being issued. If any waivers were issued, it would be national news.

Junk science from the National Institute of Medicine? They have simply looked at reality and come to that logical, rational conclusion. Given the large number of people in this country who have tried marijuana at one time or another, it certainly seems to have a low potential for abuse. Seems to me, alcohol is abused more than is marijuana.

The point is, as the old hams die off. If we do not bring new YOUNGER PEOPLE into the hobby, ham radio will be a thing of the past. Our club has 120 members, only around 30 are under 65. Due the math.

Fortunately, it's the FCC's opinion that matters, Larry, and they
disagree with you.

So if he passed a 5wpm cpde test at some time he knows CW? That just shows how little you know, too. Sorry.

You think you're making a point but the FCC couldn't care less and you can't find it with both hands these days for all the dope and joy juice you've inhaled. Poor point, really.

You mean parades and marathons? I leave that to the No Code techs, it's right up their alley. As for your second question, newcomers today are not looking for Elmers to help them learn how to build their antennas, they're looking for their HRO or AES catalog and credit card..

To the extent that ONE HAM who works for the FCC sets ham radio policy for the entire commission, (and was disproportionately influenced by no-code advocates) you are correct, they do agree. They were glad to rubber stamp his work. Actually they couldn't care less just so long as they aren't required to take time away from big $ activies to waste it on ham radio, they don't care at all about what happens to us. They wish we all would just go away so they can concentrate on the big money people and their regulatory problems.

Pretty much nails it, Larry. Somehow the kids today (even those over 50) can't soak it through that it isn't "just" being able to pass a code test that makes a radio operator of a ham. No use wasting words on them, they already know it all.

So whats your point, I have never said that test should not be comprehensive, DOnot put words in my mouth.

>CW does not make a person a better radio operator, it makes a
>person a REAL

In your case it makes a person a better LID.

>a true communications
>skill like the Morse code.

Is that why it is a skill the only the ham community requires, at least for just a few more years. Is that the reason that the only jerks I hear on HF seem to have one by two calls. That say a lot about the old gaurd.

Passing a code test has nothing to do with being a good ham. All paasing a code test does is prove that a person can pass a code test, nothing more, nothing less.

So what you're saying is that you were ignorant of the true definitions of those words - that you were thinking of something other than the commonplace meaning of each in this country?

But, I'll repeat what I said before, even if you meant to say "barter," since neither of those words (purchase or bought) requires the exchange of money, the contradiction in those two statements remain.

> of money?", I'll bet 90% of the people
> around here would say "yes".

And I'm sure those exact same people would also say that buying something requires an exchange of money. Likewise, I'm sure those exact same people would also say that if something was bought, an exchange of money took place. I've lived in Texas, Cecil. And most of the people there are smart enough not to use the word "bought" when they actually meant to say "bartered." And, to be honest, I also think you're smart enough not to use the word "bought" when you actually meant to say "bartered."

And, with that, I'm going to let this nonsense go. You have your story and you're obviously going to stick to it no matter how illogical it sounds.

Okay, Cecil. That's fine. However, it does make a conversation somewhat difficult if you're going to use your own, unique, definitions of words instead of the commonplace definitions. It would be almost as easy to talk to someone who uses another language entirely.

And why should the FCC care about us, Richard? Most ham operators act like a bunch of spoiled brats. We've got more bandwidth to play with then almost any other radio service short of the military and the government itself. And we have more privileges than almost any radio service short then the military and the government. But instead of appreciating that, and making full use of it in harmony with other hams, we sit around endlessly bickering about petty crap like CW testing and so forth. To be honest, with that in mind, I can't blame the FCC at all for not caring about us (I don't even care for some hams today).

>Of course it has, and not just in LA, why do you think most people refer to
>it as the 2 Meter CB BAND?

The only place I have seen 2 meters referred to as a CB band (contact the Department of Redundancy Department) is here, by a handful of people. Most here seem to disagree with the use of that term.

I will be in LA next month. I will listen to the repeaters to see if they are all as you describe.

Anyone here from the LA area who can tell us whether the abuses on the 2-meter repeater are more or less than they were pre-restructuring? Bruce and I are both speculating.

I can say that I can see no difference in the on-the-air conduct on VHF here in the Hartford area over the past few years.

I do listen to HF a lot. I hear little that reminds me of CB, even on phone. That little can be pretty bad, but it is the violation of the rules that is the issue there, not its resemblance to CB.

The only times I hear CQ contest on the majority of the bands are during the major contests. I rarely, if ever, hear it on non-contest weekends. Maybe it has just been bad timing on your part if that is all you hear on the bands.

Not in Hartford, CT, either. Bruce was confused that HF signals are local in
nature. Maybe he thinks that 144 MHz propagates worldwide.

No matter; I referred him to the ARRL web page for a propagation refresher. :-)

>It will make them a better CW operator, but that does not make them better
>Hams.

Sure it does. Learning any skill or knowledge makes a ham a better ham. CW is still a vibrant (and fun!) part of ham radio.

But what makes a ham a better ham is the overall body of knowledge that he or she acquires to become a ham, and the much greater body of knowledge that most hams acquire during a lifetime of learning. No one part of it is more important than another, and no one ham does it all. Once we have met the requirements to obtain our licences, we are free to choose from a universe of potential.

Works for me.

>High School and maybe they can exlpin it to you.

Sure I understand it, Bruce, I did a bit of it when I studied for my General in 1963. I just don't think that very many people find it easier to "word-associate" over a thousand questions without understanding than they would to learn a few simple concepts and apply 6-th grade math to get the correct answers.

I do not believe that people are choosing to become hams not to learn and I believe that the hams of today are doing exactly what I did in 1963 (with a MUCH shorter study guide) -- passing their exams with a combination of learning, memorizing, lucky guessing and just plain hoping that a few subjects do not appear on the exam they are given.

Of course, we have all had our own unique experiences, so I can only tell you about how I learned enough to pass my tests. If you can only learn by word association, then I will accept that you have a different view of the world than I do.

Dwight, when you chose a definition for a word, you do not and cannot
choose all definitions. You can choose only one definition at a time.
"Purchased" can involve money and that's the definition I chose to
use. "Bought" can be interchangable with "bartered" and that's the
definition I chose to use. There was NO contradiction. A word cannot
possess all of its definitions all at once. The reason that I chose
to use two different words is to be able to give them different
meanings.

Long ago, I adopted the convention that I would use "purchased" for
transactions involving money and use "bought" interchangably with
"bartered". Since that doesn't violate any dictionary definitions,
I will continue to do so. I'm sorry that you don't approve of that
decision.

Not true, Dwight. Around here you can buy a horse with two cows
but you cannot purchase a horse with two cows. I suspect it's
a regional thing. It's a useful convention for me and I don't
see any reason to change it.

> somewhat difficult if you're going to use your own, unique,
> definitions of words instead of the commonplace definitions.

I'm not using my "own, unique definitions of words", Dwight. I
am choosing the definition from a list of definitions in the
dictionary. There is nothing wrong with that. In the dictionary,
you will find definitions 1, 2, 3, 4, ... for word1. You will
find definitions 1, 2, 3, 4 ... for word2. I simply chose
definition 1 for "purchased" and definition 2 for "bought".
There's nothing wrong with that. If you don't understand what
I meant, it is up to you to ask, not go running off at the
mouth about some alleged contradiction that never existed.
When I use the word first, you are not allowed to change the
meaning of what I said by choosing a different definition
than the one I was using.

1173. Re: Restructuring

Newsgroup: rec.radio.amateur.policy
Date: 2001-08-22 12:33:29 UTC
From: n2ey@aol.com
Message-ID: <20010822083329.05130.00002597@nso-cs.aol.com>
Source record: 17467

In article <20010821000213.22481.00004525@mb-mj.aol.com>, drpfrench@aol.com (Drpfrench) writes:

>Lets face it. restructuring is here to stay, it is not going to go away.

Yep. FCC has made it clear they want things to be simpler and easier.

> For
>all those hams
>that cry about the “Dumbing down” (Their words) of ham radio. Get over it,

>the world of
>Amateur Radio is changing.

It's always been changing. Not all changes are for the better.

>After WARC 2003 it is more likely than not that CW
>will be
>gone as a requirement for HF privileges. Evan the ARRL is not going to oppose
>CW as a
>requirement at WARC 2003.

Yup. Of course nobody really knows what will come of WRC 2003 and the code test requirement.

>Of course the ARRL want’s the FCC to maintain the 5
>wpm
>requirement for US hams.

That's just a worthless bone tossed to those who want to keep code testing. Does anybody who knows the score think that any code test has a chance if the treaty requirement is removed?

FCC has said, in the restructuring R&O and elsewhere, that the ONLY reason they keep the code test is because the ITU treaty still requires it. No other reason for the TEST carries any weight with them. Without the treaty requirement, why would FCC keep the test?

> I have seen posted in the New Group an opinion that
>new
>people are getting into ham radio, but in small numbers.

That's always been the case, at least for the past 40 years or so..

>This may be true,
>but
>from what
>I have seen, these new hams are all over 40, and in most cases over 50.

Is that bad? Everyone who can pass the tests and follow the rules is welcome. From what I have seen, new hams are of all ages.

> With
>new blood
>we should be looking at recruiting younger people, by younger I mean under 12
>years of
>age.

Why not focus on all ages? Is a 25 year old somehow less desirable as a new ham?

>The club I am member of has over 120 members, Only about a dozen are
>under
>50,
>of these only 3 are under 21.

Clubs are not a good sample of the ham population. Many hams don't belong to clubs, or can't make the meetings. Or they aren't interested in what the local club is doing.

> Of course our club recently started seeking out
>younger
>people a short time ago, some thing more club should do. As the OLD Guard
>dies
>off in
>the 10 0r 20 years we will see a very large drop in the number of hams.

The old guard has been dying off since before I was licensed, which was way back in 1967. The old guard is being replaced by new hams all the time.

>To
>bring people
>into ham radio we are competing with the internet and cell phones.

Then we will lose.

What ham radio has to offer is that it is DIFFERENT than the 'net and cell phones. Only those who want something different will get ham licenses.

> Most
>people
>do not
>realize that cell phones will not work in a large disaster, we have seen this
>happen in the
>past.

Cell phones don't even work well in small local emergencies. Even with no damage, the system gets overloaded.

> Instead of complaining about restructuring, get off your buts and get
>into the
>community and recruit new people into ham radio.

Publicity is good.

>is not easy,
>but not everything in life is.

Yup.

One thing the ARRL should consider is coming up with a TV ad to go with movies that feature ham radio, like the recent "Frequency". That movie will hit TV soon, if it hasn't already, and it's a golden opportunity.

You're right about that, Dick, but not in the way you think. A tech
license and your extra license use the same form. Please note the
Operator Privileges part. It says absolutely nothing about code.

I don't believe that's any more true there than here. I can't "buy"
anything with two cows locally but I can trade somebody for something.
Since I'm fresh out of cows, it doesn't matter. The whole debate might
be taken to alt.definitions.peculiar.

Do I now need your permission to interpret your words? In seeing all you have posted about the subject, I did not believe that you think that a modest growth in Amateur Radio is a good thing. And surely, you would not expect me to believe that you have posted so much on a subject you are completely neutral about.

But I could be wrong. Do you think that the relatively small growth in Amateur Radio licensing numbers is a good thing, a bad thing or a neutral thing.

Not only me, Steve. Take a look at the history of the marijuana laws.
The AMA was AGAINST marijuana prohibition and someone lied about that
fact when the 1937 marijuana laws were passed. You should find the
following history of marijuana laws very enlightening.

Relative to what? Knowing 5wpm Morse code is INFINITELY faster than
not knowing Morse code at all. 5/0 = infinity.

From: yodoc@aol.comnospam (Larry Roll K3LT)

>WHY should I have "hope and enthusiasm" Ed? I've watched the simple,
>easily achievable licensing requirements for the ARS be "dumbed-down" to
>where they're not just a joke, they're a pretty bad joke at that!

I have to imagine that the same thing was said by the old timers in 1963 about the General exam I took to get all Amateur priveleges. I found that to be a lot easier, even at 14 years of age, than I would find today's tests to achieve the same end result -- all amateur priveleges. I don't mind talking about a 35-year old joke, Larry, as long as we all agree the tests are more difficult, and cover more scope, now than they were when I was first licensed.

>>Is this supposed to be some great relevation, Larry, that upgrades coming

>in utilizing their own time and talent (donated) and their media contacts to
>help
>reduce or totally defray production costs for such a campaign! Who made
>this decision? Or are you just afraid to ask?

Uh, Larry, have you seen the PSAs that are available? I don't know if more celebrity hams were asked. Do you know? From your choice of words, it

appears you do, so please fill us in on the details.

And you are still talking about the PSAs, not a "media blitz." Or do you now agree with me that ARRL's concentrating its media-public relations toward local publicity for ham radio and locally-run PSAs is the most effective use of limited resources?

Here's the last paragraph from that history.

"Let me conclude, and again this is my prediction -- I will tell you I don't think
it is subject to opinion. Just look at it. Just take a look at what has happened
now and what will happen. I will tell you how inexorable it is. If we get together
here in the year 2005, I will bet you that it is as likely as not that the possession
of marijuana may not be criminal in this state. But the manufacture, sale, and
possession of tobacco will be, and why? Because we love this idea of prohibitions,
we can't live without them. They are our very favorite thing because we know how
to solve difficult, social, economic, and medical problems -- a new criminal law
with harsher penalties in every category for everybody."

>less.

Passing a code test has as much to do with being a good ham as does passing a written test. In either case, the ham has demonstrated ability in things that are in use in Amateur Radio. I would agree that becoming proficient in the code is a better indicator of one of the ways that an amateur can be a good ham, as is becoming proficient in the technology and techniques that are tested on the written.

Morse code operation may have no worth to you, but it does have worth to the Amateur Radio Service. It is one of many things that are valuable about ham radio.

Larry has no idea how wrong he is, but you do and yet you still support his totally wrong statements. I don't have any need to wonder why, given your zeal to "bring 'em in however possible".
I do wonder what you or he has done that would compare to what I have done to bring in new hams to the hobby over the past 30 years. Nothing that is visible here, except run your mouths. You already know I ran a VE team for many years, and I tested many novices before that. Strangely, none wanted to upgrade to Tech, they all went on to General or Advanced-at the FCC office, many miles away. Imagine that, real initiative.

Oh really? You have no idea what I know, my friend. If he passed a 5 WPM code test administered by a VE then he knows CW. You choose to ignore this because you have your own requirements, apparently. The pompous CW-snob element of ham radio needs to get over their collective inferiority complex, but sadly, we know this will never happen.

Funny, I've read about the 'devolving' of ham radio, in one form or another, in QST letters dating back to the 50's. Each successive generation of hams apparently thinks theirs is the last true great one. Funny how ham radio has remained stable for 40 years despite this apparent, continuing 'de-evolution'. Care to explain how, despite this 40 years of apparent de-evolution, we've managed to more than quadruple the number of hams and increase our available bandwidth? I'd be curious how you think this is possible in the face of your de-evolution theory.

> Larry has no idea how wrong he is, but you do and yet you still support his
>totally wrong statements.

I do not disagree with him that there are some hams who are displeased that some of the new hams entering this hobby do not share their views on code testing or that amateur testing is merely a memorization test. If that is Larry's view, you are incorrect in thinking that I believe "how wrong he is."

> I don't have any need to wonder why, given your zeal to
>"bring 'em in however possible".

I do not share your view that we should "bring them in however possible," Dick. I believe that it is important that there be a written examination that is relevant to modern radio technology.

>I do wonder what you or he has done that would compare to what I have done to
>bring in new hams to the hobby over the past 30 years.

I am sure I have not done as much as you have over the years to bring in new hams, Dick. I respect what you have done. I would also respect your choosing to stop doing so. What I cannot respect about what you are doing here is that you have undertaken a crusade to insult every new ham that comes down the pike. You have no idea how much that detracts from your lifetime of helping hams.

> Nothing that is visible here, except run your mouths.

I think it is the running of mouths here that is Larry's major concern. Do you consider insulting and demeaning groups of hams you don't even know to be running of the mouth, Dick?

>I tested many novices before that. Strangely, none wanted to upgrade to
>Tech, they all went on to General or Advanced-at the FCC office, many miles
>away. Imagine that, real initiative.

Yes, it was. And it took the same initiative for hams who came along afterwards to upgrade through the VE system when the option of proving their worth by driving to an FCC field office was no longer available to them.

The errors were all theirs. I, as the first user of a word, get to
pick the definition from the valid list of definitions in the
dictionary. Does you allow someone else to pick your definitions
for you?

> >Exactly where in The Constitution does it give the feds the

You are evading the question. The question is whether you committed
libel when you said I grew marijuana in my garden. You did!

> No apology issued as none is required.

You are evading the question. The question is whether you committed
libel when you said I grew marijuana in my garden. You did!

> Sorry. Dem's da facts.

You claimed that I said I grew marijuana in my garden. That's a libelous statement. Exactly where did I say that, Steve?

What jury? The statute of limitations has run out. The argument is
not over whether I bought pot or not. The argument is over whether
I have a right to choose the valid definition of "bought" that I
was using at the time. Why am I the only person not allowed to
pick a valid definition from a list of dictionary definitions for
the words I am using?

The fact that you said the above just proves that you have no clue
as to what the discussion is all about. I'm not saying I didn't
buy marijuana. I'm saying I didn't pay money for it. It has absolutely
nothing to do with legalities. It has to do with the right of each
person to choose his own definitions from the list of valid definitions
in the dictionary. Can you purchase something with money? Of course.
Can you buy something without money? Of course.

There are regional differences in the English language. For instance,
there is no lunch and no afternoon here. At noon we have dinner. From
noon to dusk is evening. We have supper in the evening.

Who said the cops were falsifying evidence? It was NOT me. They
are putting violent criminals away on valid unrelated drug charges
because there's not enough evidence to convict them of their violent
crime. I sure wish you would learn to read, Steve.

> >This is why
> >even the police who use marijuana want to maintain the present

That was told to my girlfriend by a San Jose cop while they were
smoking marijuana together. He said San Jose cops would never
be arrested for smoking marijuana even if they were caught
red-handed.

Of course it was, Steve, based on what I perceived to be true from
the TV show. When are you going to learn to read?

> >I am satisfied that it was a true statement.
>
> Based upon what FACTUAL information?

The factual information presented in the History Channel TV show. They
also say Pearl Harbor happened. Do you believe that is not factual?
I have ordered the tapes of "Illegal Drugs and How They Got That Way"
so I can be 100% accurate about what they said.

> If I am going to make a statement as a matter of fact, I will take SOME
> precautions to ensure that what I am citing is factual.

BWWWWWWHHHHAHHAHHHHAHHAHHHAHHHAHAHHHHAHHAHHHHAHHAHHHHAHHAHAHHHAAAAA

If you really took those precautions then you wouldn't lie about
what I've said.

> What I want it THE LAW.

I don't give a rat's patootie what you want, Steve. It is not my
responsibility to fulfill your wants. If you want the law, go look
it up for yourself. I am not going to waste my time fulfilling
your wants. It was on the History Channel. They are usually quite
accurate. That's good enough for me.

Have you read the history of marijuana, Steve? You'll be grinding
your teeth over those *facts*. It proves what you have said here
on this newsgroup is plain old horse pucky. Precautions indeed.

Yes, but I don't know exactly what CAM intends to imply when he uses the term. Being that the primary emphasis of much of the proclamation appears to be rebellion, it would follow that any exemption would pertain primarily to the issue of rebellion. It is not at all clear that Lincoln intended to allow slavery in the states not proclaimed to be in rebellion.

Stop worrying about what I might be implying, Jim. We are dealing in
facts here. For some reason unknown to me, Lincoln chose to exempt
certain areas of the country from the Emancipation Proclamation.
That's just a fact. The big question is why are you inferring that
I implied something? I was just stating interesting facts. But now
that you mention it - what was Lincoln's ulterior motive in exempting
certain areas from the Emancipation Proclamation? Could politics have
been involved? There seems to be some relation to seaports. Could it
be that Norfolk might not allow Union ships to dock unless they were
exempted? I simply do not know.

> proclamation only freed slaves in the confederate states (which is a
> fact of history).

> Likewise, I have not said that the south was a victim in the civil
> war.

Not in so many words. But what am I to conclude when you draw pictures of the good intentioned Southern states having been oppressed by the injust big government of the North. Consider that I have been debating you, Cecil, and others, and there are common threads in the counterarguments.

> Instead, I have said that the south has suffered in the decades
> following that war as a result of that war. Again, if you read about
> the events in the south following the civil war, you will also see
> that statement is historical fact.

I don't need to read about it, as I am already aware of it. I believe I am on record as having described that as a "crater" out of which the South has had to climb.

> And, finally, while most experts, and myself, acknowledge that
> slavery was an issue in the civil war (especially following Lincoln's
> proclamation), it was not a major cause of the war (the concept of
> state's rights played a much larger role).

I am of the opinion that that portrayal is a diversion, or type of obfuscation. Most of the issues surrounding the secession can be connected in one way or another to the issue of slavery.

> Therefore, I don't see how you can perceive historical fact as
> justification or displacing blame.

Historical fact has always been open to interpretation, and I would like to suggest that it's no less true when it comes to the South's perspective of the war.

Thanks for the support, Jim, but the statute of limitations has run
out on any offense I might have commited. What Dwight and I are
arguing over now is individual rights. Does an individual have
the right to choose his definition of a word from the valid
definitions enumerated in a dictionary or does someone else
(Dwight) have the right to force a definition upon him (me)?
I vote for individual rights. Dwight apparently favors fascism.
I'm just glad he's not in charge.

Well, it is germane to the discussion.

> I was just stating interesting facts. But now
> that you mention it - what was Lincoln's ulterior motive in exempting
> certain areas from the Emancipation Proclamation?

It's pretty obvious that he wanted to make it clear who he felt was on the side of the Union, and who was on the side of the Confederacy. It has been apparent to me all along that the point of naming names, so to speak, was to make it clear who was deemed to be in rebellion. It has been assumed by some here that in doing so, he intended for slavery to be abolished only in those states. This has been my point of contention.

> Could politics have
> been involved?

Of course. But not so much on the issue of slavery, as on the issue of "are you with us, or agin' us."

> There seems to be some relation to seaports. Could it
> be that Norfolk might not allow Union ships to dock unless they were
> exempted?

Would Norfolk have foolishly believed that if they allowed Union ships into their port, they would have been allowed to continue to have slaves? I don't think so.

What about the people who weren't even aware of ham radio until recently and just became licensed?? Does that make them lesser of a person when it comes to ham? Obviously they weren't aware of the restructuring issue....

Profanity..... absolute rudeness..... the "good-ole-boys" network crap....,
same crap I hear on the SW reciever on the CB freqs. as I am scanning thru.
Not the best operators I have heard, but of course, not representative of
the whole.

The other thing is the contesting thing. When I finally can have an HF
station I am not sure if I am even going to bother with it. I currently
could only operate mobilely (sp.?) as I am not allowed to operate where I
live. If I do operate HF later on, I certainly do not care about contesting
whatsoever, even though, apparently contest operators MUST have priority
access to the frequencies.....

In previous years "The Amateur Radio Service" has provided the nation, sometimes grateful and sometimes not, with a great service in training and shaping technical talent. However, today's Appliance Buyer/Operators are about as useful as breasts on a bull for this.

Should license fees be jacked into the ionosphere to compensate the taxpayer for this bandwidth freeloading? Some feel that way. However, I think a more appropriate solution is a carrot-and-stick approach. A tax should be placed on imported Amateur Radio equipment, and the Amateur Extra license should require a tough soldering, test equipment use, and troubleshooting test.

However, the government should have a free software program similar to the commercial EDA and RF design packages written and put up as source for ham use, and companies such as Newark should be punished for not wanting to sell parts to hobbyists with an inventory tax if they balk.

Of course some people will balk. Who cares?

I freely admit that I bought pot in the past so your inference was
completely wrong. I certainly wish you guys would just accept what
I say and not try to read any hidden meanings into my words.

The whole argument is over individual rights. Do I, as an individual,
have the right to chose a definition from the list of valid definitions
enumerated in the dictionary or must I succumb to the collective will
embodied in Steve and Dwight. In response to an attack from that
collective, I raise my "Don't Tread On Me" flag and scream at the
top of my lungs, "I have only begun to fight", or "Nuts!". I can't
decide which is more appropriate.

And the ham who routinely provides public-service communication but doesnt'
build says that the True Ham Provides Public Service Communication.

There are many ways to be a good ham, and those that believe that only the way
that THEY do it is Worthy are way too narrowly focused.

The majority of the value of Amateur Radio to our regulators is NOT in its technical contributions, but rather in its emergency and public-service communications. That makes a MUCH bigger impact on our congresscritters than any technical presentation of the value of ham radio.

The vast majority of the emergency- and public-service communications has taken place using the "appliances" you feel are useless.

The majority of amateurs have disagreed with you for about the past 50 years or so.

All words have multiple meanings. In many cases, those meanings are clear from context; in others, not. In the latter case, I would normally suggest that the person who didn't understand precisely what was meant by a word ask the person who originated it. However, in this case, you volunteered on your own as to which meaning you intended for each word. For a reason I can't quite understand, that was not enough to end the discussion about what you "really" meant.

Maybe it is an extension of the secret agenda thing. :-)

Unfortunately, there are as many ideas about what should be available as a
banner at the top of the ARRL web site as there are hams with ideas. Our Tech
Info guy thinks that the TIS pages should be on that banner.

While I don't think that the ARRL's web page is the easiest to search, I can't
think of any really good ways to give access to thousands of pages by putting
each one on a banner.

You are correct. You are not the only one. I don't know exactly what it means when you say it, either. I think that ARRL can and should benefit from member input about what it it doing wrong, but "ARRL is God" just lacks enough substance to be useful.

I never have understand how (the Feds) can sell something (spectrum) that
does not belong to them.

Licensing is not a permit to OWN any frequency. Regulations are created to
maintain reasonable control to avoid mutual QRM.

You know how I found out about ham radio? In 1959 I was into model rocketry. I saw an add for a war surplus transponder unit that was small enough to fit inside a rocket nosecone. I sent for info on it. I was told that in order to operate the unit I needed a FCC Amateur Radio License of Technician class or higher.

No one came hunting for me.

That right there is what I've been saying for years. The FCC forcing of Incentive Licensing on the Amateur Community created a 'caste system'.

One of the reasons I have KEPT my W4NTI callsign is because I see NO NEED in putting on a big head because I have an extra.

I had all the SAME PRIVELDEGES back in the 60s until the FCC took them away and forced upgrades to REGAIN what was stolen.

I got involved in Amateur Radio at age 16, but have been in it life-long since then. However I am also inolved in other "pass-times" and it seems to me that they are full of "late in life" adherents too.

One of the surprising things I see folks coming into are aviation sports like hang gliding and skydiving. I have been an HG pilot since 91 now, and most of the new entrants are already well over 30, and a lot are over 40.

I think that most "kids" today want to get into the "x-treme" sports in early youth for the adrenaline rush and then enter other activities later as they are less physically intense.

Yes, it would be nice to get "kids" in the door in large numbers for Amatuer Radio again, but I think this is the way it will be for some time to come.

There will alwyas be exceptions, but I think the trend is set for a while.

It must have been about 5 years ago. The name of the report skips my
mind at the moment but it cost about $200 per year. It was authored
by James Davidson and Lord Rees-Mogg who are also authors of "The
Great Reckoning". They were afraid Clinton's alleged cocaine habit
was going to affect the markets in one way or another.

> contention.

That doesn't even make sense, Jim. The civil war had been going on for almost two years when the emancipation proclamation was issued, so there was no need to "make it clear" who was on the side of the Union and who was on the side of the confederacy. Everybody in the entire country already knew who was in rebellion. The newspapers knew who was in rebellion. The magazines knew who was in rebellion. The book authors knew who was in rebellion. The street sweepers and school children knew who was in rebellion. In fact, by the time that proclamation was issued, probably all of North America and Europe knew who was in rebellion in the United States.

The proclamation did not have to "make it clear" who was in rebellion - that detail was already widely known. So the proclamation was not about who was in rebellion in the United States. Instead, the proclamation was solely about slavery in those states in rebellion. Nothing more. Nothing less. The entire purpose of the proclamation was to free slaves in those states in rebellion. The document specifically listed which slaves, in which states, were free. If a state was not listed in that document, that document did not abolish slavery in that state. Slavery in those remaining states was not abolished until the 13th Amendment.

Why are these widely recognized facts so difficult for you to understand?

That the south was oppressed following the war is a historical fact, Jim. Again, read about the events in the south following the civil war. And southerners are still suffering to this day from the negative attitudes of northerners. Just ask any southerner who has lived in a northern state. I'm sure he'll be glad to tell you about the southern jokes or the jokes about his accent. Or just watch how southerners are portrayed on television (everything from Gomer Pile to the Beverly Hillbillies).

By the way, why do northerners always make jokes about our southern accent? Do you really think we'll find it funny when you try to mimic it? When was the last time you heard a southerner trying to mimic your ignorant sounding northern accents? No, we're too polite to do that.

> I don't need to read about it, as I am

Don't worry about it, my friend. The south is climbing out of that crater, and somehow I don't think most southerners will suddenly forget how they've been treated over the last 150 years.

> interchangable with "bartered" and that's
> the definition I chose to use. (snip)

Okay. I was willing to let it go but obviously you're not willing to do the same. Yes, you do pick only one definition at a time - the definition that fits the context of the sentence used. You're not ignorant, Cecil. If you had meant to say "barter," you would have said "barter." You didn't say "barter" because you didn't mean to say "barter."

You also choose your words in the context of the discussion. So, lets go back and see context of the discussion in which you said that you bought marijuana. You were asked (this is an exact quote)...

Assuming that you purchased the marijuana
in the normal way (the way most people get
their illegal drugs), what about the people
you bought the marijuana from? (snip)

You responded with...

(snip) I only ever bought marijuana from my
friends. I don't know and don't care where
they got it. (snip)

So, as you can see, the discussion was about who you "purchased" drugs from. You didn't dispute the word "purchased" in your response back then. You didn't dispute "the normal way most people get their illegal drugs" in your response back then (bartering is not the normal way most people get their illegal drugs). Instead, you simply responded that you "bought" marijuana from your friends. And you used

that word in the context of a discussion about where you "purchased" marijuana.

And, again, that is a direct contradiction of the following
statement made by you...

"I have never purchased marijuana
in my life. All the marijuana I have
ever smoked was offered and/or
given to me by my friends."

Again, the contradiction in your statements still exist.

HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA

WHAT A DWEEB!

Geez, Cecil..! You can't find a VALID argument about ANYTHING, and then
you have to call someone a liar or accuse them of "falsifying attributes"
because of the number of arrows in a newsgroup reader on AOL...?!?!

HOW WEAK!

>>I<< didn't put in anything!

You can "thank" the AOL newsreader IF indeed anything therein is amiss.

However, your "proof" is pretty laughable in any case!

Nice try, though!

Now, since you HAVEN'T got ANY facts to share with us except to claim you
saw something ON TV once, perhaps you'd like to try ANOTHER subject...?!?!

"Why on Earth do you do it?"

(I DID capitalize "Earth")

In the meantime, we await your next verbal meandering.

With baited breath.......

Steve

I think the pirates operating illegally on the bottom end of the 40 meter band may be selling marijuana, I think that had something to do with starting the Civil War.

> US citizens were free to use marijuana for the first 150 years. The
> main reason that marijuana was declared illegal was to control the
> Mexican alien problems in the Southwest.

The pirates operating on the 40 meter ham band don't like Mexicans or Blacks, I think that had something to do with starting the Civil War.

Cecil, don't lecture me on the use of a dictionary. I'm fully aware that a person chooses a word based on the context of the sentence and the context of the discussion. And, once a person uses a word in a certain context, the definition of that word is locked in and cannot be changed later.

So lets look at the context. We already know why "bought" was used in the context of the sentence (past tense of buy). Now lets go back and see the context of the discussion in which you said that you bought marijuana (this was said before so the following may look familiar). You were asked (and this is an exact quote)...

Assuming that you purchased the
marijuana in the normal way (the
way most people get their illegal
drugs), what about the people you
bought the marijuana from? (snip)

You responded with...

(snip) I only ever bought marijuana
from my friends. I don't know and
don't care where they got it. (snip)

So, as you can see, the discussion was about who you "purchased" drugs from. You didn't dispute the word "purchased" in your response back then. You didn't dispute "the normal way most people get their illegal drugs" in your response back then (bartering is not the normal way most people get their illegal drugs). Instead, you simply responded that you "bought" marijuana from your friends. And you used that word in the context of a discussion about where you "purchased" marijuana.

And, again, that is a direct contradiction of the following later statement made by you...

"I have never purchased marijuana
in my life. All the marijuana I have
ever smoked was offered and/or
given to me by my friends."

So, I repeat, the contradiction in your statements still exist.

And exactly where is "around here?" Your living room? It's not going to work, Cecil. You're simply not going to convince me that a Texan is too stupid to use the words "barter" when he means "barter," "bought" when he means "bought," and "purchased" when he means "purchased." And I know that you're not that stupid.

Don't push it, Cecil. I'm not forcing anything on you (so stop your endless accusations of fascism). What you wrote, in the context of that discussion, is what is now forcing that definition on you. No other definition fits that context.

You KNOW better than that. And you are gleeful that a minor functionary at the FCC now makes ALL decisions that affect every facet of ham radio, and his arbitrary output is rubberstamped by the comission as though it was the result of deepest deliberation.

Early on there might have been some question on why he was so hung up on the term "lid", but his constant and frequent useage of the term has removed all doubt- he knows all too well what a lid is, he looks at one in the mirror every morning.

Larry Stanton wrote:

> Funny, I've read about the 'devolving' of ham radio, in one form or
> another, in QST letters dating back to the 50's.

Yep, it devolved about 1951, as I recall, when someone at FCC decided that General class should have all amateur privileges. Wasn't but a very few years until that blunder was widely recognized, and the cure of Incentive Licensing went through the long process, but it took until 1968 to get it up and running. And they couldn't even do that right, as evidenced by the fact that all the old Class A licensees had privileges withdrawn, rather than being "grandfathered". So the entire affair left sour turned off the very large segment of hams who were the backbone of the hobby, and many pretty well gave up on the FCC, realizng that they are little but politically motivated bureaucrats who march to whatever is the beat du jour. Now the same song is replayed with a different note, and at least this time, no one lost privileges. What was lost has been in progress since before 1985. It goes back as far as a fellow named Dick Bash...

> Each successive
> generation of hams apparently thinks theirs is the last true great one.
> Funny how ham radio has remained stable for 40 years despite this
> apparent, continuing 'de-evolution'.

Stable??? you haven't been paying ANY attention.

> Care to explain how, despite
> this 40 years of apparent de-evolution, we've managed to more than
> quadruple the number of hams and increase our available bandwidth?

Numbers of licensees increased, yes, by making the requirements ever easier to successfully meet, such as publishing all the exact test questions with their exact answers, a gross violation of the basic principles of education if there ever was one..

But you are simply wrong to say that our bandwidth has increased. Not all that many years ago we once had ALL spectrum above UHF, and -well, just keep tuned, we are well underway to lose most everything above 2 meters before this 'wireless' auction feeding frenzy and all the Part 15 activity plays out.
I, for one, am not particularly sad to see a lot of it go, since before retirement I worked in engineering in public safety comms and know firsthand what problems are caused by congestion and difficulty obtaining much needed frequencies by non-hobby, serious users. LOTS of headaches and service compromising. Meanwhile just tune across our VHF and UHF bands- only in a few localities will you find any amount of activity AT ALL, much less enough to maintain all that RF real estate for hobby use alone. We've GOT to give some of it up. A LOT of it.

>
> I'd be curious how you think this is possible in the face of your

Cecil, if you can't think of anything intelligent to say, why say anything? To insist that because someone once squeaked by a 5wpm test that he "knows CW" is nothing more than a bad joke, when he makes it more than clear that he has no intention of ever even thinking about CW as anything more than that "hazing ritual" he had to go through. THAT's the joke.

You just dig your dumbass hole deeper with each posting. It *was* a big part of 20 years after my first license when I took and passed the General, Advanced and Extra tests at one sitting - at the FCC office, and that, friend, included 13 and 20 wpm code tests. Crawl back in your hole and play with your blasting caps.

Ed:

I don't know what you're on about here. I never stated or implied that growth, in any amount -- no matter how small -- was a bad thing. Unfortunately, the small amount of growth we've seen since Restructuring probably doesn't even cover the number of inactive and/or expired licenses that still populate the database. Growth in any amount is good, but in order for this growth to be meaningful in the way we want it to be -- to actually have more amateurs using spectrum that, at present, is sparsely used -- if at all. In order for this to be the case, we'd most likely have to increase our total numbers by at least a third over the next 3 - 5 years. And with our current growth rate at around .003 percent, I don't see that happening!

Dripschittfrench:

How do you know Richard is a lid? Have you ever heard him operate on-the-air? Remember -- this is Usenet, not ham radio. Nothing anyone says or does here counts one iota for or against whatever opinion one may hold of him as an amateur radio operator! Richard may be one of the best lids on the air -- or not -- but whatever he does on this newsgroup doesn't count toward any fair assessment of his "quality" as a lid! You don't see any of us calling you a "lid," do you Dripschitt-french?

<w4nti@nospammindspring.com> writes:

>
>That right there is what I've been saying for years. The FCC forcing of
>Incentive Licensing on the Amateur Community created a 'caste system'.

Dan:

I disagree. What the FCC did was to create a system in which radio
amateurs could progressively increase their operating privileges as a
reward for gaining greater knowledge and operating skill. The "incentive"
of the higher privileges motivated the learning and skill development.
The "caste system" you whine about is just the perception of lazy,
unmotivated, and jealous hams who did not see fit to bestir themselves
to regain lost privileges.

>One of the reasons I have KEPT my W4NTI callsign is because I see NO NEED in
>putting on a big head because I have an extra.

I know of very few Extra's who have a "big head" just because they *are*
Extras. I'm sure that, like myself, most of them don't really spend much
time thinking about their license class at all. Again -- it is the jealous,
malingering underachievers who have this perception, based on a
projection of their own unsatisfied desire for unearned privileges.

>I had all the SAME PRIVELDEGES back in the 60s until the FCC took them away
>and forced upgrades to REGAIN what was stolen.

If your poor spelling is any indicator of your preparation for ham radio
license tests, I can understand your frustration.

There were 75 words in the parts of his post you quoted. One was not spelled correctly. Aren't you being just a bit over-critical here, Larry? I have seen incorrectly spelled words in your posts and didn't think it important enough to call to the attention of a world-wide group of news readers.

I figured that either you didn't know how to spell a word or two or had made a typographical error. Recalling that your keyboard doesn't have a "1/4" key, I am sure you remember how easy it is to make a typo electronically.

The Report and Order contained a lot of deliberation, from what I saw.
Although I disagreed with some of what the FCC decided to do, I did not think
it to be arbitrary or undeliberated.

On what basis do you know that this minor functionary's work was arbitrary and
undeliberated?

I am sure Dick will answer for himself, but if you are making it easy on him to describe the elmering he has done over decades, I am sure he will do a good job.

Now, as a ham, I have not done any public-service operating over the past year nor have I individually elmered a new ham in quite some time. Care to comment on whether I am a worthwhile ham?

Suffering? Excuse me? Southerners are suffering to this day from the
negative attitudes of northerners? I have lived down here now for over 20
years and I can assure you I have witnessed no suffering from such as you
describe! In fact, when I first moved down here I went to work in a factory
that made all the interiors for the Bell Helicopters at the time. I was
chastised, ridiculed and downright insulted by most of the people there, but
stood my ground with them. One day, one of the womens' husbands came in to
have lunch with her in the lunch room. Of course, most of the rest of us
were there. This was when I'd been there for about three weeks. When
Barbara mentioned to her husband, as he was beginning to sit down on the
bench next to me, that I was a "yankee," he literally got up and moved over
to the other side of the table!

Northerners make just as much "fun" of accents as anyone else, Dwight. I cannot believe you are drawing such a parallel as this. We all make "fun" of peoples' accents. If it isn't a southerner, it's a Brit, a Laotian, etc. Just the other day we had one of our co-workers, a Cambodian I think he is, saying "Pham, Texas Ranger" and it was hysterical. We were all laughing our asses off in the elevator! Great fun!

You guys argue things in the strangest of ways. You turn what appears to be a debate on some historical event about slavery into a current day disgrace because the north and the south make "fun" of each other. I make fun of southerners all the time, and they make fun of me. Then, if there's a ferinner in our presence, we all make fun of them. I am constantly reminding my husband of my superior intellect to him due to his being a born 'n' bred Texan. :) :o It's too bad there's folks such as yourselves who are actually offended by it, because no harm is intended. Good grief. Suffering! Indeed.

Goodness no!! I'd say thinkers such as Dick are quite in the minority. But that's part of the problem, also. It is their desire to "hang on" to misery; their minds will never be changed. Let them have their delusions, because the rest of us are out here having a wonderful time with ham radio, and most are not even aware of the Dicks of the world, no pun intended.

Real men drive manual transmissions. If you don't drive a manual, you shouldn't be driving at all, and your drivers license should be revoked until you learn how to drive a manual transmission and dump your Buick for a real car, one with a manual transmission, hopefully a foreign car, to repent for your years of senseless patronization of the inferior American auto industry.

Your comments?

> procedures that would make you happy..... Please be specific.

Oftentimes my attempts at tongue-in-cheek drollness and mathematical allusions get too obscure even for the initiated. The four equations are, of course, Maxwell's equations. And the 'straightforward mathematical tricks' are the entire body of vector and tensor calculus. Furthermore, wading through the tons of college textbooks on those subjects would put one well on the road to a graduate degree in EE - obvious overkill for a ham radio license and, it was hoped, a humorous commentary on the "license tests are dumbed-down" threads.

I tend to be a fundamentalist in regards to licensing requirements. I believe those requirements should be continuously reviewed for relevance to the singular reason for licensing of any kind - to protect the rights of others. In my view, it is reasonable to ask that someone who is licensed to operate a 1500-watt transmitter that can be home-constructed and tuned to any frequency have a certain familiarity with radio theory and regulations. But it is unreasonable to require a high degree of skill using manual radiotelegraphy when there is no evidence that lack of that skill impacts other users of the radio spectrum.

^^

Then going by that logic why aren't there Packet and PSK and many of the other modes. Why is there much more detail like repeater operation (as in being the control op, and tech person responsible)? Gee, the *wonderful* (sarcastically) ARRL text books that are supposed to help teach us the theory barely touch on that for an example as well as other modes and methods.

That brings a point up..... I got slammed a couple times for using the Q signals on VHF/UHF ranges. If normal language doesn't provide for clear and understood communications, what is wrong with using a Q signal to clarify something? The only "10 code" that I haven't come up with a ham radio equivalent is the "10-100" one. LOL

I do have a hard time with one thing.... My job requires me to memorize the APCO 10-codes (slightly modified for our departments use) and the APCO version of alphabetic phonetics like Adam, Boy, Charlie, David etc.... and I catch myself "almost" using those on the ham freqs. Kinda, sorta like being bi-lingual in a sense.

I was willing to let it go but this posting of yours proves that you
are the one who has not gotten your fill of primroses.

Can you give me one good reason why I should give up my individual
right to choose the definitions for the words I use from the valid
definitions in the dictionary and allow you to become the fascist
dictator for my postings? Once again, here are the definitions that
I was using.

"purchase - to acquire with money"
"buy - to acquire through exchange"

Around Madison County, TX. You can go a year around here and never hear
the words, "purchase" and "barter". We use "buy" for both. Why use two-
syllable words when a one-syllable word will do. If you ever hear the
word "purchase" around here, it means "purchase with money". That's
why I chose "purchased" instead of "bought" in my statement. Why would
I deliberately choose to use two different words if they both mean the
same thing? BTW, don't those primroses smell sweet?

Of course, you're absolutely wrong about that, Dwight. The phrase
in your sentence that contains "purchased" is completely irrelevant
and I completely ignored it. Your assumption is false. I only responded
to your second phrase, "... what about the people you bought the
marijuana from?" That is a very common thing to do on a newsgroup.
So here is the real interchange in context. Anything else is attempted
obfuscation on your part.

> (snip) what about the people you
> bought the marijuana from? (snip)

to which I responded,

(snip) I only ever bought marijuana
from my friends. I don't know and
don't care where they got it. (snip)

Absolutely no mention of money and, of course, there was no money
involved as there would have been in a "purchase". Your assumption
of a purchase was false and therefore completely irrelevant.

> "I have never purchased marijuana
> in my life. All the marijuana I have
> ever smoked was offered and/or
> given to me by my friends."
>
> So, I repeat, the contradiction in your statements still exist.

I've explained away any possible contradition, Dwight, but you are
free to delude yourself all you want. Only I know what I meant.
Your attempted mind fornication is impotent in the face of the truth.
You need to find a different victim.

Your posted assumption was completely false, Dwight, and thus was dropped
from the context. You are simply obfuscating. I responded only to the
second phrase in your sentence, a common thing to do.

If I say, "Assuming corn is yellow, then peas are blue", and you say
"No, they are not", are you saying that corn is not yellow? Of course
not. If I argued that you said corn was not yellow, would I be right?
That's exactly what you are doing. Nice try, didn't work.

You said you weren't falsifying attributes, Steve. That was a lie as
everyone can see. You ARE falsifying attributes. If that is not illegal,
it is certainly highly unethical. Why do you falsify attributes?

You can wipe the egg off your face and answer a simple question.
Did you ever operate CW on the air at 5wpm? Virtually every HF
ham did.

Well Ryan I guess in your neck of the woods you have a smaloler ham community I my area the clubs I have been to have a large number of hams that will elmer new hams. We even have a large number of older hams there are very fast at CW that help with all sorts of events. One of them is 92 years old and one of the nicest hams you can meet. At least Hames like Bruce and Richard are not the norm.

I think the Civil War was started because the pirates who are operating on the bottom end of the 40 meter ham band make fun of yankees.

I think the Civil War started because the pirates that operate illegally on the bottom end of the 40 meter band used the word "barter" instead of "purchase" and the Northern States did not like that.

You are not in the same boat as Dick. You are open minded to having new hams come into the hobby. You do not look down on new hams because they will no have the opertunity to take a 13 or 20 wpm code test. When I started to study ham radio the study guide would recomend finding an elmer (older ham) the learn more about the technology. It would seem there is a group of older hams do not believe in that. In my club we have a very large number of old hams that are more then willing to tech the new hams, as such our club keeps growing.

I'm not sure what you mean, Dan.

> The FCC forcing of
> Incentive Licensing on the Amateur Community created a 'caste system'.

I think you mean "class system".

A "caste system" (like in India) is where people are sorted into social levels by birth, and there is no way to change an individual's assignment. An "untouchable" is always untouchable, a Brahmin is always a Brahmin, regardless of accomplishments or lack thereof. The individual has no say in the matter.

In a "class system", as it applies to IL, an individual can reach any class by means of accomplishment. Just pass the required tests. This is the fairest and most egalitarian form of system, because it is accomplishment-based.

Some people make the mistake of thinking that their class gives them some sort of right to look down on those who have not attained the same level. Such folks forget that they were once un-accomplished.

There was a class system in the ARS, before the 1968 changes called "Incentive Licensing". There were Novices, Technicians, Conditionals, Generals, Advanceds and Extras before 1968. There were very few Extras (maybe 4,000 out of a quarter million US hams) but quite a few Advanceds (40,000). There were actually only a few Novices at any give time (less than 15,000 at any time, because of the short license term).

Back then, some Extras looked down on everybody. Some Advanceds and Extras griped about the fact that anybody with a General or Conditional could operate in the "Class A" 'phone bands. Some Generals, Advanceds and Extras looked down on Conditionals because they hadn't gone to an FCC examiner. Some Generals, Conditionals, Advanceds and Extras looked down on Technicians because they had no HF back then, and had not passed 13 wpm. And some of all the other classes looked down on Novices, because they were beginners.

One heard stuff like:

"No kids, no lids, no space cadets, Class A operators only."
(kids=novices, lids=Generals/Conditionals, space cadets=Technicians

and SSB ops)

"If he can't see 'em, he can't work 'em". (a play on the old saw "you
can't work 'em if you can't hear 'em)

"Not a 'real' license" (said of Novices because their licenses were
not renewable).

Nothing new. A vocal few with a bad addytood. There's a few in
everything. But only a few.

Even Incentive Licensing was not new. It was a revival of the pre-1953
system. Everything old is new again. Like "wireless"...
>
> One of the reasons I have KEPT my W4NTI callsign is because I see NO NEED in
> putting on a big head because I have an extra.

Try working a contest or a pileup with a six-digit dash-filled moniker
like WA3IYC....(it's more than 50% longer than your call). I got N2EY
after seven years as an Extra to be more competitive.
>
> I had all the SAME PRIVELDEGES back in the 60s until the FCC took them away
> and forced upgrades to REGAIN what was stolen.

Join the club. I had all privileges for a few weeks after I passed my
Advanced in the summer of '68. Then I lost them. Big deal, another
test or two. The tests weren't THAT hard. Toughest part was getting to
the exam session.

The FCC changed the rules, that's all. Without using the actual words,
they admitted that their December 1952 decision was a mistake.
(Government almost NEVER admits a mistake with words).

What matters is what a ham does AFTER the license is in hand. That's
what's impressive, or not.

Of course it makes sense. Do you see any mention of slavery in the
following?

"That the executive will on the 1st day of January aforesaid, by
proclamation, designate the States and parts of States, if any, in which
the people
thereof, respectively, shall then be in rebellion against the United
States; and the fact that any State or the people thereof shall on that
day be in good faith
represented in the Congress of the United States by members chosen
thereto at elections wherein a majority of the qualified voters of such
States shall
have participated shall, in the absence of strong countervailing
testimony, be deemed conclusive evidence that such State and the people
thereof are not
then in rebellion against the United States."

I really don't think you can quite see the forest for the trees. I've
forwarded my quess as to why that might be, but you haven't been too
happy about it.

> The proclamation did not have to "make it clear" who was in
> rebellion - that detail was already widely known. So the proclamation
> was not about who was in rebellion in the United States.

I'm curious as to why you would have such an opinion? The proclamation
quite clearly delineates which states or portions of states are in
rebellion.

> Instead, the
> proclamation was solely about slavery in those states in rebellion.
> Nothing more. Nothing less. The entire purpose of the proclamation was
> to free slaves in those states in rebellion. The document specifically
> listed which slaves, in which states, were free. If a state was not

> state. Slavery in those remaining states was not abolished until the
> 13th Amendment.

Are you really suggesting that the Proclamation proves that Lincoln
intended to allow slavery in the non-confederate states? That's a

ludicrous notion.

Which are we speaking about, Dwight. You seem to keep shifting it. We have no argument about what happened in the South after the war. The point I thought we were discussing was prior to the war.

> By the way, why do northerners always make jokes about our southern
> accent? Do you really think we'll find it funny when you try to mimic

Using 'caste' is a play on words. Class is more correct, I agree.

My point is that Incentive Licensing caused a unnecessary split within Amateur Radio. Over time it has caused what we see today. Constant complaining and putting down 'lower' class operators.

And yes indeed it was going on before 1968. It was done to me in 1961. And it was done by those that were subject to the ORIGINAL incentive plan of class A land. I know about what happened then.

What is going on now is what went on then. Because of the 'class' system. This system needs to end.

I suggested years ago to the FCC that a single class of license be implimented. Then for additional privledges you have indorsements. For CW, Digital, SSTV, etc. The basic license would give you 200 watts on phone mode only. But I guess that was too simple.

Let's take a close look at what you said, Dwight. You, yourself,
in that sentence changed the context from "purchased" to
"bought". I inferred from that that you shared my beliefs
that "purchased" and "bought" can have different meanings.
After all, why would you use two different words that mean
the same thing? Why not just use one word twice?

I didn't respond to the first phrase in your sentence above but
if I had responded to your entire statement, it would have been:

I never purchased marijuana but I once bought (bartered) some
from my friends. I am still unsure how to use "bartered" in
a sentence. "Bartered from" just doesn't sound right.

The paragraph proves that the Proclamation contained a paragraph
exclusively about which states were in rebellion. It says nothing about
why the states were in rebellion.

You aren't drinking already today, are ya Cec?

How do you define "build"?

Does it include kits?

How about conversions of gear from other uses?

How about restoration of "basket case" equipment?

If someone buys a transceiver, power supply, antenna, tuner, mast,
cables, connectors, test equipment, accessories, furniture, etc.,
etc., and puts them all together into a working station, is that
"building"?

btw, I've built more receivers, transmitters and transceivers than I
have bought.

Source record: 17626
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

I tried several morse instruction programs for the PC both freeware and I also purchased a couple.
I found that Morse Tutor Gold was far and away the best....it took me all the way to passing my Extra Class CW test back in 1995 which then was still 20 wpm.....

I have no hard feelings for those that recently passed Extra at 5 wpm.....the requirements changed and so be it...code speed is - NOT - the measure of a Ham. IMHO it is communications skills , on-the-air courtesy to all that and a helpful attitude that marks an operator as one that has " True Ham Spirit "

Because your "definitions" only show up AFTER you have been "called" on
one of your posts and it's necessary to bail yourself out...AGAIN...from your
own web of stories that you seem to have a hard time keeping straight.

>"purchase - to acquire with money"
>"buy - to acquire through exchange"

Again...if you ever tried a weak excuse like that in court, they'd allow
you to "buy" your punishment with some of your remaining freedom.

Try again.

>That was a lie as everyone can see.

Is the content of the posts incorrect? Were the words NOT yours? Were
they NOT part/parcel of other posts you made...?!?!

If not, you are engaging in your "mind fornication" games, Cecil.

If the best you can do is make some allegation about a missing arrow from
a newsgroup reader, you have really sunk to the bottom in trying to hide your
own failings.

> You ARE falsifying attributes.

No, I am not.

> Why do you falsify attributes?

Why do you find it necessary to demonstrate in public that you ahve
nothing else to fall back on?

It really is embarrasssing, Cecil. You need to think about what you are
doing.

You're wrong, Steve. Intent is one of the major things considered
in a court of law. Given the above definitions, it is clear that
my intent was not to state a contradiction. Sorry.

I was apparently mistaken as to what the common-use meanings are
and that mistake is exactly what saves my statements from being a
contradiction. I assumed we all shared the same definitions for
those words. That assumption was apparently wrong.

> >Only I know what I meant.
>

I do NOT refuse to accept commonly accepted meanings to words. I assumed
the commonly accepted meanings that I use in everyday life here in rural
East Texas was true for the nation. Apparently, I was wrong about that
but a wrong assumption does not a contradiction make. Sorry.

To the best of my knowledge, my entire family has always been as
poor as the slaves were and some of them worked alongside the
ex-slaves as share croppers. Incidentally, some of the slaves'
lives took a turn for the worse after they were freed.

It proves the war was about rebellion. If the South had not rebelled,
slavery would probably have continued to exist past the date of the
proclamation. That conclusion can be drawn from the Emancipation
Proclamation applying only to the states in rebellion. So we are
back where we started. The Civil War was not about slavery, it was
about economics. As usual, follow the money.

The words that I spoke have been stolen from me by your false
attributions. The above attributions doesn't say who spoke my
words and indicates that I said nothing. Please fix those
false attributions, Steve. Someone who accesses Google/dejanews
in the future will think I said something I didn't say and won't
know what I did say. How would you like it if I falsified your
attributions?

> > You ARE falsifying attributes.
>
> No, I am not.

Yes, you are, Steve. The proof is there is black and white above.
If falsifying attributes is not a crime, it is at least extremely
unethical. What if I changed the attributes to make it appear
that you said something that you didn't say? You would be
threatening to sue me.

Rebellion and war are synonymous in this context, Cecil. Your
statement, quoted above, claims to prove a negative. You told me that
you can't prove a negative.

> If the South had not rebelled,
> slavery would probably have continued to exist past the date of the

You have the logic backwards. Slavery was a cause of rebellion, not a
result of it.

True enough - the result of no longer having a place to work which provids food and shelter. A similar kind of problem exists in countries that switch from socialist communism to democracy.

I (meaning me) was (meaning past tense) going (not meaning moving anywhere, but more showing intent) to (?) get (not meaning to retrieve an object, more meaning to become a part of) involved (meaning jumping in--in the colloquial of course) in (not literally in something, more a poor use of a pronoun; should probably use the word with--but, then I [meaning me] would have to define with) this (meaning this right here) discussion (loosely translated to mean the discussion taking place here (well, not here, more there--but), but (spelled with one 't' so not a part of the anatomy) it's (the contraction of "it is") just (not in terms of justice) too (used as a measure, not to but too, and not a number) difficult (meaning the literal translation of the word difficult).

The previous paragraph, which mentioned slavery, laid the foundation for that paragraph, Jim. You are again taking part of the document out of context to fit your opinion, and that is not an accurate way to view the document. The emancipation proclamation is one document, not individual pieces that can be cut and pasted to fit an individual's agenda. Instead, you have to read it as a single document with each piece of it dependent on the context laid out in the surrounding text.

> > The proclamation did not have
> > to "make it clear" who was in

> > in the United States.
>
> I'm curious as to why you would have
> such an opinion? The proclamation quite
> clearly delineates which states or
> portions of states are in rebellion.

You missing the point. You had said the sole purpose of listing the states in rebellion in that document was simply to define which states were in rebellion, which I said was wrong - that was not the true purpose of listing those states. The true purpose was to define which slaves, in which states, were freed by that document. In other words, the purpose of listing those states was not solely to define which states were in rebellion, but to define in which states the slaves

were freed.

> > Instead, the proclamation was solely

> states? That's a ludicrous notion.

In regard to that specific document, the emancipation proclamation, that was exactly Lincoln's intent. Again, we're only talking only about the emancipation proclamation, not Lincoln's intent in regard to slavery as a whole. That document clearly does only free slaves in the confederate states, which was exactly Lincoln's intent when he presented that document.

> the states were in rebellion.

Lets try a different tact. Why would that document need to list the states in rebellion if the goal was not to free the slaves solely in those states, Jim? If, as you say, that document was to free all slaves in all state, then why didn't it just say that - all slaves, in all states, are now free? Why go through all the effort to list the states in rebellion if the actual goal of that document was to free all slaves in all states?

For that matter, why distract from that important announcement (all slaves in all states are free) with a bunch of stuff about the states in rebellion? The 13th Amendment freed all slaves in all states using just 32 words. If it is true that the emancipation proclamation did the same thing as the 13th Amendment, why did Lincoln need to write several hundred words to do it?

And, for that matter, if the emancipation proclamation did indeed free all slaves in all states like you suggest, why was there a need for the 13th Amendment at all? Why write an amendment to free all slaves if the emancipation proclamation had already freed all slaves?

You can prove a negative when there are only two possible outcomes.
The war was either about slavery or it wasn't.

> You have the logic backwards. Slavery was a cause of rebellion, not a
> result of it.

Nope, economics was the cause of the rebellion. The Southern states
thought they had a right to choose their own economic system and
fought a war over it. Slavery was not a religion. Slavery was simply
a part of an economic system. Slave owners didn't want to lose the
economic advantage that slaves provided. Ending slavery was perceived
to cost the South so much money that they were willing to fight.
If ending slavery had not cost the Southerners some bucks, they
would not have been against it. Just like today. Follow the money
to figure things out.

So you're saying the events following the civil war never happened? Or that the south is one of most economically repressed regions of the country is just a coincidence? Or that the wages in the south are the lowest in the country is just a coincidence? Or that the mean family income in the south is the lowest in the country is just a coincidence? Or the fact that the southern states are on the bottom of the list when it comes to government aid programs (family assistance, college grants, etc) is is just a coincidence?

If you really want to see what I'm talking about when it comes to the attitude of northerners, take a trip up north and try to find a job. As soon as that employer sees that you were born in the south, and that your schooling was in the south, just watch how fast that door slams shut behind you (no matter how well qualified you are for the job).

We just went through that hell recently. Because of my job, we recently moved to Washington state. My wife received a pile of over thirty rejection notices, even though she has over twenty years experience in her chosen career field. Of course, only one employer made it clear what the real problem was - "we're not confident that your training qualifies you for a job with our company." The employer ignored the fact that she had years of experience (and two other degrees), and instead focused on the education she received from a southern school more than twenty years ago. In the end, my wife gave up and had to take a job that paid a quarter of what she was previously earning.

Am I saying that all northerners are like that? Absolutely not. Am I saying that all southerners are too polite to hassle others because of where they were born? Again, absolutely not. But, in the end, you cannot dispute the fact that the south is doing much worse than any other region of the country today.

>functionaries with secret agendas and ...

Riley Hollingsworth is an 11 meter operator that we "placed" in order to protect our operatives. That's why the majority of busts are only against licensed hams. The real kicker will be when you wake up one night and see a green slimy pod next to your bed and the face forming inside of it looks remarkably like your own. Come on Dick, admit it...you suddenly feel the urge to say "CQ CQ 11," don't you. We had a heck of a time loading those pods into the black helicopters...whew!

I figured you guys were in a playful mood, so I'd jump in. Hope that was alright? Hello, Dick and Ed, I hope you're both doing well. Take care and 73.

Mark

No, Cecil, that doesn't work. I know your reading comprehension is not that poor. I clearly prefaced the word "bought" with two explanations of what I meant when I used that word ("purchased...in the normal way" and "the way most people get their illegal drugs").

You responded using that exact same word without any dispute at that time concerning it's meaning. In other words, you accepted my definition of that word and responded to my question using that definition. You are not going to wiggle out of this now by trying to say that the word has a meaning other than what was clear to both of us at the time.

That is simply not true, Cecil. The definition of the word "bought" in that discussion was made very clear before you used it in your response. In the question you replied to, I clearly prefaced the word "bought" with two explanations of what was meant when that word was used ("purchased...in the normal way" and "the way most people get their illegal drugs").

You responded using that exact same word without any dispute at that time concerning it's meaning. In other words, you accepted my definition of that word and responded to my question using that definition. You are not going to wiggle out of this now by trying to say that the word has a meaning other than what was clear to both of us at the time.

> Anything else is attempted obfuscation
> on your part.

The first part of that sentence is not irrelevant, Cecil. It clearly lays out what was meant when the word "bought" was used. The word "bought" was prefaced with two explanations of what that word meant - "purchased...in the normal way" and "the way most people get their illegal drugs." In other words, the question asked was prefaced with two explanations of it's meaning.

And you answered that question using that exact same word without any dispute at that time concerning it's meaning. In other words, you accepted that definition and responded to the question using that definition. You are not going to wiggle out of this now by trying to say that the word has a meaning other than what was clearly laid out at the time.

But you did not challenge that assumption at the time. Instead, you answered that question with the assumption in place. Again, I prefaced the the question, and the word "bought," with two clear explanations as to what was meant ("purchased...in the normal way" and "the way most people get their illegal drugs"). You answered the question without any objection to that meaning. In other words, you accepted the meaning and responded in the context of that meaning.

No, you tried to wiggle you way out of this, hoping that I would just let it go at that. If you really want to end this, you obviously have three choices...

1. Admit to the contradictions.

2. Stop responding, leaving the contradictions in place.

3. Continuing until I get tired of the discussion.

Whatever the case, you're most certainly not going to end this by calling me a fascist. By the way, I absolutely love primroses - how sweet it is. ;-)

Ryan:

Post-Restructuring hams who became licensed without being aware
of the issues that lead to Restructuring are none the less the result of
a licensing system that is "dumbed down" by Pre-Restructuring
standards. They may not have had any choice in the matter, but the
effect on the perception of them as hams is still the same. Whether
or not they allow that negative image to be borne out by their personal
attributes as a radio amateur is entirely up to them. If they become
active, proficient Morse/CW users, and demonstrate the traditional
curiosity, learning ability, and technical competence, and sound
operating practices of a classic radio amateur, they will not suffer
personally from the fact that they ascended during the Post-Restructuring
era. If they act like ignorant, dumbed-down CB refugees, then they
will take the heat. It's entirely up to them. However, the one thing they
can never do is claim to have been licensed during a time when the
Amateur Radio Service had it's most comprehensive and challenging
licensing standards.

>implimented. Then for additional privledges you have indorsements. For CW,
>Digital, SSTV, etc. The basic license would give you 200 watts on phone
>mode only. But I guess that was too simple.

I like it! But it's actually much more complex. There would have to be an exam
for the basic license plus one for each endorsement.

Say we have the Basic license, then endorsements for Digital, CW, High Power,
Image, and Satellites. Right there we have at least six test elements, plus the
complexity of keeping track of who has what endorsements.

And you'd still have a class structure, because folks who had more endorsements
would be "higher class" than those who didn't.

Guys like me would simply get all of the endorsements so that we would have all privileges

No, Cecil, you missed the point. Dwight Stewart is right on the money. He found you contradicting yourself. All your lame excuses do is reduce your credibility even further.

>The argument is not over morals, ethics, or
>legalities.

Sure it is. Obtaining illegal drugs is a crime.

> The argument is over what I meant when I used the words
>"purchased" and "bought".

Same as Clinton saying he "didn't have sex with that woman".

>Only I know what I meant.
>
It's what you wrote that matters. Your claim that "bought' and "purchased" have significantly different meanings is totally bogus. Do you think the term "drug buy" can mean a bartering arrangement?

>"Dinner" for me does not mean the same thing as "dinner" for you.

You don't know what "dinner" means for me, unless you can read my mind.

I know quite a bit of regional slang and dialect. For example, I know the Aussie meaning of all the words of "Waltzing Matilda". Do you?

>In my
>mind, a "purchase" requires cash and a "buy" does not require cash.

Maybe. Or maybe you simply don't want to admit that ol' Dwight nailed your
contradictions bigtime.

It's what you wrote that matters. Your claim that "bought' and "purchased" have
significantly different meanings is totally bogus.

>That's
>why both statements can be valid.

Only in your mind.

Here's a shock for you - I agree with everything you said. I've never believed that it should be any more difficult than necessary to obtain a ham radio license. I do have one minor caveat hung on your last sentence, though. I also believe that, as advanced as technology is, there is more than ample evidence that it can and often does routinely fail in times of disaster, leaving those without more basic means of communications hanging in limbo. I have had that happen, and I mean at work as a public safety communicator, not on ham radio. Given the free use of the considerable spectrum that hams enjoy, it is not unreasonable to require them to be able to effectively use the most basic radiocommunications mode - CW- to some effective level of skill, and I agree that requiring high speed proficiency of all, or even most hams is wrong.
If the lone ham at work at the FCC making regulations for all of American ham radio has not the knowledge, intelligence nor intestinal fortitude to see to it that it is done, it won't be done. It seems he is easily swayed in other directions
As you well know, simple CW gear can and often is available when more sophisticated gear is not, and the enhanced ability, "CW can get through when SSB can't" is no secret to anyone who is interested in facts instead of agendas. If I'd had access to CW gear when our AT&T computer circuits (both main and backup) failed because (unknown to AT&T) they were routed through the same tower that a tornado took down, I would have used it. Instead our long disstance communications were out for three days with disaster traffic hanging unsent.
CW can be used with as simple a circuit as a single active device configured as an oscillator, and using that oscillator as a regenerative detector for a receiver. I know, what is the chance that such a need as this will come? Who knows? Seems remote, to be sure. So did a great many other ghastly occurances in the history of mankind, some not long ago. What happens if the overseas oil suppliers suddenly cut off the flow, or terrorists do it for them, and it STAYS off? Do you know? How long will all the high tech stuff keep working on vapor and dead generating plants? We just don't know what's coming or when. Seems everyone on the planet has a cellphone these days, me included. But when

you understand the cellphone system you know that the feeling of security it conveys is specious. Fore sure the Internet is in no better shape. Silicon Valley server farms hang on every report of rolling brownouts. Of course, hams should have available more sophisticated modern methods of communication than CW, but what about those will not, who are left, for whatever reason, with only CW capability available? Should they just be written off, how do we know what they need for how many people? This entire subject is anything but cut and dried as so many techies would have us believe. Solidly reliable technology is just not in place at this point in time, as advanced as it is. It's one thing to sit on your heated/airconditioned shack with commercial power ever at the ready and say ''CW is never needed anymore, and will never again be". Reality can be a real bitch, though.

If some of the rabid code bashers would have listened and read a little, rather than just jumping on the bandwagon in fully warpaint, they would have already known my feelings on this subject. But since I support some code testing for ham radio licensing, that was all they needed to classify me. Tough for them.

Yeah, the pirate operators who are operating illegally just inside the 40 meter band and interfering with amateur radio are rebelling against the US Government, the FCC, Blacks, Mexicans, Jews, and everything else. I think that is what started the Civil War.

> response. In the question you replied to, I clearly prefaced the word
> "bought" with two explanations of what was meant when that word was
> used ("purchased...in the normal way" and "the way most people get
> their illegal drugs").

But Dwight, you did not define the words you were using. I assumed
you were using the definitions above just like I was. It seemed to
me that you had changed the context when you changed the words from
"purchased" to "bought". I'm sorry that I misunderstood your meanings
but a misunderstanding is a long way from a contradiction. You certainly
didn't say that "purchased" and "bought" meant the same thing and at
that time it was my belief that they didn't mean the same thing. So
I believed that you had changed the context of the statement when
you switched from "purchased" to "bought". That belief was a mistake
on my part but was certainly not a contradiction. The definitions that
I had assumed are valid definitions from the dictionary. I had no idea
that a broader definition existed until I looked up "purchase" in the
dictionary long after this discussion started.

> You responded using that exact same word without any dispute at that
> time concerning it's meaning. In other words, you accepted my
> definition of that word and responded to my question using that
> definition.

But I thought that you, like me, were using different definitions
for "purchased" and "bought". After all, it doesn't make any sense
to use two different words that mean the same thing in the same
sentence. And since you didn't define "purchased" and "bought",
I assumed you were using the same definitions as I was. I apologize
for that misunderstanding. I didn't realize there was a misunderstanding
until I looked up "purchase" in the dictionary. I thought that everyone,
including you, used "purchase" to indicate something acquired by
payment of money. I was mistaken about that but a mistake is a long
way from a contradiction.

To summarize: Since you didn't post your definitions of "purchased"
and "bought", had never said that "purchased" and "bought" meant

the same thing to you, and had actually implied otherwise by using
those two words in the same sentence from which I inferred different
meanings, you are as much to blame for this misunderstanding as
I am. I was mistaken about the definitions you were using because
you didn't take time to tell me what those definitions were.
I admit to being mistaken about your definitions. But a mistake does
not a contridiction make.

If you had simply used one word two times in that sentence, this
misunderstanding would never have happened. It simply does not
make sense to use two different words that mean the same thing
in the same sentence. I inferred that because you used two
different words that you were changing the context from "purchased -
acquired by payment of money" to "bought - acquired through
exchange".
--
cheers, Cecil

Absolutely NOTHING in any post I ahve made that included quotes from YOUR posts is in any way, shape or form in doubt.

To assert that a missing < is somehow confusing is childish. I expect tyhat from the Left Coast...Not you.

>> > You ARE falsifying attributes.
>>
>> No, I am not.
>
>Yes, you are, Steve.

Cecil, life really IS that boring, isn't it...?!?!

You really CAN'T find anything MEANINGFUL to do so you make up some argument about arrows in a newsgroup reader to cover up your otherwise indefensible "arguments" about your illegal drug use and other such character weaknesses.

No one in this NG has any doubt about what's going on or who's saying it....Unless YOU would like to create some anonymous buddies like Lennie does to bolster HIS ego...?!?!

Try again.

> the normal way" and "the way most people get their illegal drugs").

You NEVER said "purchased" meant the same thing as "bought". In fact,
since you used those two words in the same sentence, I assumed that
they didn't have the same meanings and that you had changed the
context of the sentence from "purchased - acquired by payment of money"
to "bought - acquired through exchange". It doesn't make any sense at
all to use two different words that mean the same thing in the same
sentence.

You are trying to tell me what I was thinking. That's called
mind fornication, Dwight. Only I know what I was thinking.

> You responded using that exact same word without any dispute at that
> time concerning it's meaning. In other words, you accepted my
> definition of that word and responded to my question using that
> definition.

You did NOT define that word, Dwight. In fact, you implied that "bought"
had a different meaning from "purchased". If they had the same meanings
you wouldn't have used them both in the same sentence. Since you switched
from "purchased" to "bought", I assumed those words had different

meanings. What was the reason for switching words if they didn't have different meanings? Since you never published your definitions and implied a context switch when you switched words, you are partially to blame for my misunderstanding of what you meant. In any case, a misunderstanding is not a contradiction.

I thought about that but this sentence doesn't sound right either.

"I bartered oranges with my friends."

That sounds like we traded oranges for oranges. "I bought oranges
from my friends" covers an exchange of either money or goods and
sounded better in a sentence.

Message-ID: <3B865CBE.38804C20@IEEE.org>
Source record: 17707

N2EY wrote:
> No, Cecil, you missed the point. Dwight Stewart is right on the money. He found
> you contradicting yourself.

No, Jim, you missed the point. Dwight used two different words in the same
sentence that he says meant the same thing. I didn't think they meant
the same thing and thus assumed he was changing the context of the
sentence in the middle. It apparently was a mistake but a mistake is
not the same thing as a contradiction.

> Obtaining illegal drugs is a crime.

There's no argument over that, Jim. I don't know why you keep bringing
it up.

> It's what you wrote that matters. Your claim that "bought' and "purchased" have
> significantly different meanings is totally bogus.

It's not bogus, Jim, it was simply a mistake. I thought that "purchase"
meant to buy something using money. That's the way it is used in this
part of the country. I didn't know "purchase" had such a broad definition
until I looked it up in the dictionary after I had made the statements.
Since Dwight didn't define the words he was using, I assumed he was
using the same definitions as I was. That was a mistake but wasn't a
contradiction.

> Do you think the term "drug
> buy" can mean a bartering arrangement?

Yes, but when I wrote those statements I thought a "drug purchase"
could only be done with money.

> >"Dinner" for me does not mean the same thing as "dinner" for you.
>
> You don't know what "dinner" means for me, unless you can read my mind.

I assumed that since you are from 2-land, dinner would be in the PM.
Guess I should have said, "Dinner" for me may not mean the same thing
as "dinner" for you. I notice that you dodged the real answer.

> >In my
> >mind, a "purchase" requires cash and a "buy" does not require cash.
>
> Maybe. Or maybe you simply don't want to admit that ol' Dwight nailed your
> contradictions bigtime.

If you will go over the postings given what I believed to be the definitions
at the time of the postings, you will see what happened. I was mistaken about

the breadth of a definition but the definition I was using is a valid one
from the dictionary.

> It's what you wrote that matters. Your claim that "bought' and "purchased" have
> significantly different meanings is totally bogus.

I don't claim that anymore, Jim. But that is what I believed when I wrote
those statements. I was mistaken about the definition of "purchased". But
a mistake is a far cry from a contradiction.

> No, I completely GOT the point that you are trying to evade. You paid for
> illegal drugs. The rest is details.

I freely admit that I bartered for illegal drugs, Jim. You are confused if
you think that is the argument. The argument *IS* over the details.

> > I bought (bartered) marijuana from
> >my friends. I freely admit that it is the same morally, ethically, and
> >legally as paying money for it.
>
> Then what's the beef?

See, you admit that you are confused about the point of the argument.
The beef is whether Dwight is allowed to engage in mind fornication
and install a definition in my mind that didn't exist when I made
a statement.

> >What we are arguing over is the validity
> >of my statements involving purchased (for cash) and bought (bartered).
>
> "Buy" doesn't mean "traded". Sorry, Dwight gotcha.

From Websters: "buy - to acquire through exchange" Who got who?

> >"purchase - to acquire by the payment of money"
> >"buy - to acquire by exchange"
>
> Horsepucky.

You are saying that Webster's New Universal Unabridged Dictionary is
"Horsepucky", Jim. I guess you are entitled to that opinion.

> >Those are the definitions I was using when I wrote the statements.
>
> Nonsense.

I have never purchased marijuana for money. I bought some once with pizza.

> >In my mind, a buy can be a barter.
>
> Only in your mind.

From Websters: "buy - to acquire through exchange"

> > I bought marijuana from my friends.
>
> Say that to any number of English-speaking people, and they will think you paid
> money for it.

It could have been money but it wasn't. It was pizza.

> >I didn't purchase marijuana (for cash). I bought (bartered) marijuana
> >from my friends.
>
> Bull.

Nope, Jim, that is exactly what happened.

> >> >I didn't use the same word in both places for good reason. Each of those
> >> >words have slightly different meanings, at least to a Texan.
> >>
> >> Nonsense.

You are obviously ignorant of Texans. When do you have dinner, Jim?

> >I'm so glad that you are telepathic, Jim, so you can read my mind and
> >determine what definitions I was using when I used certain words.
>
> You say I'm confused and that I don't know what dinner is.

I have dinner at noon. It may be you who is confused, especially since
you don't even know what the argument is about.

> two explanations of it's meaning.

Not in my mind, Dwight. It doesn't matter to the argument what you meant.
What I thought it meant is what matters to the argument. I assumed that
you, like me, had different definitions of "purchased" and "bought".
Given that premise, you changed contexts when you switched from
"purchased" to "bought". There's no reason to use two different words
in the same sentence unless they have different meanings.

> And you answered that question using that exact same word without
> any dispute at that time concerning it's meaning.

As it turns out, I didn't know what meaning you were using. You NEVER
defined that meaning so you are partially to blame for the confusion.
I thought you were using the same meaning as I.

>
> But you did not challenge that assumption at the time.

I didn't recognize your assumption. I assumed something else.
I was mistaken but that's not a contradiction.

> Instead, you answered that question with the assumption in place.

Get real! How can the assumption be in place in my mind if I didn't
know what the assumption was?

> Again, I prefaced
> the the question, and the word "bought," with two clear explanations
> as to what was meant ("purchased...in the normal way" and "the way
> most people get their illegal drugs").

I did NOT understand that's what you were doing, Dwight. I thought
you were changing the context of the sentence when you switched
from "purchased" to "bought". After all, there's no reason
to use two different words in the same sentence unless they have
different meanings.

> You answered the question
> without any objection to that meaning. In other words, you accepted
> the meaning and responded in the context of that meaning.

How can I possibly object to that meaning when I didn't know what
the meaning was? Get real, Dwight. I made a mistake in definitions.
That is not a contradiction.

You're a madman, Mark. So who is "Dr. Miles Bennel" here? I don't think Kevin McCarthy is available to reprise his role. It was/is a good flick though and the remakes never quite captured the terror. It's funny how movies nowadays rely on gore and special effects whereas the older flicks stand on good writing/performances alone. (Hitchcock?) I've already welcomed you back, but I'll do so publically as well. Welcome back. (...to the NG.)

The ">"'s are not just alleged. They are a fact as can be seen
above. The ">"'s are the source of the misquoting.

Here's an example of what you are doing.

> Steve said:

> > Morse code is fun.

> > > Morse code sucks.

If I add a single ">" just as you are doing, it changes it from
you saying "Morse code is fun" to you saying "Morse code sucks".

> > Steve said:

> > Morse code is fun.

> > > Morse code sucks.

Now your posting is, "Morse code sucks." I have falsified the
attributes just like you are doing. Someone can dig the above
up out of Google/dejanews a year from now and "prove" that you
said "Morse code sucks." I do not appreciate you falsifying
the attributes for my postings. Please cease and desist.
People have been sued for less.

So you believe instead of making mistakes, I engage in word
ploys? Sorry to dissapoint you, Steve, but I make my share
of mistakes. It's not the first time that a word definition
has regional differences. When do you eat dinner? I eat dinner
at noon.

> >I do NOT refuse to accept commonly accepted meanings to words.
>
> Yes you do...or at least you take great liberty with your "definitions".

No I don't, Steve. I have accepted that "purchased" has a meaning
broader than I thought. The source of the problem is I thought
a "purchase" always involved money. When I said, "I never purchased
marijuana", I was using this definition of "punished - to acquire
by payment of money". At the time, I thought that was the only
definition of "purchased". But the point is that it *IS* a valid
definition of "purchased" and was the one I was using at the time.

Note: I did not use the word "purchased" anywhere in my earlier
posting.

1475. Dumbing Down and 5 WPM a Failure

Newsgroup: rec.radio.amateur.policy
Date: 2001-08-24 16:01:15 UTC
From: wa8ulx@aol.com
Message-ID: <20010824120115.27095.00008470@mb-md.aol.com>
Source record: 17719

In the newest AR Report: ARNewsline Report #1254 – August 24, 2001

IT says that all the 5 Wpm license has done is alloy existing Hams to upgrade and no significant new HAMS.

You should go read the Report in Detail. Arent we glad we got this Dumbing Down License System. All it has done is destroy, which once was a Good Service. A complete Failure. Way to go FCC, way to go NCI.

That's an obvious lie. You only have to look above to see that I
was not given credit for my posting. You have attributed my posting
to the person who replies to this posting. What is your ulterior
motive in screwing up the attributes?

> To assert that a missing < is somehow confusing is childish. I expect
> that from the Left Coast...Not you.

Those little ">"'s are extremely important in determining who said
what, Steve. It has been the standard convention on netnews for
years. Now you come along and screw it up. One wonders why.

Nope, I didn't say that, Dick. Slavery was indeed about money. That's why
the *cause* of the Civil War was economics, not slavery.

No name for the newsletter.

> It was authored
> by James Davidson and Lord Rees-Mogg who are also authors of "The
> Great Reckoning".

Never heard of any of them.

> They were afraid Clinton's alleged cocaine habit
> was going to affect the markets in one way or another.

Or maybe they hoped the rumor would do it.

Lessee, 5 years ago was 1996. Presidential election year. One has to
wonder if there was any connection.

Freedom of the press means that anyone with a press and careful
wording can say almost anything about a public figure and get away
with it. ("Unconfirmed anonymous White House sources said....") Rumor
and scandal are in big type on Page 1, retractions and corrections are
buried in the fine print on Page 37 - if they appear at all.

Did the story say how Clinton got the drugs?

>
> Does it include kits?
Yes if the kit isn't all soldered up already and aligned. You should
need to solder, align,use test equipment and (unless you are a perfect
builder) troubleshoot.
>
> How about conversions of gear from other uses?

Yes but the butchery inflicted on Mot, GE, Harris,Quintron and
Continental transmitters and on HP,Tek,IFR test equipment by _some_
hams is disgusting. Let's use quality workmanship and practices here
folks. If you can't do it and make it look factory, leave it alone.
>
> How about restoration of "basket case" equipment?
Not exactly but a worthy and good endeavor. Give 'em credit.
>

Yeah, the pirates operating illegally on the bottom end of the 40 meter ham band are rebels, I think they started the Civil War. I think the Civil War was all about the pirates operating illegally on the bottom end of the 40 meter ham band.

What's a quid? You're a LIer now, we have oysters too. Perhaps your thinking of NJ oysters...the ones that drip 10W-40 when you shuck em' open. There are plenty of good seafood restaurants in your new hometown. Stay away from The Steamroom Restaurant, (More like a cafeteria.) it's very expensive and the food's lousy. Top billing goes to Portico and The Village Way. BTW, I had some very good oysters in Atlantic City. :-) I've been to Seattle and I will concur with you about the oysters, not to mention the salmon. I'm a seafood freak and Seattle was very very good to me in 1996.

I guess since this is r.r.a.p., I should mention something about AR. Ladder line...good, no good? Is it better than coax? Will one incur less losses if the antenna is resonant and one uses ladder line?

At this point, I don't really.

And what I have said thus far is QUITE mild compared to much of what
transpires online. If I seem so forward, it perhaps reflects once
again the repression amongst much of Hamdom.

What's quite curious is when I started the thread, I mentioned a
smattering of topics which rarely seem to be discussed, and everyone
has seized upon only one - women.

Everyone immediately concluded that it's taboo - and the reasoning is
because it will get licenses revoked or some nonsense. That would happen
only if you went absolutely nuts and discussed them in
terribly obscene and indecent base, vulgar, sexual ways.

That's not how I intended them to be discussed on the air, but in your
minds I guess that's the only way to talk about them. Otherwise you
wouldn't be all biting your nails worried the FCC will come and get you
cuz you have nothing else to say about gals.

And you tell ME that I have the perv mind.

Hmmm. Here's the thing. Contrary to popular belief, the original
post in all this wasn't merely a troll, it was set of beliefs I
honestly felt to be true. And I've tried to step back in and
converse further on it - not just sit back and enjoy the aftermath.

It seems as tho - for such an overwhelmingly male population which
makes up the world of ham radio - it's without a doubt the most
asexual collection of males I've ever heard.

I don't expect it to sound like a 900 line, but it sounds pretty
outer-spacey to hear nary a mention of women.

Annnnd - when Connie Lingus is met with a series of "'huh'??????" then
perhaps the situation is even worse than I thought.

Dick,

Thanks for your cordial and thought-provoking reply to my posting.
As I wrote, my view of licensing policy is that it extends only as
far as protecting the rights of other spectrum users. Ensuring
the reliability of emergency communications, while a worthy goal,
is one that, in my opinion, lies outside the licensing process.

Yikes, Larry! Are you suggesting that we *nust* becaome "active,
proficient CW users" to cut the mustard? I've got the other parts down
pretty pat, I'm having a good time on psk31, am working on homebrewing
radio accessories, and am going to give sstv a try after a bit. I want
to try EME at some point. It's a little dissapointing that it looks like
I'll be a loser in yer eyes.

Is a ham who does 25 wpm and not much else better in your eyes than a
ham who does everything but? not trying to strawman you here, but I'd
like to get your position a bit clearer.

And don't get me wrong, I'm pro Morse code, I'm just surprised you
would narrow your zone of acceptability that much.

>It's funny how movies nowadays rely on gore and special effects
>whereas the older flicks stand on good writing/performances alone.

There's a fairly recent movie (Within the last 10 years.) with Sigourney Weaver and Ben Kingsley that is absolutely gripping. It's set in Weaver's house in South America and the entire movie is within the confines of a room or two within said house. I don't recall the name, but I'll try to look it up. Weaver was a former activist who is now married to a prominent political figure. (Himself, a former activist.) Weaver's husband encounters a stuck Kingley on the road while coming home one rainy night and the movie then revolves around Kingsley's past relationship with Weaver. You'll love it.

Thanks for the "welcome back," although we've seen each oyher at work already. :-) Take care and 73.

Still didn't answer the request..... If the fact of memorization bothers you or others, lets see the actual structure of this new effective testing method.

Gee.... memorization sucks apparently. We all need to uderstand the meaning of the colors in the color bands on resistors, not just to memorize the values. There is a TON of memorization necessary in ham radio. Isn't proficient morse operation basically memorization?

Ryan

The problem is that people say one thing and do the opposite. By that I mean, they may say they will be there to help you, but when you call them on it, they are no where to be found.

I harbor no ill feelings personally about anyone in this particular newsgroup. I just enjoy good conversations and debates. But of course things always seem to slide towards the insult direction. I may or may not disagree with someone, but I don't dislike them. Nor will I act like the CB'er mentality seen if someone says something bad to me in a newsgroup. Just shrug it off and move on is how I deal with it.

True, but they way I view this issue is, if you didn't even know Ham Radio existed or just plain unaware, then how are you going to be getting involved? (i.e. study, take test, get licensed etc.) Whoever, be it the ARRL, or other organizations, need to promote the hobby service, to get it into the spotlight to even get that glint of curiosity to find out more about it. I got interested about 16-18 years ago because I was into scanners and SWL'ing. At least there is a link between the two. I am sure there are some wonderful people out there that may have the aptitude towards this hobby service we belong to, but just aren't aware. I also didn't wait for someone to come to me either. I did the research myself.

Gee, maybe we should have our own troops of recruiters go door-to-door like the Jewhovas Witnesses or the Mormon boys on tenspeeds do?? (JUST KIDDING!)

When I was learning the code, I got an HF rig, power supply, antenna, and a Heathkit electronic keyer with capacitive "touch" paddles. Went from five to 20+ WPM in less than 3 months. Morse/CW is a two-way communication mode. Nothing works better than on-the-air operational practice. Try it. You won't be disappointed. Another hint: For best results, if your HF rig comes with a microphone, take it out to the back yard and bury it.

That is simply not true, Cecil. Read the sentence again...

Assuming that you purchased the
marijuana in the normal way (the
way most people get their illegal
drugs), what about the people you
bought the marijuana from?

Two things were INCLUDED in that sentence to make it very clear exactly what was being asked - "what about the people you BOUGHT marijuana from." To clarify exactly what the word "bought" meant in that question, it was prefaced with two explanations ("assuming that you purchased marijuana in the normal way" and "the way most people get their illegal drugs").

You did not dispute any of that at the time, which clearly suggests that you fully understood then what was being asked. Or are you now saying that you answered that question falsely back then - answered it without understanding exactly what was being asked?

> I have dinner at noon. It may be you
> who is confused, especially since you
> don't even know what the argument is
> about.

It seem to me that you're the one claiming confusion (and/or ignorance) in this discussion, Cecil. Hasn't you argument all along been that you were confused over the meaning of a simple, everyday, English language word (duh, they don't say it that way in Texas), so you didn't understand a simple question?

If we are to believe your argument that "bought" in Texas really means "bartered, not purchased with cash, then we can assume the only answer in Texas to the question, "I heard you bought a new car," is

"yep, I traded a cow for it." Sorry, but I don't buy it. Texans are not that stupid, and you're not that stupid.

Anyway, this will be the last night I will post messages concerning this aspect of the discussion (the contradiction). There is no reason to drag this out any further (besides, I'm sure others are getting bored with all this). But, before I leave, I want to leave you (and others) with a simple reminder - everybody makes mistakes (myself included), but that does not mean the mistake is a lie (a common accusation in this newsgroup recently). And that is my two-bit lecture of the week.

That is simply not true, Cecil. Read the sentence again...

Assuming that you purchased the
marijuana in the normal way (the
way most people get their illegal
drugs), what about the people you
bought the marijuana from?

Two phrases were INCLUDED in that sentence to make it very clear exactly what was being asked - "what about the people you BOUGHT marijuana from." To clarify exactly what the word "bought" meant in that question, it was prefaced with two explanations ("assuming that you purchased marijuana in the normal way" and "the way most people get their illegal drugs"). You did not dispute any of that at the time, which clearly suggests that you fully understood then what was being asked.

Finally, if we are to believe your argument that "bought" in Texas really means "bartered, not purchased with cash, then we can assume the only answer in Texas to the question, "I heard you bought a new car," is "yep, I traded a cow for it." Sorry, but I don't buy it. Most Texans know what the word "bought" means.

Anyway, this will be the last night I will post messages concerning this aspect of the discussion (the contradiction). But, before I leave, I want to leave you (and others) with a simple reminder - everybody makes mistakes (myself included), but that does not mean the mistake is a lie (a common accusation in this newsgroup lately). Two phrases were INCLUDED in that sentence to make it very clear exactly what was being asked - "what about the people you BOUGHT marijuana from." To clarify exactly what the word "bought" meant in that question, it was prefaced with two explanations ("assuming that you purchased marijuana in the normal way" and "the way most people get their illegal drugs"). You did not dispute any of that at the time, which clearly suggests that you fully understood then what was being asked.

Finally, if we are to believe your argument that "bought" in Texas really means "bartered, not purchased with cash, then we can assume the only answer in Texas to the question, "I heard you bought a new car," is "yep, I traded a cow for it." Sorry, but I don't buy it.

Anyway, this will be the last night I will post messages concerning this aspect of the discussion (the contradiction). No repeat of the two-bit lecture in this message.

Gee, I'm so sorry you won't be able to get into the Boy Scouts to play around with the little boys. At least in that organization, for the short periods they're participating in the activities, those boys will be relatively safe from people like you. At least in that regard, we can all thank the Supreme Court for it's occasional good sense.

>
> Mark

Hmmm...
Mark Pearsal -- named Persal after his father? Most of us were
named after someone who may now be deceased....Its traditional.
...with all due respect...So what? As you say ...nothing wrong with
that.

Do you know that the telephone was not invented by Bell? Its
invention (analog audio over wires)was predicted by Helmholtz, the
German physicist and developed in Germany? BUT the private use of the
telephone spread much more rapidly in the USA than it did in Europe.
That is because the telegraph was well extablished in Europe and owned
by governments just like the post offices. The governments in Europe
did not want the telephone to compete with the existing telegraph!
The telegraph was seen as a formal business communication device for
sending hard copy messages before there was FAX. The private use of
telephones was not considered important in Europe at first. Even in
The USA they clung to the telegraph longer than necessary. I can
remember when I was hired by various American companies, they sent me
a Western Union telegram to officially document my being accepted.

TH TELEGAMS WERE FULL OF ERRORS STOP

Now cellular phones are more commonly used in some parts of Europe
than they are in the USA! The USA is no longer the world technology
leader that it once was! Progress can be slowed by politics,
economics, hobbies, and Luddites.

Doesn't AT&T still stand for American Telephone & TELEGRAPH, even
though the telegraph is now commercially obsolete? Just remember that
Kodak stands for nothing..The name Kodak means nothing. It was
selected because it could be pronounced in all languages and was not
being used by any other company.
There are no grapes or nuts in Grapenuts either.

Hams need MORE license classes.

I see that you, like Steve, need a logic lesson. "Assuming" logically
means the same thing as "if" and falls uner the rules of logic. The
"assuming" part was false and thus could be ignored. I ignored it.
I only responded to "... what about the people you bought the
marijuana from?"

> Finally, if we are to believe your argument that "bought" in Texas

> Texans know what the word "bought" means.

You simply don't understand. Here in Texas, "bought" means "acquired
through exchange". The exchange can be either money or something else.
Purchased means acquired by payment of money. (It's in the dictionary).
"Purchased" and "bought" overlap. "Bought" and "bartered" overlap.
"Purchased" and "bartered" don't overlap.

> Anyway, this will be the last night I will post messages concerning

Larry...
There was a segment of "Sixty Minutes" devoted to this subject. Why
in the world would the Iraquis harm Kuwatti babies? I tend to believe
" Sixty Minutes" in this case. The woman who was responsible for
starting the false propaganda admitted that she was a liar. I believe
she originally lied in the U.N.

Yep...Propaganda can easily work on most people....even you Larry. I
don't blame you entirely because you probably don't watch "Sixty
Minutes". Read what social psychologist, Stanley Milgram wrote about

the subject of propaganda in general. I myself am surprised by the books that are now coming out about lies envolved with the Viet Nam war...I mean police action. The authors of the books admit that they did not have the guts to inform the press or the public about the real truth...because if they did they would be considered traitors.

73,
Bob Wex w2ilp (Ignore Lying Propaganda)

I replied, I didn't purchase marijuana in the normal way (implied)
I bought it from my friends. Buying it from my friends is obviously
NOT the normal way. What is it about that that you don't understand?

> Two things were INCLUDED in that sentence to make it very clear
> exactly what was being asked - "what about the people you BOUGHT
> marijuana from." To clarify exactly what the word "bought" meant in
> that question, it was prefaced with two explanations ("assuming that

The "assuming" part is false so there was no reason to respond to it.
My response implied that the first part was false.

> You did not dispute any of that at the time, which clearly suggests
> that you fully understood then what was being asked.

My answer implied a "NO!" My friends are NOT a normal way to obtain
marijuana. Why are you having such a comprehension problem?

> It seem to me that you're the one claiming confusion (and/or
> ignorance) in this discussion, Cecil. Hasn't you argument all along
> been that you were confused over the meaning of a simple, everyday,
> English language word (duh, they don't say it that way in Texas), so
> you didn't understand a simple question?

It is true that I was ignorant of the breadth of the definition of
"purchased" but the definition I was using is in the dictionary. I
admit I misunderstood what you meant but that does not indicate a
contradiction.

The pirates operating illegally near the bottom end of the 40 meter ham band don't have any friends to sell them marijuana so they tried to purchase, buy, purloin, acquire, obtain, barter for, from some Yankees. I think that had something to do with starting the Civil War.

Actually, the story was reported by more than "60 Minutes," Bob. In addition to that, I saw several reports about it on other news programs. As I understand it, the woman was not a nurse at the hospital as was first claimed, but was instead a relative of the Kuwaiti royal family. Furthermore, according to the reports, the staff at the hospital was able to account for all of the babies following the conflict (all alive and well).

It was great propaganda, but it was also completely false.

According to the Christian Bible...
Jesus was a Jew. The first followers of Jesus were Jewish, as were the appostiles. Jesus was accepted as a Jewish leader (Rabbi) by the Sanhedran...which was a Jewish religious court...However he was NOT accepted as a G-d. At the last supper (a Jewish Passover dinner) Jesus spoke. He was turned over to the Romans who controlled Palestine at that time by a single Jewish man who had heard Jesus at the last supper. That man was Lazerus. That man did not know what the Romans would do to Jesus; he just wanted to collect a reward for turning Jesus in. None of the other Jews at the last supper were responsible for helping the Romans crusify Jesus. Some of them were his followers. Read the New Testament (Christian Bible) and then tell us who was responsible for making Jesus a martyr. There is no reference to Jesus in the Old Testament which is shared by both Jews and Christians, although some people say that the Old Testament predicts the coming of Jesus or a mesiah.
The Moslems believe that both Moses and Jesus were great prophets...but that there is no G-d save Alla.

I dunno...So don't blame me. I wasn't there and I did not benefit in any way for doing what Lazerus did. Heck there must be more logical reasons for hating us Jews....that is if you feel that you must hate Jews.

Hams need more license classes.

73,
Bob Wex w2ilp (Israel's Lost Phrophet?)

The Jew of antiquity cannot tell a story in any other

way than mythically, for him an event is worth telling
only when it has been grasped into devine significance.
--Martin Buber "On Judaism"--

Spring Time for Hitler and Germany.
--Mel Brooks "The Producers"----

In my humble opinion the Christian Bible was written
(but not proof read) by ancient Jews. The few Jews,
who could read it might have became Christians.
In more recent times a Jew named Irving Berlin wrote
"G-d Bless America" and "I'm Dreaming of a White Christmas".
Mel Brooks, another Jew, wrote "The Producers".
I guess Jews will write whatever they can sell, just
like most savvy authors. I couldn't be a successful
author because nobody would want to read my sarcasm.
I dunno why being Jewish hasn't helped me much.
Not many Ham magazines will publish my poetry. ({:o))

I don't need a lesson in junk logic (logic based on a false premise). You need to take another look at the definition of the word "assuming" in this context ("taken for granted; a given").

> You simply don't understand. Here in
> Texas, "bought" means "acquired

No, you want to ignore that NOW because it proves that you posted two statements that contradict each other. This (what you saying now, not the original contradiction) is all about credibility, Cecil. How can anyone in this newsgroup ever believe what you say if all you say is subject to change whenever it fits your needs? Can the meaning of anything you say be taken for granted as the truth if it can be changed whenever you want to apply a new definition to fit what you're saying at the moment? At this point, the answer is obviously not, which means what you say has no credibility behind it whatsoever. A simple, "Sorry, I made a mistake and posted a contradiction," when this all started, would have left your credibility intact.

Hi Dwight,

It's been a while, how are you? I'm curious, how did you find out that it was false? You see, I caught the initial report but never any subsequent to that. You can reply here or by e-mail. Thanks. Take care and 73.

Mark

Here we go again.

Cecil, I have come to realize that you have some really significant social skills deficits, the least of which are your pro-drug advocacy which presents a claer and present danger to your community.

Again, you are "obfuscating". You can't defend your "position" so you generate THIS thread of silliness.

Too bad...all that education MIGHT have done something constructive.

Guess it went up in a puff of pot smoke.

My reply implied a dispute, Dwight. Too bad you missed it. I said,
"I only bought marijuana from my friends". The implication clearly
was, "No, I only bought marijuana from my friends."

> Hasn't you argument all along
> been that you were confused over the meaning of a simple, everyday,
> English language word (duh, they don't say it that way in Texas), so
> you didn't understand a simple question?

Yep, that's right. Nobody's omniscient. Everybody is ignorant of
some definitions.

> If we are to believe your argument that "bought" in Texas really
> means "bartered, not purchased with cash, ...

Please stop the obfuscation, Dwight. I never said that. I said that
"bought" can mean either "bartered" or "purchased with cash". I wasn't
confused about the definition of "bought". I was confused about the
definition of "purchased". I thought a purchase required money.

> But, before I leave, I want to leave you (and
> others) with a simple reminder - everybody makes mistakes (myself
> included), but that does not mean the mistake is a lie (a common
> accusation in this newsgroup recently).

Sorry to disappoint you, Dwight, but I seem not to be the only one
having a problem with definitions. From Webster's:

"lie - an untrue or inaccurate statement that MAY OR MAY
NOT be believed true by the speaker."

Ergo, many mistakes ARE lies especially if they continue to be uttered
after the utterer has been corrected. So you are lying about what went
on in my mind even if you delude yourself into believing otherwise.

I thought I knew what the word meant. I was surprised when I looked
it up in the dictionary. It was an honest mistake, not a contradiction.

Please fix your attributions.

The dispute was clearly implied. I said, "I ONLY bought marijuana
from my friends." The implication clearly was, "No, I bought marijuana
from my friends." The word "only" clearly indicates I was disputing
what you said.

The word "only" in my reply is clearly a dispute, Dwight. I didn't
say, "I bought marijuana from my friends." I said, "I ONLY ever
bought marijuana from my friends." The meaning is clear. I was
disputing what you said.

> Palestine at that time by a single Jewish man who had heard Jesus at
> the last supper. That man was Lazerus. That man did not know what
> the Romans would do to Jesus; he just wanted to collect a reward for
> turning Jesus in.

Perhaps you meant Judas? I am not familiar with this version of Jesus'
last dinner. The official transcript was that Judas was enticed by Pilot
for 30 pieces of silver and was paid in by Pilot in view of the city for
betraying Jesus, hence the term "Judas" referring to someone who betrays
a trust...

It is an obvious lie, Steve. Anyone can look above and observe the
screwed up attributions. In case you don't know the definition of
a lie, here it is from Webster's:

"lie - an untrue or inaccurate statement that may or may not be
believed true by the speaker"

Why don't you just fix your attributions? What is your motive in
screwing up the attributions?

Geez, you still don't get it. It was a joke, Ryan.

I have nothing against memorization. As others have pointed out, a substantial part of each exam - frequency allocations, other rules & regs - can only be handled by memorizing the numbers. And the "analytical" parts are best handled by memorizing formulas, such as Ohm's law, and then manipulating them algebraically until solving for any term in the expression becomes second nature. It has been my experience with "novice" broadcast engineers (six-week wonders from 1st-'phone license mills) that memorized "right" answers can be a springboard to real understanding of radio theory.

Learning Morse code reception might be characterized as "memorization", but in a part of the mind that is very deep in the unconscious and close to reflexes and that sort of thing. If you think about what you're hearing in Morse code, you're dead in the water.

No, it doesn't. It deceives people. "Bought" in this context means "paid money
for" to everyone but you, Cecil.

Then there is the definition of "bought" (derived from "bought the farm") which
means "to die" as in "He bought it".

>folks. If you can't do it and make it look factory, leave it alone.

I disagree. If we expect perfection in all ham projects, people will be
intimidated. When a kid first gets a coloring book and a box of crayons, we
don't say "Unless you can stay inside the lines perfectly, leave it alone".
Sure, some folks can turn out a nice job the first time, but others need to
develop their skills. Developing skills is the name of the game.

Experience varies directly as equipment ruined.
>>
>> How about restoration of "basket case" equipment?

> Not exactly but a worthy and good endeavor. Give 'em credit.

Been there, done that.
>>
>> If someone buys a transceiver, power supply, antenna, tuner, mast,
>> cables, connectors, test equipment, accessories, furniture, etc.,
>> etc., and puts them all together into a working station, is that
>> "building"?

Why not? Often the work involved in setting up an elaborate station and getting
it to function correctly exceeds the work required to build a simple
transceiver.
>
> Points given for writing new firmware for existing equipment though.
>6800 Assembler is not that esoteric folks!

Agreed - but not all rigs use it!

Building stuff is part of ham radio, but it's not the whole picture by any means. Our licenses are for operating, not building stuff.

Marijuana use skyrocketed during Prohibition. It was outlawed in 1937
but the Supreme Court overturned that law in 1967. Wonder what happened
to all the people who went to jail during the time that unconstitutional
law was in force?

>a trust...
>
Not exactly.

The high priest wanted Jesus out of the way. Judas, one of Jesus' disciples, betrayed Jesus for 30 pieces of silver.

But the high priest could not execute anyone - only the Romans could do that. Pontius Pilate was the Roman governor. He knew Jesus was not really guilty of anything, but he didn't want a riot on his hands, so he literally washed his hands of the affair and Jesus was executed.

Why did Judas do it? Some say for money, but a more logical answer is that Judas thought Jesus would perform a miracle in front of the high priests and be recognized as the messiah.

>about economics.

It was about the economics of slavery. Freeing the slaves was essentially the returning of stolen property (the slaves' lives) to the rightful owners (the slaves themselves).

>

Bruce:

I will not be participating in any such rally. I thoroughly agree with the Supremes decision, and support it fully. I have nothing personally against homosexuals, however, and feel that if you wish to have scouting-like activities available to homosexual boys and girls, then you have every right to form your own scouting-like organization outside of the auspices of the Boy Scouts of America. I realize that homosexuality is as old as man, but a cursory examination of the form and function of male and female anatomical design will disclose the truth that homosexuality was not meant to be the "normal" lifestyle for our species. Homosexuality is an abnormality of the human mind, not a normal way of human life. I have no problem with homosexuals grouping together to provide scouting activities for homosexual boys, but I don't want them in the same tent with one of my 14 year old nephews -- for the same reason I don't want teenage heterosexual males in the same tent with one of my teenage nieces. In other words, I will "tolerate" your abnormality, but I will not tolerate you forcing it upon others in order to advance your self-serving political agenda.

> Yikes, Larry! Are you suggesting that we *nust* becaome "active,
>proficient CW users" to cut the mustard?

Mike:

Yes, you nust becaome an active, proficient CW user to cut the mustard.
In order to become a well-rounded radio amateur, you must become
reasonably proficient at CW, with 20 WPM being the traditionally
acceptable standard. It has been proven that people from all walks of
life can achieve this level of proficiency, so you should not have any
problem.

>I've got the other parts down
>pretty pat, I'm having a good time on psk31, am working on homebrewing
>radio accessories, and am going to give sstv a try after a bit. I want
>to try EME at some point. It's a little dissapointing that it looks like
>I'll be a loser in yer eyes.

I don't recall saying that you, personally, were a loser. Keep one thing
in mind -- EME is almost always done in CW -- albeit at very slow speeds.

> Is a ham who does 25 wpm and not much else better in your eyes than a
>ham who does everything but? not trying to strawman you here, but I'd
>like to get your position a bit clearer.

Nope. A ham who does 25 wpm but not much else is not better or worse
than any other ham. However, I believe in and support the notion of radio
amateurs having proficiency in CW, in order to exploit the many benefits
and advantages of that mode. Therefore, I would not condemn him if
that's all he's doing.

> And don't get me wrong, I'm pro Morse code, I'm just surprised you
>would narrow your zone of acceptability that much.

My "zone of acceptability" is pretty broad, but it demands that a person who wishes to be considered a well-rounded ham have some useful communications skills other than passively yakking into a microphone. Morse/CW really does "get through when all else fails" in spite of the wishful thinking of those
who call this a "Morse myth." I have had the robust qualities of this mode proven to me over and over again during my 20 year ham career. I am a "True Believer." My postings in this newsgroup will always reflect this.

>> will take the heat. It's entirely up to them. However, the one thing they
>> can never do is claim to have been licensed during a time when the
>> Amateur Radio Service had it's most comprehensive and challenging
>> licensing standards.

> Well, I guess we'll just have to live with the shame! (big grin)

I never said it was a matter of shame, but you certainly will have to live with the lack of distinction as an Extra class ham compared to those of us who achieved that status in the Pre-Restructuring era. However, how you, personally, are perceived as a ham depends entirely on what you do and how you do it. My opinion is my own; it is not the only one, and I don't insist on blind agreement. I offer it merely to set an example.

Absolutely! The discussion of a wide range of topics in this newsgroup is a tradition that goes back years. And that should not be overly surprising considering that this is one of the few newsgroups where ham operators can talk to other ham operators about these issues (do remember that we have more in our lives than just radio).

Of course, if these discussions really bother you, you are certainly free not to participate. There are plenty of other threads in this newsgroup that center solely on radio discussion. Ignore these threads and participate in those others instead.

Take care, GH.

No, slavery was just an easy target. If slavery had not existed,
Lincoln would have found something else to use against the confederacy
and we would be arguing about that today instead of the slavery issue.

Used to be true, but not any more. Digital signal processing will get
through when the signals are literally not audible to the human ear.

If Morse was the best mode for weak signals, NASA would be using it to
retrieve data from their deep space probes. They don't.

In this day and age, brass pounding skills are waning; keyboard skills
are on the rise. Might as well spend one's time learning something
useful outside ham radio as well.

Sorry for the mistake. All you pirates look the same to me. It might help matters if you guys shopped at different stores, trimmed those sloppy beards, and stopped wearing those silly, out of date, swords. And finding a woman might do wonders for your disposition (I think you've all spent way too much time with those cannons). ;-)

Sorry for the misleading closing comment, Mark. I was agreeing with
Bob Wexelbaum's comment about the earlier reports of babies being
killed in Kuwait. It was great propaganda, but, according to the later
reports, it was also completely false. And, to my knowledge, nobody
has come forward to this day with evidence to dispute those later reports.

It certainly makes sense given your attitudes toward newcomers.
When my three year old grandson gets his ham license, you are
obviously going to look down on him. He's going to ask you, "What
did I do to deserve your low perception of me? I had absolutely
no choice except to meet the requirements existing in 2020."

So when all other modes fail on 10m at the low of the sunspot cycle, CW
still gets through? Dream on, Larry. BTW, PACTOR II gets through when the
CW signal cannot even be heard.

Note the attributions in this posting. There is no ">" by your name
which means that all of the text containing one ">" was written by
you. My initials, CAM, have one ">" before them indicating that
everything containing two ">"'s was written by me. This is the
standard that netnews has used for more than a decade. Steve has
chosen to violate that standard which, in my mind, is unethical.

If Steve had posted this instead of you it would look like this:

> > CAM wrote:
> > Please fix your attributions

That indicates that I didn't write the next sentence and instead
wrote everything starting with three ">"'s. When someone accesses
Google/dejanews a year from now, my attributions will be false.

Since Steve is originating the false attributions, I think he, as
the perp, should be the one who fixes them. Why should I have to
fix Steve's attributions every time I reply to one of his postings?

Cecil,

In case you haven't been paying attention to other parties in here, there is nothing wrong with my "attributes". I did not think there was, and now I am sure. They stand as they are.

I can only assume that your repeated assertion that I am acting "unethically" is an attempt by you to intentionally libel. This applies to your assertions of lying.

I can only guess at YOUR reasons for this twist. Mostly it stems from your assertions of having NOT said something only to have it spoon fed BACK to you...not just by me but by others who seem to realize that you cannot seem to keep your own stories straight.

I again redirect your attention to the fact that I am not the only one herein who finds your frequent "assertions" to be lacking in merit. And I am not the only one who continues to find CONSTANT contradiction in your own stories.

You are the only one who seems to think this is normal behaviour.

Personally, I think it was due to too much pot. But then I am just guessing.

You can simmer and stew all you care to about "attributes", but they are without error and accurately reflect what you said. Period. Anything else is merely a sham by someone who should know better.

You used to be one of the few voices of moderation and wisdom in here, Cecil.

What happened?

> What's wrong with Steve's attributions, Cecil?

There's nothing wrong, Dwight. More than one person has started to notice the inconsistencies and errors in his posts, and his only way to deflect those errors from himself is to find a way to redirect the attention to someone else.

You are not the first one to make the same observation. I have gone back through as many of his posts as I could stand and find nothing wrong.

Cecil states that the dropped "<" somehow constitutes unethical behaviour.

Yeah....right.

What it "constitutes" is an attempt by him to redirect the burgeoning tide of "You're Wrong-itis" he's been getting from myself and others.

>Besides, since just
>about every newsreader does it slightly different, it's not like there
>are hard rules in place for this.

Hard rules would constitute facts, and facts are not his strong point.

Oh, I see what you're fussing about. You're right, the norm today is to have nothing in front of the last quote, but there are a number of newsreaders that still add something anyway. It wasn't always that way. I can remember the big fight over quotes about six or seven years ago (what to add before that line, what character to use for quotes, or to simply use quotation marks). Since there was no real authority to decide, the present system just slowly developed over time to what we have today.

>retrieve data from their deep space probes. They don't.

Hmmm....I wonder why, then, the very recent and very well published exercise wherein Amatuers were asked to track a deep space probe that was sending telemetery back in Morse?

It was a combination, no doubt, of exercises to determine whether Morse was efective and wether we had the capabilities to accurately receive those messages...?!?!

Kinda like the scene in the move "Arrival" where Charlie Sheen's character used a lashed-up neighbor hood interferometer system to listen for his deep space signals...?!?!

Definately some Hollywood fiction, there, but I wonder if a volunteer SETI type operation like that COULD hear those signals like that?

Sure would put NASA to shame if a bunch of Amatuers with home reception gear beat them to the punch, huh...?!?!

Well, yeah. A minority of the popultation literally OWNING a majority of the population (as was the case in South Carolina, for example) is a pretty obvious wrong that needs to be righted.

The amazing thing is that it took so long.

>If slavery had not existed,
>Lincoln would have found something else to use against the confederacy
>and we would be arguing about that today instead of the slavery issue.
>
No.

If slavery had not existed, the confederacy would not have existed.

What Lincoln gradually came to understand was that the main reason for the economic/social/political division between the states that wanted to secede and the ones that didn't was slavery, pure and simple. The divisions had come about BECAUSE of the widespread existence of slavery in the states where it existed. This is why a few states where slavery existed but was not very prevalent (like Missouri) did not try to secede.

Think about this: Where is Fort Sumter? What was the % slave population of that state in 1860?

While not disagreeing with your thesis, Jim, Missouri is not a really good example. The Civil War was in full bloom in parts of Missouri from 1856 on when the whole 'bleeding Kansas' thing got going. What was weird was the geography: Mark Twain country in the Northeast (still called Little Dixie) was pro-Confederate while Southwest Mo around Springfield was definitely Federal territory. Look on your trusty Rand-McNally along I-70 between STL and Columbia and you will see Kingdom City, once the seat of the Kingdom of Calloway which seceded from everything and shot both sides on sight.

One person Harry Truman could not handle was his mother-in-law. When he came from the National Guard drills to court Bess, he had to change out of his uniform in the outhouse; mama would not let a federal uniform in the house.

One of Grant's early campaigns was to take and defend the Federal Arsenal at St. Louis. Had this fallen into rebel hands, the war might have taken a far different course.

Steve you HAVE chosen to violate the attributes standard.
Ask anybody who knows. Would somebody Steve trusts please
alleviate his ignorance about attrubutes?

Then you are choosing to violat netnews attribution standards.

> I can only assume that your repeated assertion that I am acting
> "unethically" is an attempt by you to intentionally libel.

The truth is defense against libel, Steve. IMO, anyone who violates the
netnews attribution standards is acting unethically. Falsifying quotes
anywhere else is illegal.

> You can simmer and stew all you care to about "attributes", but they are
> without error and accurately reflect what you said.

Steve, please have someone you trust alleviate your absolute ignorance
on this subject. You are the one who is falsifying attributes. By doing
that you are the perp and I, and others, are the injured parties.

One more note. Ed Hare had the same attributes problem with that
newsreader. I pointed it out to him and Ed changed the attributes
to match the netnews standard because Ed holds himself to a high
ethical standard.

>
>Please Cast your Vote ......

Not me. I use an Icom IC-735 (160-10m coverage w/general coverage receive) as my primary HF rig, with an Icom IC-730 (an earlier version with 80-10m coverage and no gen. coverage receive capability) as my backup. The only reason I have the '730 is because I was able to steal it off the consignment shelf of a local ham radio store in virtually new condition, with matching PS-15 power supply, for $350! I had previously owned an IC-730, put thousands of CW QSO's on it in seven years, sold it to a friend for $500 -- *without* the PS-15!

Single-band 10m rigs seem to me to be geared to two groups -- terminally microphone-obsessed No-Coders who can't conceive of needing to use any other band and any mode other than SSB/FM voice, and CB'ers looking for a higher power (usually 25 - 100w.) easily-modified rig that they can use to "bootleg" on 11m. I am a Real Ham who regularly uses CW and digital modes and little or no voice; therefore a single-band rig has limitations which would not appeal to me.

Since the rules for publication have been relaxed it appears to be any time
three VEs gather at the rear of Paddy's Bar and Grill for an exam session.

Appears of late that it also means the session before the exam where the VEs
give out the answers to the upcoming tests.

>obviously going to look down on him. He's going to ask you, "What
>did I do to deserve your low perception of me? I had absolutely
>no choice except to meet the requirements existing in 2020."

Cecil:

I would say to him, "Young man, amateur radio is what amateur radio
operators make of it -- and amateur radio operators are what they make
of themselves! The current licensing requirements will not have any
negative effect on my perception of you as a ham, as long as you
prove yourself to be a Real Ham through your curiosity, willingness to
experiment and learn, and your on-the-air operational technique.
You must, however, accept the fact that your fellow hams licensed
prior to April 15, 2000 did so under a more challenging and comprehensive
set of licensing requirements -- and therefore are deserving of higher
status as hams than you are. If you cannot understand and accept
this, then I hope you're not wasting your time getting a college
education, attending a specialized trade school, or doing anything else
to improve your standing in life."

Any questions?

Steve, what does it take for you to see you are screwing up the
attributions? I have told you about it something like 15 times
and have given at least three examples. You choose to ignore
any attempt to educate you in the netnews attribution standards.

Ed Hare had the same problem with the pseudo newsreader that
you are using. Ed, being a nice ethical guy, simply started
following the netnews standard. Why don't you just follow
Ed's lead?

It's easy to figure out who said what when there are only two posters.
But when there are half a dozen posters, your mixing up of the
attributions will certainly lead to confusion. Why can't you just
be a nice person and follow the netnews attribution standards?

I had to change the above attributes to make them correct. You
posted them wrong. I certainly don't appreciate you messing
with the postings that should be attributed to me. If you did
that in a newspaper, it would be grounds for a lawsuit.

Sorry, Dwight. And, certainly sorry to hear of your wife's problems with finding a job. However, that it had anything to do with the fact that she's "southern" is highly questionable. It is inherently more difficult to find a job in the north than it is in the south, that's just a plain fact.

Dwight, I *am* a northerner, living in the south. And, your experience is just not mine. Well, save that I believe it's the same in both regions--there's just as much anti-northerner crap that used to go on here when I first moved down, as there is anti-southerner crap up north. However, all that has subsided quite a bit over the past 15 years. And, it's no different than "territory." When I returned to my little rural in NY a few years back, I quite resented the fact that so many city-dwellers had moved in and "taken over."

As to the comments about economy, I think that is just "the way it is." I can tell you for a fact that there's a lot more ignorance in the south than there is in the north. And, that is my personal experience. And, in the north I was quite rural; in the south I am quite urban (working right smack dab in the middle of downtown Dallas, even). So, should the comparison be made between north and south, rural and urban, country and city, or any combination thereof?
